c. A brief on types of customers:

Precision Camshafts is one of the world's leading manufacturers and supplier of camshafts, a critical engine component in the passenger vehicle segment. The Company supplies over 150 varieties of Camshafts for passenger vehicles, tractors, light commercial vehicles and locomotive engine applications from its manufacturing facilities in Solapur Maharashtra. The Company mainly caters to the passenger vehicle segment. Precision Camshafts is a complete solutions provider for camshafts manufactured by different technologies earning a major chunk of its revenue from the export of camshafts to various OEMs directly and indirectly. It is a niche player in the camshaft segment with a global market share of 8% to 9%. It is also the largest supplier in the domestic market with a market share of ~70% and the preferred suppliers of casting camshaft to some of the global and domestic Original Equipment Manufacturers (OEM).

Governance leadership & oversight**1. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets & achievements (listed entity has flexible regarding the placement of this disclosure)**

At Precision Camshafts Limited, sustainability forms the core of all activities. We endeavor to become the driving force in crafting a bright and confident future for the nation, serving our stakeholders responsibly, underpinned by resilience and future-readiness. Communities are a top priority and the Company's CSR activities in the areas of Education, Health and Hygiene, Environment and Rural Development are aimed at addressing concerns and challenges that affect the surrounding communities including underprivileged groups within the community. PCL takes efforts towards enhancement of communities around its operations. Therefore, specific efforts are taken to partner with small and local producers. PCL also invests in supplier development through measures to educate them on best practices that can lead to an improvement in operational and logistical efficiency. In the reporting year, we have created awareness with all our major suppliers about ESG and its relevance to our business. We are in the process of finalizing ESG concepts into our supplier assessment. We have targeted 15% of our suppliers to go for ESG assessment and rate them as per their performance.

Business Responsibility & Sustainability Reporting (Contd.)

At PCL we are cognizant of the importance of developing a diverse and inclusive work force. Diversity is one of the core components of our people philosophy. We have institutionalised diversity and inclusion into our employment processes-meritocracy, fairness and ethics being the pillars of our people management strategy. We believe that workplace diversity is a vital component in building an enabling and empowering workplace. Keeping this in mind, we do not discriminate our current or prospective employees based on nationality, race, caste, gender, gender identity/expression, physical ability, religion, color, sexual orientation, disability, age or marital status. In our agenda to foster an inspiring workplace, we provide equal opportunities to all team members. We continually put in place several initiatives to further strengthen our diversity and inclusion framework.

At PCL, we recognise the importance of emission management in the industry, making it a key material aspect of our business. Over the past five years, we have better understood the difficulty in achieving year-on-year energy reductions and Scope 1 and 2 CO₂ emissions savings. Our best opportunities for further improvements are through increased efficiency and fuel use changes, and we will focus on these areas in the coming years. We will also install new technology to identify potential savings and explore new technologies to achieve our goals.

Our sustainability vision and our continual efforts have helped us reduce a considerable number of emissions. To manage our carbon impact and achieve our emission reduction goals, we have strategised a variety of measures including interventions such as replacing fossil fuel with Renewable Solar energy. We will have 7% reduction in scope 1 & 2 by 2030 from our reporting year calculations. We are planning for renewable energy at our sites in the coming years.

As a part of PCL long-term goal to build a cleaner and greener planet, we have invested in environmental sustainability, making it a key aspect in our manufacturing processes. We focus relentlessly on improving productivity, energy efficiency and maximising sustainability at our manufacturing facility through usage of state-of-the-art technologies and processes. Our technologies and processes help us continually monitor and analyse our environmental footprints in various locations. Resource efficiency and environmental impact reduction are at the core of our sustainability strategy, all our green targets being focused on these two aspects. ESG performance in the upcoming decade is a key focus area for PCL. Through its community development initiatives, deep vendor relationships, skilled team, and leading technologies PCL will continue to deliver on its ESG agenda while driving true stakeholder value.
