Cigniti positioned as a ‘Niche player’ in Gartner 2020 Magic Quadrant for Application Testing Services, Worldwide

Dallas, 14th December: Cigniti Technologies, a global leader in independent quality engineering and software testing services, today announced that it has been positioned as a ‘Niche Player’ in the December 2020 Gartner, Inc. Magic Quadrant for Application Testing Services, Worldwide. This is the 6th consecutive year Cigniti has been positioned in this Magic Quadrant.

Gartner is aware of about 300 providers offering application testing services globally, but these providers are not the complete marketplace. The Magic Quadrant assesses 20 of the service providers offering testing services including consulting services, implementation, integration and managed services, based on specified inclusion criteria.

According to Gartner, “The demand for intelligent and highly automated testing services is driven by the need for continuous quality excellence at a lower cost. This report guides sourcing, procurement and vendor management leaders in making better sourcing decisions when selecting application testing service providers.”

Many of the world’s largest and most innovative companies turn to Cigniti to get assistance on accelerating their digital transformation efforts and obtaining higher returns on their investments into Quality Engineering initiatives. Cigniti has a strong application testing expertise and uses its portfolio of testing IP, including its core testing platform, BlueSwan. Cigniti leverages its test automation accelerators, industry accelerators and testing labs within mobile, IoT, medical devices and robotics, as well as its COEs in enterprise application platforms (such as Oracle, SAP and Salesforce), RPA, cybersecurity, and specialized testing areas like performance, mobile and test data management for delivering customer-centric quality assurance services.

This year, Cigniti also received 5-star reviews and has been rated by its enterprise customers a 4.8 out of 5 on [Gartner Peer Insights for Application Testing Services, Worldwide](#) based on 43 ratings in the last 12 months. Cigniti received the highest number of ratings across all providers in the application testing services category.

Speaking on the occasion, Srikanth Chakkilam, CEO, Cigniti, said “To us, getting consistently positioned in the Magic Quadrant and great feedback on Gartner Peer Insights stands testament to the faith large enterprise clients have placed on us in driving quality engineering initiatives for them. Our focus on delivering value through proprietary IP and client centricity has helped us gain this trust and recommendations from our clients.”
