OUR COMMITMENT TO SUSTAINABILITY

BUSINESS RESPONSIBILITY & SUSTAINABILITY REPORT

NOCIL LTD. (hereinafter referred to as "the Company") is a part of the Arvind Mafatlal Group (AMG) of Industries, a well-known Business House of India having diversified business interests. The Company commenced Rubber Chemicals production in the year 1975 and today it stands tall as the Largest Rubber Chemicals Manufacturer in India with the state-of-the-Art Technology.

The Company's brands **PILFLEX® Anti-degradants**, **PILNOX® Antioxidants**, **PILCURE® Accelerators**, **Post Vulcanization Stabilizer** and **PILGARD® Pre-Vulcanization Inhibitor** are well recognised in both domestic as well as international markets. The Company is one of the few players in this business to offer a wide range of rubber chemicals to suit the customer needs. Due to its rich experience and offering a one stop shop to customers, the Company has been acknowledged as a dependable supplier of rubber chemicals by major clients. Globally the Company is recognized for its technical capabilities, it enjoys an edge over other players in this business.

The Company is committed to be a **World Class, Customer Focused, Innovative Organization** in the field of Rubber Chemicals and a partner of choice to all its customers across the globe.

The Company welcomes the reporting framework '**Business Responsibility and Sustainability Reporting**' ("**BRSR**") introduced by the Securities and Exchange Board of India ("SEBI") vide Circular SEBI/HO/CFD/CMD-2/P/CIR/2021/562 dt. May 10, 2021 containing detailed Environmental, Social and Governance ("ESG") disclosures and the Company has mandatorily adopted the framework for the financial year 2022-23.

SECTION A: GENERAL DISCLOSURES

I. Details of the listed entity

1. **Corporate Identity Number (CIN) of the Listed Entity** - L99999MH1961PLC012003
2. **Name of the Listed Entity** - NOCIL Ltd.
3. **Year of incorporation** - 1961
4. **Registered office address** - 3rd Floor, Mafatlal House, H. T. Parekh Marg, Backbay Reclamation, Churchgate, Mumbai- 400020
5. **Corporate address** - 3rd Floor, Mafatlal House, H. T. Parekh Marg, Backbay Reclamation, Churchgate, Mumbai- 400020
6. **E-mail** - investorcare@nocil.com
7. **Telephone** - 022 6636 4062
8. **Website** - www.nocil.com
9. **Financial year for which reporting is being done** - 2022-23
10. **Name of the Stock Exchange(s) where shares are listed.**

Name of the Exchange	Stock Code
BSE	500730
NSE	NOCIL

11. **Paid-up Capital** - ₹ 166,64,28,550
12. **Name and contact details (telephone, email address) of the person who may be contacted in case of any queries on the BRSR report.**
 Mr. Amit K. Vyas
 Company secretary
 Email id: amit.vyas@nocil.com
 Tel No.: 022-66364054
13. **Reporting boundary** - Are the disclosures under this report made on a standalone basis (i.e., only for the entity) or on a consolidated basis (i.e., for the entity and all the entities which form a part of its consolidated financial statements, taken together). –

The disclosures under this report are made on a Standalone basis for NOCIL Ltd.

