National Securities Depositories Limited ('NSDL') will be providing facility for voting through remote e-voting, for participation in the AGM through VC/OAVM facility and e-voting during the AGM. The detailed procedure for participation in the meeting through VC/OAVM is also available at the Company's website www.ommetals.com.
3. Pursuant to the provisions of the Act, a member entitled to attend and vote at the AGM is entitled to appoint a proxy to attend and vote on their behalf and the proxy need not be a member of the company. Since this AGM is being held pursuant to the MCA circulars through VC/OAVM, physical attendance of Members has been dispensed with. Accordingly, the facility for appointment of proxies by the Members will not be available for this AGM and hence the proxy form, attendance slip and route map of AGM are not annexed to this notice.
4. Institutional / Corporate Shareholders (i.e. other than individuals / HUF, NRI, etc.) are required to send a scanned copy (PDF/JPG Format) of its Board or governing body Resolution/Authorization etc., authorizing its representative to attend the AGM through VC / OAVM on its behalf and to vote through remote e-voting. The said Resolution/Authorization shall be sent to the Scrutinizer by email through its registered email address to csabhishek.goswami@gmail.com with a copy marked to evoting@nsdl.co.in
5. The attendance of the Members/Authorized representatives attending the AGM through VC/OAVM will be counted for the purpose of reckoning the quorum under Section 103 of the Companies Act, 2013.
6. In case of joint holders attending the meeting, only such joint holder who is higher in the order of names will be entitled to vote.
7. Brief Resume and other details of the Director seeking appointment or reappointment at this AGM, as required under Regulation 36(3) of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Regulations") and Secretarial Standard -2 issued by The Institute of Company Secretaries of India, is annexed hereto. The Company has received the requisite consents/declarations for the appointment/ re-appointment under the Companies Act, 2013 and the rules made thereunder.
8. The Register of Members and Share Transfer Books of the Company shall remain closed for the purpose of AGM from 23.09.2022 to 29.09.2022 (both days inclusive).

9. The Company has fixed Thursday, September 22, 2022 as the 'Record Date' for determining entitlement of members to final dividend for the financial year ended March 31, 2022, if approved at the AGM.
10. If the final dividend, as recommended by the Board of Directors, is approved at the AGM, payment of such dividend subject to deduction of tax at source will be made within 30 days of the date of declaration i.e. Friday, October 28, 2022 as under:
 - To all Beneficial Owners in respect of shares held in dematerialized form as per the data as may be made available by the National Securities Depository Limited ("NSDL") and the Central Depository Services (India) Limited ("CDSL"), collectively "Depositories", as of the close of business hours on Thursday, September 22, 2022.
 - To all Members in respect of shares held in physical form after giving effect to valid transfer, transmission or transposition requests lodged with the Company as of the close of business hours on Thursday, September 22, 2022.
11. Members holding shares in demat mode are hereby informed that bank particulars registered with their respective DPs, with whom they maintain their demat accounts, will be used by the Company for the payment of dividend. Members holding shares in demat mode are requested to intimate any change in their address and/or bank mandate to their DPs only, as the Company or its Registrar cannot act on any request received directly on the same.
12. Pursuant to Finance Act 2020, dividend income will be taxable in the hands of shareholders w.e.f. April 1, 2020 and the Company is required to deduct tax at source from dividend paid to shareholders at the prescribed rates. For the prescribed rates for various categories, the shareholders are requested to refer to the Finance Act, 2020 and amendments thereof. The shareholders are requested to update their PAN with the Company/ M/s Skyline Financial Services Private Limited (in case of shares held in physical mode) and depositories (in case of shares held in demat mode). A Resident individual shareholder with PAN and who is not liable to pay income tax can submit a yearly declaration in Form No. 15G/15H, to avail the benefit of non-deduction of tax at source by email to cs@ommetals.com by 11:59 p.m. IST till September 21, 2022. Shareholders are requested to note that in case their PAN is not registered, the tax will be deducted at a higher rate of 20%.

