STATE OF THE COMPANY’S AFFAIRS/ CHANGES IN THE NATURE OF BUSINESS, IF ANY

The Financial results for the year 2021-22 are not comparable with that for the year 2020-21 due to completion of slump sale transaction with Manjushree Technopack Limited (“MTL”). On April 12, 2021, the transaction of slump sale was completed, at a lumpsum amount of Rs. 8758.72 Lakhs without values being assigned to any individual assets and liabilities. During the year under consideration on Standalone basis your Company has achieved total Revenue of Rs. 10,477.17 Lakhs as against Rs. 11,528.75 Lakhs in the relevant previous financial year. There is a net profit of Rs. 2184.38 as compared to an operating loss of Rs. 1,057.62 Lakhs in the previous year.

ECONOMIC OUTLOOK, KEY CHALLENGES AND RESPONSE

The outbreak of the Covid-19 pandemic caused significant disruption during 2019-20. Impact of this disruption flowed over till the first two quarters of 2021-22. In the third quarter, the country progressed into a scenario with free movement of goods and people. The economy grew considerably during the year.

India’s revival in consumer spending is likely to be driven by households that earn more than a million rupees a year. Consumer sentiments survey data suggest that while all income groups are worse off than they were earlier, richer households are doing better than the rest on the sentiments front. These are the least affected households and most likely with the best savings.

India is going digital and the pandemic has accelerated this shift. Even before the COVID-19 pandemic, India’s e-commerce sector had begun to gain immense traction as people swayed from physical shopping and gravitated towards online shopping. The pandemic accelerated this adoption of e-commerce and India, today, is one of the fastest-growing e-commerce markets in the world with an estimated 330 million online shoppers.

Consumers are flocking online for almost all their needs - from groceries and essentials to clothing and accessories. Moreover, goods that will come in useful during long periods at home are seeing increased sales. Brands have been compelled to develop an online presence even if they had none before. This has led to a massive spurt in Direct to Consumer (D2C) brands.

The economy is now enabling people to cater to niche segments of consumers economically and there is also a rise in digital entrepreneurs. Brands are also realizing the need to approach consumers directly rather than going to marketplaces to build private labels. Moreover, payment infrastructure and integration with multiple payment options and the demand for niche products has led to the surge in the number of D2C brands.

Pearl Polymers Limited during the year 2021-22 completed the transition from B2B industrial goods manufacturer to focusing completely on its consumer business through the Pearlpet brand.

We are proud to have brought a new thought process to the Indian kitchen by making the first safe, transparent, unbreakable, odorless plastic jars & bottles. We are now expanding our range to include trendy steel, glass, biodegradable and other products. Pearlpet is synonymous with quality and consumer satisfaction as the leading manufacturer of kitchen jars, containers, bottles, and other storage solutions. Pearlpet is the one-stop-shop for those seeking safe and durable storage solutions. We also produce durable products in rust-free materials and are the pioneers of primary food packaging in India. Constantly seeking to improvise and grow, Pearlpet is heavily focused on innovating through its thorough R&D department, accelerating Pearlpet towards the international market and garnered several awards nationally and internationally. Taking pride in our products' utility to our consumers, Pearlpet has made conscious choices to develop and produce air-tight, highly durable, and 100% recyclable products.

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

INDUSTRY STRUCTURE AND DEVELOPMENT

India is currently the world's sixth largest economy and one of the fastest-growing large countries, with an annual gross domestic product (GDP) growth rate of mid to high single digit percentage, a momentum that is expected to sustain over the next five to ten years. In purchasing power parity terms, India ranks third behind the United States and China.

Domestic consumption, which powers 60% of the GDP today, is expected to grow into a \$6 trillion opportunity by 2030. This consumption growth will be supported by a 1.4 billion strong population that is younger than that of any other major economy. Household savings have historically been high as thrifty and cautious Indian families put away more than a fifth of their incomes for a rainy day. This buffer provides support to domestic consumption expenditure even through challenging cycles in economic activity.

The vision for the future of consumption in India is anchored in the growth of the upper-middle income and high-income segments, which will grow from being one in four households today, to one in two households by 2030. The country, one of the last big consumer markets still up for grabs.

Over the next decade, one of the biggest changes in India will be the coming of age of liberalization's true children - the nearly 700 million people born through the late 1980s to the 2000s. With a median age of 28 years, India is a nation of young working-age persons who drive both income and consumption. It will continue to remain young up to 2030 with a median age of 31 years. These individuals will have grown up in a more open and confident India and will not carry the cultural or economic baggage of their predecessors. This is a generation on the move that aspires to a materially better life, backed by the ability to spend and make it a reality.

One of the most challenging and exciting implications for companies in India is the opportunity to shape consumption patterns - in terms of categories consumed, brands purchased or ways of accessing products and information. India's unique combination of preferences, aspirations and prudence will require innovation specifically for this market. A massive increase in internet penetration will lead to more than a billion internet users in India by 2030.

Those who are more connected have a keener sense of what is "desirable" and are willing to invest in more comfortable living - including a greater spend on household durables and services.