II. Products/services

14. Details of business activities (accounting for 90% of the turnover):

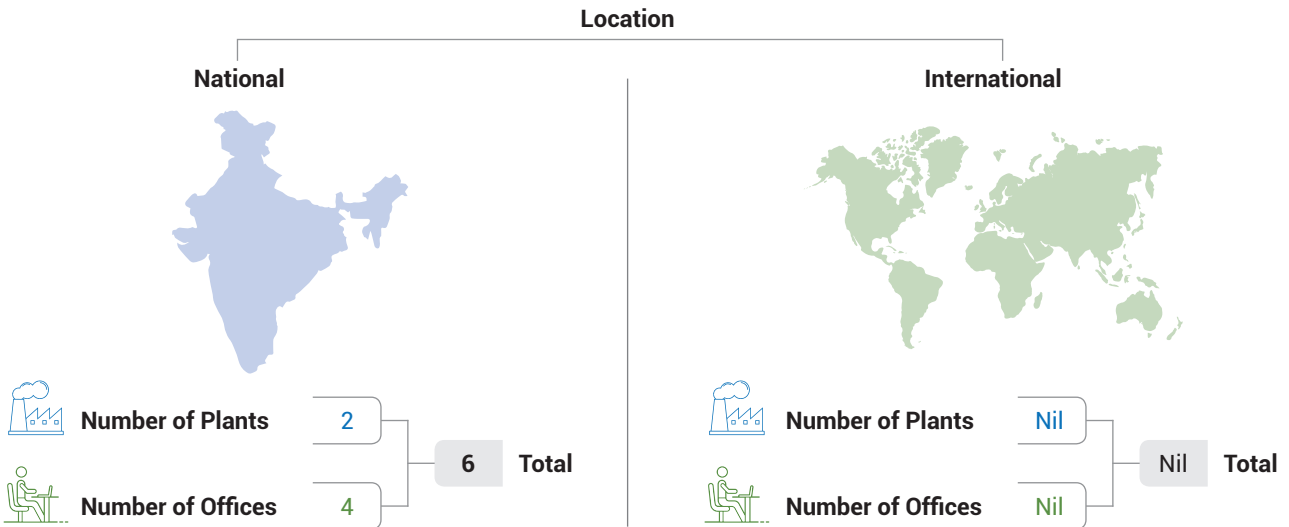

Description of Main Activity	Description of Business Activity	% of Turnover of the entity
Manufacture and Sale of Rubber Chemicals	Manufacture and Sale of Rubber Chemicals	100%

15. Products/Services sold by the entity (accounting for 90% of the entity's Turnover):

Product/Service	NIC Code	% of total Turnover contributed
Rubber Chemicals & Accelerators	20119	100%

III. Operations

16. Number of locations where plants and/or operations/ offices of the entity are situated:

17. Markets served by the entity:

a. Number of locations

b. What is the contribution of exports as a percentage of the total turnover of the entity? 30.50%

c. A brief on types of customers

The Company manufactures rubber chemicals for tire and other rubber product manufacturing industry. The Company is one of the few players in this business to offer wide range of rubber chemicals to suit the customer needs. Due to our rich experience and offering a one stop shop to customers, the Company is today acknowledged as a dependable supplier of rubber chemicals. The Company is recognised for its technical capabilities, it enjoys an edge over other players in this business.

NOCIL today is the Largest Rubber Chemicals Manufacturer in India with the State-of-the-Art Technology for the manufacture of rubber chemicals. NOCIL operates solely B2B segment.

24. Overview of the entity's material responsible business conduct issues pertaining to environmental and social matters that present a risk or an opportunity to our business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format:

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1.	<p>GHG Emissions</p>	Risk	Chemical manufacturing generates direct (Scope 1) greenhouse gas (GHG) emissions from the combustion of fossil fuels in manufacturing and cogeneration processes, as well as process emissions from the chemical transformation of feed-stocks. GHG emissions can create regulatory compliance costs or penalties and operating risks for chemicals companies. However, resulting financial impacts will vary depending on the magnitude of emissions and the prevailing emissions regulations. The industry may be subject to increasingly stringent regulations as nations seek to limit or reduce emissions.	Cost effective management of GHG emissions through greater energy efficiency, the use of alternative fuels, or manufacturing process advances stand benefitted from improved operating efficiency and reduced regulatory risk, among other financial benefits.	Positive
2.	<p>Air Quality</p>	Risk	In addition to greenhouse gases (GHGs), chemical manufacturing may produce air emissions including, sulfur dioxides (SOx), nitrogen oxides (NOx), and Hazardous Air Pollutants (HAPs). As with GHGs, these emissions typically stem from the combustion of fuels and the processing of feed-stocks. Relative to other industries, the Chemicals industry is a more significant source of some of these emissions.	Active management of the issue through technological process improvements or other strategies has helped the Company mitigate such impacts, improved financial performance and enhanced brand value.	Positive
3.	<p>Energy Management</p>	Risk	Chemical manufacturing is typically energy-intensive, with energy used to power processing units, cogeneration plants, machinery, and non-manufacturing facilities. The type of energy used, magnitude of consumption, and energy management strategies depends on the type of products manufactured. Typically, fossil fuels including natural gas and natural gas liquids are the predominant form of non-feedstock energy used, while purchased electricity may also represent a significant share. Therefore, energy purchases can represent a significant share of production costs.	A company's energy mix may include energy generated onsite, purchased grid electricity and fossil fuels, and renewable and alternative energy. Trade-offs in the use of such energy sources include cost, reliability of supply, related water use and air emissions, and regulatory compliance and risk. As such, a company's energy intensity and energy sourcing decisions may affect its operating efficiency and risk profile over time.	Positive

