VBL now accounting for growing proportion of PepsiCo's beverage sales volume in India

E: Estimated based on existing sales volumes of PepsiCo in the newly acquired regions

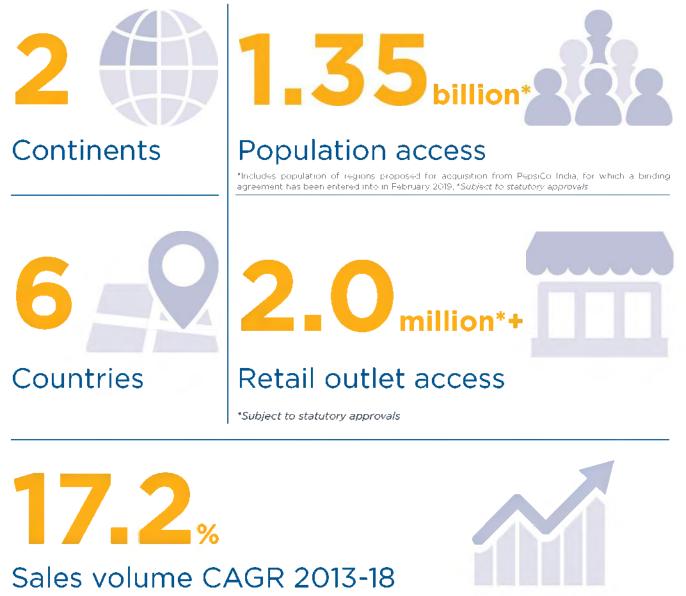

Built for the long-term. We are the Indian thirst quenchers.

We are PepsiCo's second-largest global franchisee (outside of US)

We are PepsiCo's second largest carbonated soft drinks (CSDs) and non-carbonated beverages (NCBs) global franchisee (outside US) possessing rights to manufacture, distribute and sell CSDs, fruit juice based drinks, packaged drinking water, sports drinks and energy drinks. We are operational in 6 countries spanning 2 continents with access to combined population of 1.35 billion*.

We manufacture, distribute and sell beverages to customers ranging from distributors to large retailers to small outlets to restaurants. We have a proven track record of consistently growing sales. In the last five years, our sales volume have grown at a CAGR of 17.2% to 340 million cases in 2018.

We have symbiotic relation with PepsiCo.

We are an important and trusted business partner to PepsiCo. We combine their insights and resources with our expertise in manufacturing, packaging, distribution, and understanding of market dynamics to consistently increase sales volume and strengthen PepsiCo's brand equity. PepsiCo reciprocates this confidence by regularly granting us additional territories and product licenses.

Built for the long-term. We are the Indian thirst quenchers.

We have a strong and diversified portfolio.

We have manufacturing, selling and distribution rights to several of PepsiCo's popular brands – Pepsi, Mountain Dew, Mirinda, 7UP, Tropicana, Aquafina, Slice, Evervess, and Gatorade. This provides us strong brand pull and opportunity to capture market share. Our wide portfolio across categories provides us the necessary diversity to de-risk business.

"includes Tropicana 100%, Tropicana Essentials and Tropicana Delight for which we have only distribution rights

We have optimal manufacturing footprint.

As on December 31, 2018, we have a total of 26 plants across our territories operating at a peak capacity utilization of under 70%, despite addition of new territories and products. This connotes adequacy of capacity without having to undertake further capital expenditure. Our presence in contiguous territories also provide scope to undertake capacity and logistics optimization initiatives to achieve better cost efficiencies.

Pyaas ki haar. India ki jeet. A glance into our winning portfolio

We have built a portfolio of multicategory beverages that resonate with the changing taste and preference of our customers. We promote healthy habits among all age groups by launching healthier product variants – zero calorie or no sugar.

Chairman's message

We have been able to drive this strong performance on the back of our end-to-end execution capabilities and presence across the beverage value chain.

Varun Beverages is financially, operationally and strategically wellplaced to deliver growth in the long-term."

Dear Shareholders,

It gives me immense pleasure to place before you the 24^{th} Annual Report of the Company.

Overview

We are greatly enthused to report a year of strong performances with revenue growth at 28% reverting to historical levels. This was led by a robust volume growth of 21.9% and value growth of 5.6%, driven by the introduction of higher realization products. Our India business has delivered a strong organic volume growth of 13.3% for 2018. PAT increased by 40% YoY driven by strong volumes in India and Zimbabwe.

We have been able to drive this strong performance on the back of our end-toend execution capabilities and presence across the beverage value chain. We have focused on every facet of business and put in place an effective decision-making framework and strategic building blocks, which, we believe, will continue to hold us in good stead in the long run. We have strengthened our distribution and reach. re-aligned portfolio in line with changing consumer trends, consolidated newly acquired contiguous sub-territories and added new ones, managed costs effectively, and continuously invested in people and process capability.

Acquisition of new territories

Your Company has furthered its strategic intent to expand into contiguous subterritories in India when an opportunity has presented, and this reinforces our

STATUTORY REPORTS

FINANCIAL STATEMENTS

VBL will become national bottler in India with presence in 27 States and 7 Union Territories, accounting for 80%*+ of PepsiCo India's beverage sales volumes from 51% earlier.

partnership with PepsiCo India. Your Company recently concluded the acquisition of PepsiCo India's franchised sub-territories of parts of Maharashtra (14 districts), Karnataka (13 districts) and Madhya Pradesh (3 districts). We have also entered into a binding agreement with PepsiCo, subject to statutory approvals, to acquire franchise rights in South and West regions. This includes 7 States (Gujarat, parts of Maharashtra, parts of Karnataka, Telangana, parts of Andhra Pradesh, Kerala and Tamil Nadu) and 5 Union Territories (Daman & Diu, Dadra & Nagar Haveli, Andaman & Nicobar Islands, Lakshadweep and Puducherry, except Yanam).

These acquisitions are a part of our strategy to consolidate presence in contiguous sub-territories and garner market share. We believe that these are high potential markets with relatively low seasonality factor which should lead to better asset utilization and offer long term, sustainable growth opportunities. We are confident that our learnings, knowledge and mastery over processes will be a catalyst to this.

Acquisitions have always been a key component of our growth, accelerating our revenue growth rate, profitability and cash flow. We are confident that this development will do the same.

This move comes as a welcome force multiplier to our aggressive expansion efforts and consolidates our position as a dominant player in the beverage industry. Upon completion of these acquisitions, VBL will become national bottler in India with presence in 27 States and 7 Union Territories, accounting for 80%+ of PepsiCo India's beverage sales volumes from 51% earlier.

In our international operations, we have invested in greenfield production facilities in Zimbabwe and Nepal. We are delighted to report that your Company has recorded volumes of ~15 million cases in Zimbabwe in only 10 months of operations, capturing ~35% market share. This is an untapped market with huge potential and as the sole PepsiCo franchisee, we are confident of sustaining the momentum.

New product launches

Our solid track record of driving growth and gaining market share is driven by our ability to adapt to changing market dynamics. For this, we are constantly working towards building a winning multi-category product portfolio, which now includes a wide array of carbonated soft drinks, carbonated juices, juices and fruit pulp-based beverages, packaged water, and energy drinks. This is helping us better connect with customers and accelerating our quest for leadership across each beverage segment and category. We will continue to innovate and work with PepsiCo to roll-out new products to future-proof ourselves and to push our strategic intent of driving profitable growth.

During the year, we have strengthened our presence in the fast-growing categories. We entered into a strategic partnership for selling and distribution of the larger Tropicana portfolio that includes Tropicana Juices (100%, Delight, Essentials), sports drink Gatorade and Quaker Value-Added Dairy across North and East India. We will leverage our knowledge and infrastructure to expand this franchise. Currently, we have only a supply and distribution arrangement for this portfolio. However, we expect to start in-house production shortly at our Pathankot facility which is expected to be operational in March 2019. This will help us expand our margin.

We have also expanded our juice portfolio by launching Fizzy drink in seven flavors, leveraging the 'Slice' brand that has wider recognition and strong brand value. It will have 11% juice content and include both ethnic flavors (Jeera and Guava Chilli) and mainstream flavors (Apple, Orange, Lemon and Lime, Clear Lemon and Cream Soda). These drinks have lower calories and zero sugar content, in line with PepsiCo's plans to intensify focus on health and nutrition. They augur well for our long-term growth prospects and will reduce seasonality, thereby boosting profitability and return ratios.

Dividend

We operate our business in a sustainable way to benefit all our stakeholders. An important component of delivering value to our shareholders and earning their trust is returning capital in a consistent and transparent way. And so, based upon the financial performance of 2018 and the confidence in the future performance trajectory, the Board of Directors recommended an interim dividend of ₹ 2.5/share in Q3 FY 2018 (based on financial results of Q2 2018), which was approved by board as final dividend for FY 2018 and resulted in a cash outflow of ~ ₹ 511.29 million (including dividend distribution tax payable).

Message to stakeholders

We enter the new year on a strong footing. We have created a stronger franchise over the last few months, undertaking several business strengthening initiatives including value accretive acquisitions, product portfolio enhancement. greenfield expansion, and a successful foray into the Zimbabwean market. Our balance sheet, despite several investments, remains healthy on the back of strong cash flows and working capital efficiencies. Our peak capacity utilization, despite volume growth, has remained under 70%, providing significant scope for arowth on existing investments. And, our newly territories acquired are highly under-penetrated, providing huge opportunity for growth.

With our fundamental strengths, we are well-positioned to satisfy the evolving consumer preferences and create sustainable value for many years to come.

We thank our employees for their commitment, energy and irrepressible drive to always improve our capability, and our customers, partners and shareholders for their ongoing trust and support. On behalf of the entire Varun Beverages team, we thank you for accompanying us on the exciting journey ahead.

Warm regards,

Ravi Kant Jaipuria Chairman

Directors' Induction and Familiarization

The provision of an appropriate induction programme for new Directors and ongoing training for existing Directors is a major contributor to the maintenance of high Corporate Governance standards of the Company. The Whole-time Director and the Company Secretary are jointly responsible for ensuring such induction and training programmes are provided to the Directors. The management provides such information and training either at the meeting of Board of Directors or otherwise. The details of such familiarization programmes for Independent Directors are posted on the website of the Company at http://varunpepsi.com/wpcontent/uploads/2016/12/Familiarisation-Programme-For-Independent-Directors.pdf

Board Evaluation

The Board of Directors of the Company ensures formation and monitoring of robust Evaluation framework of the

Individual Directors including Chairman of the Board, Board as a whole and various Committees thereof and carries out the evaluation of the Board, the Committees of the Board and Individual Directors, including the Chairman of the Board on annual basis.

Board Evaluation for the Financial Year ended December 31, 2018 has been completed by the Company internally which included the Evaluation of the performance of the Board as a whole, Board Committees and Directors. Further, results of the Evaluation were shared with the Board.

Internal Audit

As recommended by the Audit and Risk Management Committee, the Board of Directors in their meeting held on February 16, 2018 appointed M/s. O.P. Bagla & Co., Chartered Accountants (now known as O. P. Bagla & Co., LLP, Chartered Accountants) as an Internal Auditor of the Company for the Financial Year 2018 to conduct internal audit of the Company and their report on findings is submitted to the Audit and Risk Management Committee on a quarterly basis.

Separate Meeting of Independent Directors

To comply with the provisions of Schedule IV of the Act read with Regulation 25 of SEBI (LODR) Regulations, during the Financial Year 2018, the Independent Directors met once on December 26, 2018 without the presence of Executive Directors and Management Representatives and *inter alia* discussed:

- The performance of non-Independent directors and the Board as a whole;
- The performance of the Chairman of the Company, taking into account the views of executive Directors and non-executive Directors; and
- The quality, quantity and timeliness of flow of information between the Company management and the Board that is necessary for the Board to effectively and reasonably perform their duties.

In addition to formal meetings, interactions also took place between the Chairman and Independent Directors.

Board Meetings, Board Committee Meetings and Procedures

The Board of Directors is the apex body constituted by shareholders for overseeing the Company's overall functioning. The Board provides and evaluates the Company's strategic direction, management policies and their effectiveness, and ensures that shareholders' longterm interests are being served.

As at the end of the year under review, the Board had 6 (Six) Committees, namely Audit and Risk Management Committee, Nomination and Remuneration Committee, Stakeholders' Relationship Committee, Corporate Social Responsibility Committee, Share Allotment Committee and Investment and Borrowing Committee.

The Company's internal guidelines for Board/ Board Committee meetings facilitate the decisionmaking process at its meetings in an informed and efficient manner.

Board Meetings

The Board meets at regular intervals to discuss and decide on Company / business policies and strategies apart from other regular business matters. The Board/ Committee Meetings are pre-scheduled and a tentative annual calendar of the Board and Committee Meetings is circulated to all Directors and invitees well in advance to facilitate them to plan their schedule and to ensure meaningful participation in the meetings. The Board is updated on the discussions held at the Committee meetings and the recommendations made by various Committees.

The agenda of the Board/Committee Meetings is set by the Chief Risk Officer & Group Company Secretary in consultation with the Whole-time Director and the Chairman of the Company. The agenda is generally circulated a week prior to the date of the meeting and includes detailed notes on items to be discussed at the meeting to enable the Directors to take an informed decision. However, in case of urgency, the agenda is circulated along with the shorter notice as per the provisions of the Secretarial Standards on Meetings of the Board of Directors. Usually meetings of the Board are held at the Corporate Office of the Company at Gurugram.

Board meets at least once in a quarter to review inter-alia the quarterly results and performance of the Company. Additional meetings are held on a need basis.

The Company also provides facility to the Directors to attend meetings of the Board and its Committees through Video Conferencing mode except in respect of those meetings wherein transactions are not permitted to be carried out by way of video conferencing, to enable their participation.

7 (Seven) Board meetings were held during the Financial Year 2018 on January 12, 2018, January 17, 2018, February 16, 2018, March 19, 2018, May 3, 2018, August 9, 2018 and October 25, 2018. The gap between two Board meetings was within the limit prescribed under Section 173(1) of the Act and Regulation 17(2) of the SEBI (LODR) Regulations.

Management Discussion & Analysis

Economic Overview & Outlook

Global Economy

The global economy grew at an estimated 3.7% in 2018 amidst global trade policy uncertainty and weaker performance in some major economies in Europe and Asia. Emerging market and developing economies have witnessed a challenging environment in the second half of 2018 owing to trade tensions, rising interest rates, dollar appreciation, capital outflows, and volatile oil prices. Some of these challenges are expected to carry over in 2019. So, while the global economy is still anticipated to expand, the growth is projected to be softer at 3.5% in 2019 and 3.6% in 2020.

Indian Economy

The Indian economy continued to remain resilient and recorded a GDP growth of 7.3% for the calendar year 2018 as compared to 6.7% recorded in 2017. The performance is commendable as the economy overcame the initial slowdown owing to the implementation of the Goods and Services Tax (GST) in the previous year as well as the overall uncertainty and weakness in the global economy. Several path-breaking reforms have been implemented over the past few years including GST, the Insolvency and Bankruptcy Code, liberalization of FDI norms, reforms in Ease of Doing Business and Labor. These economic reforms have improved the investment and business climate and supported the overall pace of economic growth.

India's economic growth is poised to accelerate further to 7.5% in 2019 and 7.7% in 2020, according to the IMF, retaining its tag as the world's fastest growing large economy. India will benefit from lower oil prices and a slower pace of monetary tightening. The Gross Fixed Capital Formation, a key indicator of investment demand, is expected to register a growth of 12.4% at current prices and 10% at constant prices during 2018-19.

Further, the proposal of direct cash transfer program for farmers and tax relief measures for the middle-class in the Interim Budget 2019-20 will provide a significant fiscal stimulus. In the current financial year, the Union Government has renewed its efforts towards enhancing rural incomes with highest ever hike in the MSP along with thrust on rural spending, infrastructure creation and irrigation spending. India's favorable demographics should continue to assist its economic momentum and the roadmap has been laid to propel India to become a US\$ 5 trillion economy over the next few years.

Soft Drinks Market Overview & Outlook

The global soft drinks market comprising carbonates, packaged juices, bottled water, sports/energy drinks, ready-to-drink tea and coffee is a mature and penetrated market growing at steady volumes. Countries in Asia and Africa (VBL's key markets) consume significantly lower soft drinks than those in the mature and developed markets. Resultantly, the forecasted per capita volume consumption CAGR in these countries is expected to be higher.

In India, the soft drinks industry is relatively underdeveloped with low penetration. The per capita consumption is far lower than global averages, despite double-digit growth rates. The main segments constituting the soft drinks market in India are carbonates, juices and bottled water, which together accounted for over 99% of the total volumes sold in 2016. In value terms, carbonates are the largest category while bottled water is the largest in volume terms. Segments such as concentrates, ready-todrink tea/coffee, sports and energy drinks are still at a nascent stage of evolution with negligible share of overall volumes.

Going forward, the soft drink industry is expected to continue its robust growth trajectory led by broadbased growth across the various categories, especially juices and bottled water. Within carbonates, non-cola carbonates, especially lemon-based ones are expected to grow faster. The bottled water category is expected to see robust volume growth with increasing awareness among consumers about water-borne diseases and shortages in drinking water in the urban areas. Rising health awareness is driving juice consumption and it is increasingly becoming a part of the regular breakfasts and social gatherings. In India, there is a steady decline in rural-urban consumer gap driven by increasing interest and readiness to spend in the rural markets.

Key Growth Drivers & Opportunities

The Indian soft drinks market is in its growth phase. Favorable demographics, low per capita consumption, long summers and higher spending on packaged products makes it an attractive market. This coupled with continued innovations towards product packaging and sizing to enhance product affordability are likely to strengthen growth rates. Various factors driving the Indian soft drinks market include:

Low per capita consumption: India's soft drinks consumption at 44 bottles per capita in 2016, is relatively lower compared to matured markets like the U.S. (1,496 bottles), Mexico (1,489 bottles) and Germany (1,221 bottles) and even the developing markets like Brazil (537 bottles). This under-penetration is likely to correct with consumption expected to almost double to 84 bottles by 2021. Most of the categories in which the Company operates in are under-penetrated and therefore it is continuously investing in market development.