The Pandemic has accelerated the shift towards digital India. Even before the pandemic, India's e-commerce sector had begun to gain immense traction as people swayed from physical shopping and gravitated towards online shopping. The pandemic accelerated this adoption of e-commerce and India, today, is one of the fastest-growing e-commerce markets in the world.

Pearl Polymers Limited during the year 2021-22 completed the transition from B2B industrial goods manufacturer to focusing completely on its consumer business through the Pearlpet brand.

The success of our R&D Department has been realized through several packaging awards, like the World Star, Asia Star, India Star and Plast Icons Awards that have been awarded to Pearl Polymers Limited, both nationally and internationally.

Pearlpet has been the brand of choice for Kitchenware products used by end customers in the market.

Consumers' demand is increasing for more sustainable kitchenware products and will continue to shape the industry and the answer is responsible products that offer differentiated functionality while minimizing waste in the environment. Pearlpet products have been and will continue to be sustainable by using fully recyclable material.

RECENT DEVELOPMENT

The global kitchenware market size was valued at USD 56.8 billion in 2018 and is expected to expand at a CAGR of 4.5% over the forecast period (2019-25). Economic growth in emerging countries and rapid urbanization are the primary factors driving the market. Moreover, rising disposable income, changing lifestyles, and an increasing number of households are surging the demand for the product over the last few years and are expected to propel the market growth in the forecast period (2019-2025).

Furthermore, the growing trend of smart kitchens is influencing the market growth as it leads to a change in the purchase pattern of the consumer group. An increase in the residential side of the market is also fueling market growth. For instance, as per census 2011, in India, the household count has increased from 52.06 million to 78.48 million. In other countries, a growing population due to increasing immigrants from different countries has surged the number of household consumption, thus propelling the market demand for the product.

The Industry in India is moderately fragmented in nature, owing to the several players competing to improve their market share. With the rising demand for Kitchenware products and household items, along with technological advancement across the Indian economy, many companies are increasing their market presence by expanding their business footprint across various end-user markets.

Consumers want their kitchenware products to be hygienic, safe and at the same time to look attractive. This development has led to healthy competition between the local manufacturers to deliver innovative products, and as a result, the entire ecosystem is gearing up for the change.

The industry is driven by key factors like rising population, increase in income levels and changing lifestyles. Demand from rural sector for products is being fueled by increasing media penetration through the means of internet and television.

With advancement in technology and general awareness, the houseware sector in India is well poised as most of the raw materials for making these products are abundantly available in the country. Moreover, the per capita spending has increased tremendously, leading to changing rural markets and a growing middle class who demand the best of products. Various upgraded technologies are being used in industry.

OPPORTUNITIES AND THREATS

India is forecasted to become the 5th largest consumer market in the world by 2025. Currently, the country is experiencing a 12 % year on year growth in consumer expenditure as against a global increase of 5%. 100 plus million middle-class Indian households will show high growth in their consumption pattern owing to increase in their incomes and moving them upwards into affluent and elite segments.

The retail industry in India has emerged as one of the most dynamic and fast-paced. With the constant entry of several new players across a variety of product categories and retail formats, India's retail market is expected to increase significantly. Organized retail in India has been growing exponentially every year.

Houseware is a fast growing category in the Indian domestic retail market. From the traditional to the modern society, across the globe, houseware has always existed as a major product category in the marketplace. India has also witnessed a major shift in buyer or consumer base for houseware products and it is no more restricted to women.

Production of standard quality tableware, kitchenware, and general houseware, and products in India is still very limited and hence, the market is also fed through imports. There are hundreds of importers and distributors, who either import and sell under their own brands or represent international brands in India.

With evolving lifestyle of Indians, India has witnessed a major shift in the houseware industry. Due to the high degree of urbanization, the proliferation of nuclear families and technological advancement, there have been far-reaching changes in the nature of houseware products. In India, globalization has also brought about significant changes in cooking, serving and dining habits.

The complexity of the products also makes it necessary that husband-wife both engage in the purchase of these products - be it kitchenware, cookware, tableware, kitchen appliances, storage, cleaning or maintenance products, outdoor houseware, or travel goods, one can see the drastic change in the market scenario. Most of the modern day houseware products are now made by combining materials like steel, plastics, ceramics, glass and so on. Hence the market classification is now less material-driven and more utility or functionality-driven.

Aspirational demand across segments will also drive the consumption and consumer spending upwards. Increasing number of nuclear families and their keenness to invest in their own homes is leading to a consistent growth in housing sector, which is bound to push demand for houseware products. It will also push upwards the market for consumer durables. With rising affluence, consumers are bound to move beyond functionality in their purchases and will increasingly spend on lifestyle factors like design, trends, fashion and aesthetics. All these factors create a potential market for entrepreneurs to tap into and explore huge opportunities in India in manufacturing, retail, distribution and imports. Retail will obviously be the biggest of them all.

Traditionally, houseware products were more utility-driven with a high focus on functionality, labour saving and simplifying domestic chores. Today, such products are already well accepted by consumers across all market segments. But the Indian houseware industry missed the retail boom enjoyed by categories like apparel and food in India over the last 28 years, as the majority of its products lacked good design and glamour of branding. Retailers always identify retail space allocation with big brands and well-designed products. As the houseware sector emerges in its contemporary avatar with focus on good design, high technology, branding and glamorous presentation, retailers are discovering a great opportunity in this segment as both unit prices and margins go up. With the increased allocation of retail space as well as the entry of ecommerce players, houseware business is poised for substantial growth.

