Industry Structure and developments.

Industry Overview

India - One of the largest education markets in the world

The Indian education sector is one of the largest education markets (in terms of the potential number of students) in the world..

Key Market Segments

Pre-school Market

While science and child development experts have long proven that, first 6 years of a human being's life are the most critical, in India this is still a nascent concept, there is need to spread higher awareness of importance of early childhood education.

K-12 Market

K-12 schools form the core and largest segment of the Indian education system. India has one of the world's largest networks of schools. Still, the country needs new schools to meet the demand of quality K-12 education.

Supplemental Education

While the number of schools in India makes for impressive reading, the quality of education imparted in these schools leaves a lot to be desired. There have been multiple reports in recent times that point to the low learning levels of students in Indian schools. The challenge here however, is not to repeat what happens in school but to create a more customized and hands on learning environment.

Segment - wise or product -wise performance.

The activities of the Company comprise of only one business segment i.e. "providing education and related services including leasing of education infrastructure". The company operates in only one segment.

Recent accounting pronouncements

Appendix B to Ind AS21, Foreign currency transactions and advance consideration On March 28, 2018 Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

"The amendment will come into force from 1 April 2018. The company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 21 is expected to be insignificant."

Ind AS 115

In March 2018, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amendment rules, 2018 (amended rules). As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after 1 April 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions. The model specifies that revenue should be recognized when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard require enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with the customers. The new revenue standard is applicable to the Company from 1 April 2018.

The standard permits two possible methods of transition:

Retrospective approach - Under this approach the standard will be applied retrospectively to each prior period presented in accordance with Ind AS 8 - Accounting Policies, Changes in Accounting Estimates and Errors.

Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch - up approach)

"The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 115 is expected to be insignificant."

Note 42: Fair Value measurement

Financial Instrument by category and hierarchy

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

1. Fair value of cash and short term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to short term maturities of these instruments.
2. The fair value of security deposits were calculated based on cash flow discounted using a current lending rate.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

The company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique.

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: other techniques for which all inputs which have significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

Registered Office of the Holding Company was under lockdown (closed) for almost two and half months, however staff was permitted to work from home as per the policy adopted by the Holding Company of "Work from home " and all essential and required functions were being performed with limited access.

ANNUAL REPORT 2019-2020

As Holding Company's owned and franchise centres are closed due to lockdown and the uncertainty prevailing for re-opening of the centres, the admissions of the students have been effected badly for the academic year 2020-2021.

The pandemic has effected badly on the liquidity flow of the Holding Company.

Some of the severe impact which company estimates COVID-19 will have on it's financials in future are:

- 1) Cash flow crunch;
- 2) Significant reduction in numbers of centres;
- 3) Reduction in collection of royalty;
- 4) Reduction in number of students;
- 5) Reduction in fees structure;
- 6) Delay in serving debt to the banks;

It is worthwhile to mention that Corporate Governance and legal compliances have always been the topmost priority of the Holding Company and Holding Company ensures that all available information about the impact of these events on the Holding Company and its operations is communicated in a timely and cogent manner to its investors and stakeholders.

Recent accounting pronouncements

Appendix B to Ind AS21, Foreign currency transactions and advance consideration On March 28, 2018 Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2018 containing Appendix B to Ind AS 21, Foreign currency transactions and advance consideration which clarifies the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income, when an entity has received or paid advance consideration in a foreign currency.

"The amendment will come into force from 1 April 2018. The company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 21 is expected to be insignificant."

Ind AS 115

In March 2018, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amendment rules, 2018 (amended rules). As per the amended rules, Ind AS 115 "Revenue from contracts with customers" supersedes Ind AS 11, "Construction contracts" and Ind AS 18, "Revenue" and is applicable for all accounting periods commencing on or after 1 April 2018.

Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions. The model specifies that revenue should be recognized when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard require enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity's contracts with the customers. The new revenue standard is applicable to the Company from 1 April 2018.

The standard permits two possible methods of transition:

Retrospective approach – Under this approach the standard will be applied retrospectively to each prior period presented in accordance with Ind AS 8 – Accounting Policies, Changes in Accounting Estimates and Errors.

Retrospectively with cumulative effect of initially applying the standard recognized at the date of initial application (Cumulative catch – up approach)

"The Company is evaluating the requirement of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 115 is expected to be insignificant."

This note provides an overview of the areas that involved a higher degree of judgment or complexity, and items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed. Detailed information about each of these estimates and judgments is included in relevant notes together with information about the basis of calculation for each affected line item in the financial statements.

Note 42: Fair Value measurement

Financial Instrument by category and hierarchy

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

1. Fair value of cash and short term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to short term maturities of these instruments.
2. The fair value of security deposits were calculated based on cash flow discounted using a current lending rate.

For financial assets and liabilities that are measured at fair value, the carrying amounts are equal to the fair values.

The company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique.

Level 1: Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Level 2: Other techniques for which all inputs which have significant effect on the recorded fair value are observable, either directly or indirectly.

Level 3: Techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data.

Note 43: Financial Risk Management

Financial risk management objectives and policies

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Board.

Credit Risk:

Credit risk arises from the possibility that the counter party may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses financial reliability of customers and other counter parties, taking into account the financial condition, current economic trends.

Financial assets are written off when there is no reasonable expectations of recovery, such as a debtor failing to engage in a repayment plan with the Company.