Growing middle-class: India is home to one of the largest and fastest growing middle-class populations anywhere in the world. The rising aspirations of this segment will boost demand for premium products including beverages.

Electrification in India: With 100% electrification of all villages in India, the soft drink industry will benefit with increased penetration of cooling infrastructure in these regions.

Rising affordability and urbanization: During 2010 to 2020, India's aggregate consumer expenditure is likely to grow over threefold from ₹ 45 trillion in 2010 to nearly ₹ 150 trillion by 2020 and its affluent and aspiring households from 48 million to more than 100 million. The growing aspirations combined with rising affordability and urbanization are expected to drive beverages growth in India.

Continuous and aggressive focus on innovations and hyper-localization: Higher spending on packaged products and continuous innovations towards specific requirements, especially in rural India, in terms of pack sizes and glass bottles is likely to enhance product affordability and strengthen growth rates. Greater thrust

has been made on developing products in India for the local market that are more suited to regional palates, or income class, or even parts of an Indian state. With changing population demographics, higher spending capacity of consumers and wider reach of products, there is an increasing need to constantly innovate to meet the needs of all consumers.

Location: Majority of the Indian population reside in hot and dry climatic regions or temperate regions being potential consumers for Varun Beverages.

Shift from unorganized to organized: The advent of the Goods and Services Tax has led to several consolidation in the beverage sector, and hence, market share gains for organized players like Varun Beverages.

Execution: VBL's continued and relentless focus on flawless execution across the value chain is a key differentiator and growth driver. The Company will continue to leverage this opportunity by making appropriate investments.

Business Overview – A KEY PLAYER IN THE BEVERAGE INDUSTRY

VBL Presence

India Sales

olume

Varun Beverages Limited (VBL) is a key beverage player. It has presence across 6 countries, 3 in the Indian Subcontinent (India, Sri Lanka, Nepal) contributing ~80% to revenues, while 3 in Africa (Morocco, Zambia and Zimbabwe) contributing ~20%.

Symbiotic Relationship with PepsiCo

The Company enjoys a strong, symbiotic and longstanding relationship with PepsiCo spanning over 25 years, since their entry in India, accounting for ~51% of its sales volumes in India.

VBL – Demand Delivery

- Investment in Production Facilities -Manufacturing Plants.
- Sales & Distribution Vehicles
- In-outlet Management Visi-Coolers
- Market Share Gains Consumer Push Management

PepsiCo - Demand Creation

- Owner of Trademarks
- Investment in R&D Product & Packaging Innovation
- Concentrate Supply
- Brand Development Consumer Pull Management

It engages in the manufacture, sell and distribution of products under trademarks and brands owned by PepsiCo which includes carbonated soft drinks, carbonated juices, juice-based drinks, energy drinks and packaged bottled water through its extensive manufacturing facilities and well-entrenched distribution network. VBL strategically combines its extensive manufacturing and distribution infrastructure, and market understanding of market dynamics with PepsiCo's insights, resources and experience to consistently grow volumes and margins.

The Company has been granted franchise rights for various PepsiCo products across 21 States and two Union Territories in India, as well as for the territories of Nepal, Sri Lanka, Morocco, Zambia and Zimbabwe.

Business Model

VBL's unique business model with end-to-end execution capabilities (from manufacturing, distribution and warehousing, customer management and in-market execution, to managing cash flows and future growth) makes it an undisputed leader in the industry. Other than the concentrate and the consumer marketing provided by PepsiCo and the brands, VBL charters its own success through having complete control over the manufacturing and supply chain process. Having reached to ~1/8th of the world's population, the Company continuously strives for category value/volume growth, market share gains, cost efficiencies and judicious capital allocation strategies.

The soft drinks distribution, entailing complex logistics because of the nature of the packaging, and refrigeration requirements, is an area where the Company has expertise. It procures raw material (concentrate from PepsiCo and sugar/other raw materials from chosen local suppliers), manages manufacturing, bottling and packaging at its production facilities, and transports finished goods to the warehouses in trucks. These goods are delivered to the retail outlets either through the Company's extensive distribution network or in some cases directly. The products are stored by the retailer in visi-coolers provided and owned by VBL.

The Company has invested significantly in creating a solid infrastructure. As on December 31, 2018, it has 20 state-of-the-art manufacturing facilities in India, six internationally. Further, nine more production facilities are currently under consolidation (subject to receipt of statutory approvals). It has also invested in backward integration for production of preforms, crowns, corrugated boxes and pads, plastic crates and shrink-wrap films to ensure operational efficiencies and quality standards. Integration advantage along with strategic location of plants near target markets, facilitates logistics costs optimization and VBL is constantly looking for avenues to further optimize these costs.

VBL has a robust supply chain with 80+ owned depots. 2,400+ owned vehicles and 1,100+ primary distributors as on December 31, 2018. Another 10+ depots, 100+ vehicles and 300+ primary distributors are under consolidation. The Company, with its dedicated and experienced sales staff, focuses on driving growth and expanding market share across categories through consumer push management within its designated sales regions in licensed territories. It undertakes local level promotion, in-store activations, customer relation management, merchandizing, individual account management and evaluation of high demand region for strategic placement of vending machines and visi-coolers. The Company has presently installed 550,000+ visi-coolers and further 275,000+ under consolidation across various markets (subject to receipt of statutory approvals).

VBL has also significantly invested in technology to maximize its distribution efficacy, and automate field work processes. It has empowered sales team with a GPRS-enabled handheld device system called SAMNA (Sales Automation Management for the New Age) for real-time sales information from production facilities, warehouses and distribution centers.

The Company has recently also entered into a binding agreement with PepsiCo, subject to receipt of statutory approvals to acquire franchisee rights in South and West regions. This includes seven states and five union territories in India. Upon completion of this the company will have a presence in twenty seven states and seven union territories of India. It leverages its strong execution track record for expanding operations through acquisition of several new sub-territories from PepsiCo, contiguous to existing operations, offering economies of scale advantage. As far as the International expansion is concerned, the Company has a growing presence in emerging markets characterized by low per capita consumption and expected to deliver volume growth significantly above the world average. The Company plans to further explore opportunities into new geographical markets where it could leverage its operational experience or where the market offers significant volume growth.

Key Business Developments – 2018 Acquisition of New Territories

- Consolidation of 5 new sub-territories acquired in 2018 has yielded positive results with significant volume and margin expansion. Given deep underpenetration, these territories have significant potential to further drive market share gains and margins.
- Concluded the acquisition of PepsiCo India's previously franchised territories of parts of Maharashtra (14 districts), parts of Karnataka (13 districts) and parts of Madhya Pradesh (3 districts) w.e.f. February 14, 2019.

- Entered into a binding agreement with PepsiCo India Holdings Private Limited ('PepsiCo') on February 18, 2019 to acquire franchise rights in South and West regions, subject to statutory approvals.
 - These regions include 7 States (Gujarat, parts of Maharashtra, parts of Karnataka, Telangana, parts of Andhra Pradesh, Kerala and Tamil Nadu) and 5 Union Territories [Daman & Diu, Dadra & Nagar Haveli, Andaman & Nicobar Islands, Lakshadweep and Puducherry (except Yanam)].
 - o Given the growth prospects and promising earnings potential, the acquisition comes at a reasonable valuation, which is in line with the Board approved strategic and financial guidelines and offers an attractive payback. It will be funded partly through internal accruals, debt and the rest through equity.
 - The acquisition is a part of the Company's strategy to consolidate its presence in contiguous territories and garner market share. These are high potential markets which offer long-term, sustainable growth opportunities. They will help in achieving greater scale, operational productivity and better asset usage as the seasonality in these regions is relatively lower, leading to higher revenues and profitable growth.

New Product Launches

- Entered into a strategic partnership for selling and distribution of the larger Tropicana portfolio that includes Tropicana Juices (100%, Delight, Essentials) as well as Gatorade in the sports drink category and Quaker Value-Added Dairy in territories across North and East India in 2018:
 - Focused on effectively leveraging knowledge of the supply chain process, existing distribution network and chilling infrastructure to expand the franchise for Brand Tropicana.
 - o Invested in setting-up a manufacturing facility in Pathankot to commence in-house production. The facility is expected to be operational in March 2019 and will help expand margin profile in this category, as presently the Company is only executing supply and distribution arrangement.
- Expanded juice portfolio with the launch of Fizzy drink in seven different flavors, leveraging the 'Slice' brand with wider recognition and strong brand value:
 - Fizzy Slice will have 11% juice content and will include both ethnic flavors like Jeera and Guava Chilli as well as mainstream flavors such as Apple, Orange, Lemon and Lime, Clear Lemon and Cream Soda.

- o It will have lower calories and zero sugar content, in line with PepsiCo's plans to intensify focus on health and nutrition and reduction in sugar content. All flavors are available in 250 ml PET bottles at an attractive price point of ₹ 12.
- o These product categories with lower seasonality factor augurs well for long-term growth. It will augment profitability and return ratios.

Capacity Expansion

- Net capex for 2018 stood at ₹ 7,915.2 million. In addition, CWIP of ₹ 3,523.6 million pertains mostly to upcoming Pathankot facility.
- Capex during the period July '17 Jun '18 include -₹ 2,900 million for acquisition of 5 new sub-territories in India, -₹ 1,300 million for new plant in Nepal, -₹ 1,400 million for foraying into the new geography of Zimbabwe and -₹ 2,000 million for organic capex. All these investments have been made through internal accruals.
- Despite robust volume growth, capacity utilization during the peak month remained under 70%, providing significant scope for growth on existing investments.

Awards & Accolades

- Winner of Special Commendation for Golden Peacock National Quality Award - 2019.
- National Best Employer Brand Award for 2018, by ET Now in collaboration with World HRD Congress.
- Mr. Ravi Kant Jaipuria Distinguished Entrepreneurship Award in the PHD Annual Awards for Excellence 2018.

Dividend

With the listing of the Company in November 2016, the Board of Directors of the Company formalized a dividend policy, in line with good Corporate Governance practices.

Salient Features of the Policy are as follows:

- Endeavor to maintain a dividend payout in the range of 10-30% of annual profit after tax on standalone financials.
- Consider financial parameters like earnings outlook, future capex requirements, organic growth plans, capital restructuring, debt reduction, cash flows, etc.
- Consider external parameters like macro-economic environment, regulatory changes, technological changes, statutory and contractual restrictions, etc.
- For a detailed perspective, please refer to the Company's website at www.varunpepsi.com

For CY2018, the Board of Directors has recommended an interim dividend of ₹ 2.5/share in Q2 CY2018. This has been approved by the Board as the final dividend for the year, resulting in a cash outflow of ~ ₹ 511.29 million (including dividend distribution tax payable).

Sales Volume

*A unit case is equal to 5.678 liters of beverage divided in 24 bottles of ~ 237 ml each

The Company follows a calendar year of reporting. Owing to the seasonality aspect of the soft drinks business, whereby majority of the sales happen in the summer months, it is best to monitor the Company's performance on an annual basis. Revenues and profits follow a bell-curve with significant portion accruing in the April-June quarter.

The Company has delivered a strong performance in 2018 with revenue growth of 27.5% YoY to ₹ 51,052.5 million. Total sales volumes were up 21.9% YoY at 340 million cases in 2018 as compared to 278.8 million unit cases in 2017. Introduction of higher realization products, MRP increase in select SKU's and reclassification of freight cost (instead of netting off from revenue) amounting to ₹ 530.8 million have resulted in ~5.6% value growth during the year. India business saw traction recording strong organic volume growth of 13.3% in 2018 in contrast to 9.6% growth achieved on a consolidated basis. A broad-based growth was recorded across all product categories. CSD constituted 76%, Juice 6% and Packaged Drinking water 18% of total sales volumes in 2018.

Gross margins expanded 126 bps YoY to 56% in 2018. EBITDA increased by 20.4% to ₹ 10,065.9 million in 2018 from ₹ 8,359.1 million in 2017. Underlying EBITDA margins have improved in both existing and recently acquired territories on the back of operational efficiencies, increase in organic volumes and consolidation of contiguous territories. However, blended EBITDA margins reduced by 116 bps YoY to 19.7% due to sub-optimal volumes/ margins in acquired sub-territories, and lower contribution from the Tropicana juice portfolio, where at present the Company only has a supply and distribution arrangement, and is not manufacturing the product. Depreciation during the year has increased on account of inorganic expansion. Finance cost has remained stagnant even after considerable organic and inorganic expansion during 2018. The robust volume growth in India and strong volumes in Zimbabwe have resulted in 40.1% YoY increase in profit after tax to ₹ 2,998.6 million in 2018 from ₹ 2,140.6 million in 2017.

Net debt stood at ₹ 26,715 million as on December 31, 2018 as against ₹ 25,572 million as on December 31, 2017. Net debt as on December 31, 2018 includes the debt of ₹ 4,000 million availed for the Pathankot facility which is expected to operationalize in March 2019. Working capital days have come down to ~26 days as on December 31, 2018 from ~30 days as on December 31, 2017 on account of efficient working capital management despite consolidation of 5 new sub-territories in India during the period.

Growth Outlook

- Well-positioned to leverage PepsiCo brand to increase market penetration in licensed territories
- Consolidating existing distributors and increasing distribution in underpenetrated regions
- Penetrate newer geographies - to compliment existing operations in India
- Identify strategic consolidation opportunities in South Asia / Africa

Acquisition Balance Sheet

• To enable significant interest cost saving

- To periodically launch innovative products in select markets in line with changing consumer preferences
- Focus on non-Cola carbonated beverages and NCB's
- Bottled water provides significant growth opportunity
- Contiguous territories/ markets offer better operating
 leverage and asset utilization economies of scale
- Production and logistics optimization
- Packaging synchronization and innovations
- Technology use to improve sales and operations processes

VBL's sales volumes has grown at a 17.3% CAGR over the last 5 years. The Company has demonstrated strong cash flow generation, working capital efficiencies and ability to grow and gain market share. As it enters 2019, it is on a strong footing with encouraging growth prospects. VBL has created a stronger business with several value accretive acquisitions, continuously enhanced its product portfolio, and is well-poised to capitalize on the significant growth potential in its target markets for many years. This growth will be supported by its end-to-end execution capabilities and presence across the entire beverage value chain.

The Company will be focused on concluding and unlocking value from the recently acquired underpenetrated subterritories in India by strengthening distribution, installing visi-coolers and increasing availability. The acquired subterritories provide huge opportunity for driving volumes, gaining market share and provide significant operating leverage going forward.

With consumer demands and preferences continuously changing, VBL strongly values flexibility to adapt its

proposition to remain relevant. It will remain agile by keeping on top of macroeconomic trends and changes in consumer preferences and adjust its portfolio and processes accordingly to offer innovation and choice.

The Company is confident to further accelerate the historical trend of strong performance delivered by the business in the coming years. It is confident that the efficient execution of its strategy will translate into profitable, sustainable and responsible growth in the years to come.

Threats, Risks and Concerns

Risks and opportunities are inevitable and inseparable components of all businesses. The Company's Directors and management take proactive decisions to protect stakeholder interests. The Company has in place a Risk ManagementPolicy which is monitored and reviewed under the guidance of Audit and Risk Management Committee. The Committee comprises various departmental heads who meet regularly to identify processes exposed to risks, determine risk mitigation strategies and monitor their implementation. CORPORATE OVERVIEW

| Ris | sk | Description | Mitigation |
|-----|-------------------------------|--|--|
| 1. | Demand Risk | A cyclical downturn can lead to a slowdown in the Company's target markets and impact its sales velocity. | The Company has demonstrated ability of driving significant growth in sales volumes over the years by seeking to offer the right brand, at the right price, in the right package, and through the right channel. Moreover, the Company has presence in relatively underpenetrated markets having favorable demographics, climatic conditions and rising population facilitating steady growth in demand. Its wide range of product portfolio enables it to cater to diverse consumer segments. |
| 2. | Business Agreement Risk | The Company relies on strategic relationships and agreements with PepsiCo. Termination of agreements, or less favorable renewal terms could adversely affect profitability. | The Company has been associated with PepsiCo for over two decades during which it has consolidated its business association with them – increasing the number of licensed territories and sub-territories, producing and distributing a wider range of PepsiCo beverages, introducing various SKUs in the portfolio, and expanding distribution network. The Company's demonstrated ability of significantly enhancing PepsiCo's market share makes it a favorable partner. The Company enjoys a symbiotic relationship with PepsiCo, working closely together as effective partners for growth, engaging in joint projects and business planning with a focus on strategic issues. |
| 3. | Regulatory Risk | Regulations on consumer health and the risk of the Company's products being targeted for discriminatory tax and packaging waste recovery may adversely impact business. | The Company proactively works with PepsiCo, governments and regulatory authorities to ensure that the facts are clearly understood and that its products are not singled out unfairly. VBL adheres to best manufacturing practices and takes the issues of sustainability relating to packaging and waste recovery very seriously. It works closely and constantly engages with stakeholders, including NGOs and the communities in which it operates, to develop sustainable strategies focused on protecting the environment. PepsiCo's strategy of introducing healthier and zero sugar variant of products pose well for the Company's future. |
| 4. | Business Viability Risk | An inability to integrate the operations of, or leverage potential operating and cost efficiencies from, the newly acquired territories and sub- territories may adversely affect the Company's business and future financial performance. | VBL's stringent strategic and financial criteria ensures all potential acquisition or partnership is value accretive, and in line with the Board's acquisition guidelines. Further, to ensure success of the newly acquired operations, the Company invests significant management time and financial resources, develop local market strategies (including that for potential cultural and language barriers), and assimilate business practices to ensure business viability. Acquisition of new territories has always been a key to the Group's growth and substantially accelerates its revenue growth, making positive contribution to net income and cash flow. |
| 5. | Concentrate Pricing Risk | PepsiCo is entitled to various rights under the PepsiCo India and PepsiCo International Agreements, including the right to unilaterally determine the price of the PepsiCo beverage concentrates. An adverse exercise of such rights may materially and adversely affect business prospects and future financial performance. | VBL is PepsiCo's important long-term strategic partner, and has emerged as its the second-largest franchisee in the world (outside the USA), accounting for ~51% of its sales volumes in India. VBL has a strong track of execution and delivering market share gain in its territories of operation. As a result of this key role played by VBL, the concentrate price is determined by PepsiCo after discussions with VBL, taking into account factors such as selling price, taxation, input costs and market conditions. |

77

| Ris | k | Description | Mitigation |
|-----|--------------------------------|--|--|
| 6. | Consumer Preference Risk | Failure to adapt to changing consumer health trends and address misconceptions relating to impact of soft drinks consumption on the health may adversely impact demand. | VBL's sales team works closely with PepsiCo to ascertain the changing consumer habits and constantly focus on product innovation and expanding range of products to remain relevant. In fact, PepsiCo's new product strategy includes focusing more on healthier products with zero calorie and sugar content. |
| 7. | Raw Material Risk | An interruption in the supply or significant increase in the price of raw materials or packaging materials may adversely affect the Company's business prospects, results of operations and financial condition. | Maximizing cost efficiencies is an integral part of VBL's strategy, whereby it constantly focuses on reducing cost of goods sold, effectively managing operating expenses and enhancing cash flows. For this, the Company has undertaken several initiatives including backward integration and centralized material procurement. It leverages its scale of operations to achieve better bargaining power with suppliers resulting in better working capital management. The Company's ability to improve asset utilization enables it to achieve higher operating leverage and amortize overheads on a wider base. Additionally, the Company continues to invest in advanced technologies to improve operational efficiencies and work processes in its operations, thereby ensuring integrated operational data from manufacturing, planned procurement and superior tracking of transportation of products from distributors to final delivery to the retail point-of-sale. |

Human Resources

As of December 31, 2018, VBL employed 8,200+ fulltime employees globally (5,662 in India and 2,550+ in international subsidiaries). The Company recognizes the need for change management and talent management throughout the business and their criticality to its future growth and success as any other element of its commercial strategy. A significant emphasis is placed on training personnel, increasing their skill levels, and fostering ongoing employee engagement. VBL organizes in-house training for employees through skill-building programs and professional development programs at all levels and across all functions. Key employees also attend management and staff development programs organized by PepsiCo as well as at leading management institutions of India.