The advancements in terms of product innovations and technologies in the market are also expected to create strong investment opportunities for global players. Regulatory and structural guidelines are expected to be the strongest restraints for the industry. High input costs and environmental concerns are the major challenges,

whereas fluctuating demand patterns and advancements of alternative technologies are expected to be the burning issues.

However, despite having a good growth potential, the industry faces many threats and challenges. Some of the challenges are:

Organizational Challenges

That said, in an ordinary market situation, the challenges differ. While the fragmented nature of the industry adds up to a large segment of the problems, that's just one part of the puzzle. One commonality that can be mapped across businesses and industries though is the chaos that these challenges lead to. Chaos in terms of failed packaging design, packaging stock-out, erroneous artwork, product recalls - it's a long list. At a broader level, resulting in a loss of business and revenue. And that's where the bigger problem lies.

Organizations are intrinsically wired to think about aspects like the product, its quality, its usability, and its benefits. This often takes away the spotlight from packaging. In some cases, we've seen businesses lacking awareness on how their packaging is impacting their business topline and bottom line. And in most cases, this can be tied back to their inadequate understanding of the packaging supply chain.

Environmental Consciousness

With environmental awareness rising globally, there is a strong momentum towards sustainable solutions. Stakeholders across the value chain are voicing their concerns regarding the use of plastic products and organizations are realigning themselves in this direction.

However, there are teething challenges the market is facing in providing these sustainable solutions. The investment required for the research of these solutions is high. This has limited the number of available eco-friendly options. Also, these solutions come at an added cost which neither the industry nor the consumer is prepared to absorb. This is making manufacturers wary of investing in the production that might not fetch the markup price. Importing again is cost-intensive.

Stringent Regulations

Stringent regulations imposed for plastic products may act as a restraint but to a lower extent. Compliance with regulations is necessary as the smallest defect in product may lead to rejection of the product. It will also negatively impact the manufacturer's profit.

Some of the players present in the industry follow unethical practices to increase the revenue by selling poor quality products which may look similar but are hazardous to the environment.

Most of these challenges can be solved with technology, to form a tightly knit and integrated system. However, with technology, an all-embracing approach would be necessary. Every stage of the procurement process will need automation. Business leaders can empower their teams with visibility of their supply chain in real-time. This would help them absorb demand fluctuations faster.

India, remains one of the most complex countries to manage and build businesses in. The market requires an in-depth consumer understanding and is not only price and value sensitive but also unorganized. Nonetheless, Indian houseware market's potential and growth aspect are appealing to major international players.

Entrepreneurs have to understand that while the market is sizeable they will have to keep a few factors in mind to conduct business successfully. One needs to understand the substantial size of the market for the particular product category in different retail channels and the strength and weaknesses of each major player present in the market. As consumers get more used to branded and better products and buying through organized retail channels, opportunities for entrepreneurs in houseware segment will become larger and larger in the years ahead.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

As we were transitioning out of the lockdown period, the year presented unique challenges and tested our outlook towards employees and stakeholders. We are grateful to the Pearl family - the employees and everyone in the extended value chain at, who made this happen. Pearl believes that the employees are at the core of its strategies to achieve all present and future organizational goals. Employee wellbeing is a key priority for the organisation. Through the year, we introduced an employee assessment and rating system, leading to variable pays. Over the few quarters, function by function we have rolled this out and the employee feedback is positive.

Industrial Relations with staff and workmen at Head Office and across all the plants, continued to be cordial. Your Company has successfully aligned human capital with business and organizational objectives. The emphasis has been on team work, skill development and development of leadership and functional capabilities of the employees.

As on 31st March, 2022, there were 71 employees including the Executive Directors recorded on the roll of Company.

OPERATIONS AND FINANCIAL REVIEW

The operations and financial review is covered in the Board's Report and is to be read as a part of this report itself.

Note: The Financial results for the year 2021-22 are not comparable with that for the year 2020-21 due to completion of slump sale transaction with Manjushree Technopack Limited. On April 12, 2021, the transaction of slump sale was completed, at a lumpsum amount of Rs. 8758.72 Lakhs without values being assigned to any individual assets and liabilities.

SEGMENT-WISE PERFORMANCE

During the Year under review, your Company was operating only in one segment.

RISK MANAGEMENT

The Company is also exposed to several potential risks both from internal and external sources. By addressing the risk in its nascent stages allows for long-term corporate success. Risks such as industry segment risks, technological changes, political risks, product distribution and supply can be anticipated and curbed.

Your Company believes that the products should not be hazardous to the environment. Our products are made of virgin plastics which are universally approved by USFDA, EU Directive 2002/72/ EC, BIS IS: 12252 -1987 and other regulating bodies for Food, Beverage and Water storage.

Some of the features that give an advantage to the Company over other local players in the market which may help the Company in reducing the loss of sales are:-

- Non-toxic, Food-grade and Re-usable.
- Unbreakable, Strong and Light-weight.
- Manufacturing process integrates the finest quality certified raw materials, with state-of-the-art equipment and stringent quality control procedures, at every station on the line.