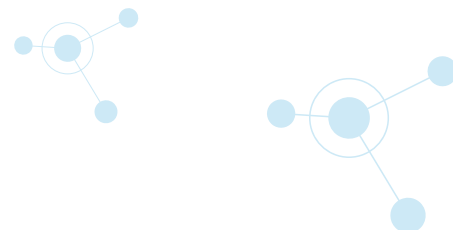

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
4	 <p>Water & Waste-Water Management</p>	Risk	Water is a critical input in chemicals production and is used primarily for cooling, steam generation, and feedstock processing. Long-term historic increases in water scarcity and cost, and expectations of continued increases—due to overconsumption and constrained supplies, resulting from population growth and shifts, pollution, and climate change—indicate the heightened importance of water management. Water scarcity can result in a higher risk of operational disruption for companies with water-intensive operations and can also increase water procurement costs and capital expenditures. Meanwhile, chemical manufacturing can generate process wastewater that must be treated before disposal.	Non-compliance with water quality regulations may result in regulatory compliance and mitigation costs or legal expenses stemming from litigation. Reducing water use and consumption through increased efficiency and other water management strategies may lead to lower operating costs over time and may mitigate financial impacts of regulations, water supply shortages, and community-related disruptions of operations.	Positive
5	 <p>Waste & Hazardous Materials Management</p>	Risk	Chemical manufacturing may generate hazardous process waste, including but not limited to heavy metals, spent acids, catalysts, and wastewater treatment sludge. Companies face regulatory and operational challenges in managing waste, as some wastes are subject to regulations pertaining to their transport, treatment, storage, and disposal. Waste management strategies include reduced generation, effective treatment and disposal, and recycling and recovery, where possible.	Such activities, while requiring initial investment or operating costs, may lower companies' long-term cost structure and mitigate the risk of remediation liabilities or regulatory penalties.	Positive

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
6	<p>Human Rights & Community Relations</p>	Opportunity	<p>Chemical companies are important economic contributors to many communities, providing employment opportunities and community development through taxes and capital generation. Meanwhile, issues including environmental policy, community health, and process safety are key issues with important regulatory, operational, financial, and reputational implications for companies. Environmental externalities including air emissions and water use can affect human health of those living near chemical facilities over the long term. Meanwhile, process safety incidents can endanger community health and safety, leading to regulatory penalties, legal action, and mitigation costs. Consequently, chemicals companies can benefit from building strong relationships with communities in order to mitigate potential operating disruption, reduce regulatory risk, retain top employees, lower the risk of litigation expenses in the event of process safety incidents, and ensure a strong social license to operate.</p>	<p>Adoption of various community engagement strategies, such as developing community engagement plans, establishing codes and guidelines has ensured alignment of the organization's interests with those of their surrounding communities, or conducting impact assessments to evaluate projects and mitigate potential adverse impacts.</p>	Positive
7	<p>Employee Health & Safety</p>	Risk	<p>Employees in chemicals manufacturing facilities face health and safety risks from exposure to heavy machinery, harmful substances, high temperatures and pressure, and electrical hazards, among others.</p>	<p>Creating an effective safety culture is critical to proactively mitigate safety impacts, which could result in financial consequences, including higher healthcare costs, litigation, and work disruption. By maintaining a safe work environment and promoting a culture of safety, companies can minimize safety-related expenses and potentially improve productivity.</p>	Positive

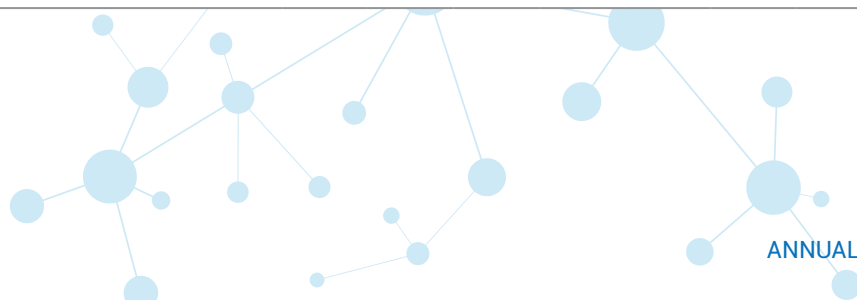

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk/opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
8	 Product Design & Lifecycle Management	Opportunity	As increasing resource scarcity and regulations drive the need for greater materials efficiency and lower energy consumption and emissions, the Chemicals industry stands to benefit from developing products that enhance customer efficiency. From reducing automobile emissions through materials optimization to improving the performance of building insulation, chemical industry products can enhance efficiency across a multitude of applications.	Development of cost-effective solutions to address customers' needs for improved efficiency has benefited from increased revenues and market share, stronger competitive positioning, and enhanced brand value.	Positive
9	 Management of the Legal & Regulatory Environment	Risk	The Chemicals industry faces strict regulation governing air emissions, water discharge, chemical safety, and process safety, among other issues. Anticipating and adapting to regulatory developments, both in the short and long term, is a critical issue for the industry, as regulatory developments can significantly affect product demand, manufacturing costs, and brand value.	Adoption of a clear strategy for managing the regulatory environment that aligns corporate performance with sustainable environmental outcomes and accounts for societal externalities has benefited from reduced regulatory uncertainty, stronger brand value, and improved competitive positioning.	Positive
10	 Critical Incident Risk Management	Risk	Health, safety, and emergency management is a critical issue for companies in the Chemicals industry. Technical failure, human error, or external factors such as weather can lead to accidental releases of chemical substances into the environment at processing facilities or during storage and transportation. Furthermore, the combustible nature of chemical substances, combined with the high operating temperatures and pressures involved in manufacturing, elevates the risk of explosions, hazardous spills, or other emergency situations. Such events can harm workers or people in nearby communities through the release of harmful air emissions and chemical substances and may also adversely impact the environment.	The Company may face operational disruptions, damage to facilities, reputational harm, and increased regulatory compliance and remediation costs in the event of a process incident. As such, strong management of process safety has helped reduce operational downtime, mitigated costs and regulatory risk, and ensured workforce productivity.	Positive