Risk Management, Audit and Internal Control System

The Company has well-equipped and operative internal control systems in place commensurate to the size of its business and nature of the industry in which it operates. These stringent and comprehensive controls put in place ensures optimal and efficient utilization of resources to an extent that the assets and interests of the Company are safeguarded, transactions are authorized, recorded and properly reported, and reliability and correctness of accounting data is warranted with checks and balances. An extensive program of internal audits and regular reviews by the Audit and Risk Management Committee is carried out to ensure compliance with the best practices. The Company has employed Walker Chandiok & Co. LLP, Chartered Accountants & M/s APAS & Co., Chartered Accountants, the Joint Statutory Auditors of the Company to report on the Financial Controls of the Company.

Section E: Principle-wise performance

Principle 1:

| SI. No. | Particulars | Details |
|------------|---|--|
| 1 | Does the policy relating to ethics, bribery, and corruption cover only the Company? | Yes |
| 2 | Does it extend to the Group/Joint Ventures/ Suppliers/Contractors/ NGOs/Others? | No |
| 3 | How many stakeholder complaints have been received in the past Financial Year and what percentage was satisfactorily resolved by the management? If so, provide details thereof, in about 50 words or so. | No complaint was received from any stakeholder of the Company during Financial Year 2018. |

Principle 2:

1. List up to 3 of your products or services whose design has incorporated social or environmental concerns, risks and/or opportunities:

VBL is in the business of providing high quality products to consumers such as carbonated, non-carbonated sweetened beverages and packaged drinking water with endeavor to make its business and ecosystem sustainable. The Company tries to embed the principles of sustainability into various stages of product, procurement of raw material, manufacturing of products, transportation of raw materials and supply of finished goods. In order to continuously reduce the Company environmental footprint, the Company is improving efficiencies, especially on critical resources such as water and energy, optimizing the resource consumption and minimizing wastages, increasing green cover in manufacturing plants and also developing outside establishments. The Company has implemented the guidelines provided by international standards such as Environment Management System ISO 14001, OHSAS 18001 and all our units are AIB and FSSAI certified.

- 2. For each such product, provide the following details in respect of resource use (energy, water, raw material etc.) per unit of product (optional):
 - (a) Reduction during sourcing/production/ distribution achieved since the previous year throughout the value chain?

The Company follows number of key Environmental Indicators to monitor the efficiency and consumption of natural resources in manufacturing such as water consumption and recycling, fuel consumption, energy consumption, raw materials yield and waste generation. The Company regularly track these consumptions patterns of critical nature resources.

(b) Reduction during usage by consumers (energy, water) has been achieved since the previous year?

Reduction in Greenhouse Gases emission which is measured in units of carbon dioxide. Number of initiatives have already been implemented across various units. Some of the key improvements done are use of fuels like biomass for steam generation, Usage of Solar energy and Optimizing the water requirements at manufacturing plants.

- 3. Does the Company have procedures in place for sustainable sourcing (including transportation)? Yes
 - (a) If yes, what percentage of your inputs was sourced sustainably? Also, provide details thereof, in about 50 words or so.

With a responsible supply chain, the Company has developed a comprehensive and dynamic model, to engage with its suppliers and transporters on material aspects. Regular capacity building and assessments are carried out for key suppliers. However, currently, it is not feasible to measure the same in percentage.

Independent Auditor's Report

To the Members of **Varun Beverages Limited**

Report on the Consolidated Financial Statements

 We have audited the accompanying consolidated financial statements of Varun Beverages Limited ('the Holding Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group') and its associates, which comprise the Consolidated Balance Sheet as at 31 December 2018, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

2. The Holding Company's Board of Directors is responsible for the preparation of these consolidated financial statements in terms of the requirements of the Companies Act, 2013 ('the Act') that give a true and fair view of the consolidated state of affairs (consolidated financial position), consolidated profit or loss (consolidated financial performance including other comprehensive income), consolidated cash flows and consolidated changes in equity of the Group including its associates in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. The Holding Company's Board of Directors and the respective Board of Directors of the subsidiaries included in the Group, and its associates are responsible for the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. Further, in terms of the provisions of the Act, the respective Board of Directors of the companies included in the Group, and its associate companies covered under the Act are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. These financial statements have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

Auditor's Responsibility

- 3. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.
- 4. While conducting the audit, we have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.
- 5. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether these consolidated financial statements are free from material misstatement.
- An audit involves performing procedures to 6. obtain audit evidence about the amounts and the disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the Holding Company's preparation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Board of Directors, as well as evaluating the overall presentation of the consolidated financial statements.

Independent Auditors' Report to the members of Varun Beverages Limited, on the Consolidated Financial Statements for the year ended 31 December 2018 (Cont'd)

7. We believe that the audit evidence obtained by us and the audit evidence obtained by the other auditors in terms of their reports referred to in paragraph 9 of the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on these consolidated financial statements.

Opinion

In our opinion and to the best of our information 8. and according to the explanations given to us and based on the consideration of the reports of the other auditors on separate financial statements and on the other financial information of the subsidiaries and associates, the aforesaid consolidated financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the consolidated state of affairs (consolidated financial position) of the Group and its associates as at 31 December 2018, and their consolidated profit (consolidated financial performance including other comprehensive income), their consolidated cash flows and consolidated changes in equity for the year ended on that date.

Other Matter(s)

We did not audit the financial statements of six 9 subsidiaries, whose financial statements reflect total assets of ₹ 16,066.54 million and net assets of ₹ 2.282.94 million as at 31 December 2018. total revenues of ₹ 15,980.73 million and net cash inflows amounting to ₹ 74.81 for the year ended on that date, as considered in the consolidated financial statements. The consolidated financial statements also include the Group's share of net profit (including other comprehensive income) of ₹ 30.20 million for the year ended 31 December 2018, as considered in the consolidated financial statements, in respect of two associates, whose financial statements have not been audited by us. These financial statements have been audited by other auditors whose reports have been furnished to us by the management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and associates, and our report in terms of sub-section (3) of Section 143 of the Act. in so far as it relates to the aforesaid subsidiaries and associates, is based solely on the reports of the other auditors.

Our opinion above on the consolidated financial statements, and our report on other legal and regulatory requirements below, are not modified in respect of the above matters with respect to our reliance on the work done by and the reports of the other auditors.

10. The consolidated financial statements of the Company for the year ended 31 December 2017 were jointly audited by the predecessor joint auditor, Walker Chandiok & Associates, Chartered Accountants and current joint auditor, APAS & Co., Chartered Accountants, who have expressed an unmodified opinion on those consolidated financial statements vide their audit report dated 16 February 2018.

Report on Other Legal and Regulatory Requirements

- 11. As required by section 197(16) of the Act, based on our audit and on the consideration of the reports of the other auditors, referred to in paragraph 9, on separate financial statements of the subsidiaries and associates, we report that the Holding Company and two associate companies covered under the Act paid remuneration to their respective directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act. Further, we report that the provisions of section 197 read with Schedule V to the Act are not applicable to six subsidiaries companies, since none of such companies are covered under the Act.
- 12. As required by Section 143(3) of the Act, based on our audit and on the consideration of the reports of the other auditors on separate financial statements and other financial information of the subsidiaries and associates, we report, to the extent applicable, that:
 - a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid consolidated financial statements;
 - b) In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors;

Independent Auditors' Report to the members of Varun Beverages Limited, on the Consolidated Financial Statements for the year ended 31 December 2018 (Cont'd)

- c) The consolidated financial statements dealt with by this report are in agreement with the relevant books of account maintained for the purpose of preparation of the consolidated financial statements;
- d) In our opinion, the aforesaid consolidated financial statements comply with Ind AS specified under Section 133 of the Act;
- e) On the basis of the written representations received from the directors of the Holding Company and taken on record by the Board of Directors of the Holding Company and the reports of the other statutory auditors of its associate companies covered under the Act, none of the directors of the Group companies and its associate companies covered under the Act, are disqualified as on 31 December 2018 from being appointed as a director in terms of Section 164(2) of the Act.
- f) With respect to the adequacy of the internal financial controls over financial reporting of the Holding Company and its associate companies covered under the Act and the operating effectiveness of such controls, refer to our separate report in 'Annexure 1'; and
- g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditor's) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on separate financial statements as also the other financial information of the subsidiaries and associates:
 - (i) The consolidated financial statements disclose the impact of pending litigations

on the consolidated financial position of the Group and its associates as detailed in Note 46 to the consolidated financial statements.

- (ii) Provision has been made in the consolidated financial statements, as required under the applicable law or Ind AS, or material foreseeable losses, if any, on long-term contracts including derivative contracts, as detailed in Note 28 to the consolidated financial statements;
- (iii) There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Holding Company and its associate companies covered under the Act during the year ended 31 December 2018; and
- (iv) The disclosure requirements relating to holdings as well as dealings in specified bank notes were applicable for the period from 8 November 2016 to 30 December 2016 which are not relevant to these consolidated financial statements. Hence, reporting under this clause is not applicable.

Annexure 1 to the Independent Auditors' Report of even date to the members of Varun Beverages Limited on the Consolidated Financial Statements for the year ended 31 December 2018

Annexure 1

Independent Auditor's Report on the Internal Financial Controls under Clause (i) of Subsection 3 of Section 143 of the Companies Act, 2013 ('the Act')

 In conjunction with our audit of the consolidated financial statements of Varun Beverages Limited ('the Holding Company') and its subsidiaries (the Holding Company and its subsidiaries together referred to as 'the Group') and its associates as at and for the year ended 31 December 2018, we have audited the internal financial controls over financial reporting ('IFCoFR') of the Holding Company and its two associate companies, which are companies covered under the Act, as at that date.

Management's Responsibility for Internal Financial Controls

2. The respective Board of Directors of the Holding Company and its two associate companies, which are companies covered under the Act, are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the respective company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the company's business, including adherence to the company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

3. Our responsibility is to express an opinion on the IFCoFR of the Holding Company and its two associate companies, as aforesaid, based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI and deemed to be prescribed under Section 143(10) of the Act, to the extent applicable to an audit of IFCoFR, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate IFCoFR were established and maintained and if such controls operated effectively in all material respects.

- 4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the IFCoFR and their operating effectiveness. Our audit of IFCoFR includes obtaining an understanding of IFCoFR, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
- 5. We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the IFCoFR of the Holding Company and its two associate companies as aforesaid.

Meaning of Internal Financial Controls over Financial Reporting

A company's IFCoFR is a process designed to 6 provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's IFCoFR include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

STATUTORY REPORTS

Annexure 1 to the Independent Auditors' Report of even date to the members of Varun Beverages Limited on the Consolidated Financial Statements for the year ended 31 December 2018 (Cont'd)

Inherent Limitations of Internal Financial Controls over Financial Reporting

7. Because of the inherent limitations of IFCoFR, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the IFCoFR to future periods are subject to the risk that the IFCoFR may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion and based on the consideration of the reports of the other auditors on IFCoFR of the two associate companies, the Holding Company and its two associate companies which are companies covered under the Act, have in all material respects, adequate internal financial controls over financial reporting and such controls were operating effectively as at 31 December 2018, based on the internal control over financial reporting criteria established by the respective Company considering the essential components of internal financial controls stated in the Guidance Note issued by the ICAI.

Other Matters

9. We did not audit the IFCoFR in so far as it relates to two associate companies, which are companies

covered under the Act, in respect of which, the Group's share of net profit (including other comprehensive income) of₹30.20 million for the year ended 31 December 2018, has been considered in the consolidated financial statements. The IFCoFR in so far as it relates to such associate companies have been audited by other auditors whose reports have been furnished to us by the management and our report on the adequacy and operating effectiveness of the IFCoFR for the Holding Company and its two associate companies, as aforesaid, under Section 143(3)(i) of the Act in so far as it relates to such associate companies is based solely on the reports of the auditors of such companies. Our opinion is not modified in respect of this matter with respect to our reliance on the work done by and on the reports of the other auditor.

Notes:

(a) Amendment to Ind AS 7

The amendments to Ind AS 7 'Statement of Cash Flows' require the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement. This amendment has become effective from 01 January 2018 and the required disclosure is made below.

CORPORATE OVERVIEW

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

1. Corporate information

Varun Beverages Limited ("VBL" or "the Company" or "Holding Company") is a public limited Company domiciled in India. Its registered office is at F-2/7, Okhla Industrial Area, Phase-I, New Delhi- 110 020. The Company's equity shares are listed on Bombay Stock Exchange Limited (BSE) and National Stock Exchange of India (NSE). The Company was incorporated on 16 June 1995 under the provisions of the Companies Act 1956.

The Company together with its subsidiaries and associates (hereinafter, "the Group") is engaged in manufacturing, selling, bottling and distribution of beverages of Pepsi brand in geographically pre-defined territories of India, Sri Lanka, Nepal, Zambia, Morocco and Zimbabwe as per franchisee agreement with PepsiCo India Holdings Private Limited ("PepsiCo India") and its affiliates. The sale of Group's products is seasonal.

2. Basis of preparation

These Consolidated Financial Statements ("the CFS") of the Group have been prepared in accordance with the Indian Accounting Standards ("Ind AS") and comply with requirements of Ind AS, stipulations contained in Schedule III (revised) as applicable under Section 133 of the Companies Act, 2013 ("the Act"), the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other pronouncements/ provisions of applicable laws.

These consolidated financial statements of the Group are authorised for issue on 20 February 2019 in accordance with a resolution of the Board of Directors. Board of Directors permits the revision to the standalone financial statements after obtaining necessary approvals or at the instance of regulatory authorities as per provisions of the Companies Act, 2013.

The CFS have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- i. Derivative financial instruments;
- ii. Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments);

- Defined benefit plans- plan assets measured at fair value; and
- iv. Share based payments;

The Group presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current if it satisfies any of the following conditions:

- i. Expected to be realised or intended to sold or consumed in normal operating cycle;
- ii. Held primarily for the purpose of trading;
- iii. Expected to be realised within twelve months after the reporting period;
- iv. Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current if it satisfies any of the following conditions:

- i. It is expected to be settled in normal operating cycle;
- ii. It is held primarily for the purpose of trading;
- iii. It is due to be settled within twelve months after the reporting period; or
- iv. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and its realisation in cash and cash equivalents. The Group has identified twelve months as its operating cycle.

All amounts disclosed in the CFS and notes have been rounded off to the nearest million as per

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

the requirement of Schedule III to the Act, unless otherwise stated.

2.1. Basis of consolidation

The consolidated financial statements comprise the financial statements of the Company, its subsidiaries and associate. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights result in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- a) The contractual arrangement with the other vote holders of the investee;
- b) The rights arising from other contractual arrangements;
- c) The Group's voting rights and potential voting rights; and
- d) The size of the Group's holding of voting rights relative to the size and dispersion of the holdings of the other voting rights holders.

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Group gains control until the date the Group ceases to control the subsidiary.

Consolidated financial statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances. If a member of the Group uses accounting policies other than those adopted in the consolidated financial statements for like transactions and events in similar circumstances, appropriate adjustments are made to that member's financial statements in preparing the consolidated financial statements to ensure conformity with the Group's accounting policies.

