Performance for FY'20:

During first quarter of operation, the Refinery complex faced unprecedented water scarcity affecting plant operation nearly for a month and half. and after taking necessary corrective action, Phase III operations of the refinery were resumed in a phased manner by September 17, 2019. During Fourth quarter of operation, the outbreak of COVID-19 pandemic globally and resultant lockdown in many countries, including India from March 25, 2020 has impacted the business of the Company. Future Outlook:

The lock down of COVID-19 is continuing for financial year 2020-21 and the Company is continuing its operation with current lower demand and margins as these products are falling under essential goods and services. Management is expecting that demand for products will improve on post removal of lock down on stabilisation of COVID-19. Management has assessed the potential impact of COVID 19 based on the current circumstances and expects no significant impact on the continuity of operations of the business on long term basis/ on useful life of the assets/ on long term financial position etc. though there may be lower revenues and refinery throughput in the near future.
