The Adani Group's purpose of Nation Building provides a guiding framework for investment in businesses that accelerate India's economic growth, which is vital for the wellbeing of its citizen. The Group strongly believes that embedding Environmental, Social, and Governance (ESG) principles in its business operations is not only a responsibility but an essential part of our DNA. Adherence to these principles helps build resilience, transform culture and long-term value

creation to systematically identify opportunities, manage risks, and secure the interest of all our stakeholders. As a part of our vision to lead the sustainable energy future, we are committed to providing an ecologically leading solution to climate change, water scarcity and the growing unsustainable consumption of natural resources. While climate change has been an important driver for renewable energy adoption, water availability provides an additional impetus. By generating clean electricity with no emissions and virtually negligible water consumption in comparison to business as usual, we are enabling customers to decouple their own business growth from environmental impacts. We support efforts to shift to zero carbon grids while aligning our goals with our nation's decarbonization commitments.

Introduction

DNV Business Assurance India Private Limited ('DNV') has been commissioned by the management of Adani Green Energy Limited ('the Company' or 'AGEL', Corporate Identification Number: L40106GJ2015PLC082007) to undertake an independent assurance of AGEL's Business Responsibility and Sustainability Reporting ('BRSR') disclosures (the 'Report') which shall form part of the Company's Business Responsibility and Sustainability Report FY 2022-23 in its digital/online format. The disclosures in this Report have been prepared based on the requirements of SEBI Circular no. SEBI/HO/CFD/CMD-2/P/CIR/2021/562 dated May 10, 2021, prescribing format of the BRSR and the guidance notes and the nine principles of the National Guidelines on Responsible Business Conduct, 2019 ('NGRBC') of the Ministry of Corporate Affairs, Government of India. This also includes an independent verification of Scope 1, Scope 2 and selected Scope 3 Greenhouse Gas (GHG) inventory (the 'GHG Inventory'). AGEL has used Principle 6 of the NGRBC, 2019 as guidance to arrive at its GHG emissions, which shall be reported as part of its response to its CDP Climate Change Response 2023.

The intended user of this assurance statement is the Management of AGEL ('the Management') and its stakeholders. Our assurance engagement was planned and carried out during May, 2023 – June, 2023 covering the Company's non-financial/sustainability performance during April 01, 2022 - March 31,

2023. We performed a limited level of assurance based on our assurance methodology, VeriSustain™¹.

Responsibilities of the Management of AGEL and of the Assurance Provider

The Management has the sole responsibility for the preparation of the Report and are responsible for all quantitative and qualitative information disclosed in the Report as well as the processes for collecting, analyzing and reporting the sustainability performance data presented in the Report. AGEL is also responsible for ensuring the maintenance and integrity of its website and any referenced disclosures on sustainability performance. In performing this assurance, DNV's responsibility is to the Management of AGEL; however, this statement represents our independent opinion and is intended to inform the outcome of the assurance to the stakeholders of AGEL.

We do not provide any services to AGEL which in our opinion constitutes a conflict of interest with this assurance. Our assurance engagements are based on the assumption that the data and information provided by the Company to us as part of our review have been provided in good faith and are free from material misstatements.

Scope, Boundary and Limitations

The reporting scope and boundary encompasses economic, environmental, social and governance performance data of

The reported data on economic performance, expenditure towards Corporate Social Responsibility (CSR) activities, and other financial data are based on financial statements prepared by AGEL and audited by its statutory auditors which is subject to a separate audit process. We were not involved in the review of financial information within the Report.

Basis of our Opinion

As part of the assurance process, a multi-disciplinary team of sustainability specialists performed assurance work for all sites of AGEL. We adopted a risk-based approach, that is, we concentrated our assurance efforts on the issues of high material relevance to AGEL's business and its key stakeholders. We carried out the following activities:

- Reviewed the approach to stakeholder engagement and materiality determination process and its outcomes as brought out in the Report.
- Conducted interviews with selected representatives

responsible for management of sustainability issues and implementation of the NGRBC Principles and carried out reviews of selected evidence to support topics and claims disclosed in the Report. We were free to choose interviewees and interviewed those with overall responsibility to deliver AGEL's overall sustainability objectives.

- Carried out onsite verification of sustainability performance data and sample evidence related to the sample offices of AGEL Limited to review the processes and systems for aggregating site-level sustainability information, as well as overall aggregation and consolidation of data from sites by the sustainability team at the Corporate Office at Ahmedabad in Gujarat
- Reviewed the process of reporting on BRSR requirements including Section A: General Disclosures, Section B: Management and Process Disclosures, and Section C: Principle-wise Performance Disclosures.
- Carried out an assessment of the processes for gathering and consolidating performance data related to the NGRBC Principles and, for a sample, checked the processes of data consolidation to assess the Reliability and Accuracy of performance disclosures reported based on BRSR requirements.
- Verification of the data consolidation of reported performance disclosures in context to the Principle of Completeness as per VeriSustain for a limited level of verification.