An associate is an entity over which the Group has significant influence, i.e., the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The financial statements of all entities used for the purpose of consolidation are drawn up to same reporting date as that of the parent company, i.e., year ended 31 December. When the end of the reporting period of the parent is different from that of a subsidiary/ associate, the subsidiary/ associate prepares, for consolidation purposes, additional financial information as of the same date as the financial statements of the parent to enable the parent to consolidate the financial information of the subsidiary, unless it is impracticable to do so.

The following consolidation procedures are adopted:

Subsidiary:

 a) Combine like items of assets, liabilities, equity, income, expenses and cash flows of the parent with those of its subsidiaries. For this purpose, income and expenses of the subsidiary are based on the amounts of the assets and liabilities recognised in the consolidated financial statements at the acquisition date;

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

- b) Offset (eliminate) the carrying amount of the parent's investment in each subsidiary and the parent's portion of equity of each subsidiary. Business combinations policy explains how to account for any related goodwill; and
- c) Eliminate in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the group (profits or losses resulting from intragroup transactions that are recognised in assets, such as inventory and fixed assets, are eliminated in full). Ind AS 12 'Income Taxes' applies to temporary differences that arise from the elimination of profits and losses resulting from intragroup transactions.

Profit or loss and each component of Other Comprehensive Income ("OCI") are attributed to the equity holders of the parent of the Group and to the noncontrolling interests, even if this results in the non-controlling interests having a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it:

- Derecognises the assets (including goodwill) and liabilities of the subsidiary;
- Derecognises the carrying amount of any non-controlling interests;
- Derecognises the cumulative translation differences recorded in equity;
- Recognises the fair value of the consideration received;
- Recognises the fair value of any investment retained;
- Recognises any surplus or deficit in Consolidated Statement of Profit and Loss;

Reclassifies the parent's share of components previously recognised in OCI to profit or loss or retained earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities

Associates:

Interests in associates are accounted for using the equity method, after initially being recognised at cost in the consolidated balance sheet. When a member of the Group transacts with an associate of the Group, profits and losses from transactions with the associate are recognised in the CFS only to the extent of interests in the associate that are not related to the Group.

The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment.

The Consolidated Statement of Profit and Loss reflects the Group's share of the results of operations of the associate. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate. The aggregate of the Group's share of profit or loss of an associate is shown on the face of the Consolidated Statement of Profit and Loss.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate is impaired. If there is such evidence, the Group calculates the amount of impairment as the

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

difference between the recoverable amount of the associate and its carrying value, and then recognises the loss as 'Share of profit of an associate' in the Consolidated Statement of Profit and Loss.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant and the fair value of the retained investment and proceeds from disposal is recognised in the Consolidated Statement of Profit and Loss.

3. Summary of significant accounting policies

a) Fair value measurements

The Group measures financial instruments at fair value which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

b) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured, regardless of when the payment is being made. The Group has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excludes taxes/duties collected on behalf of the government.

Sale of goods

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Excise duty is a levy on manufacture irrespective of ultimate sale of goods and hence the recovery of excise duty flows to the Group on its own account. Accordingly, revenues from sale of goods are

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

stated gross of excise duty. GST, sales tax and value added tax (VAT) are not received by the Group on its own account but collected on behalf of the government and accordingly, are excluded from revenue.

Interest income

Interest income is recognised on time proportion basis taking into account the amount outstanding and rate applicable. For all debt instruments measured at amortised cost, interest income is recorded using the effective interest rate ("EIR"). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial assets. Interest income is included in finance income in the Consolidated Statement of Profit and Loss.

Dividends

Dividend is recognised when the Group's right to receive the payment is established, which is generally when shareholders approve the dividend.

Services rendered

Revenue from service related activities is recognised as and when services are rendered and on the basis of contractual terms with the parties.

c) Inventories

Inventories are valued as follows:

i. Raw materials, components and stores and spares: At lower of cost and net realisable value. Cost of inventory comprises all costs of purchases, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition and is determined on a moving weighted average cost basis. However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.

- Work-in-progress: At lower of cost and net realisable value. Cost for this purpose includes material, labour and appropriate allocation of overheads including depreciation. Cost is determined on a weighted average basis.
- iii. Intermediate goods/ Finished goods:
 - a) Self manufactured At lower of cost and net realisable value. Cost for this purpose includes material, labour and appropriate allocation of overheads. Cost is determined on a weighted average basis.
 - b) Traded At lower of cost and net realisable value. Cost of inventory comprises all costs of purchases, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition and is determined on a weighted average cost basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. Provision for obsolescence is determined based on management's assessment and is charged to the Consolidated Statement of Profit and Loss.

d) Property, plant and equipment Measurement at recognition:

Property, plant and equipment and capital work in progress is stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

Cost comprises the purchase price, borrowing costs if capitalization criteria are met and any directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. The cost of an item of property, plant and equipment is recognised as an asset if, and only if:

- a. it is probable that future economic benefits associated with the item will flow to the entity; and
- b. the cost of the item can be measured reliably.

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increased the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing assets, including dayto- day repair and maintenance expenditure and cost of replacing parts, are charged to the Consolidated Statement of Profit and Loss for the period during which such expenses are incurred. Expenditure directly relating to construction activity is capitalized. Indirect expenditure incurred during construction period is capitalized as a part of indirect construction cost to the extent the expenditure is related to construction or is incidental thereto. Other indirect costs incurred during-the construction periods which are not related to construction activity nor are incidental thereto are charged to the Consolidated Statement of Profit and Loss.

Value for individual assets acquired for a consolidated price, the consideration is apportioned to the various assets on a fair value basis as determined by competent valuers.

Depreciation:

The management has estimated, supported by technical assessment, the useful lives of property, plant and equipment. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used. Depreciation is calculated on a straightline basis over the estimated useful lives of the assets as follows:

| Description | Useful lives (upto) |
|---------------------|------------------------|
| Leasehold land | Over lease period |
| Buildings - factory | 20-50 years |
| Buildings - others | 59-60 years |

| Description | Useful lives (upto) |
|------------------------|------------------------|
| Plant and equipment | 4-20 years |
| Furniture and fixtures | 5-10 years |
| Delivery vehicles | 4-10 years |
| Vehicles (other than | 4-7 years |
| delivery vehicles) | |
| Office equipment | 4-10 years |
| Computer equipment | 3-5 years |
| Containers | 4-10 years |
| Post-mix vending | 7-10 years |
| machines and | |
| refrigerators | |
| (Visi-Coolers) | |

Freehold land is not depreciated.

Depreciation on property, plant and equipment is provided over the useful life of assets as specified in Schedule II to the Act except where the management, based on independent technical assessment, depreciates certain assets are over estimated useful lives which are different from the useful life prescribed in the Schedule II to the Act.

The Group has used the remaining useful lives to compute depreciation on its property, plant and equipment, acquired under the business transfer agreement based on external technical evaluation.

Depreciation on property, plant and equipment which are added/disposed off during the year is provided on a pro-rata basis with reference to the month of addition/deletion.

The Company has technically evaluated all the property, plant and equipment for determining the separate identifiable assets having different useful lives under the component approach. On technical evaluation of all separate identifiable components, the management is of the opinion that they do not have any different useful life from that of the principal asset.

In case of revaluation of leasehold land, the resulting amortisation of the total revalued amount is expensed off to the Consolidated Statement of Profit and Loss.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

Derecognition:

An item of property, plant and equipment and any significant part initially recognised is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds or amount of security deposit adjusted and the carrying amount of the asset) is included in the Consolidated Statement of Profit and Loss when the asset is de-recognised.

Breakages of containers are adjusted on 'first bought first broken' basis, since it is not feasible to specifically identify the broken containers in the fixed assets records.

e) Intangible assets

Intangible assets are initially recognised at:

- a. In case the assets are acquired separately then at cost,
- b. In case the assets are acquired in a business combination or under any asset purchase agreement at fair value.

Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses.

Intangible assets with finite useful life are assessed for impairment whenever there is an indication that the intangible assets may be impaired.

Amortisation of other intangible assets are amortised on a straight-line basis using the estimated useful life as follows:

| Intangible assets | Useful lives (years) |
|-----------------------|----------------------|
| Software | 3-5 years |
| Market infrastructure | 5 years |
| Distribution network | 8 years |

The franchise rights and trademarks acquired as part of business combinations normally have a remaining legal life of not exceeding ten years but is renewable every ten years at little cost and is well established. The Group intends to renew these rights continuously and evidence supports its ability to do so. An analysis of product life cycle studies, market and competitive trends provides evidence that the product will generate net cash inflows for the Group for an indefinite period. Therefore, these rights have been carried at cost without amortisation, but is tested for impairment annually, at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

f) Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs, if any, directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized, if any. All other borrowing costs are expensed to the Consolidated Statement of Profit and Loss in the period in which they occur.

g) Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Group as a lessee

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Group is classified as a finance lease.

Finance leases are capitalised at the commencement of the lease at the inception

date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the Consolidated Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on the borrowing costs.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Operating lease payments are recognised as an expense in the Consolidated Statement of Profit and Loss on a straight-line basis over the lease term.

Group as a lessor

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Group to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Leases in which the Group does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on straight line basis over the term of the relevant lease.

h) Employee benefits

Contribution to provident and other funds

Retirement benefit in the form of provident fund is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Gratuity

Gratuity is a defined benefit scheme. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. The Group recognises termination benefit as a liability and an expense when the Group has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than twelve months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market vields at the balance sheet date on government bonds.

Gratuity liability is accrued on the basis of an actuarial valuation made at the end of the year. The actuarial valuation is performed by an independent actuary as per projected unit credit method, except for few subsidiary companies where gratuity liability is provided on full cost basis.

Re-measurements, comprising actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

Past service costs are recognised in Consolidated Statement of Profit and Loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Group recognises related restructuring cost

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Group recognises the following changes in the net defined benefit obligation as an expense in the Consolidated Statement of Profit and Loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

Compensated absences

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit which are computed based on the actuarial valuation using the projected unit credit method at the year end except for few subsidiary companies where accumulated leave liability is provided on full cost basis. Actuarial gains/losses are immediately taken to the Consolidated Statement of Profit and Loss and are not deferred. The Group presents the leave as a current liability in the balance sheet to the extent it does not have an unconditional right to defer its settlement for twelve months after the reporting date. Where Group has the unconditional legal and contractual right to defer the settlement for a period beyond twelve months, the balance is presented as a non-current liability.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

All other employee benefits payable/available within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, bonus, etc. are recognised in the Consolidated Statement of Profit and Loss in the period in which the employee renders the related service.

i) Share-based payments

Employees (including senior executives) of the Group receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments, which are classified as equitysettled transactions.

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model. That cost is recognised as an employee benefit expense with a corresponding increase in 'Share option outstanding account' in other equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest.

Service non-market performance and conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Nonvesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms had not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through Consolidated Statement of Profit and Loss.

j) Foreign currency transactions and translations

The Group's consolidated financial statements are presented in INR, which is also the parent company's functional currency. Transactions in foreign currencies are initially recorded by the Group's entities at their respective functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Group uses an average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on restatement of the Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

Exchange differences pertaining to long-term foreign currency monetary items obtained or given on or before 31 December 2016: Exchange differences arising on conversion of long term foreign currency monetary items used for acquisition of depreciable fixed assets are added to the cost of fixed assets and is depreciated over the remaining life of the respective fixed asset and in other cases, is recorded under the head 'Foreign Currency Monetary Item Translation Difference Account' and is amortised over the period of maturity of underlying long term foreign currency monetary items, in accordance with the option available under Ind AS 101.

Exchange differences pertaining to long-term foreign currency monetary items obtained or given on or after 01 January 2017: Exchange differences arising on conversion of long term foreign currency monetary items obtained or given is recorded in the Consolidated Statement of Profit and Loss.

Group companies

On consolidation, the assets and liabilities of foreign operations are translated into INR at the rate of exchange prevailing at the reporting date and their statements of profit and loss are translated at exchange rates prevailing at the dates of the transactions. For practical reasons, the group uses an average rate to translate income and expense items, if the average rate approximates the exchange rates at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognised in profit or loss.

k) Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, deferred tax assets or liabilities, and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS12 'Income Taxes' and Ind AS19 'Employee Benefits' respectively. When a liability assumed is recognised at the acquisition date but the related costs are not deducted in determining taxable profits until a later period, a deductible temporary difference arises which results in a deferred tax asset. A deferred tax asset also arises when the fair value of an identifiable asset acquired is less than its tax base.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

If the business combination is achieved in stages, any previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 'Financial Instruments' ("Ind AS 109"), is measured at fair value with changes in fair value recognised in Consolidated Statement of Profit and Loss. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit

and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit.

Any impairment loss for goodwill is recognised in Consolidated Statement of Profit and Loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cashgenerating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cashgenerating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

Business combinations involving entities that are controlled by the Group are accounted for using the 'pooling of interests' method as follows:

- The assets and liabilities of the combining entities are reflected at their carrying amounts;
- Except for adjustments made to harmonise accounting policies, no adjustments are made to reflect fair values, or recognise any new assets or liabilities;

- The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee or is adjusted against general reserve;
- The identity of the reserves is preserved and the reserves of the transferor become the reserves of the transferee; and
- The difference, if any, between the amounts recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves.

I) Government grants

Grants from the Government are recognised when there is reasonable assurance that all underlying conditions will be complied with and that the grant will be received.

When loans or similar assistance are provided by governments or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. That grant is recognised in the Consolidated Statement of Profit and Loss under 'other operating revenue'. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

Government grants related to assets, including non-monetary grants at fair value, are presented in the balance sheet by recording the grant as deferred income which is released to the Consolidated Statement of Profit and Loss on a systematic basis over the useful life of the asset.

Grants related to income are recognised as income on a systematic basis in the Consolidated Statement of Profit and Loss over the periods

STATUTORY REPORTS

necessary to match them with the related costs, which they are intended to compensate and are presented as 'other operating revenues'.

Total government grant recognised in the Statement of Profit and Loss under the head 'Other operating revenue' amounts to ₹ 966.62 (31 December 2017: ₹ 885.07) under different industrial promotion tax exemption schemes.

m) Taxes

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current and deferred tax.

Current income tax

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 and respective local jurisdictions of members of the Group.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or in equity).

Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their book bases. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Deferred tax liabilities are recognised for all taxable temporary differences except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries and associate, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of deductible temporary differences associated with investments

in subsidiaries and associate, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

Deferred income taxes are not provided on the undistributed earnings of subsidiaries where it is expected that the earnings of the subsidiary will not be distributed in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Minimum Alternate Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the relevant members of the Group will pay normal income tax during the specified period. Such asset is reviewed at each reporting period end and the adjusted based on circumstances then prevailing.

Deferred tax assets are recognised on the unrealized profit for all the inter-company sale/ purchase eliminations of property, plant and equipment and inventories.

Deferred tax on business combination

When a liability assumed is recognized at the acquisition date but the related costs are not deducted in determining taxable profits until a later period, a deductible temporary difference arises which results in a deferred tax asset. A deferred tax asset also arises when the fair value of an identifiable asset acquired is less than its tax base. In both cases, the resulting deferred tax asset affects goodwill.

n) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments. The business activities of the Group predominantly fall within a single operating segment, i.e., manufacturing and sale of beverages. The Group operates in two principal geographical areas, namely, India and other countries or 'outside India'. The Group prepares its segment information in conformity with the accounting policies adopted for preparing the CFS.

o) Discontinued operations

A discontinued operation is a component of the Group that either has been disposed of, or is classified as held for sale, and:

- Represents a separate major line of business or geographical area of operations;
- Is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations; or
- Is a subsidiary acquired exclusively with a view to resale.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the Consolidated Statement of Profit and Loss

p) Impairment of non-financial assets

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded company's or other available fair value indicators.

The Group bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Group's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Group extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Consolidated Statement of Profit and Loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Consolidated Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

q) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

For purposes of subsequent measurement, financial assets are classified as follows:

a) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost where the asset is held within a business model whose objective is to hold assets for collecting contractual cash flows; and contractual terms of the asset give rise to cash flows on specified dates that are solely payments of principal and interest.

After initial measurement, such financial assets are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The interest income from these financial assets is included in

other income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

b) Debt instruments at Fair Value Through Other Comprehensive Income

Assets that are held for collection of contractual cashflows and for selling the financial assets, where the cash flow represent solely payments of principal and interest, are measured at fair value through other comprehensive income ("FVOCI"). The Group has not designated any debt instrument in this category.

c) Debt instruments at Fair Value Through Profit or Loss

Fair Value Through Profit or Loss ("FVTPL") is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Group may elect to designate a debt instrument which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the Consolidated Statement of Profit and Loss. The Group has not designated any debt instrument in this category.

d) Equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 'Business Combinations' applies are Ind AS classified as at FVTPL. Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the Consolidated Profit and Loss.

For all other equity instruments, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair values. The Group makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to profit or loss, even on sale of investment. However, the Group may transfer the cumulative gain or loss within equity.

De-recognition

A financial asset is derecognised when the contractual rights to receive cash flows from the asset have expired or the Group has transferred its rights to receive the contractual cash flows from the asset in a transaction in which substantially all the risks and rewards of ownership of the asset are transferred.

Impairment of financial assets

The Group measures the Expected Credit Loss ("ECL") associated with its assets based on historical trends, industry practices and the general business environment in which it operates. The impairment methodology applied depends on whether there has been a significant increase in credit risk. ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the Consolidated Statement of Profit and Loss under the head 'other expenses'.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Consolidated Financial Statements for the year ended 31 December 2018

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

a) Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses are recognised in the Consolidated Statement of Profit or Loss, except for those attributable to changes in own credit risk, which are recognised in OCI. These gains/ loss are not subsequently transferred to the profit or loss.

b) Financial liabilities at amortised cost

After initial recognition, financial liabilities designated at amortised costs are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortisation process. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The amortisation is included as finance costs in the Consolidated Statement of Profit and Loss.