SECTION C: PRINCIPLE WISE PERFORMANCE DISCLOSURE

This section is aimed at helping entities demonstrate their performance in integrating the Principles and Core Elements with key processes and decisions. The information sought is categorized as “Essential” and “Leadership”. While the essential indicators are expected to be disclosed by every entity that is mandated to file this report, the leadership indicators may be voluntarily disclosed by entities which aspire to progress to a higher level in their quest to be socially, environmentally and ethically responsible.

1 PRINCIPLE | **Businesses should conduct and govern themselves with integrity, and in a manner that is Ethical, Transparent and Accountable.**

Essential Indicators

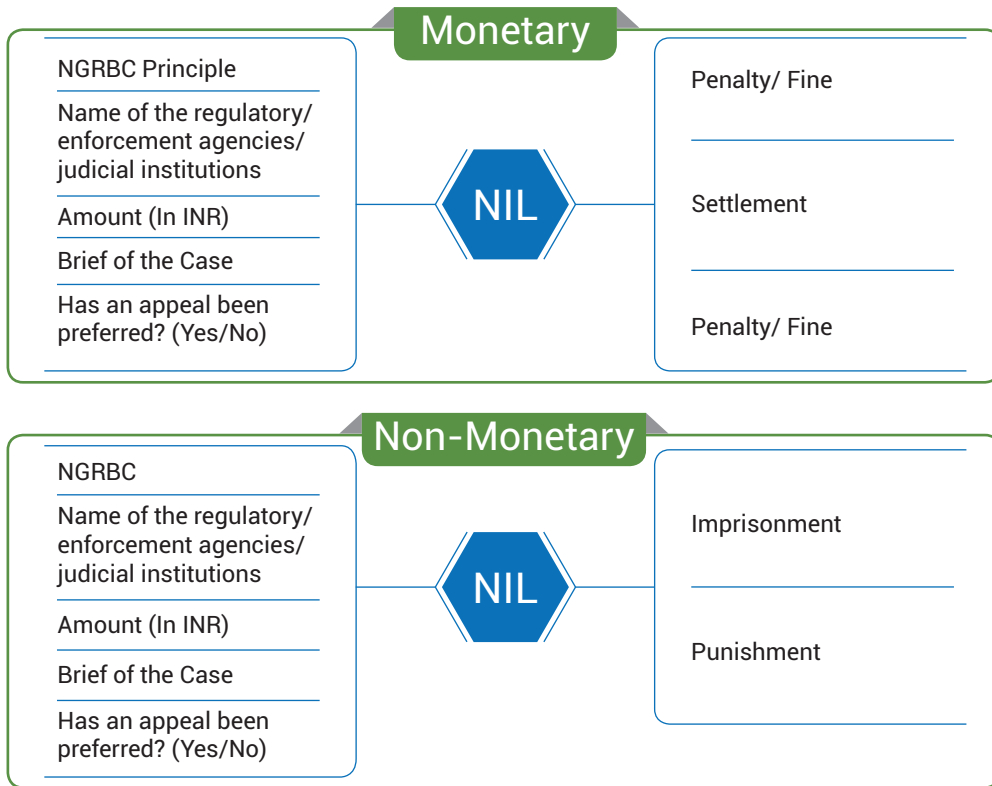

1. Percentage coverage by training and awareness programmes on any of the Principles during the financial year:

Segment	Total Number of training and awareness programmes held	Topics/ principles covered under the training and its impact	% age of persons in respective category covered by the awareness programmes
Board of Directors	4*	Discussion on ESG Initiatives towards complying with the SEBI directions for preparation of the Business Responsibility & Sustainability Reporting (BRSR) format and the GRI (Global Reporting Initiative) Customer requirements.	>90% of targeted participants
Key Managerial Personnel	7	Discussion on ESG Initiatives towards complying with the SEBI directions for preparation of the Business Responsibility & Sustainability Reporting (BRSR) format and the GRI (Global Reporting Initiative) Customer requirements.	>90% of targeted participants
Employees other than BoD and KMPs	125	<ul style="list-style-type: none"> Health Safety and Environment Capability building programmes >90% of targeted participants 	>90% of targeted participants
Workers		<ul style="list-style-type: none"> POSH & Compliance Management 	

*Also includes meetings of the Risk Management Committee.

2. Details of fines / penalties/ punishment/ award/ compounding fees/ settlement amount paid in proceedings (by the entity or by directors/ KMPs) with regulators/ law enforcement agencies/ judicial institutions, in the financial year, in the following format (Note: the entity shall make disclosures on the basis of materiality as specified in Regulation 30 of SEBI (Listing Obligations and Disclosure Obligations) Regulations, 2015 and as disclosed on the entity's website):

3. Of the instances disclosed in Question 2 above, details of the Appeal/ Revision preferred in cases where monetary or non-monetary action has been appealed.

4. Does the entity have an anti-corruption or anti-bribery policy? If yes, provide details in brief and if available, provide a web-link to the policy:

Bribery and corruption can adversely impact business activity, cause significant damage to reputation of an Organisation as well as threaten its viability on the market as a whole. The Company has a **Business Ethics Policy** in place which covers the aspects of Anti-Bribery and Anti-Fraud. We have appropriate internal controls to ensure that the employees do not engage in unethical practices. **The Business Ethics Policy** has been circulated to all the Group Heads and Senior Managerial Personnel with specific directions to percolate it downwards to all employees under each Department/ Function for strict Compliance. All employees have been sensitized and trained for strict adherence to the policy.

URL of the Policy for reference: <https://www.nocil.com/images/fckeditor/file/Business%20Ethics%20Policy.pdf>

5. Number of Directors/ KMPs/ employees/ workers against whom disciplinary action was taken by any law enforcement agency for the charges of bribery/ corruption:

	2022-23	2021-22
Directors	NIL	
KMPs		
Employees		
Workers		

6. Details of complaints with regard to conflict of interest:

	2022-23		2021-22	
	Number	Remarks	Number	Remarks
Number of complaints received in relation to issues of conflict of interest of the Directors	NIL			
Number of complaints received in relation to issues of Conflict of Interest of the KMPs				

7. Provide details of any corrective action taken or underway on issues related to fines/ penalties/ action taken by regulators/ law enforcement agencies/ judicial institutions, on cases of corruption and conflicts of interest.

The Company has not been subjected to penalty/ fine by any regulator during the year under review. The Company has installed a robust mechanism to deal with any complaints from any regulators or complaints relating to corruption / anti bribery.

Leadership Indicators

9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your Company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

The Company is the largest Rubber chemicals manufacturer in India. All the Environmental controls with respect to Liquid, Gaseous and solid streams are exercised.

The Company has a full-fledged Effluent Treatment Plant and has adopted the following innovative technologies :

