Union Minister Narendra Modi, the schemes have been conceptualised for making India Alma Nivibata in pharma sectory. Union Minister O'N Schananda Gowda said in a press conference. The objective is to make India self-reliant in production of 32 critical active pharmaceutical ingredients (APIs) or key starting materials (KSMs), and in production of medical devices, for which India is crucially dependent upon imports, he added. The coronavirus crisis has exposed the weakness in global supply chains and posed threat to the health security of the country. Cowda said.

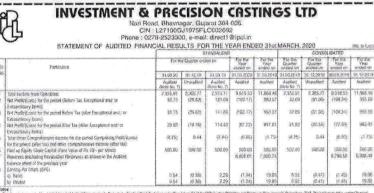

While production of Pharmaceutical Pricing Authority ensured steady supply of medicines, and prevented any shortage even during the lock-down, it was felt that domestic capabilities in production of APIs and medical devices have to eliminate any risks to the health security, he added.

"The details of the schemes have been drawn up meticulously after having in depth consultations with stakehold-ers including industries and state governments. The selection of their location will be based on objective criteria, and state governments, these parks will be selected for the PII scheme on the basis of marks obtained in the evaluation criteria as per the guidelines, headded.