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Consolidated Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derivative financial instruments

Derivatives are initially recognised at fair value on the date of executing a derivative contract and are subsequently remeasured to their fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in the profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

r) Non-current assets and liabilities classified as held for sale

Non-current assets classified as held for sale are presented separately in the Balance Sheet and measured at the lower of their carrying amounts immediately prior to their classification as held

for sale and their fair value less costs to sell. Once classified as held for sale, the assets are not subject to depreciation or amortisation. Any gain or loss arises on remeasurement or sale is included in Consolidated Statement of Profit and Loss.

If an entity has classified an asset (or disposal group) as held for sale, but the held-for-sale criteria as specified in Ind AS 105 are no longer met, the Group ceases to classify the asset (or disposal group) as held for sale.

The Group measures a non-current asset that ceases to be classified as held for sale (or ceases to be included in a disposal group classified as held for sale) at the lower of:

- a) its carrying amount before the asset (or disposal group) was classified as held for sale, adjusted for any depreciation, amortisation or revaluations that would have been recognised had the asset (or disposal group) not been classified as held for sale, and
- b) its recoverable amount at the date of the subsequent decision not to sell.

s) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and shortterm deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

t) Dividend distribution to equity holders of the parent

The Group recognises a liability to make cash or non-cash distributions to equity holders of the parent when the distribution is authorised and the distribution is no longer at the discretion of the Group. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

u) Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Consolidated Statement of Profit and Loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

v) Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Group or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Group does not recognize a contingent liability but discloses its existence in the financial statements. Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

w) Earnings per share

Basic earnings/ (loss) per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares

outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events, other than conversion of potential equity shares, that have changed the number of equity shares outstanding without a corresponding change in resources.

For the purpose of calculating diluted earnings/ (loss) per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

3.1. Significant accounting judgements, estimates and assumptions

The preparation of the Group's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In particular, the Group has identified the following areas where significant judgements, estimates and assumptions are required. Further information on each of these areas and how they impact the various accounting policies are described below and also in the relevant notes to the consolidated financial statements. Changes in estimates are accounted for prospectively.

i) Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the consolidated financial statements:

a) Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Group, including legal, contractor, land access and other claims. By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

b) Recognition of deferred tax assets

The extent to which deferred tax assets can be recognised is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carry-forward can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group bases its assumptions and estimates on parameters available when the consolidated financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market change or circumstances arising beyond the control of the Group. Such changes are reflected in the assumptions when they occur.

a) Useful lives of tangible/intangible assets The Group reviews its estimate of the useful lives of tangible/intangible assets at each

reporting date, based on the expected utility of the assets.

b) Defined benefit obligation

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. In view of the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

c) Inventories

The Group estimates the net realisable values of inventories, taking into account the most reliable evidence available at each reporting date. The future realisation of these inventories may be affected by future technology or other market-driven changes that may reduce future selling prices.

d) Business combinations

The Group uses valuation techniques when determining the fair values of certain

assets and liabilities acquired in a business combination.

e) Impairment of non-financial assets and goodwill

In assessing impairment, Group estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

f) Fair value measurement of financial instruments

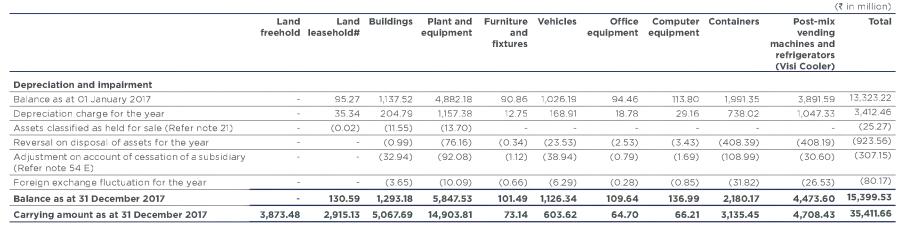

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Footnotes to Note 5 and 6:

The Group has considered the related provisions of Ind AS 38 on 'Intangibles Assets' which permit certain intangible assets to have an indefinite life and accordingly the carrying value of these franchisee rights have been considered to have an indefinite life. These franchisee rights meet the prescribed criteria of renewal at nominal cost, renewal at no specific conditions attached and is supported by evidences of being renewed. Management is of the opinion that, based on an analysis of all of the relevant

factors, there is no foreseeable limit to the period over which the franchisee rights are expected to generate net cash inflows for the Group.

Goodwill and franchise rights with indefinite useful lives are tested for impairment annually, or more frequently if the events and circumstances indicate that the carrying value may be impaired. The useful life of an intangible asset with an indefinite useful life is reviewed annually to determine whether the useful life assessment continues to be supportable.

The assumptions used in this impairment assessment are most sensitive to following:

- a) Weighted average cost of capital "WACC" of 13.82%.
- b) For arriving at the terminal value, approximate growth rate of 5% is considered.
- c) Number of years for which cash flows were considered are 5 years.

No impairment loss was identified on the above assessment.

The amount of contractual commitments for the acquisitions of intangible assets are disclosed in Note 47.

| Retirement age (Years) | 55-65 years | 55-65 years | 58-65 years | 58-65 years | |

These assumptions were developed by management of the respective company/entity with the assistance of independent actuaries. Discount factors are determined close to each year-end by reference to market yields of high quality corporate bonds that are denominated in the respective currency in which the benefits will be paid and that have terms to maturity approximating to the terms of the related pension obligations. Other assumptions are based on current actuarial benchmarks and respective management's historical experience.

The defined benefit obligation and plan assets are composed by geographical locations as follows:

| | All amounts ₹ in million, unless otherwise stated | | | |
|----------------------------|---|---------------|--------|--|
| 31 December 2018 | India | Outside India | Total | |
| Defined benefit obligation | 773.06 | 72.40 | 845.45 | |

| Defined benefit obligation | 573.50 | 73.58 | 647.08 |
| Fair value of plan assets | 38.66 | - | 38.66 |

A quantitative sensitivity analysis for significant assumption is as shown below:

| | Sensitivity level | | Gratuity | | Compensated absences | |
|-----------------|---------------------|---------------------|---------------------|---------------------|-----------------------------|---------------------|
| | 31 December 2018 | 31 December 2017 | 31 December 2018 | 31 December 2017 | 31 December 2018 | 31 December 2017 |

| | -1% | -1% | 13.83 | 11.81 | 4.89 | 3.77 |

The sensitivity analysis above has been determined based on reasonably possible changes of the assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

| Risk associated: | |
|------------------------------------|--|
| Investment risk | The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan liability is funded and return on plan assets is below this rate, it will create a plan deficit. |
| Interest risk (discount rate risk) | A decrease in the bond interest rate (discount rate) will increase the plan liability. |
| Mortality risk | The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants. For the purpose of these consolidated financial statements Indian Assured Lives Mortality (2006-08) ultimate table and A 67/70 mortality table issued by Institute of Actuaries, London, have been used. A change in mortality rate will have a bearing on the plan's liability. |
| Salary risk | The present value of the defined benefit plan liability is calculated with the assumption of salary increase rate of plan participants in future. Deviation in the rate of increase of salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability. |

48. Pursuant to transfer pricing legislations under the Income-tax Act, 1961, the Holding Company is required to use specified methods for computing arm's length price in relation to specified international and domestic transactions with its associated enterprises. Further, the Holding Company is required to maintain prescribed information and documents in relation to such transactions. The appropriate method to be adopted will depend on the nature of transactions/ class of transactions, class of associated persons, functions performed and other factors, which have been prescribed. The Holding Company is in the process of updating its transfer pricing documentation for the current financial year. Based on the preliminary assessment, the management is of the view that the update would not have a material impact on the tax expense recorded in these consolidated financial statements. Accordingly, these consolidated financial statements do not include any adjustments for the transfer pricing implications, if any.

Goodwill

Goodwill of ₹ 19.40 primarily relates to growth expectations, expected future profitability. Goodwill has been allocated to the beverages business and is deductible for tax purposes.

D. Acquisition of additional stake in Varun Beverages (Zambia) Limited

With effect from 20 February 2017, the Holding Company has acquired additional thirty percent equity, consisting of 15,000 shares, from other minority shareholders, namely, Africa Bottling Company Ltd. and Multi Treasure Ltd. in Varun Beverages (Zambia) Limited for a consideration of ₹ 685.96 million (USD 10.24 million), payable to acquiree, thereby increasing the Holding Company's ownership stake to ninety percent.

As Varun Beverages (Zambia) Limited, was already a subsidiary of the Holding Company, this transaction has not resulted in change in control. Accordingly, difference between the non-controlling interest relatable to thirty percent equity, i.e., ₹ 60.61 million and the value of consideration is directly recognised in other equity in capital reserve. The expenses incurred for acquisition amounting to ₹ 33.20 million are charged to Consolidated Statement of Profit and Loss.

E. Reduction of ownership stake in Varun Beverages Mozambique Limitada

The Holding Company sold 41% equity quota of Varun Beverages Mozambique Limitada to reduce its stake from 51% down to 10% for a consideration of ₹ 0.11 on 02 March 2017. This transaction did not have any material impact on these financial statements.

During the year ended 31 December 2018, the Holding Company sold its 10% stake in Varun Beverages Mozambique Limitada to other shareholder for a consideration of ₹ 0.03.

At the date of disposal, the carrying amounts of net assets of Varun Beverages Mozambique Limitada were as follows:

55. The Holding Company follows calendar year as its financial year as approved by the Company Law Board, New Delhi.

56. Share-based payments

Description of share based payments arrangements

During the year ended 31 December 2013, the Holding Company granted stock options to certain employees of the Holding Company and its subsidiaries. The Holding Company has the following share-based payment arrangements for employees.

A. Employee Stock Option Plan 2013 (ESOP 2013)

The ESOP 2013 ('the Plan') was approved by the Board of Directors and the shareholders on 13 May 2013 and further amended by Board of Directors on 01 December 2015. The plan entitles key managerial personnel and employees of the Holding Company and its subsidiaries to purchase shares in the Holding Company at the stipulated exercise price, subject to compliance with vesting conditions. Stock options can be settled by issue of equity shares. As per the Plan, holders of vested options are entitled to purchase one equity share for every option at an exercise price of ₹149.51, which is 1.14 % above the stock price at the date of grant, i.e., 13 May 2013.

The expense recognised for employee services received during the respective years is ₹ Nil.

Movements during the year

The following table illustrates the number and weighted average exercise prices (WAEP) of, and changes in, share options during the year:

| | 31 December 2018 | | 31 Decem | ber 2017 |
|--|------------------|--------|------------|----------|
| | Number | WAEP | Number | WAEP |
| Outstanding at the beginning of the year | 78,285 | 149.51 | 3,52,700 | 149.51 |
| Options exercised during the year | (55,000) | 149.51 | (2,74,415) | 149.51 |
| Outstanding at the end of the year | 23,285 | | 78,285 | |
| Exercisable at the end of the year | 23,285 | - | 78,285 | - |

The fair values of options granted under new plan were determined using a variation of the binomial option pricing model that takes into account factors specific to the share incentive plans, such as the vesting period. The following principal assumptions were used in the valuation:

| | Options vested and exercised | Options vested and unexercised |
|---|---------------------------------|--------------------------------------|
| Number of options | 20,06,550 | 6,68,850 |
| Fair value on grant date (₹) | 65.92 | 66.44 |
| Share price at grant date (₹) | 147.83 | 147.83 |
| Exercise price (₹) | 149.51 | 149.51 |
| Expected volatility* | 16.63% | 16.63% |
| Expected life | 7.56 years | 7.64 years |
| Expected dividends | 0% | 0% |
| Risk-free interest rate (based on government bonds) | 7.53% | 7.53% |

*The measure of volatility has been calculated based on the average volatility of closing market price of the BSE 500 during the period 01 January 2013 to 31 December 2013.

| Particulars of Scheme | |

B. Employee Stock Option Plan 2016 ("ESOP 2016")

The ESOS 2016 ('the Scheme') was approved by the Board of Directors and the shareholders on 27 April 2016. The Scheme entitles key managerial personnel and employees of the Holding Company and its subsidiaries to purchase shares in the Holding Company at the stipulated exercise price, subject to compliance with vesting conditions. Stock options can be settled by issue of equity shares. No options under this scheme have been granted upto year ended 31 December 2018.

57. Financial instruments risk

Financials risk management objectives and policies

The Group is exposed to various risks in relation to financial instruments. The main types of financial risks are market risk, credit risk and liquidity risk.

The respective management of the Holding Company and other companies/entities comprising the Group monitors and manages the financial risks relating to the operations of the respective entity/company on a continuous basis. The Group's risk management is coordinated at head office, in close cooperation with the management of respective entity/company, and focuses on actively securing the short to medium-term cash flows and simultaneously minimising the exposure to volatile financial markets. Long-term financial investments are managed to generate lasting returns.

The Group does not engage in the trading of financial assets for speculative purposes. The most significant financial risks to which the Group is exposed are described below.

57.1 Market risk analysis

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. The Group is exposed to market risk through its use of financial instruments and specifically to currency risk and interest rate risk, which result from its operating, investing and financing activities. Contracts to hedge exposures in foreign currencies, interest rates etc. are entered into wherever considered necessary by the management.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The functional currency of the Holding Company is Indian Rupees ('INR' or '₹'). Most of the transactions of the Holding Company and other entities/companies are carried out in the respective local currency. Exposures to currency exchange rates mainly arise from the overseas sales and purchases and external commercial borrowings etc.

To mitigate its exposure to foreign currency risk, the Group continuously monitors non-INR cash flows and hedging contracts are entered into wherever considered necessary.

The carrying amounts of the Group's foreign currency denominated monetary items are restated at the end of each reporting period. Foreign currency denominated financial assets and liabilities which expose the Group to currency risk are as follows:

The foreign currency sensitivity of profit and equity in regards to the Group's financial assets and financial liabilities considering 'all other things being equal' and ignoring the impact of taxation. It assumes a +/- 1% change of the respective countries exchange rates (i.e. local currency to foreign currency) for the year ended at 31 December 2018 (31 December 2017: +/-1%). These are the sensitivity rates used when reporting foreign currency exposures internally to the key management personnel and represents respective management's assessment of the reasonably possible changes in the foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items at end of each period reported upon. A positive number indicates an increase in profit or equity and vice-versa.

If the INR had strengthened/weakened against respective foreign currency by 1% (31 December 2017: 1%), then impact of such change on profit for the year and equity as at 31 December 2018 and 31 December 2017 will be as below:

| | | | | (₹ in million) |
|------------------|----------------|-------------|--------|----------------|
| | Profit for the | year | Equity | |
| | +1% | -1 % | +1% | -1% |
| 31 December 2018 | 130.74 | (130.74) | 130.74 | (130.74) |
| 31 December 2017 | 97.28 | (97.28) | 97.28 | (97.28) |

Exposures to foreign exchange rates vary during the year depending on the volume of the overseas transactions. Nonetheless, the analysis above is considered to be representative of the Group's exposure to currency risk

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's policy is to minimise interest rate cash flow risk exposures on long-term financing. The Group is exposed to changes in market interest rates as some of the bank and other borrowings are at variable interest rates.

The following table illustrates the sensitivity of profit and equity to a reasonably possible change in interest rates of +/- 1% (31 December 2017: +/- 1%). These changes are considered to be reasonably possible based on management's assessment. The calculations are based on a change in the average market interest rate for each period, and the financial instruments held at each reporting date that are sensitive to changes in interest rates. All other variables are held constant.

Commodity price risk

The Group is affected by the price volatility of certain commodities. Its operating activities require the ongoing purchase of sugar and pet chips and therefore require a continuous supply. In view of volatility of price of sugar and pet chips, the Group also executes various purchase contracts.

Commodity price sensitivity

The following tables shows the effect of price change in sugar and pet chips

Other price sensitivity

The Group is not exposed to any listed equity or listed debt price risk as it does not hold any investments in listed entities.

57.2 Credit risk analysis

Credit risk is the risk that a counterparty fails to discharge an obligation to the Group. The Group is operating through a network of distributors and other distribution partners based at different locations. The Group is exposed to this risk for various financial instruments, for example loans granted, receivables from customers, deposits placed etc. The Group's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at end of each reporting period, as summarised below:

| | | (₹ in million) |
|--|---------------------------|----------------|
| Particulars | As at 31 December 2018 | |
| Classes of financial assets-carrying amounts: | | |
| Investments (non-current) | 0.01 | 0.04 |
| Loans (non-current and current) | 216.45 | 193.42 |
| Others non-current financial assets | 8.34 | 8.96 |
| Trade receivables | 1,280.25 | 1,502.45 |
| Cash and cash equivalents | 429.36 | 649.46 |
| Bank balances (other than those classified as cash and cash equivalents above) | 505.44 | 295.14 |
| Others current financial assets | 1,404.78 | 932.40 |
| | 3,844.63 | 3,581.87 |

The Group continuously monitors receivables and defaults of customers and other counterparties, and incorporates this information into its credit risk controls. Appropriate security deposits are kept against the supplies to customers and balances are reconciled at regular intervals. The Group's policy is to deal only with creditworthy counterparties.

In respect of trade and other receivables, the Group is not exposed to any significant credit risk exposure to any single counterparty. Trade receivables consist of a large number of customers of various scales and in different geographical areas. Based on historical information about customer default rates, management considers the credit quality of trade receivables. In case the receivables are not recovered even after regular follow up, measures are taken to stop further supplies to the concerned customer. The expected credit loss is based on the five years historically observed default rates over the expected life of the trade receivables and is adjusted for forward looking estimates.

Movement in expected credit loss allowance on trade receivables and capital advances:-

| | | (₹ in million) |
|--|---------------------------|----------------|
| | As at 31 December 2018 | |
| Balance at the beginning of the year | 400.14 | 252.37 |
| Loss allowance measured at lifetime expected credit loss | 257.40 | 156.74 |
| Foreign currency translation reserve | (3.59) | (8.97) |
| Balance at the end of the year | 653.95 | 400.14 |

The credit risk for cash and cash equivalents, bank deposits including interest accrued thereon and Government grant receivables is considered negligible, since the counterparties are reputable banks with high quality external credit ratings and State Government bodies.

