CyberTech is First Esri Partner to be Awarded ArcGIS Cloud Services Specialty Designation

MUMBAI and OAK BROOK, Illinois, June 8, 2020: – CyberTech Systems and Software Inc. today announced CyberTech’s recognition as an ArcGIS Cloud Services Specialty partner with location intelligence world leader Esri. CyberTech is the first Esri partner to achieve this designation. This designation signifies CyberTech’s valued expertise in supporting the Esri Geospatial Cloud. With this milestone, CyberTech becomes a trusted partner for providing expert assistance for migrating and managing ArcGIS solutions in the commercial and compliance cloud.

With interest amongst many Esri customers for migrating to flexible and agile cloud or hybrid environments, Esri recently introduced the ArcGIS Cloud Services Specialty to distinguish and recognize experts in ArcGIS cloud services. CyberTech became the first partner to meet the comprehensive and rigorous requirements to achieve this specialty.

The ArcGIS Cloud Services Specialty designation recognizes CyberTech’s expertise, high standards and best practices for driving the Esri Geospatial Cloud. CyberTech is ready and able to assist organizations across the globe by providing services for cloud deployments, system architecture design, managed services, and the implementation of cloud-based ArcGIS solutions.

“We are committed to supporting the deployment of ArcGIS in the cloud, which is a strategic initiative for many of our customers,” said Robert Laudati, Director of Global Partners & Alliances at Esri. “The ArcGIS Cloud Services Specialty is part of that commitment, and CyberTech’s designation was notable not only because they were the first partner to obtain it, but also how quickly they earned it given the rigorous requirements. With this specialty, they are now ready and able to assist organizations with a smooth migration to maximize their returns from the Esri Geospatial Cloud.”

Speaking on the occasion, Vince Rosales, VP at CyberTech said, “The Esri Geospatial Cloud is a game changer enabling dynamic scaling, enablement, and accessibility of location services in real time. We are delighted to receive the ArcGIS Cloud Services Specialty recognition. This distinction acknowledges the depth of expertise that we have and gives us an edge in driving ArcGIS cloud adoption. Businesses are becoming more agile as they plan to migrate their on-premise landscapes to the cloud.”

About CyberTech Systems and Software Inc.

CyberTech is a CMMI Level 3 next-generation location analytics and IT solutions provider. CyberTech has a strong and mature geospatial practice with a proven track record of comprehensive services including implementing and supporting GIS based enterprise systems and cloud solutions. CyberTech has assisted clients across multiple industries such as Utilities, Public Safety, Governance, Healthcare to unlock the power of map-centric solutions for achieving higher operational excellence and growth. An Esri Gold Partner and a Cornerstone Partner, CyberTech has operational & execution expertise in transforming enterprise GIS landscapes with Esri suite of products.
