Forward-looking statement

In this BRS report we are presenting some forward-looking information to enable investors to comprehend our prospects and take informed investment decisions. This report and other statements- written and oral- that we periodically make contain forward-looking statements that set out anticipated results based on the management's plans and assumptions. Wherever possible, we have tried to identify such statements by using words such as 'anticipates', 'estimates', 'expects', 'projects', 'intends', 'plans', 'believes', and words of similar substance in connection with any discussion of future performance. We cannot guarantee that these forward-looking statements will be realised, although

we believe we have been prudent in our assumptions. The achievement of results is subject to risks, uncertainties and even inaccurate assumptions.

Should known or unknown risks or uncertainties materialise, or should underlying assumptions prove inaccurate, actual results could vary materially from those anticipated, estimated or projected.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise.

Powering a Sustainable Future

The foundation of MTAR was laid in 1969 to cater to prestigious Indian Civil Nuclear Power program. The company has developed several climate positive products for Clean Energy- Civil Nuclear Sector since then.

MTAR has forayed into Clean Energy- Fuel cells in 2009 by supplying power units for Solid Oxide Fuel Cells. The company has increased its wallet share in this sector by adding products such as electrolysers, sheet metal assemblies, enclosures etc.

In addition, MTAR has started catering to customers in Hydro Power and Waste to Energy sectors by supplying complex fabricated structures. The company is also in discussion with customers that are into Wind Energy, Battery Storage Systems and Hydrogen Storage Systems

MTAR strategises to expand its green product portfolio further, powering a sustainable future

Managing Director's Overview- Sustainability

In FY 2022-23, the company has derived nearly 85% of revenue from manufacturing climate positive products as against 77% in FY 2021-22. At MTAR, ESG has been an integral part of our business decision making to power a sustainable future

Dear Stakeholders,

I am delighted to inform our shareholders that we have made significant strides in integrating environmental, social, and governance (ESG) considerations into our operations. Sustainability has been an integral part of our business strategy, and we have been manufacturing climate positive products since our inception. We have always believed that infusing company with purpose can help attract a motivated skilled workforce that drives financial success.

MTAR was established to supply climate positive products for Civil Nuclear Programme to Clean Energy – Civil Nuclear Power and later forayed into Clean Energy Fuel Cells division in 2009. The company has started fabricating critical structures for Clean Energy – Hydel & Waste to Energy sectors. In FY 2022-23, the company has derived nearly 85% of revenue from manufacturing climate positive products as against 77% in FY 2021-22. To contribute further to sustainability by manufacturing products that have positive impact on environment, the company has also initiated discussions with customers that are into Wind Energy, Battery Storage Systems and Hydrogen Storage systems.

Apart from expanding our green product portfolio, the company has focused on several key areas to drive sustainability and create positive impact. One of our major initiative is installation of solar rooftops across EOU and Unit2 that contribute to the majority of our revenues to reduce our carbon footprint. We are working towards installing solar rooftops at our Adibatla unit. In addition, the company has also implemented other energy-efficient practices including replacement of conventional lighting with LED lighting. As a result, the company has started reducing its carbon foot print.

In the past, the company has developed several import substitutes such as ball screws, roller screws, water lubricated bearing, fins, fork lift bases, bellows etc. to reduce emissions by avoiding imports. In FY 2022-23, the company has developed products such as bellows etc. that were previously imported to integrate with power units for Solid Oxide fuel cells, which enables us to reduce emissions by avoiding sea shipments/ airfreight. MTAR is committed to sustainable procurement and responsible sourcing and always procured majority of imported raw materials through sea shipments to contribute to the reduction of emissions. The company has strengthened partnerships with the vendor throughout the value chain in the year under review to create awareness about ESG. MTAR has taken up training session to its vendors about the need for adhering to ethical labour practices, minimizing environmental impacts, and promoting biodiversity conservation. By promoting awareness about sustainability throughout the value chain, the company aims to create a positive ripple effect that extends beyond its own operations.

The company has always focused on fostering a cultural of excellence marked by high people retention. We have a modest attrition of 8.5% as on year ended March 31, 2023. The company firmly believes that the growth of the organisation is dependent on the growth and welfare of our employees. Accordingly, the company places a lot of emphasis on the training our employees and various welfare activities taken up for our employee wellbeing. We have taken up salary correction activity in Q4 FY 2022-23 to ensure the compensation of our employees in on par with or better than the industry average.