In respect of financial guarantees provided by the Group, the maximum exposure to which the Group is exposed to is the maximum amount which it would have to pay if the guarantee is called upon. Based on the expectation at the end of each reporting period, the Group considers that it is more likely than not that such an amount will not be payable under the guarantees provided.

57.3 Liquidity risk analysis

Liquidity risk is that the Group might be unable to meet its obligations. The Group manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities and considering the maturity profiles of financial assets and other financial liabilities as well as forecast of operational cash inflows and outflows. Liquidity needs are monitored in various time bands, on a day-to-day basis, a week-to-week basis and a month-to-month basis. Long-term liquidity needs for a 180-day and a 360-day lookout period are identified monthly. Net cash requirements are compared to available borrowing facilities in order to determine headroom or any shortfalls.

Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the Group's ability to avail further credit facilities subject to creation of requisite charge on its assets. The Group assessed the concentration of risk with respect to refinancing its debt and concluded it to be low.

As at 31 December 2018, the Group's non-derivative financial liabilities have contractual maturities as summarised below:

| | | | (₹ in million) |
|---------------------------------------|----------------|--------------|--------------------|
| 31 December 2018 | 1 to 12 months | 1 to 5 years | Later than 5 years |

Valuation technique to determine fair value

Cash and cash equivalents, other bank balances, trade receivables, other current financial assets, trade payables, current borrowings and other current financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

- The fair values of the long term borrowings, loans and other deferred payments are determined by using discounted cash flow method using the appropriate discount rate. The discount rate is determined using other similar instruments incorporating the risk associated.
- The fair values of the unquoted instruments and other financial assets and liabilities have been estimated using a discounted cash flow method using the appropriate discount rate. The discount rate is determined using other similar instruments incorporating the risk associated.
- The Group executed derivative financial instruments such as cross currency interest rate swap being valued using valuation techniques, which employs use of market observable inputs. The Group uses mark to market valuation provided by bank for its valuation.

Fair value hierarchy

The financial assets measured at fair value are grouped into the fair value hierarchy as on 31 December 2018 and 31 December 2017 as follows: (also refer note 3(a))

| 31 December 2018 | | | Fair value | e measurement | using |

59. Capital management

For the purpose of the Group's capital management, capital includes issued equity share capital, securities premium and all other equity reserves attributable to the equity shareholders of the Group.

The Group's capital management objectives are:

- to ensure the Group's ability to continue as a going concern
- to provide an adequate return to shareholders
 by pricing products and services commensurately with the level of risk.

The Group manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Group includes within net debt, non-current and current borrowings, deferred payment liabilities, less cash and cash equivalents, excluding discontinued operations, if any.

The amounts managed as capital by the Group for the reporting periods are summarised as follows:

| | | (₹ in million) |
|--|---------------------------|---------------------------|
| Particulars | As at 31 December 2018 | As at 31 December 2017 |
| Non-current borrowings (Refer note 24A) | 19,800.69 | 16,913.68 |
| Current borrowings (Refer note 24B) | 3,776.55 | 3,533.65 |
| Current portion of deferred payment liabilities (Refer note 24D) | 429.58 | 2,976.98 |
| Current maturities of long-term debts (Refer note 24C) | 4,071.85 | 3,112.71 |
| | 28,078.67 | 26,537.02 |
| Less: Cash and cash equivalents (Refer note 15) | 429.36 | 649.46 |
| Net debt | 27,649.31 | 25,887.56 |
| Equity share capital (Refer note 22) | 1,826.42 | 1,825.87 |
| Other equity (Refer note 23) | 18,158.62 | 15,868.41 |
| Total capital | 19,985.04 | 17,694.28 |
| Capital and net debt | 47,634.35 | 43,581.84 |
| Gearing ratio | 58.04% | 59.40% |

In order to achieve this overall objective, the Group's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2018 and 31 December 2017.

Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any borrowing in the reporting periods.

60. Assets pledged as security

The carrying amount of assets pledged as security are:

| | 4 | (₹ in million) |
|--|---------------------------|---------------------------|
| Particulars | As at 31 December 2018 | As at 31 December 2017 |

| Property, plant and equipment (including capital work-in-progress) | 37,725.97 | 32,198.09 |

61. Recent accounting pronouncements (Ind AS issued but not yet effective)

The Ministry of Corporate Affairs ("MCA") issued the Companies (Indian Accounting Standards) Amendments Rules, 2018 and Companies (Indian Accounting Standards) Second Amendments Rules, 2018, notifying Ind AS 115, 'Revenue from Contract with Customers', Appendix B to Ind AS 21, Foreign currency transactions and advance consideration and amendments to Ind AS 20, Government grants. These amendments are in line with recent amendments made by International Accounting Standards Board ("IASB"). These amendments are applicable to the Company from accounting periods beginning on or after 01 January 2019, i.e., from financial year 2019.

Ind AS 115, Revenue from Contract with Customers:

Ind AS 115 supersedes Ind AS 11, Construction Contracts and Ind AS 18, Revenue. Ind AS 115 requires an entity to report information regarding nature, amount, timing and uncertainty of revenue and cash flows arising from contract with customers. The principle of Ind AS 115 is that entity should recognize revenue that demonstrates the transfer of promised goods and services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The standard can be applied either retrospectively to each prior reporting period presented or can be applied retrospectively with recognition of cumulative effects of contracts that are not completed contacts at the date of initial application of the standard.

The Holding Company is evaluating the requirements of the standard and the effect on the financial statements.

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration:

The appendix clarifies that the date of transaction for the purpose of determining the exchange rate to use an initial recognition of the asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration towards such assets, expense or income. If there are multiple payments or receipts of advance, then an entity must determine transaction date for each payment or receipts of advance consideration.

The Holding Company is evaluating the requirements of the amendment and the effect on the financial statements.

Ind AS 20, Government grant:

The amendment provides alternative to recognition of government grants related to assets and non-monetary grant. Government grant related to assets can also be presented by deducting the grant from the carrying amount of the asset and non-monetary grant can be recognised at a nominal amount.

The Holding Company has evaluated the requirements of the amendment and is not expecting to use such options.

- 3. Our responsibility is to express an opinion on these standalone financial statements based on our audit.
- 4. We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the

audit report under the provisions of the Act and the Rules made thereunder.

- 5. We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether these standalone financial statements are free from material misstatement.
- An audit involves performing procedures to obtain 6. audit evidence about the amounts and the disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial controls relevant to the Company's preparation of the financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the financial statements.
- 7. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on these standalone financial statements.

Opinion

8. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India including Ind AS specified under Section 133 of the Act, of the state of affairs (financial position) of the Company as at 31 December 2018, and its profit (financial performance including other comprehensive income), its cash flows and the changes in equity for the year ended on that date.

Other Matter

9. The standalone financial statements of the Company for the year ended 31 December 2017 were jointly audited by the predecessor joint auditor, Walker

Chandiok & Associates, Chartered Accountants and current joint auditor, APAS & Co., Chartered Accountants, who have expressed an unmodified opinion on those financial statements vide their audit report dated 16 February 2018.

Report on Other Legal and Regulatory Requirements

- 10. As required by section 197(16) of the Act, we report that the Company has paid remuneration to its directors during the year in accordance with the provisions of and limits laid down under section 197 read with Schedule V to the Act.
- As required by the Companies (Auditor's Report) Order, 2016 ('the Order') issued by the Central Government of India in terms of Section 143(11) of the Act, we give in the Annexure 1 a statement on the matters specified in paragraphs 3 and 4 of the Order.
- 12. Further to our comments in Annexure 1, as required by Section 143(3) of the Act, we report that:
 - a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
 - b) in our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;
 - c) the standalone financial statements dealt with by this report are in agreement with the books of account;
 - d) in our opinion, the aforesaid standalone financial statements comply with Ind AS specified under Section 133 of the Act;
 - e) on the basis of the written representations received from the directors and taken on record by the Board of Directors, none of the directors is disqualified as on 31 December 2018 from being appointed as a director in terms of Section 164(2) of the Act;
 - f) we have also audited the internal financial L-41
 controls over financial reporting (IFCoFR) Connaught Place, of the Company as on 31 December 2018 in New Delhi 110 001

conjunction with our audit of the standalone financial statements of the Company for the year ended on that date and our report dated 20 February 2019 as per Annexure 2 expressed an unqualified opinion; and

- g) with respect to the other matters to be included in the Auditor's Report in accordance with Rule
 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us:
 - the Company, as detailed in Note 42 to the standalone financial statements, has disclosed the impact of pending litigations on its financial position;
 - the Company, as detailed in Note 26 to the standalone financial statements, has made provision, as required under the applicable law or Ind AS, for material foreseeable losses, if any, on long-term contracts including derivative contracts;
 - there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company; and
 - iv. the disclosure requirements relating to holdings as well as dealings in specified bank notes were applicable for the period from 8 November 2016 to 30 December 2016 which are not relevant to these standalone financial statements. Hence, reporting under this clause is not applicable.

STATUTORY REPORTS

Annexure 1 to the Independent Auditor's Report of even date to the members of Varun Beverages Limited, on the standalone financial statements for the year ended 31 December 2018

Annexure 1

Based on the audit procedures performed for the purpose of reporting a true and fair view on the financial statements of the Company and taking into consideration the information and explanations given to us and the books of account and other records examined by us in the normal course of audit, and to the best of our knowledge and belief, we report that:

- (i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.
 - (b) The fixed assets, other than refrigerators (visi coolers) and containers lying with third parties, have been physically verified by the management during the year and no material discrepancies were noticed on such verification. The Company has a regular program of physical verification of refrigerators (visi coolers) under which such fixed assets are verified in a phased manner over a period of three years and no

material discrepancies were noticed on such verification. According to the information and explanations given to us, the existence of containers lying with active third parties is considered on the basis of the confirmations obtained from such third parties. In our opinion, the frequency of verification of the fixed assets is reasonable having regard to the size of the Company and the nature of its assets.

(c) The title deeds of all the immovable properties (which are included under the head 'Property, plant and equipment') are held in the name of the Company except for the following property, which according to the information and explanation given to us by the management, land at Pathankot will be registered in the name of the Company on expiry of 3 years from the date of commencement of commercial production on such property and land at Sonapur and Sangli will be registered on full and final payment.

| Nature of property | Total Number of Cases | Whether leasehold / freehold | Gross block as on 31 December 2018 | Net block as on 31 December 2018 |
|---------------------|--------------------------|---------------------------------|---------------------------------------|-------------------------------------|
| Land (at Pathankot) | 1 | Leasehold | ₹ 197.10 million | ₹ 192.23 million |
| Land (at Sonapur, | 1 | Leasehold | ₹ 1.50 million | ₹ 1.49 million |
| Kolkata) | | | | |
| Land (at Sangli, | 1 | Leasehold | ₹ 1.55 million | ₹ 1.55 million |
| Maharashtra) | | | | |

- (ii) In our opinion, the management has conducted physical verification of inventory at reasonable intervals during the year, except for goods-intransit and stocks lying with third parties. For stocks lying with third parties at the year-end, written confirmations have been obtained by the management. No material discrepancies were noticed on the aforesaid verification.
- (iii) The Company has not granted any loan, secured or unsecured to companies, firms, Limited Liability Partnerships (LLPs) or other parties covered in the register maintained under Section 189 of the Act. Accordingly, the provisions of clauses 3(iii)(a), 3(iii)(b) and 3(iii)(c) of the Order are not applicable.
- (iv) In our opinion, the Company has not entered into any transaction covered under Sections 185 of the Act. The Company has complied with the provisions of Section 186 of the Act in respect of loans, investments, guarantees and security, as applicable.
- (v) In our opinion, the Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.
- (vi) We have broadly reviewed the books of account maintained by the Company pursuant to the Rules made by the Central Government for the

Annexure 1 to the Independent Auditor's Report of even date to the members of Varun Beverages Limited, on the standalone financial statements for the year ended 31 December 2018

maintenance of cost records under sub-section (1) of Section 148 of the Act in respect of Company's products and are of the opinion that, prima facie, the prescribed accounts and records have been made and maintained. However, we have not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

- (vii) (a) Undisputed statutory dues including provident fund, employees' state insurance, income-tax, goods and service tax, sales-tax, service tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues, as applicable, have generally been regularly deposited to the appropriate authorities, though there has been a slight delay in a few cases. Further, no undisputed amounts payable in respect thereof were outstanding at the year-end for a period of more than six months from the date they became payable.
 - (b) The dues outstanding in respect of income-tax, sales-tax, service-tax, duty of customs, duty of excise and value added tax on account of any dispute, are as follows:

ANNUAL REPORT 2018 191

Annexure 2 to the Independent Auditor's Report of even date to the members of Varun Beverages Limited on the standalone financial statements for the year ended 31 December 2018

Annexure 2

Independent Auditor's Report on the Internal Financial Controls under Clause (i) of Subsection 3 of Section 143 of the Companies Act, 2013 ('the Act')

 In conjunction with our audit of the standalone financial statements of Varun Beverages Limited ('the Company') as at and for the year ended 31 December 2018, we have audited the internal financial controls over financial reporting ('IFCoFR') of the Company as at that date.

Management's Responsibility for Internal Financial Controls

2 The Company's Board of Directors is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the Company's business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

- 3. Our responsibility is to express an opinion on the Company's IFCoFR based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the ICAI and deemed to be prescribed under Section 143(10) of the Act, to the extent applicable to an audit of IFCoFR, and the Guidance Note issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate IFCoFR were established and maintained and if such controls operated effectively in all material respects.
- 4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the IFCoFR

and their operating effectiveness. Our audit of IFCoFR includes obtaining an understanding of IFCoFR, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's IFCoFR.

Meaning of Internal Financial Controls over Financial Reporting

6 A company's IFCoFR is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's IFCoFR include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

7. Because of the inherent limitations of IFCoFR, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the IFCoFR to future periods are subject to the risk that the IFCoFR may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

STATUTORY REPORTS

Annexure 2 to the Independent Auditor's Report of even date to the members of Varun Beverages Limited on the standalone financial statements for the year ended 31 December 2018

Opinion

8. In our opinion, the Company has, in all material respects, adequate internal financial controls over financial reporting and such controls were operating effectively as at 31 December 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal financial controls stated in the Guidance Note issued by the ICAI.

Notes:

(a) Amendment to Ind AS 7

The amendments to Ind AS 7 'Statement of Cash Flows' require the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement. This amendment has become effective from 01 January 2018 and the required disclosure is made below.

Chief Risk Officer and Group Company Secretary Membership No. F- 5746 STATUTORY REPORTS

1 Corporate information

Varun Beverages Limited (the 'Company') is a public limited Company domiciled in India. Its registered office is at F-2/7, Okhla Industrial Area, Phase-I, New Delhi- 110 020. The Company's equity shares are listed on Bombay Stock Exchange Limited (BSE) and National Stock Exchange of India (NSE). The Company was incorporated on 16 June 1995 under the provision of the Companies Act, 1956. The Company is engaged in manufacturing, selling, bottling and distribution of beverages of PepsiCo's brand in geographically pre-defined territories as per franchisee agreement with PepsiCo India Holdings Private Limited ("PepsiCo India").

2 Basis for preparation

These standalone financial statements ('financial statements') of the Company have been prepared in accordance with Indian Accounting Standard ('Ind AS') and comply with requirements of Ind AS, stipulations contained in Schedule III (revised) as applicable under Section 133 of the Companies Act, 2013 ("the Act"), the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time and other pronouncements/ provisions of applicable laws. These financial statements are authorised for issue on 20 February 2019 in accordance with a resolution of the Board of Directors. Board of Directors permits the revision to the standalone financial statements after obtaining necessary approvals or at the instance of regulatory authorities as per provisions of the Companies Act, 2013.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- i. Derivative financial instruments;
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments);
- iii. Defined benefit plans- plan assets measured at fair value; and
- iv. Share based payments;

The Company presents assets and liabilities in the balance sheet based on current/non-current

classification. An asset is treated as current if it satisfies any of the following conditions:

- i. Expected to be realised or intended to sold or consumed in normal operating cycle;
- ii. Held primarily for the purpose of trading;
- iii. Expected to be realised within twelve months after the reporting period;
- iv. Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current if it satisfies any of the following conditions:

- i. It is expected to be settled in normal operating cycle;
- ii. It is held primarily for the purpose of trading;
- iii. It is due to be settled within twelve months after the reporting period; or
- iv. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and its realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

The Company follows calendar year as its financial year as approved by the Company Law Board, New Delhi.

The financial statements of the Company are presented in Indian Rupees (₹), which is also its functional currency and all amounts disclosed in the financial statements and notes have been rounded off to the nearest million as per the requirement of Schedule III to the Act, unless otherwise stated.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

3 Significant accounting policies

3.1 Fair value measurements

The Company measures financial instruments at fair value which is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between independent market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; and

Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. For assets and liabilities that are recognised in the balance sheet at fair value on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period. For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

3.2 Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excludes taxes/duties collected on behalf of the government.

a) Sale of goods:

Revenue from the sale of goods is recognised when the significant risks and rewards of ownership of the goods have passed to the buyer, usually on delivery of the goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. Excise duty is a levy on manufacture irrespective of ultimate sale of goods and hence the recovery of excise duty flows to the Company on its own account. Accordingly, revenues from sale of goods are stated gross of excise duty. GST, sales tax and value added tax (VAT) are not received by the Company on its own account but collected on behalf of the government and accordingly, are excluded from revenue.

b) Interest:

Interest income is recognised on time proportion basis taking into account the amount outstanding and rate applicable. For all debt instruments measured at amortised cost, interest income is recorded

using the effective interest rate ("EIR"). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial assets. Interest income is included in other income in the Statement of Profit and Loss.

c) Dividends:

Dividend is recognised when the Company's right to receive the payment is established, which is generally when shareholders approve the dividend.

d) Commission:

Commission income is recognised rateably over the contract period as per the agreed contractual terms.

e) Services rendered:

Revenue from service related activities including management and technical know-how service is recognised as and when services are rendered and on the basis of contractual terms with the parties.

