Airtel 5G Plus now live in Ladakh

Districts of Leh and Kargil get ultrafast Airtel 5G Plus services

- *Promises to offer massive speeds, best voice experience and be kinder to the environment*
- *SIM won't need to be changed – will work on all 5G smart phones; existing Airtel 4G SIM is also 5G-enabled*
- *Customers will be able to enjoy unlimited 5G data to experience the power of the Airtel 5G Plus network*

Ladakh, April 12, 2023: Bharti Airtel (“Airtel”), one of India’s leading telecommunications services providers, today, announced the launch of its cutting edge 5G services in the Union Territory of Ladakh.

Airtel 5G Plus services will be available to customers in a phased manner as Airtel continues to construct its network and complete the roll out. Customers with 5G-enabled devices will enjoy a high-speed Airtel 5G Plus network at no extra cost until the roll out is more widespread. Airtel will augment its network making its services available to all the cities across the Union Territory in due course.

Commenting on the launch, **Adarsh Verma, COO, Bharti Airtel, Jammu, Kashmir & Ladakh**, said, *“Bringing 5G connectivity to our customers in Ladakh is in line with our commitment to bridging the digital divide and connecting not only the tourists who flock here to see the scenic landscapes but also the residents of this remarkable Union Territory. Customers can now experience ultrafast networks and enjoy speeds up to 20-30 times faster than the current 4G speeds. We are in the process of lighting up the entire Union Territory which will allow customers to enjoy superfast access to high-definition video streaming, gaming, multiple chatting, instant uploading of photos and more.”*

Customers will now be able to experience ultrafast, reliable and secure 5G Plus services without having to worry about data exhaustion as the company removes the capping on data usage across all existing plans.

Airtel 5G Plus will bolster the entire portfolio of services that Airtel offers, revolutionising education, healthcare, manufacturing, agriculture, mobility and logistics.

In the last one year, Airtel has demonstrated the power of 5G with a host of powerful use cases that will change the way customers lead their lives and do business. From India’s first live 5G network in Hyderabad to India’s first private 5G network at the BOSCH facility in Bengaluru to partnering with Mahindra & Mahindra to make its Chakan manufacturing facility, India’s first 5G enabled auto manufacturing unit, Airtel has been at the forefront of 5G innovation.
