PMI RISES TO 62.3 AGAINST 58.5 IN JUNE

Services Activity Hits 13 year High in July

New orders come from Bangladesh, Lanka, Nepal, UAE

Our Bureau

Gaining Momentum

New Delhi: Services activity in the country reached its highest level in 13 years in July buoyed by a pick-up in both domestic and international demand. The seasonally adjusted S&P Global India Services PMI Business Activity Index rose to 62.3 last month from 58.5 in June, the rating and research agency said in a report released on Thursday.

A value of over 50 denotes expansion. A number below 50 indicates contraction.

"The resilience of the service sector underscores its vital role in fuelling India's economic growth," said the agency. "With the PMI results for July so far pointing to a notable contribution from the service sector to overall GDP for the second fiscal quarter," said Polymaris De Lima, economics associate director at S&P Global Market Intelligence.

"The broad increases in sales across the domestic and international markets are particularly welcoming news, especially in light of the challenging global economic scenario," she added.

Experts have been highlighting the role of strengthening service activity in India's consumption demand and rising GST collection.

"The gap between the services PMI and manufacturing PMI (57.7), which has been widening again," said Bahal Bajaj, managing director and head of EM Asia (ex-China) economics at Barclays.

"Although input cost inflation is softening, the outlook to anchor growth this year," he added.

Although the 400 service firms surveyed by S&P indicated a softening of future outlook, compared to June owing to extreme weather conditions, they cited demand strength and marketing initiatives as reasons for optimism for the year.

Employment performance was mixed in July, with the increase broadly in line with the previous two months.

On the inflation front, services sector companies faced further cost pressures as they reported greater food, labour and transportation costs contributing to inflation raising at fastest pace in 13 months.

"Although input cost inflation ticked higher in July, service providers were again cautious in their price-setting decisions amid efforts to not deter sales," De Lima said.

Input inflation rose fastest for consumer services whereas output prices, which is charged to the consumer, witnessed fastest growth in real estate and business services sectors.

Finance and insurance was July's best performer among services sectors measured by S&P.
