Healthcare Triangle INC., Releases Ready-to-Deploy Blockchain Network

"Blockedge gives healthcare and life sciences organizations a plug-and-play solution that provides easy access to blockchain capabilities without the need for significant investment in infrastructure or staff"

PLEASANTON, California., August 12, 2021— Healthcare Triangle INC., USA (HTI), a leading provider of cloud data transformation solutions, is pleased to announce the release of Blockedge, a blockchain infrastructure and automation platform for healthcare and life sciences, in partnership with blockedge.io a leading blockchain transformation provider. This ready-to-deploy blockchain network can operate on any public cloud, with real-time support from blockchain experts.

"Blockedge eases blockchain adoption for healthcare and life sciences organizations by providing a plug-and-play solution that provides support for a wide range of use cases," says Suresh Venkatachari, CEO, HTI. "With Blockedge, leaders can focus on organizational goals rather than concentrating time and talent on deploying, managing and optimizing their blockchain network."

Blockedge enables organizations to choose from multiple cloud providers and blockchain nodes to deploy their unique use cases. Intuitive user interfaces empower IT teams to effectively leverage Blockedge and optimize value from their investment.

The business case for blockchain is compelling: Gartner projects that blockchain's business value will reach $176 billion by 2025 and $3.1 trillion by 2030. In 2020 alone, blockchain made headlines for its ability to support smarter vaccine distribution, collaborative COVID-19 research, faster drug development, and more.

"Blockedge integrates seamlessly with an organization's existing IT infrastructure while ensuring hassle-free platform integration and automated network management," Venkatachari says. "There is no coding prerequisite needed to run and manage blockchain nodes on our UI-driven platform. We work alongside the organization's IT team to maintain security, data integrity and regulatory compliance, including with the Drug Supply Chain Security Act. Further, our HITRUST-ready platform supports all aspects of blockchain transformation with a full suite of services, from advisory and consulting to blockchain decentralized applications, smart contract development and managed services"

For more information, or to request a demo, visit www.healthcaretriangle.com/hti-blockedge/.

About Healthcare Triangle, Inc.

Healthcare Triangle INC., (HTI), based in Pleasanton, California, reinforces healthcare progress through breakthrough technology and extensive industry knowledge and expertise. We support healthcare organizations—including hospitals and health systems and health plans—as well as pharma and life sciences organizations, in their efforts to improve health outcomes. HTI enables the rapid adoption of new technologies, data enlightenment, business agility, and response to immediate business needs and competitive threats. The highly regulated healthcare and life sciences industries rely on HTI for expertise in digital transformation encompassing the cloud, security and compliance, data lifecycle management, healthcare interoperability, and clinical and business performance optimization.