Furthermore, we also believe that a diverse workforce drives innovation and leads to better decision-making. Our hiring practices have always been aimed at gender and racial diversity at all levels of the company, however, historically female work force in our overall strength is lower due to the nature of the industry in spite of inclusive human resource policies. In the recent past the company has taken up special initiatives to enhance gender diversity by increasing the number of women in the organisation at all levels and is working on improving it further. The company's believes that a diverse workforce drives innovation and leads to better decision-making goal. We target to create an environment where every employee feels valued, respected, and empowered to reach their full potential; the company promotes training programs and takes up activities to promote a culture of belonging. The company believes that up-lifting of communities is essential for an inclusive and equitable growth. We have contributed to Rs. 11.7 Mn towards various initiatives related to education, skill development, healthcare, eradication of poverty and preservation of cultural heritage through CSR funds in the year under review. Furthermore, the company has adopted two schools to enhance the quality of education by improving the infrastructural facilities.

The company firmly believes that robust corporate governance is essential for the long-term success of a business and we ensure 100% compliance with all the regulatory requirements. At MTAR, our strategic direction is guided by our board, which comprises majority of independent directors. The company has always maintained transparency in providing disclosures to all the stakeholders. It also organises regular

MTAR has been rated good by Dun & Bradstreet for the companies practices on Environmental, Social & Governance aspects

trainings sessions on corporate governance and business code of conduct to all the stakeholders including the directors on the board, KMPs and employees.

The company has always taken measures to integrate sustainability into our business model with an aim to impact different aspects of it, however, we understand that the ever-changing landscape of sustainability requires us to continually adapt and find innovative solutions. MTAR understands the imperative need to address various issues such as reduction of carbon emissions, water management, waste management, work place diversity, and biodiversity. The company believes that addressing these challenges requires collaborative efforts from all the stakeholders, and hence, MTAR has been engaging with all the stakeholders including vendors, industry partners, NGOs etc. to accelerate progress by

driving collective action.

The company envisions to be 100% complaint with ESG and charted out a clear road map for sustainability over the coming years. The company shall continue to integrate sustainability into its business strategies and operations, focusing on expansion of Clean Energy verticals, implementation of circular economy principles, renewable energy adoption, and community engagement.

MTAR is in discussion with various customers in Clean Energy to increase its green product portfolio and shall be carrying out project specific investments to develop sustainable products. Furthermore, the company is exploring business models to prioritize resource efficiency, and aims to leverage technology to enhance our environmental monitoring and reporting capabilities.

I would like to express my gratitude to our

board, our employees, customers, suppliers and partners who have extended their immense support in the company's sustainability journey thus far. Our stakeholders have a key role to play in our emergence of MTAR as a Clean Energy player that constitutes 85% of revenues of the firm and their commitment and passion have been instrumental in driving positive change. Together, the company looks forward to power a sustainable future over the coming decades.

Srinivas Reddy
Managing Director

Making ESG an integral part of our business

MTAR envisions to be 100% ESG compliant for a sustainable future; Nearly 85% of the Company's revenue is derived from manufacturing climate positive products in FY 2022-23

MTAR looks forward to expand our green product portfolio to manufacture climate positive products

Our ESG Outlook

At MTAR, we believe companies have a key role to play in driving the global transition to a low-carbon economy, improving workplaces and gender representation, and improving governance. Viewing our long-term business model through a comprehensive ESG lens is essential

Progressive and proactive ESG policies enable a sustainable business growth, thereby enhancing value to all the stakeholders including investors, customers, employees, suppliers and wider communities.

A comprehensive ESG framework links to the cashflows in five important ways:

1. Facilitating top-line growth
2. Reducing costs
3. Minimising regulatory and legal interventions
4. Increasing employee productivity
5. Optimising investment and capital expenditure

SI No	Factor	How a strong ESG proposition could help
1	Top-line growth	<ul style="list-style-type: none"> • Helps to tap new markets and expand into existing ones • Enhance the customer base with sustainable products • Provides better access to resources through stronger community and government relations
2	Cost Reductions	<ul style="list-style-type: none"> • Low energy consumption helps in reducing the operational costs
3	Minimising Regulatory & Legal interventions	<ul style="list-style-type: none"> • Achieve greater strategic freedom through deregulation • Provides access to subsidies and government support
4	Increasing employee productivity	<ul style="list-style-type: none"> • Increases employee motivation • Enables to attract talent through greater social credibility
5	Optimising investment and capital expenditure	<ul style="list-style-type: none"> • Enhance investment returns through a better capital allocation towards sustainable plant and equipment helps in avoiding investments that may not pay off because of longer-term environmental issues

To achieve sustainable business growth the Company is committed to conducting its business by integrating environmental, social and governance (“ESG”) factors into its investment decisions and operational processes

Our Environment Commitment

In any business a decision that has positive impact on environment leads to better investment outcomes and increased wellbeing of our stakeholders and society at large. MTAR intends to continuously improve the environmental impact of our business by manufacturing climate positive products and by making our operational processes more sustainable