- Pearlpet products & raw material do not use Bisphenol A (BPA) or other harmful plasticizers/chemicals.
- All of our products have good barrier properties that protect and preserve the food content.
- Good strength, premium quality, Air tight.
- 100% recyclable and environment friendly.

DISCLOSURE OF ACCOUNTING TREATMENT

The financial statements have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by the companies (Indian Accounting Standards) (Amendment) Rules, 2016 and notified under Section 133 of the Companies Act, 2013 (“the Act”) and other relevant provisions of the Act and other accounting principles generally accepted in India.

BUSINESS OUTLOOK

With significant part of the Indian population having been vaccinated and decreasing intensity of covid waves, the near term growth outlook for consumer products looks positive. The medium and long-term prospects of the business are also positive given the low penetration of these products in the country which provide a long runway for growth. The Consumer Products business is expected to grow by 15% to 20% in the medium term in a normal business environment with potentially higher growth rates in the near term. Verified Market Research points out that the non-biodegradable properties of plastic products have been reported to have a serious impact on the environment, which has slowed growth. Fluctuating raw material prices are also hindering growth.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY OF INTERNAL FINANCIAL CONTROLS WITH REFERENCE TO THE FINANCIAL STATEMENTS

Pearl has in place an adequate system of internal control procedures for business processes, operations, financial reporting, fraud control and compliance with applicable laws and regulations, among others. They commensurate with the size of the company and the nature of the business and is in line with requirements of the regulations.

During the year under review, no material weakness in the policy or procedures was observed. Your Company has put in place an independent internal audit system conducted by a professional to ensure adequacy of internal financial control system, adherence to Company policies and compliance.

I have also examined compliance with the Secretarial Standards issued by The Institute of Company Secretaries of India on Meetings of the Board of Directors and General Meeting.

During the period under review the Company has generally complied with the provisions of the Act, Rules, Regulations, Guidelines, Standards, etc. as mentioned herein.

I further report that

1. The Board of Directors of the Company is duly constituted with proper balance of Executive Directors, Non-Executive Directors and Independent Directors. The changes in the composition, if any, of the Board of Directors that took place during the period under review were carried out in compliance with the provisions of the Act.

2. Adequate notice is given to all directors to schedule the Board Meetings, agenda and detailed notes on agenda were sent in compliance to applicable provisions of the Companies Act, 2013 and Secretarial Standards, and a system exists for seeking and obtaining further information and clarifications on the agenda items before the meeting and for meaningful participation at the meeting.
3. The minutes of the Board Meetings and Committee Meetings have not identified any dissent by members of the Board/Committee of the Board, respectively hence I have no reason to believe that the decisions by the Board were not approved by all the directors present.
4. The Company has proper Board processes.

I further report that based on information provided and also on the review of compliance certificates/reports taken on record by the Board of Directors of the Company, in my opinion, there are adequate systems and processes in the Company commensurate with the size and operations of the Company to monitor and ensure compliance with applicable laws, rules, regulations and guidelines.

I further report that during the financial year under review, the company had the following specific events having any major bearing on the Company's affairs in pursuance of the law, regulations, guidelines, standards, etc. referred to above.

1. INDEPENDENT AUDITOR'S REPORT

To
THE MEMBERS OF
M/s PEARL POLYMERS LTD.
A-97/2, Industrial Area, Phase-II,
Okhla, New Delhi-110020

Opinion

We have audited the accompanying financial statements of **M/S PEARL POLYMERS LTD.** ("the Company"), which comprise the Balance Sheet as at March 31, 2022, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements gives the information required by the Companies Act, 2013 ("the Act") in the manner so required and gives a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, the profit and total comprehensive profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Contingent liabilities and provisions (refer note 38 to the financial statements)

Key Audit Matter	How the matter was addressed in our audit
The Company operates in various states within India, exposing it to a variety of different Central and State	Our audit procedures on contingent liabilities and provisions included the following:

<p>laws, regulations and interpretations thereof. In this complex regulatory environment, there is a risk of litigations and claims.</p> <p>Consequently, provisions and contingent liability disclosures may arise from direct and indirect tax proceedings, legal proceedings, including regulatory and other government/department proceedings, as well as investigations by authorities and commercial claims.</p> <p>At 31 March 2022, the Company's contingent liabilities are disclosed in note 38 to the financial statements.</p> <p>Management applies significant judgement in estimating the likelihood of the future outcome in each case when considering whether, and how much to provide or in determining the required disclosure for the potential exposure of each matter. This is due to the highly complex nature and magnitude of the legal matters involved along with the fact that resolution of tax and legal proceedings may span over multiple years, and may involve protracted negotiation or litigation. Management recognises a provision when it has a present obligation as a result of past events and it is probable that an outflow of resources embodying economic benefits will be required to settle obligation. A contingent liability is recognised if there is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.</p> <p>These estimates could change substantially over time as new facts emerge and as each legal case progresses.</p> <p>Given the inherent complexity and magnitude of potential exposures and the judgment necessary to estimate the amount of provision required or to determine required disclosures, this is a key audit matter.</p>	<ul style="list-style-type: none"> • Obtained the outstanding litigations list as compared to the previous year. Enquired and obtained explanations for movement in litigations during the year. • Inquired with management regarding the status of significant litigations and claims including obtaining legal teams views on the likely outcome of each litigation and claim and the magnitude of potential exposure. • Examined the Company's legal expenses and read the minutes of Board meetings, to evaluate the completeness of list of the open litigations. • Read the latest correspondences between the Company and tax/legal authorities and reviewed legal opinions obtained by management where applicable, for significant matters and considered the same in evaluating the appropriateness of the Company's provisions or disclosures on such matters. • With respect to tax matters, we involved tax specialists to evaluate the significant cases and the technical grounds for Management's conclusions on provisions or disclosure of contingent liabilities. • For non-tax matters, we evaluated Management's decisions and rationale for provisions established or disclosures made for contingent liabilities.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Management and Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon. The Company's annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. When we read the Company's annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take necessary actions, as applicable under the relevant laws and regulations.

Management's Responsibility for the Financial Statements

The Company's Management and Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial

position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind-AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the Annexure a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, based on our audit we report that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, Statement of Changes in Equity and the Statement of Cash Flow dealt with by this Report are in agreement with the relevant books of account.
 - d) In our opinion, the aforesaid financial statements comply with the Ind-AS specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
 - e) On the basis of the written representations received from the directors as on March 31, 2022 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2022 from being appointed as a director in terms of Section 164 (2) of the Act.
 - f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
- (B) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - i) The Company has disclosed the impact of pending litigations on its financial position in its financial statements (Refer Note No.38 to the financial statements).

Annexure - A to the Auditors’ Report

(Referred to in paragraph 2(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report to the Members of Pearl Polymers Limited of even date)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

We have audited the internal financial controls over financial reporting of **M/s Pearl Polymers Limited (“the Company”)** as of 31st March 2022 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we

comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- 1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- 2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- 3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31st MARCH, 2022

1. COMPANY OVERVIEW

Pearl Polymers Limited is a listed company incorporated and domiciled in India and has its principal place of business at A-97/2, Okhla Industrial Area, Phase-II, New Delhi-110020. The Company is listed on Bombay Stock Exchange (BSE) and National Stock Exchange (NSE). The principal business of the company is manufacturing and trading of PET Jars and Bottles. The financial statements are approved for issue by the company's board of directors on **May 26, 2022**.

2. SIGNIFICANT ACCOUNTING POLICIES

I. Basis of preparation and presentation of financial statements

A. Basis of preparation of financial statements

These financial statements have been prepared and presented on a going concern basis under the historical cost convention (except those revalued), on the accrual basis of accounting and comply with the Indian Accounting Standards prescribed by Section 133 of the Companies Act, 2013 ('the Act') read with Rule 7 of the Companies (Accounts) Rules, 2014, other pronouncements of the Institute of Chartered Accountants of India, guidelines issued by Securities and exchange board of India (SEBI) and the relevant provisions of the Companies Act, 2013/Companies Act, 1956, as adopted consistently by the Company.

B. Statement of compliance with Ind-As

The financial statements have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 ("the Act") and other relevant provisions of the Act and other accounting principles generally accepted in India.

C. Basis of Measurement

The financial statements have been prepared on a historical cost convention and on an accrual basis except for the defined benefit and other long-term employee benefits obligations and Investments measured at fair value through profit and loss (FVTPL)/ fair value through other comprehensive income (FVTOCI) that have been measured at fair value as required by relevant Ind-AS.

D. Use of Estimates and Judgments.

The preparation of financial statements in conformity with Ind-AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on a periodic basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the standalone financial statements is included in the following notes:

- i. **Income Taxes:** The Company's tax jurisdiction is India. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.
- ii. **Provisions and Contingencies:** The assessments undertaken in recognizing the provisions and contingencies have been made in accordance with Ind-AS 37, 'Provisions, Contingent Liabilities and Assets'. The evaluation of the likelihood of the contingent events has required best judgment by management regarding the probability of exposure to potential loss. Should circumstances change following unforeseeable developments, this likelihood could alter.
- iii. **Post-Employment benefit plan:** Employee benefits obligations are measured on the basis of actuarial assumptions which include mortality and withdrawal rates as well as assumptions concerning future developments in discount rates, the rate of salary increase and the inflation rate. The company considers that the assumptions used to measure its obligations are appropriate and documented. However, any changes in these assumptions may have a material impact on the resulting calculations.
- iv. **Other estimates:** The preparation of standalone financial statements involves estimates and assumptions that affect the reported amount of assets, liabilities, disclosure of contingent liabilities at the date of standalone financial statements and the reported amount of revenues and expenses for the reporting period. Specifically, the Company estimates the probability of collection of accounts receivable by analyzing historical payment patterns etc.

E. Functional and Presentation Currency

Items included in the standalone financial statements of the company are measured using Indian Rupee (Rs.) which is the functional currency of the company and the currency of the primary economic environment in which the entity operates. The presentation currency of the company is also Indian Rupee (Rs.) (Rounded off to Rs. lakhs up to two decimals)

I. Summary of significant accounting policies

A. Financial Instruments

i. Financial Assets

Financial assets comprise investments in equity and debt instruments, mutual funds, security deposits, inter-corporate deposits, trade receivables, Cash and cash equivalents and other eligible assets.

