Financial Overview

Indian Auto Industry at the Cusp of a Multi-Year Upcycle

- Q1FY24 was a mixed bag from demand perspective, with signs of volume growth moderation in most segments
- In the two-wheeler segment, the slowdown in scooter sales was countered by the pickup in demand for motorcycles, primarily through the changing customer preference in the premium two-wheeler space
- PV volumes declined QoQ mainly due to high base while saw growth moderation on YoY driven by rise in demand for SUV-style vehicles and new launches
- Three-wheeler segment YoY growth is led by passenger carrier, e-rickshaw and e-cart segment
- CVs saw decline in volume mainly due to the implementation of OBD phase II norms from April 1, 2023, which had led to strong pre-buying in Q4FY23

Going ahead, demand is expected to remain moderate, mainly due to seasonality and is expected to pick up with the beginning of festive season. In 2Ws, exports are expected to recover gradually going forward and show growth in the 2nd half. However, 2W domestic demand to be supported by higher rural income. CV demand is expected to sustain with increasing economic activities