3.3 Inventories

Inventories are valued as follows:

- a) Raw materials, components, stores and spares: At lower of cost and net realisable value. Cost of inventory comprises all costs of purchases, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition and is determined on a moving weighted average cost basis.
- b) However, materials and other items held for use in the production of inventories are not written down below cost if the finished products in which they will be incorporated are expected to be sold at or above cost.
- c) **Work-in-progress:** At lower of cost and net realisable value. Cost for this purpose includes material, labour and appropriate allocation of overheads including

depreciation. Cost is determined on a weighted average basis.

- d) Intermediate goods/ Finished goods:
 - i. **Self manufactured** At lower of cost and net realisable value. Cost for this purpose includes material, labour and appropriate allocation of overheads. Cost is determined on a weighted average basis.
 - ii. **Traded** At lower of cost and net realisable value. Cost of inventory comprises all costs of purchases, duties, taxes (other than those subsequently recoverable from tax authorities) and all other costs incurred in bringing the inventory to their present location and condition and is determined on a weighted average cost basis.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. Provision for obsolescence is determined based on management's assessment and is charged to the Statement of Profit and Loss.

3.4 Property, plant and equipment Measurement at recognition:

Property, plant and equipment and capital work-in progress are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any.

Cost comprises the purchase price, borrowing costs if capitalisation criteria are met and any directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price. The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if:

 a) it is probable that future economic benefits associated with the item will flow to the entity; and

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

b) the cost of the item can be measured reliably.

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increased the future benefits from the existing asset beyond its previously assessed standard of performance. All other expenses on existing assets, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit and Loss for the period during which such expenses are incurred. Expenditure directly relating to construction activity is capitalised. Indirect expenditure incurred during construction period is capitalised as a part of indirect construction cost to the extent the expenditure is related to construction or is incidental thereto. Other indirect costs incurred during the construction periods which are not related to construction activity nor are incidental thereto are charged to the Statement of Profit and Loss.

Value for individual assets acquired for a consolidated price, the cost is apportioned to the various assets on their relative fair values basis as determined by competent valuers.

Depreciation:

The management has estimated, supported by technical assessment, the useful lives of property, plant and equipment. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used. Depreciation is calculated on a straightline basis over the estimated useful lives of the assets as follows:

| Description | Useful lives (upto) |
|---|------------------------|
| Leasehold land | Over lease period |
| Buildings-factory | 30 years |
| Buildings-others | 60 years |
| Plant and equipment | 20 years |
| Furniture and fixtures | 10 years |
| Delivery vehicles | 10 years |
| Vehicles (other than delivery vehicles) | 7 years |
| Office equipment | 4 years |
| Computer equipment | 4 years |

| Description | Useful lives (upto) |
|---|------------------------|
| Containers | 6 years |
| Post-mix vending machines and refrigerators | 8 years |
| (Visi - Cooler) | |

Freehold land is not depreciated.

Depreciation on property, plant and equipment is provided over the useful lives of assets as specified in Schedule II to the Act except where the management, based on independent technical assessment, depreciates certain assets are over estimated useful lives which are different from the useful lives prescribed in the Schedule II to the Act. The Company has used the remaining useful lives to compute depreciation on its property, plant and equipment, acquired under the business transfer agreement based on external technical evaluation.

Depreciation on property, plant and equipment which are added/disposed off during the year is provided on pro-rata basis with reference to the month of addition/deletion.

The Company has technically evaluated all the property, plant and equipment for determining the separate identifiable assets having different useful lives under the component approach. On technical evaluation of all separate identifiable components, the management is of the opinion that they do not have any different useful life from that of the principal asset.

In case of revaluation of leasehold land, the resulting amortisation of the total revalued amount is expensed off to the Statement of Profit and Loss.

Derecognition:

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds or amount of security deposit adjusted and the carrying amount of the asset) is included in the Statement of Profit and Loss when the asset is de-recognised.

Breakages of containers are adjusted on 'first bought first broken' basis, since it is not feasible to specifically identify the broken containers in the fixed assets records.

3.5 Intangible assets Intangible assets are initially recognised at:

- a) In case the assets are acquired separately then at cost,
- b) In case the assets are acquired in a business combination or under any asset purchase agreement at fair value.

Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment loss. Intangible assets with finite useful life are assessed for impairment whenever there is an indication that the intangible assets may be impaired. Amortisation of intangible assets such as softwares is computed on a straight-line basis, at the rates representing estimated useful life of 4 years and 8 years in case of distribution network.

The franchise rights and trademarks acquired as part of business combinations normally have a remaining legal life of not exceeding ten years but is renewable every ten years at little cost and is well established. The Company intends to renew these rights continuously and evidence supports its ability to do so. An analysis of product life cycle studies, market and competitive trends provides evidence that the product will generate net cash inflows for the Company for an indefinite period. Therefore, these rights have been carried at cost without amortisation, but is tested for impairment annually, at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

3.6 Borrowing costs

Borrowing costs include interest, amortisation of ancillary costs incurred in connection with the arrangement of borrowings and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Borrowing costs, if any, directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalized, if any. All other borrowing costs are expensed to the Statement of Profit and Loss in the period in which they occur.

3.7 Leases

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

Company as a lessee

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Finance leases are capitalised at the commencement of the lease at the inception date fair value of the leased property or, if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised in finance costs in the Statement of Profit and Loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on the borrowing costs.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

Operating lease payments are recognised as an expense in the Statement of Profit and Loss on a straight-line basis over the lease term.

Company as a lessor

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amounts due from lessees under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the net investment outstanding in respect of the lease.

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on straight line basis over the term of the relevant lease.

3.8 Employee benefits

Contribution to provident and other funds

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognises contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognised as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognised as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Gratuity

Gratuity is a defined benefit scheme. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method. The Company recognises termination benefit as a liability and an expense when the Company has a present obligation as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the termination benefits fall due more than twelve months after the balance sheet date, they are measured at present value of future cash flows using the discount rate determined by reference to market yields at the balance sheet date on government bonds.

Re-measurements, comprising actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through Other Comprehensive Income ("OCI") in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in Statement of Profit and Loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring cost

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of Profit and Loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

Compensated absences

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit which are computed based on the actuarial valuation using the projected unit credit method at the period end. Actuarial gains/losses are immediately taken to the Statement of Profit and Loss and are not deferred. The Company presents the leave as a current liability in the balance sheet to the extent it does not have an unconditional right to defer its settlement for twelve months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond twelve months, the balance is presented as a non-current liability.

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

All other employee benefits payable/available within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages, bonus, etc. are recognised in the Statement of Profit and Loss in the period in which the employee renders the related service.

3.9 Share-based payments

Employees (including senior executives) of the Company receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments which are classified as equitysettled transactions.

The cost of equity-settled transactions is determined by the fair value at the date of grant using an appropriate valuation model. That cost is recognised as an employee benefit expense with a corresponding increase in 'Share option outstanding account' in other equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions.

Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms had not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through the Statement of Profit and Loss.

3.10 Foreign currency transactions and translations

Transactions in foreign currencies are initially recorded in the reporting currency, by applying

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

to the foreign currency amount the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

Exchange differences arising on the settlement of monetary items or on restatement of the Company's monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or as expenses in the year in which they arise.

Exchange differences pertaining to long-term foreign currency monetary items obtained or given on or before 31 December 2016: Exchange differences arising on conversion of long term foreign currency monetary items used for acquisition of depreciable fixed assets are added to the cost of fixed assets and is depreciated over the remaining life of the respective fixed asset and in other cases, is recorded under the head 'Foreign Currency Monetary Item Translation Difference Account' and is amortised over the period of maturity of underlying long term foreign currency monetary items, in accordance with the option available under Ind AS 101.

Exchange differences pertaining to long-term foreign currency monetary items obtained or given on or after 01 January 2017: Exchange differences arising on restatement of long term foreign currency monetary items obtained or given is recorded in the Statement of Profit and Loss.

3.11 Business combination and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, deferred tax assets or liabilities, and the assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 'Income Taxes' and Ind AS 19 'Employee Benefits' respectively.

When the Company acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Any contingent consideration to be transferred by the Company is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 'Financial Instruments' ('Ind AS 109'), is measured at fair value with changes in fair value recognised in Statement of Profit and Loss. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Company re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain

purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Company's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit.

Any impairment loss for goodwill is recognised in Statement of Profit and Loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cashgenerating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cashgenerating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Company reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

3.12 Government grants

Grants from the Government are recognised when there is reasonable assurance that all underlying conditions will be complied with and that the grant will be received.

When loans or similar assistance are provided by Government or related institutions, with an interest rate below the current applicable market rate, the effect of this favorable interest is regarded as a government grant. The loan or assistance is initially recognised and measured at fair value and the government grant is measured as the difference between the initial carrying value of the loan and the proceeds received. That grant is recognised in the Statement of Profit and Loss under 'other operating revenue'. The loan is subsequently measured as per the accounting policy applicable to financial liabilities.

Government grants related to assets, including non-monetary grants at fair value, are presented in the balance sheet by recording the grant as deferred income which is released to the Statement of Profit and Loss on a systematic basis over the useful life of the asset.

Grants related to income are recognised as income on a systematic basis in the Statement of Profit and Loss over the periods necessary to match them with the related costs, which they are intended to compensate and are presented as 'other operating revenues'.

Total government grant recognised in the Statement of Profit and Loss under the head 'Other operating revenue' amounts to ₹ 966.62 (31 December 2017: ₹ 885.07) under different industrial promotion tax exemption schemes.

3.13 Income taxes

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

Current income tax

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income-tax Act, 1961 and rules thereunder. Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in OCI or in equity).

Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their book bases. Deferred tax liabilities are recognised for all temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside profit or loss is recognised outside profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced

to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Minimum Alternate Tax ("MAT") credit is recognised as an asset only when and to the extent there is convincing evidence that the relevant members of the Company will pay normal income tax during the specified period. Such asset is reviewed at each reporting period end and the adjusted based on circumstances then prevailing.

Deferred tax on business combination

When a liability assumed is recognized at the acquisition date but the related costs are not deducted in determining taxable profits until a later period, a deductible temporary difference arises which results in a deferred tax asset. A deferred tax asset also arises when the fair value of an identifiable asset acquired is less than its tax base. In both cases, the resulting deferred tax asset affects goodwill.

3.14 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments. The business activities of the Company predominantly fall within a single operating segment, i.e., manufacturing and sale of beverages within India.

3.15 Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or

when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cashgenerating unit's (CGU) fair value less costs of disposal and its value in use.

Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded Company's or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the Statement of Profit and Loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit and Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

3.16 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss (FVTPL), transaction costs that are attributable to the acquisition of the financial asset.

For purposes of subsequent measurement, financial assets are classified as follows:

a) Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost where the asset is held within a business model whose objective is to hold assets for collecting contractual cash flows; and contractual terms of the asset give rise to cash flows on specified dates that are solely payments of principal and interest.

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

After initial measurement, such financial assets are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The interest income from these financial assets is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss. This category generally applies to trade and other receivables.

b) Debt instruments at fair value through other comprehensive income

Assets that are held for collection of contractual cashflows and for selling the financial assets, where the cash flow represent solely payments of principal and interest, are measured at fair value through other comprehensive income ("FVOCI"). The Company has not designated any debt instrument in this category.

c) Debt instruments at fair value through profit or loss

Fair Value Through Profit or Loss ("FVTPL") is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorisation as at amortized cost or as FVTOCI, is classified as at FVTPL.

In addition, the Company may elect to designate a debt instrument which otherwise meets amortized cost or FVTOCI criteria, as at FVTPL. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

Debt instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of Profit and Loss. The Company has not designated any debt instrument in this category.

d) Equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind AS 103 'Business Combinations' applies are Ind AS classified as at FVTPL. Equity instruments included within the FVTPL category are measured at fair value with all changes recognised in the Statement of Profit and Loss.

For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair values. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in the OCI. There is no recycling of the amounts from OCI to profit or loss, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

De-recognition

A financial asset is derecognised when the contractual rights to receive cash flows from the asset have expired or the Company has transferred its rights to receive the contractual cash flows from the asset in a transaction in which substantially all the risks and rewards of ownership of the asset are transferred.

Impairment of financial assets

The Company measures the Expected Credit Loss ("ECL") associated with its assets based on historical trends, industry practices and the general business environment in which it operates. The impairment methodology applied depends on whether there has been a significant increase in credit risk. ECL impairment loss allowance (or reversal) recognised during the period is recognised as income/ expense in the

Statement of Profit and Loss under the head 'other expenses'.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts and derivative financial instruments.

Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

a) Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss. Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term.

This category includes derivative financial instruments entered into by the Company that are not designated as hedging instruments in hedge relationships as defined by Ind AS 109.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated as such at the initial date of recognition, and only if the criteria in Ind AS 109 are satisfied. For liabilities designated as FVTPL, fair value gains/ losses are recognised in the Statement of Profit and Loss, except for those attributable to changes in own credit risk, which are recognised in OCI. These gains/ loss are not subsequently transferred to the Statement of Profit and Loss.

b) Financial liabilities at amortised cost

After initial recognition, financial liabilities designated at amortised costs are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in Statement of Profit and Loss when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The amortisation is included as finance costs in the Statement of Profit and Loss.

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derivative financial instruments

Derivatives are initially recognised at fair value on the date of executing a derivative contract and are subsequently remeasured to their fair value at the end of each reporting period. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities CORPORATE OVERVIEW

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

when the fair value is negative. Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in the Statement of Profit and Loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

3.17 Investment in subsidiaries and associates

An investor, regardless of the nature of its involvement with an entity (the investee), shall determine whether it is a parent by assessing whether it controls the investee. An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Thus, an investor controls an investee if and only if the investor has all the following:

- a) power over the investee;
- b) exposure, or rights, to variable returns from its involvement with the investee; and
- c) the ability to use its power over the investee to affect the amount of the investor's returns.

An associate is an entity over which the Company has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but not control or joint control over those policies. The considerations made in determining significant influence are similar to those necessary to determine control over subsidiaries.

The Company has elected to recognise its investments in subsidiary and associate companies at cost in accordance with the option available in Ind AS 27, 'Separate Financial Statements'. Except where investments accounted for at cost shall be accounted for in accordance with Ind AS 105, 'Non-current Assets Held for Sale and Discontinued Operations', when they are classified as held for sale. Investment carried at cost is tested for impairment as per Ind-AS 36.

3.18 Non-current assets classified as held for sale

Non-current assets classified as held for sale are presented separately in the Balance Sheet and measured at the lower of their carrying amounts immediately prior to their classification as held for sale and their fair value less costs to sell. Once classified as held for sale, the assets are not subject to depreciation or amortisation. Any gain or loss arises on remeasurement or sale is included in Statement of Profit and Loss.

If an entity has classified an asset (or disposal group) as held for sale, but the held-for-sale criteria as specified in standard are no longer met, the entity shall cease to classify the asset (or disposal group) as held for sale.

The Company measures a non-current asset that ceases to be classified as held for sale (or ceases to be included in a disposal group classified as held for sale) at the lower of:

- a) its carrying amount before the asset (or disposal group) was classified as held for sale, adjusted for any depreciation, amortisation or revaluations that would have been recognised had the asset (or disposal group) not been classified as held for sale, and
- b) its recoverable amount at the date of the subsequent decision not to sell.

3.19 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand, cheques on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

3.20Dividend distribution to equity holders

The Company recognises a liability to make cash or non-cash distributions to equity holders

when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

3.21 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the Statement of Profit and Loss, net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pretax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

3.22 Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

3.23 Earnings per share

Basic earnings/ (loss) per share are calculated by dividing the net profit or loss for the year

attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events, other than conversion of potential equity shares, that have changed the number of equity shares outstanding without a corresponding change in resources.

For the purpose of calculating diluted earnings/ (loss) per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

3.24Significant management judgement in applying accounting policies and estimation uncertainty

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

In particular, the Company has identified the following areas where significant judgements, estimates and assumptions are required. Further information on each of these areas and how they impact the various accounting policies are described below and also in the relevant notes to the financial statements. Changes in estimates are accounted for prospectively.

i) Judgements

In the process of applying the Company's accounting policies, management has made

CORPORATE OVERVIEW

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

the following judgements, which have the most significant effect on the amounts recognised in the financial statements:

a) Contingencies

Contingent liabilities may arise from the ordinary course of business in relation to claims against the Company, including legal, contractor, land access and other claims. By their nature, contingencies will be resolved only when one or more uncertain future events occur or fail to occur. The assessment of the existence, and potential quantum, of contingencies inherently involves the exercise of significant judgments and the use of estimates regarding the outcome of future events.

b) Recognition of deferred tax assets

The extent to which deferred tax assets can be recognised is based on an assessment of the probability that future taxable income will be available against which the deductible temporary differences and tax loss carry-forward can be utilised. In addition, significant judgement is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

ii) Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market change or circumstances arising beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

a) Useful lives of tangible/intangible assets

The Company reviews its estimate of the useful lives of tangible/intangible assets at each reporting date, based on the expected utility of the assets.

b) Defined benefit obligation

The cost of the defined benefit plan and other post-employment benefits and the present value of such obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases, mortality rates and future pension increases. In view of the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

c) Inventories

The Company estimates the net realisable values of inventories, taking into account the most reliable evidence available at each reporting date. The future realisation of these inventories may be affected by future technology or other market-driven changes that may reduce future selling prices.

d) Business combinations

The Company uses valuation techniques when determining the fair values of certain assets and liabilities acquired in a business combination.

e) Impairment of non-financial assets and goodwill

In assessing impairment, Company estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount

them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

f) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the Balance Sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Footnotes to Note 5A and 5B:

i. The Company has considered the related provisions of Ind AS 38 on 'Intangibles Assets' which permit certain intangible assets to have an indefinite life and accordingly the carrying value of these franchisee rights have been considered to have an indefinite life. These franchisee rights meet the prescribed criteria of renewal at nominal cost, renewal at no specific conditions attached and is supported by evidences of being renewed. Management is of the opinion that, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the franchise rights are expected to generate net cash inflows for the Company.