Initial recognition and measurement

All financial assets are recognized initially at fair value. Transaction costs that are attributable to the acquisition of the financial asset (other than financial assets recorded at fair value through profit or loss) are included in the fair value of the financial assets. Purchase or sale of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent Measurement

Financial Assets measured at amortized cost: Financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payment of principal and interest (SPPI) on principal amount outstanding are measured at amortized cost using effective interest rate (EIR) method. They are presented as current assets, except for those maturing later than 12 months after the reporting date which are presented as non-current assets. These financial assets are subsequently carried at amortized cost using the effective interest method, less any impairment loss. The EIR amortization is recognized as finance income in the Statement of Profit and Loss. Assets at amortized cost are represented by inter corporate deposits, trade receivables, security deposits, cash and cash equivalents and other eligible current and noncurrent financial assets.

- **Financial assets at fair value through other comprehensive income (FVTOCI):** Financial assets held within a business model whose objective is achieved by both collecting the contractual cash flows and selling the financial assets and the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payment towards principal and interest (SPPI) on principal outstanding are subsequently measured at FVTOCI. Fair value movements in financial assets at FVTOCI are recognized in other comprehensive income. However, the Company recognizes interest income, impairment losses & reversals and foreign exchange gain loss in statement of profit and loss. On de-recognition of the asset, cumulative gain or loss previously recognized in OCI is reclassified from equity to profit and loss. Interest earned is recognized under the expected interest rate (EIR) model.
- **Equity instruments other than investment in associates:** The management determines at the initial recognition of investments in Equity instruments whether to measure it at FVTPL or FVTOCI. However, the equity instruments held for trading are always classified at fair value through Profit or Loss (FVTPL). The classification of investments at FVTOCI is irrevocable. Fair value changes on equity instruments at FVTOCI, excluding dividends, are recognized in other comprehensive income (OCI).
- **Financial assets at fair value through Profit or Loss (FVTPL):** Financial assets are measured at FVTPL if it does not meet the criteria for classification as measured at amortized cost or at fair value through other comprehensive income. Fair value changes are recognized in Statement of Profit and Loss.

De-recognition of financial assets

Financial assets are derecognized when the contractual rights to the cash flows from the financial assets expire or the financial asset is transferred and the transfer qualified for de-recognition. On de-recognition of financial asset in its entirety the difference between the carrying amount (measured at the date of de-recognition) and the consideration received (including any new asset obtained less any new liability assumed) shall be recognized in Statement of Profit and Loss.

Impairment of financial assets

Trade receivables, contract assets, receivables under Ind-AS 109, investments in debt instruments that are carried at amortized cost, investments in debt instruments that are carried at FVTOCI are tested for impairment based on the expected credit losses (ECL) for the respective financial asset. ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/expense in the Statement of Profit and Loss. The approach followed by the company for recognizing the impairment loss is given below:

- **Trade receivables**

An impairment analysis is performed at each reporting date. The expected credit losses over lifetime of the asset are estimated by adopting the simplified approach using a provision matrix which is based on historical loss rates reflecting current condition and forecasts of future economic conditions. The company estimates the following provision matrix at the reporting date:

Period past due	Default rate
0 to 1 year	0%
2 to 2 year	0%
More than 2 years	10%
More than 3 years	100%
Doubtful receivables	100%

- **Other financial assets**

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If in subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL.

- ii. **Financial liabilities**

Financial liabilities comprise trade payables and other eligible liabilities.

Initial recognition and measurement

Financial liabilities are initially recognized at fair value. Any transaction costs that are attributable to the acquisition of the financial liabilities (except financial liabilities at fair value through profit or loss) are deducted from the fair value of financial liabilities.

Subsequent measurement

- **Financial liabilities at amortized cost:** The Company has classified the following under amortized cost:
 - a) Trade payables
 - b) Other eligible financial liabilities

Amortized cost for financial liabilities represents amount at which financial liability is measured at initial recognition minus the cumulative amortization using the effective interest rate (EIR) method of any difference between that initial amount and the maturity amount.

- **Financial liabilities at fair value through profit or loss (FVTPL):** Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. Financial liabilities designated upon initial recognition at fair value through profits or losses are designated as such at the initial date of recognition, and only if the criteria in Ind-AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses attributable to changes in own credit risks are recognized in OCI. These gains/ losses are not subsequently transferred to P&L. However, the company may transfer the cumulative gain or loss within equity. All other changes in fair value of such liability are recognized in the statement of profit or loss. The company has not designated any financial liability as at fair value through profit and loss.

De-recognition of financial liabilities

A financial liability shall be de-recognized when, and only when, it is extinguished i.e. when the obligation specified in the contract is discharged or cancelled or expires.

- iii. **Off-setting of financial assets and financial liabilities:**

Financial assets and liabilities are offset and the net amount is presented in the balance sheet when, and only when, the Company has a legal enforceable right to offset the recognized amounts and intends either to settle on a net basis or to realize the assets and settle the liability simultaneously.

