- "Manufacturing facilities of the Company which were shut down in the last week of March 2020 due to countrywide lockdown, resumed operations in a phased manner from the first week of June 2020 after obtaining the requisite approvals."The Company has considered possible effects that may result from COVID-19 in preparation of these standalone financial results including recoverability of inventories, trade receivables and other assets. In developing the assumptions relating to future uncertainties in the economic conditions due to COVID-19, it has, at the date of approval of these standalone financial results, used relevant internal and external sources of information including economic forecasts and expects that the carrying amounts of these assets are recoverable."Manufacturing industry has been hit in many ways due to the Covid-19 effect from lower production to disturbed credit cycle. Given the fact that the major manufacturing industries have a PAT to Sales turnover ratios (profitability ratio) in the high single or the low double digits which affected negatively. To recover and come back to normal, it may take several months. Coming back to the profitability picture, the company has made recovery plan strategies for Cost reduction and higher revenue and is expected to recover its production capacity to normal in next quarters gradually.
- The figures for the quarter ended March 31, 2020 are the balancing figures between audited figures in respect of the full financial year and the published year to-date figures up to the third quarter of the respective financial years.