Goodwill and franchise rights with indefinite useful lives are tested for impairment annually, or more frequently if the events and circumstances indicate that the carrying value may be impaired. The useful life of an intangible asset with an indefinite useful life is reviewed annually to determine whether the useful life assessment continues to be supportable.

The assumptions used in this impairment assessment are most sensitive to following:

- a) Weighted average cost of capital "WACC" of 13.82%.
- b) For arriving at the terminal value, approximate growth rate of 5% is considered.
- c) Number of years for which cash flows were considered are 5 years.

No impairment loss was identified on the above assessment.

ii. The amount of contractual commitments for the acquisitions of intangible assets are disclosed in Note 43.

MAT credit recognised in a year is adjustable against income taxes payable under normal tax provisions over a period of 15 years.

Mat credit recognised on balance sheet date is accumulation of credit recognised (net of utilisation) as per below table:

| | | (₹ in million) |
|----------------|---|----------------|
| Financial year | Credit available for carry forward (net of utilisation) | Expiry date |
| 2015-16 | 444.36 | 31 March 2031 |

39. Gratuity and other post-employment benefit plans

All amounts in ₹ in million, unless otherwise stated

Gratuity:

The Company has a defined benefit gratuity plan governed by the Payments of Gratuity Act, 1972. Every employee who has completed five years or more of services is eligible for gratuity on separation at 15 days salary (last drawn salary) for each completed year of service. The Company has formed a Gratuity Trust to which contribution is made and an insurance policy is taken by the trust, which is a year-on-year cash accumulation plan in which the interest rate is declared on yearly basis and is guaranteed for a period of one year. The insurance company, as part of the policy rules, makes payment of all gratuity outflow during the year (subject to sufficiency of funds under the policy). The policy, thus, mitigates the liquidity risk. However, being a cash accumulation plan, the duration of assets is shorter compared to the duration of liabilities. Thus, the Company is exposed to movement in interest rate (particularly, the significant fall in interest rates, which should result in a increase in liability without corresponding increase in the asset. The Company makes a provision of unfunded liability based on actuarial valuation in the Balance Sheet as part of employee cost.

Compensated absences:

The Company recognises the compensated absences expenses in the Statement of Profit and Loss based on actuarial valuation.

The following tables summaries the components of net benefit expense recognized in the Statement of Profit and Loss and the funded status and amounts recognized in the balance sheet:

CORPORATE OVERVIEW

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

Risk associated:

| Investment risk | The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to Government Bonds Yield. If plan |
|------------------------------------|--|
| | liability is funded and return on plan assets is below this rate, it will create a plan deficit. |
| Interest risk (discount rate risk) | A decrease in the bond interest rate (discount rate) will increase the plan liability. |
| Mortality risk | The present value of the defined benefit plan liability is calculated by reference |
| | to the best estimate of the mortality of plan participants. For this report we |
| | have used Indian Assured Lives Mortality (2006-08) ultimate table. A change |
| | in mortality rate will have a bearing on the plan's liability. |
| Salary risk | The present value of the defined benefit plan liability is calculated with the |
| | assumption of salary increase rate of plan participants in future. Deviation in |
| | the rate of increase of salary in future for plan participants from the rate of |
| | increase in salary used to determine the present value of obligation will have |
| | a bearing on the plan's liability. |

The appropriate method to be adopted will depend on the nature of transactions/ class of transactions, class of associated persons, functions performed and other factors, which have been prescribed. The Company is in the process of updating its transfer pricing documentation for the current financial

year. Based on the preliminary assessment, the management is of the view that the update would not have a material impact on the tax expense recorded in these financial statements. Accordingly, these financial statements do not include any adjustments for the transfer pricing implications, if any.

CORPORATE OVERVIEW

STATUTORY REPORTS

Summary of significant accounting policies and other explanatory information on the Standalone Financial Statements for the year ended 31 December 2018

The fair values of options granted under new plan were determined using a variation of the binomial option pricing model that takes into account factors specific to the share incentive plans, such as the vesting period. The following principal assumptions were used in the valuation:

| | Options vested and exercised | Options vested and unexercised |
|---|---------------------------------|-----------------------------------|
| Number of options | 2,006,550 | 668,850 |
| Fair value on grant date (₹) | 65.92 | 66.44 |
| Share price at grant date (₹) | 147.83 | 147.83 |
| Exercise price (₹) | 149.51 | 149.51 |
| Expected volatility | 16.63% | 16.63% |
| Expected life | 7.56 years | 7.64 years |
| Expected dividends | 0% | 0% |
| Risk-free interest rate (based on government bonds) | 7.53% | 7.53% |

The measure of volatility has been calculated based on the average volatility of closing market price of the BSE 500 during the period 01 January 2013 to 31 December 2013.

B. Employee Stock Option Plan 2016 ("ESOS 2016")

The ESOS 2016 ("the Scheme") was approved by the Board of Directors and the shareholders on 27 April 2016. The Scheme entitles key managerial personnel and employees of the Company and its subsidiaries to purchase shares in the Company at the stipulated exercise price, subject to compliance with vesting conditions. Stock options can be settled by issue of equity shares. No options under this Scheme have been granted in the financial year ended 31 December 2018.

52. Capital management

For the purpose of the Company's capital management, capital includes issued equity share capital, securities premium and all other equity reserves attributable to the equity shareholders of the Company. The Company's capital management objectives are:

- to ensure the Company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants. To maintain or adjust the capital structure, the Company may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Company monitors capital using a gearing ratio, which is net debt divided by total capital plus net debt. The Company includes within net debt, non-current and current borrowings, deferred payment liabilities, less cash and cash equivalents, excluding discontinued operations, if any.

The amounts managed as capital by the Company for the reporting periods are summarised as follows:

| | | (₹ in million) |
|--|---------------------------|----------------|
| Particulars | As at 31 December 2018 | |
| Non-current borrowings (Refer note 21A) | 18,359.13 | 16,061.57 |
| Current borrowings (Refer note 21B) | 3,188.75 | 1,925.88 |
| Current portion of deferred payment liabilities (Refer note 21D) | 429.58 | 2,976.98 |
| Current maturities of long-term debts (Refer note 21C) | 3,376.93 | 2,883.23 |
| | 25,354.39 | 23,847.66 |
| Less: Cash and cash equivalents (Refer note 13) | 17.75 | 312.64 |
| Net debt | 25,336.64 | 23,535.02 |
| Equity share capital (Refer note 19) | 1,826.42 | 1,825.87 |
| Other equity (Refer note 20) | 24,062.97 | 21,142.14 |
| Total capital | 25,889.39 | 22,968.01 |
| Capital and net debt | 51,226.03 | 46,503.03 |
| Gearing ratio | 49.46% | 50.61% |

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements.

No changes were made in the objectives, policies or processes for managing capital during the years ended 31 December 2018 and 31 December 2017.

Breaches in meeting the financial covenants would permit the bank to immediately call loans and borrowings. There have been no breaches in the financial covenants of any borrowing in the reporting periods.

53. Assets pledged as security

The carrying amount of assets pledged as security are:

| | | (₹ in million) |

| Capital work-in-progress (Refer note 4) | 3,392.26 | 119.69 |

54. Recent accounting pronouncements (Ind AS issued but not yet effective)

The Ministry of Corporate Affairs ("MCA") issued the Companies (Indian Accounting Standards) Amendments Rules, 2018 and Companies (Indian Accounting Standards) Second Amendments Rules, 2018, notifying Ind AS 115, 'Revenue from Contract with Customers', Appendix B to Ind AS 21, Foreign currency transactions and advance consideration and amendments to Ind AS 20, Government grants. These amendments are in line with recent amendments made by International Accounting Standards Board ("IASB"). These amendments are applicable to the Company from accounting periods beginning on or after 01 January 2019, i.e., from financial year 2019.

Ind AS 115, Revenue from Contract with Customers:

Ind AS 115 supersedes Ind AS 11, Construction Contracts and Ind AS 18, Revenue. Ind AS 115 requires an entity to report information regarding nature, amount, timing and uncertainty of revenue and cash flows arising from contract with customers. The principle of Ind AS 115 is that entity should recognize revenue that demonstrates the transfer of promised goods and services to customers at an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The standard can be applied either retrospectively to each prior reporting period presented or can be applied retrospectively with recognition of cumulative effects of contracts that are not completed contacts at the date of initial application of the standard.

The Company is evaluating the requirements of the standard and the effect on the financial statements.

Appendix B to Ind AS 21, Foreign currency transactions and advance consideration:

The appendix clarifies that the date of transaction for the purpose of determining the exchange rate to use an initial recognition of the asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration

towards such assets, expense or income. If there are multiple payments or receipts of advance, then an entity must determine transaction date for each payment or receipts of advance consideration.

The Company is evaluating the requirements of the amendment and the effect on the financial statements.

Ind AS 20, Government grant:

The amendment provides alternative to recognition of government grants related to assets and non-monetary grant. Government grant related to assets can also be presented by deducting the grant from the carrying amount of the asset and non-monetary grant can be recognised at a nominal amount.

The Company has evaluated the requirements of the amendment and is not expecting to use such options.

56. Financial instruments risk

Financials risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The main types of financial risks are market risk, credit risk and liquidity risk.

The management of the Company monitors and manages the financial risks relating to the operations of the Company on a continuous basis. The Company's risk management is coordinated at its head office, in close cooperation with the management, and focuses on actively securing the Company's short to medium-term cash flows and simultaneously minimising the exposure to volatile financial markets. Long-term financial investments are managed to generate lasting returns.

The Company does not engage in the trading of financial assets for speculative purposes. The most significant financial risks to which the Company is exposed are described below.

56.1Market risk analysis

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. The Company is exposed to market risk through its use of financial instruments and specifically to currency risk and interest rate risk, which result from its operating, investing and financing activities. Contracts to hedge exposures in foreign currencies, interest rates etc. are entered into wherever considered necessary by the management.

Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. The functional currency of the Company is Indian Rupees ('INR' or '₹'). Most of the Company's transactions are carried out in Indian Rupees. Exposures to currency exchange rates mainly arise from the Company's overseas sales and purchases, lending to overseas subsidiary companies, external commercial borrowings etc. which are primarily denominated in US Dollars ('USD'), Euro, Singapore Dollars ('SGD') and Pound Sterling ('GBP').

The Company has limited exposure to foreign currency risk and thereby it mainly relies on natural hedge. To further mitigate the Company's exposure to foreign currency risk, non-INR cash flows are continuously monitored and derivative contracts are entered into wherever considered necessary.

The carrying amounts of the Company's foreign currency denominated monetary items are restated at the end of each reporting period. Foreign currency denominated financial assets and liabilities which expose the Company to currency risk are as follows:

| | USD | GBP | SGD | Euro |

*Rounded off to Nil

The following table illustrates the foreign currency sensitivity of profit and equity with regards to the Company's financial assets and financial liabilities considering 'all other things being equal' and ignoring the impact of taxation. It assumes a +/- 1% change of the INR/USD, INR/GBP, INR/SGD and INR/Euro exchange rate for the year ended at 31 December 2018 (31 December 2017: 1%). These are the sensitivity rates used when reporting foreign currency exposures internally to the key management personnel and represents management's assessment of the reasonably possible changes in the foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items at end of each period reported upon. A positive number indicates an increase in profit or equity and vice-versa.

If the INR had strengthened against the USD by 1% (31 December 2017: 1%), Euro by 1% (31 December 2017: 1%), SGD by 1% (31 December 2017: Nil) and GBP by 1% (31 December 2017: 1%), the following would have been the impact:

*Rounded off to Nil.

Exposures to foreign exchange rates vary during the year depending on the volume of the overseas transactions. Nonetheless, the analysis above is considered to be representative of the Company's exposure to currency risk.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's policy is to minimise interest rate cash flow risk exposures on long-term financing. The Company is exposed to changes in market interest rates as some of the bank and other borrowings are at variable interest rates and also loans have been advanced to subsidiary companies at variable interest rates. All the Company's term deposits are at fixed interest rates.

The following table illustrates the sensitivity of profit and equity to a reasonably possible change in interest rates of +/- 1% (31 December 2017: +/- 1%). These changes are considered to be reasonably possible based on management's assessment. The calculations are based on a change in the average market interest rate for each period, and the financial instruments held at each reporting date that are sensitive to changes in interest rates. All other variables are held constant.

Commodity price risk

The Company is affected by the price volatility of certain commodities. Its operating activities require the ongoing purchase of pet chips and sugar and therefore require a continuous supply. In view of volatility of pet chips and sugar prices, the Company also executes into various purchase contracts.

Commodity price sensitivity

The following tables shows the effect of price change in sugar and pet chips

Other price sensitivity

The Company is not exposed to any listed equity or listed debt price risk as it does not hold any investments in listed entities.

56.2 Credit risk analysis

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company. The Company is operating through a network of distributors and other distribution partners based at different locations. The Company is exposed to this risk for various financial instruments, for example loans granted, receivables from customers, deposits placed etc. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at end of each reporting period, as summarised below:

| | | (₹ in million) |
|--|---------------------------|---------------------------|
| | As at 31 December 2018 | As at 31 December 2017 |
| Classes of financial assets-carrying amounts: | | |
| Investments (current) | 0.01 | 0.04 |
| Loans (current and non-current) | 7,063.74 | 6,025.16 |
| Trade receivables | 1,344.74 | 946.90 |
| Cash and cash equivalents | 17.75 | 312.64 |
| Bank balances other than mention above | 0.65 | 0.06 |
| Other financial assets (current and non-current) | 1,792.14 | 1,382.26 |
| | 10,219.03 | 8,667.06 |

The Company continuously monitors receivables and defaults of customers and other counterparties, and incorporates this information into its credit risk controls. Appropriate security deposits are kept against the supplies to customers and balances are reconciled at regular intervals. The Company's policy is to deal only with creditworthy counterparties.

In respect of trade and other receivables, the Company is not exposed to any significant credit risk exposure to any single counterparty. Trade receivables consist of a large number of customers of various scales and in different geographical areas. Based on historical information about customer default rates, management considers the credit quality of trade receivables. In case the receivables are not recovered even after regular follow up,

measures are taken to stop further supplies to the concerned customer. The expected credit loss is based on the five years historically observed default rates over the expected life of the trade receivables and is adjusted for forward looking estimates.

Movement in expected credit loss allowance on trade receivables

| | | (₹ in million) |
|--|---------------------------|---------------------------|
| | As at 31 December 2018 | As at 31 December 2017 |
| Balance at the beginning of the year | 222.41 | 190.20 |
| Loss allowance measured at lifetime expected credit loss | 33.52 | 32.21 |
| Balance at the end of the year | 255.93 | 222.41 |

The credit risk for cash and cash equivalents, bank deposits including interest accrued thereon and Government grant receivables is considered negligible, since the counterparties are reputable banks with high quality external credit ratings and State Government bodies. The credit risk for loans advanced to subsidiary companies including interest accrued thereon is also considered negligible since operations of these entities are regularly monitored by the Company and these companies have shown considerable growth.

In respect of financial guarantees provided by the Company, the maximum exposure which the Company is exposed to is the maximum amount which the Company would have to pay if the guarantee is called upon. Based on the expectation at the end of each reporting period, the Company considers that it is more likely than not that such an amount will not be payable under the guarantees provided.

56.3 Liquidity risk analysis

Liquidity risk is that the Company might be unable to meet its obligations. The Company manages its liquidity needs by monitoring scheduled debt servicing payments for long-term financial liabilities and considering the maturity profiles of financial assets and other financial liabilities as well as forecast of operational cash inflows and outflows. Liquidity needs are monitored in various time bands, on a day-to-day basis, a week-to-week basis and a month-to-month basis. Long-term liquidity needs for a 180-day and a 360-day lookout period are identified monthly. Net cash requirements are compared to available borrowing facilities in order to determine headroom or any shortfalls.

Funding for long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities and the Company's ability to avail further credit facilities subject to creation of requisite charge on its assets. The Company assessed the concentration of risk with respect to refinancing its debt and concluded it to be low.

As at 31 December 2018, the Company's non-derivative financial liabilities have contractual maturities as summarised below:

| | | | (₹ in million) |
|---------------------------------------|----------------|--------------|--------------------|
| 31 December 2018 | 1 to 12 months | 1 to 5 years | Later than 5 years |
| Borrowings (current and non-current) | 6,995.26 | 16,401.73 | 629.81 |

Valuation technique to determine fair value

Cash and cash equivalents, other bank balances, trade receivables, loans, other current financial assets, trade payables, current borrowings and other current financial liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments. The fair value of the financial assets and liabilities is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than inaforced or liquidations ale. The following methods and assumptions were used to estimate the fair values:

- The fair values of the long term borrowings, loans and other deferred payments are determined by using discounted cash flow method using the appropriate discount rate. The discount rate is determined using other similar instruments incorporating the risk associated.
- The Company executed derivative financial instruments such as cross currency interest rate swap being valued using valuation techniques, which employs use of market observable inputs. The Company uses mark to market valuation provided by bank for its valuation.

Fair value hierarchy

The financial assets measured at fair value are grouped into the fair value hierarchy as on 31 December 2018 and 31 December 2017 as follows: (also refer note 3.1)