Over the years we have strategized to grow our clean energy segment significantly to enhance our green

product portfolio that contributes in a small way to global transition into low carbon economy. Nearly 85% of our revenues in FY 2022-23 are derived from clean energy segment including civil nuclear power and fuel cells. In addition, we are in discussions with several other customers in Clean Energy. The Company has a substantial potential to benefit through the growth of low-carbon products and services

To reduce our energy consumption and

improve the sustainability of our operational processes we have installed solar rooftops at Unit 2 and EOU, which is expected to reduce our energy consumption significantly. The Company is the process of installing solar rooftops at Unit 3 and Adibatla

Our facilities at Unit 2, EOU and Adibatla are certified for ISO 14001:2015, Environmental Management System.

6. Provide details of greenhouse gas emissions (Scope 1 and Scope 2 emissions) & its intensity, in the following format:

Parameter	Unit	FY-23 (Current Financial Year)	FY-22 (Previous Financial Year)
Total Scope 1 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Tonnes of CO ₂ equivalent	454	362
Total Scope 2 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Tonnes of CO ₂ equivalent	5656	4733
Total Scope 1 and Scope 2 emissions per rupee of turnover	Tonnes of CO ₂ /Crore INR	10.64	15.82
Total Scope 1 and Scope 2 emission intensity (optional)-the relevant metric may be selected by the entity	-	-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency. **(N)**

7. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details

Some of our products and their development are our major contribution towards clean technology thereby contributing to reduction in global carbon footprint and greenhouse emissions. As part of our green initiative as well as thrust towards renewable energy, we have set up solar rooftop panels across the units for captive power generation and switched over to LED lights.

8. Provide details related to waste management by the entity, in the following format:

Parameter	FY-23 (Current Financial Year)	FY-22 (Previous Financial Year)
Total Waste generated (in metric tonnes)		
Plastic waste (A)	0	0
E-waste (B)	0	0
Bio-medical waste (C)	0	0
Construction and demolition waste (D)	0	0
Battery waste (E)	0	0
Radioactive waste (F)	0	0
Other Hazardous waste. Please specify, if any. (G)	Chemical Liquid waste-638Tonnes	Chemical Liquid waste-579 Tonnes
Other Non-hazardous waste generated (H). Please specify, if any. (Break-up by composition i.e. By materials relevant to the sector)	Scrap Waste- 833 Tonnes	Scrap Waste-528 Tonnes
Total (A+B + C + D + E + F + G+H)	1472 Tonnes	1107 Tonnes

Parameter	FY-23 (Current Financial Year)	FY-22 (Previous Financial Year)
For each category of waste generated, total waste recovered through recycling, re-using or other recovery operations (in metric tonnes)		
Category of waste		
(i) Recycled	833 Tonnes	528 Tonnes
(ii) Re-used	-	-
(iii) Other recovery operations	-	-
Total	833 Tonnes	528 Tonnes
For each category of waste generated, total waste disposed by nature of disposal method (in metric tonnes)		
(i) Incineration	-	-
(ii) Landfilling	-	-
(iii) Other disposal operations	-	-
Total	-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency. **(N)**

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency. **(N)**

3. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):

 For each facility / plant located in areas of water stress, provide the following information : **NA**

(i) Name of the area

(ii) Nature of operations

(iii) Water withdrawal, consumption and discharge in the following format:

Parameter	FY-23 (Current Financial Year)	FY-22 (Previous Financial Year)
Water withdrawal by source (in kilolitres)		
(i) Surface water	NA	NA
(ii) Groundwater		
(iii) Third party water		
(iv) Seawater / desalinated water		
(v) Others		
Total volume of water withdrawal (in kilolitres)	NA	NA
Total volume of water consumption (in kilolitres)	NA	NA
Water intensity per rupee of turnover (Water consumed / turnover)	NA	NA
Water intensity (optional) – the relevant metric may be selected by the entity	NA	NA
Water discharge by destination and level of treatment (in kilolitres)		
(i) Into Surface water	NA	NA
- No treatment		
- With treatment-please specify level of treatment		
(ii) Into Groundwater	NA	NA
- No treatment		
- With treatment-please specify level of treatment		
(iii) Into Seawater	NA	NA
- No treatment		
- With treatment-please specify level of treatment		
(iv) Sent to third-parties	NA	NA
- No treatment		
- With treatment-please specify level of treatment		
(v) Others	NA	NA
- No treatment		
- With treatment-please specify level of treatment		
Total water discharged (in kilolitres)	NA	NA

 Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?
 (Y/N) If yes, name of the external agency. **(N)**

4. Please provide details of total Scope 3 emissions & its intensity, in the following format:
