**Commenting on the results, Mr. C.S. Nopany, Chairperson, Magadh Sugar & Energy Ltd said:**

*“Sugar industry experienced changing market dynamics and numerous structural deviations amid overproduction scenario creating havoc in the industry. Plunge in realizations and pile of sugar inventory led to inability of the millers to meet their obligations towards farmers leading to creation of cane arrears. To address the situation, Government of India undertook various measures to divert the sugar production towards ethanol. 2018-19SS experienced a surge of 10% in area under sugarcane production.*

*GOI’s thrust towards improvement in export viability along with surge in diversion of sugar capacities towards ethanol will enable millers to achieve economies of scale. Magadh Sugar had achieved the highest yield in Bihar last fiscal and we believe the trend to continue for this fiscal. We are operating at our best operating efficiencies and shall continue our growth trajectory going ahead.”*

## Key Highlights

- *Sugar Stock as on 30<sup>th</sup> June was at 18.12 lakh quintals*
- *Average realization in Q1FY20 Rs3,335 per quintal against Rs.2,821 per quintal in Q1FY19*
