Packaging today is pervasive. It is part of every product sold in many shapes and materials. This is why at AGI Greenpac -a leader in packaging – ESG has always been integral to its operations.

Our goal and vision both include sustainability as part of our Company identity.

AGI Greenpac has always held the conviction that sustainability and growth go hand in hand and that a Company's long-term performance is greatly influenced by the proactiveness with which it addresses its environmental, social, and governance components. This is why this year, we took a focused and strategic approach to revisit our ESG Strategy and look beyond compliance to help align our clients, shareholders, employees, and local community to realise their ESG aspirations and expectations with AGI Greenpac's ESG Strategy.

As a result, AGI Greenpac's ESG Vision is defined across three pillars.

1. Insulating the Environment: We are committed to conducting our operations in a manner that will reduce our carbon footprint and promote conscious efforts towards resource efficiency and waste minimisation;
2. Breaking the Glass Ceiling, Raising the Bar: We are committed to a safe and rewarding environment for our employees and community; the development of high-quality products for our customers; and
3. Reflecting Transparency: We are committed to practising transparency and accountability in all aspects of our business conduct.

We are also committed to actively supporting India's growth through sustainable development. AGI Greenpac's Pillars are aligned with United Nations Sustainable Development Goals (UN SDG):

Goal 3: Good Health and Wellbeing

Principle 2: Businesses should provide goods and services in a manner that is sustainable and safe

The Company intends to make a difference by offering its customers outstanding products and services that support environmental friendly packaging – as its name denotes. AGI manufactures Container Glass bottles, PET bottles and Security Caps and Closures to ensure that its contents remain safe and product quality is not affected for its intended end consumers across the alcoholic-beverages, pharmaceuticals, food, soft drinks, cosmetics and perfumes industries; it caters to.

Essential Indicators
1. Percentage of R&D and capital expenditure (capex) investments in specific technologies to improve the environmental and social impacts of product and processes to total R&D and capex investments made by the entity, respectively.

Particulars	FY 2023 (Current Financial Year)	FY 2022 (Previous Financial Year)	Details of improvements in environmental and social impacts
Research and Development	-	-	-
Capex	3.36%	3.26%	<ul style="list-style-type: none"> The Company is aware of its responsibility to contribute to India's transition to a low-carbon future. It has been embedding ESG principles into everyday functions and investing in the right technology to ensure minimal impact on the environment. AGI Greenpac has undertaken projects for sustainable sourcing of raw materials, circular economy, material research and human health. Capex is focused on eco-friendly initiatives like reducing the use of energy across its plants and reducing waste to landfill by increasing recycling, continually conserving resources and minimising its impact on the environment through innovation. The Company has invested in Capex to be self-reliant for material characterisations such as chemicals, stone defects, fractures and glass delamination. Across 4 sites, upto FY 2022-23, the Company installed 16.76 MW of rooftop and ground-mounted Solar Power. The Company has tied up for procurement of environmental friendly natural gas in its production process as a substitute for petroleum-based inputs. The Company conducted energy audits by CII and others, to increase energy efficiency and implemented the proposed initiatives. Energy efficient LED lights, star-rated other equipment like ACs, motors etc., had been used in the plant.

2. a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)

Through its R&D Centre and given the Company's commitment to ESG, sustainable sourcing is an ongoing effort at AGI Greenpac. The Company is in the process of developing a companywide policy on sustainable sourcing, which aims to ensure that all goods and services procured, manufactured, and delivered uphold the principles of labour practices, human rights, ethics, occupational health, safety, and environment as defined in AGI Greenpac's policies. Business partners of AGI Greenpac are encouraged to follow the Company's Code of Conduct.

The Company is committed to sourcing significant raw materials, products, and services in a balanced way between social and economic and environmental impacts is balanced. Two such examples of this in practice at AGI Greenpac are below:

1. The Company has developed mines and crushing plants near its manufacturing plants for input materials. These mines and plants provide livelihood opportunities to the local community, ensuring that the quality of the raw materials is maintained and lowering transport-related costs and carbon footprint.
2. Bulk Soda Ash has been procured from Kenya through Concur, which aids in reducing frequent vehicle movement and carbon footprint.

b. If yes, what percentage of inputs were sourced sustainably?

Through focused effort at AGI Greenpac today, 60% of the raw materials are sourced from sustainable suppliers.

3. Describe the processes in place to safely reclaim your products for reusing, recycling, and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

The most significant waste in a glass manufacturing plant is a glass cullet – a crushed or waste glass produced from breakage and rejection during manufacturing. Glass cullets are collected at our plant and from waste aggregators. It is washed and cleaned thoroughly and sent for size reduction.

The cullet is then re-used as input material in the production process across the plants. 45% of input materials at AGI Greenpac's plants are Glass Culletts.

The Company commissioned a cullet sorting machine at its Bhongir plant to improve cullet quality and availability to increase cullet usage in the furnace.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes/No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same

Yes, the Extended Producer Responsibility applies to AGI Greenpac. The Company is registering for the EPR and processes are being set per EPR guidelines.

Principle 3: Businesses should respect and promote the well-being of all employees, including those in their value chains

The Company recognises without a doubt that helping its employees achieve their full potential is fundamental to the Company's continued success. The Company is committed to providing equal, i.e., merit-based opportunities both at the time of recruitment and during employment irrespective of caste, creed, gender, race, religion, disability etc.

The Company is committed to provide a safe environment and hygienic conditions. Training during induction and periodic training on the using protective equipment and identifying and eliminating unsafe working conditions is a top priority. Prevention of accidents is at the heart of what the Company does. The Company has a policy for health and safety. The Company continuously focuses on and ensures the skill development of employees through its structured training and competency development programs. The Company also conducts various programs concerning the well-being of employees and strives to employ and empower women employees and fosters a friendly environment through its policy for the prevention of sexual harassment and related grievance redressal mechanisms.

10. Health and safety management system:**a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/No). If yes, the coverage of such system?**

Yes, Health and Safety is of utmost importance to AGI Greenpac. The Company is certified with ISO – 45001:2018 version. This standard enables organisation to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its Occupational Health and Safety performance.

Employees working at the plants are trained on environment, health and safety best practices regularly and in accordance with the Company policy and local and statutory regulations.

b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?

The Company, as part of its Environment, health and safety management process implements Hazard Identification and Risk Assessment (HIRA) across all its activities - routine and non-routine. This process is aligned to the ISO 45001 standard and helps AGI Greenpac in estimating the magnitude of potential risks and deciding whether risks identified are manageable or not.

c. Whether you have processes for workers to report the work-related hazards and to remove themselves from such risks. (Y/N)

Yes, AGI Greenpac values the benefits of promptly reporting work-related hazards. As this can help the Company identify problem areas quickly and reduce avoidable risks for employees in the future in a timely manner.

Hence, all AGI Greenpac employees from their first day at work are trained on the Company's safety protocols, procedures and policies including the incident reporting process. AGI Greenpac provides formalised channels for Employees to report any unsafe conditions or behaviour via suggestion boxes, internal safety groups, WhatsApp, Mail communication etc. Employees can also raise their concerns at formal gathering e.g., Safety Committee Meetings or Daily Operational Review Meetings. All concerns and observations brought to AGI Greenpac's attention are recorded, tracked and reviewed each month.