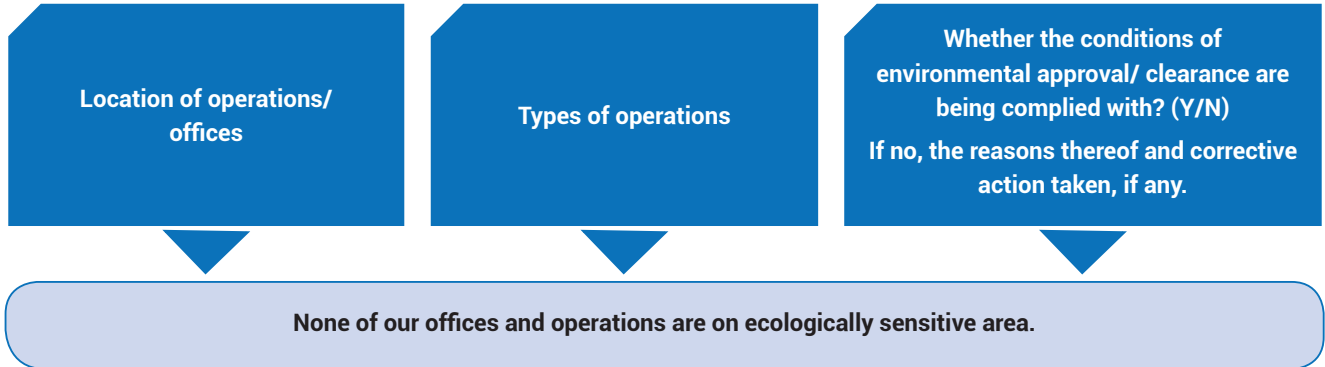

- Soil Biotechnology
- Hydrodynamic Cavitation
- Multiple Effect Evaporator

Effluent after treatment meeting prescribed norms is discharged into underground MIDC/GIDC drainage pipeline. Online pH, Flow, COD, BOD and Suspended Solids measurement system is in place. Hazardous waste is stored at designated area and periodically disposed of to TTCWMA, BEIL authorized TSDF. ETP sludge is disposed by secured landfill at CHWTSDF – TTCWMA, BEIL Process stacks are equipped with scrubber systems and drains are connected to chemical sewer leading to ETP for onward treatment. An Electrostatics Precipitator (ESP) has been provided for the control of particulate matter emissions from Coal fired boiler. The stack is under constant surveillance by the Camera mounted at the top exit of the stack. As a part of pollution reduction, we have started PNG eco – friendly fuel in our boilers. Liquid fuel replaced with Natural Gas (PNG) in steam boilers and Thermic Fluid Heater. Replaced LPG with PNG as fuel for canteen, laboratory use. All Process and boiler stacks are regularly monitored through MOEF approved lab, and the parameters are well within prescribed norms. The Company is certified for ISO - 9001(Quality Management System), ISO-14001 (Environmental Management System). OHSMS -45001 (Occupational Health and Safety Assessment system), IATF- 16949 (Quality – Automotive Supply Chain) Standards, EnMS-50001-Energy Management Systems.

Maintaining very high HSE Standards is the minimum and basic requirement of our business and Organizational Philosophy.

As a part of the Company's culture, we have always focused our efforts in continuously improving our standards in terms of environment, safety and energy.

10. If the entity has operations/ offices in/ around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals/ clearances are required, please specify details in the following format:

11. Details of environmental impact assessments of projects undertaken by the entity based on applicable laws, in the current financial year:

Name and brief details of project	EIA Notification No.	Date	Whether conducted by independent external agency (Yes/ No)	Results communicated in public domain (Yes/ No)	Relevant Web link
Not Applicable					

12. Is the entity compliant with the applicable environmental law/ regulations/ guidelines in India, such as the Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, and Environment protection Act and rules thereunder (Y/N). If not, provide details of all such non-compliances, in the following format:

Serial Number	Specify the law/ regulation/ guidelines which was not complied with	Provide details of the non-compliance	Any fines/ penalties/ action taken by regulatory agencies such as pollution control boards or by courts	Corrective action taken, if any
Yes*				

*The Company has installed a dedicated **Compliance Software Tool** to oversee control and monitor the status of compliance by the Company with all applicable laws including Water (Prevention and Control of Pollution) Act, Air (Prevention and Control of Pollution) Act, and Environment protection Act and rules. The software not only monitors but also guides the employees responsible for the Compliance about the specific requirements and updates them on any amendments.

4. with respect to the ecologically sensitive areas reported at Question 10 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities.

Not Applicable, as none of our projects are being done in ecologically sensitive areas.

5. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions/ effluent discharge/ waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
-----------------------	--	---------------------------

Company continuously optimizes parameters for reduction in raw material consumption and improvement in yields. Company uses innovative technologies like liquid- liquid extraction and carbon column to recover raw materials in waste stream which minimizes waste generation.

6. Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.

The Company believes that all the risks associated with operational activities requires effective engineering controls. We conduct such risk mappings, and we have an on-site emergency plan at place, for which viz-a-viz are few plans that helps us mitigate the associated risks:

The plan is implemented for the following:

- To prevent an Emergency developing into a major emergency, leading to a disaster.
- To define resources and procedures for effective control of emergency.
- To assign specific activities and responsibilities for key personnel and agencies in order to eliminate delays in mitigation / control of emergency.
- To minimize damage to people, property and environment.
- Effective rescue operations and treatment of casualties.
- Identification of casualties and informing relatives.
- Alerting relevant outside agencies and providing relevant information on the incident.
- Rehabilitation and restoration of normalcy.

7. Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard?