- iv. **Reclassification of financial assets**

The Company determines the classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are categorized as equity instruments at FVTOCI and financial assets or financial liabilities that are specifically designated at FVTPL. For financial assets, which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The management determines change in the business model as a result of external or internal changes which are significant to the Company's operations. A change in the business model occurs when the Company either begins or ceases to perform an activity that is significant to its operations. If the company reclassifies financial assets, it applies the reclassification

B. Inventories

Raw materials and stores, work in progress, traded and finished goods are stated at the lower of cost and net realizable value. Cost of raw materials and traded goods comprises cost of purchases. Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost of inventories also includes all other costs incurred in bringing the inventories to their present location and condition. Costs are assigned to individual items of inventory on the basis of first-in first-out basis. Costs of purchased inventory are determined after deducting rebates and discounts.

C. Property, Plant and Equipment

Property, Plant and Equipment is carried at cost less accumulated depreciation and accumulated impairment losses. The cost comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price. Cost of self-constructed asset include the cost of material, direct labour and any other costs directly attributable to bringing the asset to its working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalized as part of the equipment.

Gains and losses on disposal of an item of Property, Plant and Equipment are determined by comparing the proceeds from disposal with the carrying amount of Property, Plant and Equipment and are recognized net within "Other income/ Other expenses" in the Statement of Profit and Loss.

The cost of property, plant and equipment not ready for intended use before such date are disclosed under capital work-in-progress.

Subsequent costs

The cost of replacing part of an item of Property, Plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is de-recognized. The costs of the day-to-day servicing of property, plant and equipment are recognized in the Statement of Profit and Loss.

Depreciation

Depreciation on property, plant & equipment is provided on pro-rata to the period of use, on the Straight Line Method rates worked out based on the useful life and in the manner prescribed in the Schedule II to the Companies Act, 2013.

The estimated useful lives of assets for the current and comparative period of significant items of property, plant and equipment are as follows:

Category	Useful life (Years)
Buildings	60
Furniture & Fixture	10
Plant & Machinery	15
Electrical Installation	10
Office Equipments	5
Computer	3
Vehicles	8

The company follows component approach as envisaged in Schedule II to the Companies Act, 2013. The approach involves identification of components of the asset whose cost is significant to the total cost of the asset and has useful life different from the useful life of the remaining assets and in respect of such identified components, useful life is determined separately from the useful life of the main asset.

Assets acquired under finance lease and leasehold improvements are amortized over the lower of estimated useful life and lease term.

Depreciation on additions is provided on a pro-rata basis from the month of acquisition/installation. Depreciation on sale/deduction from property, plant & equipment is provided for up to the date of sale/adjustment, as the case may be.

Modification or extension to an existing asset, which is of capital nature and which becomes an integral part thereof is depreciated prospectively over the remaining useful life of that asset.

The depreciation method, useful lives and residual value are reviewed at each of the reporting date.

D. Intangible assets

Intangible asset are carried at cost of acquisition less amortization. The cost of an item of intangible assets comprises its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use; any trade discounts and rebates are deducted in arriving at the purchase price.

Amortization of Intangible assets

Intangible assets are amortized on straight line method on pro-rata basis over a period of three years.

E. Investment property

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and accumulated impairment loss, if any.

The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met.

When significant parts of the investment property are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in profit or loss as incurred.

The Company depreciates building component of investment property over 60 years from the date of original purchase as per the requirement of Schedule II of the Companies Act, 2013. The leasehold investment properties are amortized over the term of the lease.

Though the Company measures investment property using cost-based measurement, the fair value of investment property is disclosed in the notes.

Fair values are determined based on an annual evaluation performed by an accredited external independent valuer.

Investment properties are de-recognized either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss in the period of de-recognition.

F. Investments in subsidiaries and associates

Investment in subsidiaries and associates is recognized at cost less impairment. Dividend income from subsidiaries and associates is recognized when its right to receive the dividend is established.

G. Foreign currency transactions and balances

Transactions in foreign currencies are initially recognized in the standalone financial statements using exchange rates prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the relevant functional currency at the exchange rates prevailing at the reporting date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate prevailing on the date that the fair value was determined. Non-monetary assets and liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction. Foreign currency differences arising on translation are recognized in the Statement of Profit and Loss for determination of net profit or loss during the period.

H. Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset are capitalized as part of the cost of that asset. Other borrowing costs are recognized as expenses in the period in which they are incurred. To the extent the Company borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the Company determines the amount of borrowings costs eligible for capitalization by applying a capitalization rate to the expenditure incurred on such asset. The capitalization rate is determined based on the weighted average of borrowing costs applicable to the borrowings of the Company which are outstanding during the period, other than borrowings made specifically towards purchase of the qualifying asset. The amount of borrowing costs that the Company capitalizes during a period does not exceed the amount of borrowing costs incurred during that period.

I. Leases**Operating leases**

Leases where the lessor effectively retains substantially all the risks and benefits of ownership of the leased asset are classified as operating leases.

Operating lease charges are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

J. Deposits provided to lessor

The company is generally required to pay refundable security deposits in order to obtain property leases from various lessors. Such security deposits are financial assets and are recorded at fair value on initial recognition. The difference between the initial fair value and the refundable amount of the deposit is recognized as a lease prepayment. The initial fair value is estimated as the present value of the refundable amount of security deposit, discounted using the market interest rates for similar instruments. "Subsequent to initial recognition, the security deposit is measured at amortized cost using the effective interest method with the carrying amount increased over the lease period up to the refundable amount. The amount of increase in the carrying amount of deposit is recognized as interest income. The lease prepayment is amortized on a straight line basis over the lease term as lease rental expense.

K. Revenue

Revenue from the sale of Flat/Plots is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates. Revenue is recognized when the significant risks and rewards of ownership have been transferred to the buyer, recovery of the consideration is probable, the associated costs and possible return of goods can be estimated reliably, there is no continuing management involvement with the goods, and the amount of revenue can be measured reliably. Interest income is recognized as it accrues in Statement of Profit and Loss using the effective interest method.

Profit on trading of mutual fund units is recognized only on redemption of units.

L. Impairment of non-financial assets

The carrying amount of the Company's non-financial assets, other than deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risk specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from the continuing use that are largely independent of cash inflows of other assets or group of assets (the cash generating unit).

An impairment loss is recognized if the carrying amount of an asset or its cash generating unit exceeds its estimated recoverable amount. Impairment losses are recognized in the Statement of Profit and Loss. Impairment losses are recognized in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit or group of units on a pro rata basis.

Reversal of impairment loss

Impairment losses recognized in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists.

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized directly in other comprehensive income and presented within equity.

M. Earnings per share (EPS)

Basic earnings per share are computed using the weighted average number of equity shares outstanding during the period.

Diluted earnings per share is computed by dividing the net profit after tax by the weighted average number of equity shares considered for deriving basic EPS and also weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented. The number of equity shares and potentially dilutive equity shares are adjusted for bonus shares, as appropriate.

N. Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash on hand, cash at banks, demand deposits, short-term deposits with balance maturity of three months or less as at the balance sheet date, which are subject to an insignificant risk of changes in value.

For the purpose of Statement of Cash Flows, cash and cash equivalents comprise cash on hand, cash at banks, demand deposits, short-term deposits with balance maturity of three months or less from the balance sheet date and other short term investments, that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

A. Employee Benefits**i. Short Term Benefits**

Employee benefits (other than post employment benefits) which fall due wholly within twelve months after the end of the year in which the employees render the related service are recognized at the amount expected to be paid for it.

ii. Post Employment Benefits

The Company participates in various employee benefit plans. Post-employment benefits are classified as either defined contribution plans or defined benefit plans. Under a defined contribution plan, the Company's only obligation is to pay a fixed amount with no obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits. The related actuarial risks fall on the employee. The expenditure for defined contribution plans is recognized as expense during the period when the employee provides service. Under a defined benefit plan, it is the Company's

Company's obligation to provide agreed benefits to the employees. The related actuarial and investment risks fall on the Company. The present value of the defined benefit obligations is calculated using the projected unit credit method.

The Company has the following post-employment benefit plans:

Gratuity

In accordance with the Payment of Gratuity Act, 1972, the Company provides for a lump sum payment to eligible employees, at retirement or termination of employment based on the last drawn salary and years of employment with the Company. The Company's obligation in respect of the gratuity plan, which is a defined benefit plan, is provided for based on actuarial valuation using the projected unit credit method. Actuarial gains or losses are recognized in other comprehensive income and are not reclassified to profit or loss in subsequent periods.

i. Other long term employee benefits

Leave Encashment

The employees of the Company are entitled to leave encashment. The employees can carry forward a portion of the unutilized accumulating leaves and utilize it in future periods or receive cash at retirement or termination of employment. The Company records an obligation for leave encashment in the period in which the employee renders the services that increases this entitlement. The Company measures the expected cost of leave encashment as the additional amount that the Company expects to pay as a result of the unused entitlement that has accumulated at the end of the reporting period. The Company recognizes accumulated leave encashment based on actuarial valuation. Non-accumulating leave encashment are recognized in the period in which the absences occur. The Company recognizes actuarial gains and losses immediately in the statement of profit and loss.

P. Provisions & Contingencies

A provision arising from claims, litigation, assessment, fines, penalties, etc. is recognized when the Company has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. These are reviewed at each balance sheet date and adjusted to reflect current management estimates. Contingent liabilities are disclosed in respect of possible obligations that have arisen from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise. When there is a possible obligation or present obligation where the likelihood of an outflow is remote, no disclosure or provision is made.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. A contingent asset is disclosed, where an inflow of economic benefits is probable.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset, if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Q. Income Taxes

Income tax comprises current tax and deferred tax. Income tax expense is recognized in the statement of profit and loss except to the extent it relates to items directly recognized in equity or in other comprehensive income.

Current Tax

Current tax for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities based on the taxable income for the period. The tax rates and tax laws used to compute the current tax amount are those that are enacted or substantively enacted by the reporting date and applicable for the period. The Company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis or to realize the asset and liability simultaneously.

Deferred Tax

Deferred tax is recognized using the balance sheet approach. Deferred tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in standalone financial statements, except when the deferred tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary

differences, and the carry forward of unused tax credits and unused tax losses can be utilized.

Deferred tax liabilities are recognized for all taxable temporary differences.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.