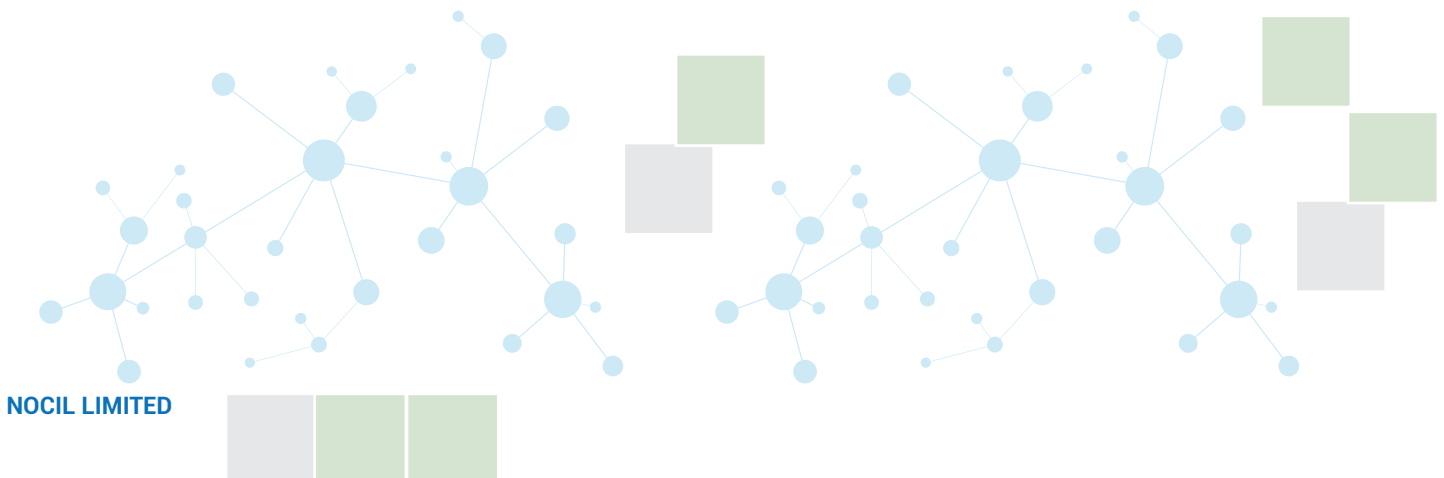

No such adverse impact to the environment is identified from the value-chain partners of the entity.

8. Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.

About 40% value-chain partners were assessed for environmental impacts, through supplier audit.

INDEPENDENT ASSURANCE STATEMENT

Report No. 16985763-1 / 2023

Assurance Statement

1. INTRODUCTION AND OBJECTIVES OF WORK

Bureau Veritas (India) Pvt. Ltd. has been engaged by NOCIL Limited (hereinafter abbreviated as "NOCIL") to conduct an independent assurance of the Non-Financial Parameters of its Business Responsibility & Sustainability Report (BRSR) for the reporting period from 01.04.2022 to 31.03.2023 (i.e., F.Y. 2022-23). NOCIL has prepared document as per "Annexure-1" of BRSR with stated parameters for the period (F.Y 2022-23), based on which this overall assessment has been carried out. This Assurance Statement applies to the related information included within the scope of work described below.

The selection of reporting criteria, reporting period, reporting boundary, monitoring and measurement of data, selection of datapoints/information, preparation and presentation of information in the BRSR and the supporting documentation for the BRSR is the sole responsibility of the management of "NOCIL". Bureau Veritas was not involved in the drafting or preparation, back-up or presentation of the BRSR. Our sole responsibility was to provide independent assurance on its content.

2. INTENDED USER

The assurance statement is made solely for 'NOCIL' as per the governing contractual terms and conditions of the assurance engagement contract between "NOCIL" and Bureau Veritas. To the extent that the law permits, we owe no responsibility and do not accept any liability to any other party other than "NOCIL" for the work we have performed for this assurance report or for our conclusions stated in the paragraphs below.

3. SCOPE OF WORK

The scope of work for the assurance included;

- Checking that the data and information included in the BRSR for the reporting period from 01.04.2022 to 31.03.2023 was fairly presented without material misrepresentation.
- Appropriateness and robustness of underlying reporting systems and processes, used to collect, analyse and review the information reported;

- Reporting Criteria: National Guidelines for Responsible Business Conduct (NGRBC) of the Ministry of Corporate Affairs, Government of India 2019
- Reporting period: 01/04/2022 to 31/03/2023
- Assurance standard: The assurance process was conducted in line with the requirements of the Accountability 1000 Assurance Standard (AA1000AS) version 3, Type 2 assurance.

Level of assurance:

- Moderate (the level of assurance obtained in work performed in a moderate assurance engagement is lower than for a "high" level of assurance engagement, but is higher than no assurance)

Methodology used to conduct the assurance

As part of its independent assurance, Bureau Veritas undertook the following activities:

- Audit was done on site as well as by remote means at both the sites and interviewed relevant management personnel of NOCIL.
- NOCIL initially submitted the "Annexure-1 of BRSR" as prepared, for both the units under the reporting boundary viz; Navi Mumbai unit (including HO at Mafatlal House, Churchgate, Mumbai) and the Dahej unit.
- The data management systems and procedures were assessed on a sampling basis. Data on the various BRSR disclosures were verified.
- The work was planned and carried out to provide a "Moderate" level of assurance and we believe it provides an appropriate basis for our conclusions.

The reporting boundaries considered for this reporting period are as follows:

NOCIL Ltd., C-37, TTC Industrial Area, Off Thane-Belapur Road, Pawne village, Post Turbhe, Navi Mumbai - 400 705	NOCIL Ltd., Plot No. 12-A-1, GIDC Industrial Area, Dahej, Taluka – Vagra, Bharuch, Gujarat – 392 130

Bureau Veritas conducted Physical as well as remote assessment of the sites as mentioned in the table below:

Name of Site	Date and mode
Navi Mumbai site	21 Apr & 25 Apr 2023 (Physical)
HO at Mafatlal House, Churchgate, Mumbai	24 Apr 2023 (Physical)
Dahej Site	22 Apr 2023 (Remote)

The assessment was carried out, of the submitted BRSR and the supporting evidences verified during the site visits and remote activities, based on a sampling exercise, to verify the data and computations that were prepared by NOCIL. The assessment was carried out only for the reported parameters that have been considered by NOCIL in the BRSR for FY 2022-23

Some of the parameters verified for the units under the reporting boundary include:

- Employee details
- Participation / Representation of women
- Turnover rate for employees & workers
- CSR details

- Environmental monitoring parameters including water, waste water, air emissions, solid waste, GHG emissions etc.
- Welfare and OHS data
- All other data from Principle 1 to Principle 9 of the NGRBC.

The data values for all reported parameters in Sections A, B & C (consisting of reporting for all the 09 principles) were verified by Bureau Veritas through an auditing process based on sampling of data records. Sampling was conducted by considering the contribution of the individual parameter to the overall organizational sustainability levels. A separate verification checklist was also utilized during

Assurance Statement (Contd.)

the assessment. Gaps in data values or any other error identified during the data assessment was reported in this checklist which was then responded to by the client and subsequently the reported findings were closed.

Bureau Veritas has assessed the quantification methodology used by NOCIL for the monitoring and calculations of the various ESG parameters from its different sources and confirms the same to be in line with accepted practice of standard practice. The materiality threshold of 5% has been considered in this assessment process.

The details of the breakdown of data were verified by Bureau Veritas during the physical site visits conducted to verify the data. Samples of data were verified during the process to confirm the correctness of values considered in the calculations. The primary activity data values used to report in the BRSR can be regarded as conservatively considered.

Our work was conducted against the requirements defined in the guidance document of BRSR, with the requirements of Accountability 1000 Assurance Standard (AA1000AS) version 03 Type 2 assurance as well as Bureau Veritas' standard procedures and guidelines for external Assurance of Sustainability Reports, based on current best practice in independent assurance.

The Bureau Veritas assurance process has also involved an Independent Technical Review (ITR) to check for correctness and accuracy of the assurance conclusions as well as adherence to Bureau Veritas internal procedures and/or assurance standard requirements.

4. OUR CONCLUSION

On the basis of our methodology and the activities described above, it is our opinion that the BRSR for FY 2022-23 of "NOCIL", containing its reporting and declaration of the various ESG parameters from the operations within the reporting boundary and the reporting period, as described above, is prepared in all material respects in line with the applicable criteria here before stated. The reviewed statements

within the scope of our verification are transparent and the information included therein are fairly stated. A separate report (Management report) have been generated and forwarded to NOCIL regarding internal processes (as in practice) and opportunities for improvement, may be considered for the subsequent reporting period.

5. LIMITATIONS AND EXCLUSIONS

Excluded from the scope of our work is any assurance of information relating to:

- Activities outside the defined assurance period stated here in above;
- Positional statements, expressions of opinion, belief, aim or future intention by "NOCIL" and statements of future commitment;
- Competitive claims in the report claiming "first in India", "first time in India", "first of its kind" etc. if any;
- Our assurance does not extend to the activities and operations of "NOCIL" outside of the scope and geographical boundaries mentioned in this report as well as the operations undertaken by any other entity that may be associated with or have a business relationship with "NOCIL"
- Our assurance of the various ESG parameters covers only those parameter and sites, that have been reported in the BRSR for FY 2022-23.
- Our assurance on economic and financial performance data or information of NOCIL is based only on NOCIL's annual audited statement of accounts for the Financial Year 2022-23 and our conclusions rest solely upon that audited report.

This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist within the BRSR or the supporting documentation.

Assurance Statement (Contd.)

Alignment with the principles of AA1000AS version 03

Inclusivity	NOCIL has processes in place for engaging with its key stakeholders including socially responsible investors, Government officials, local community representatives and has undertaken stakeholder engagement activities. The entity is also involved in many CSR projects for the local community.
Materiality	The BRSR addresses the range of environmental, social and economic issues of concern that NOCIL has identified as being of highest material importance. The material issues were identified by a process of stakeholder engagement and interaction. The identification of material issues has considered both internal assessments of risks and opportunities to the business, as well as stakeholders' views and concerns.
Responsiveness	NOCIL is responding to those issues it has identified as material and demonstrates this in its policies, objectives, indicators and performance targets. The company has taken various initiatives towards delivering environmentally friendly services along with occupational health and safety, appropriate measures for emergency handling, control and risk management in its operations.
Impact	There is no finding from our assessment that NOCIL has not monitored, measured or has not been accountable for its actions related to its material topics.
Uncertainty	The reliability of assurance is subject to uncertainty(ies) that are inherent in the assurance process. Uncertainties stem from limitations in the accounting and quantification models used for various parameters or emission factors used or may be present in the estimation of data used to arrive at conclusions or results. Our conclusions in respect of this assurance are naturally subject to any inherent uncertainty(ies) involved in the assurance process

6. STATEMENT OF INDEPENDENCE, IMPARTIALITY AND COMPETENCE