Non-resident shareholders can avail beneficial rates under tax treaty between India and their country of residence, subject to providing necessary documents i.e. No Permanent Establishment and Beneficial Ownership Declaration, Tax Residency Certificate, Form 10F, any other document which may be required to avail the tax treaty benefits by sending an email to cs@ommetals.com. The aforesaid declarations and documents need to be submitted by the shareholders by 11:59 p.m. IST by September 21, 2022.
13. Non-resident Indian shareholders are requested to inform about the following immediately to the Company or its Registrar and Share Transfer Agent or the concerned Depository Participant, as the case may be:-
 - a) The change in the residential status on return to India for permanent settlement, and
 - b) The particulars of the NRE account with a Bank in India, if not furnished earlier.
14. The Register of Directors' and Key Managerial Personnel and their shareholding maintained under Section 170 of the Companies Act, 2013, the Register of contracts or arrangements in which the Directors are interested under Section 189 of the Companies Act, 2013 and all other documents referred to in the Notice will be available for inspection in electronic mode.

15. Members holding shares in physical form, in identical order of names, in more than one folio are requested to send to the Company or M/s Skyline financial Services Private limited, the details of such folios together with the share certificates for consolidating their holdings in one folio. A consolidated share certificate will be issued to such Members after making requisite changes.
16. Members are requested to intimate changes, if any, pertaining to their name, postal address, email address, telephone/ mobile numbers, Permanent Account Number (PAN), mandates, nominations, power of attorney, bank details such as, name of the bank and branch details, bank account number, MICR code, IFSC code, etc., to their DPs in case the shares are held by them in electronic form and to M/s Skyline financial Services Private limited in case the shares are held by them in physical form. The Company will not entertain any direct request from such Members for change of address, transposition of names, deletion of name of deceased joint holder and change in the bank account details. While making payment of Dividend, the Registrar and Share Transfer Agent is obliged to use only the data provided by the Depositories, in case of such dematerialized shares.
17. Regulation 40 of Listing Regulations, as amended, mandates that transfer, transmission and transposition of securities of listed companies held in physical form shall be effected only in demat mode. Further, SEBI, vide its Circular dated 25th January, 2022, has clarified that listed companies, with immediate effect, shall issue the securities only in demat mode while processing investor service requests pertaining to issuance of duplicate shares, exchange of shares, endorsement, sub-division/ consolidation of share certificates, etc. In view of this as also to eliminate all risks associated with physical shares and for ease of portfolio management, Members holding shares in physical form are requested to consider converting their holdings to demat mode. Members can contact the Company or Company's Registrars and Transfer Agents, M/s Skyline Financial Services Private Limited for assistance in this regard.
18. Members seeking any information with regard to accounts are requested to write to the Company at least 5 days before the meeting so as to enable the management to keep the information ready at the meeting.
19. Members are requested to note that, dividends if not encashed for a consecutive period of 7 years from the date of transfer to Unpaid Dividend Account of the Company, are liable to be transferred to the Investor Education and Protection Fund ("IEPF"). The shares in respect of such unclaimed dividends are also liable to be transferred to the demat account of the IEPF Authority. In view of this, Members are requested to claim their dividends from the Company, within the stipulated timeline. The Members, whose unclaimed dividends/shares have been transferred to IEPF, may claim the same by making an online application to the IEPF Authority in web Form No. IEPF-5 available on www.iepf.gov.in.
20. Pursuant to the Rule 5(8) of the Investor Education and Protection Authority (Accounting, Audit, Transfer and Refund) Rules, 2016, the Company has uploaded details of unpaid and unclaimed amounts lying with the Company as on 30th September, 2021 (date of last Annual General Meeting) on its website at <https://www.ommetals.com> and also on the website of the Ministry of Corporate Affairs.
21. To support the 'Green Initiative', announced by the Government of India as well as Regulation 36 of SEBI Listing Regulations and applicable provisions of the Act the Company hereby request to the Members who have not yet registered their email addresses to register the same with their DPs in case the shares are held by them in electronic form and with M/s Skyline Financial Services Private Limited in case the shares are held by them in physical form.

22. The Members vide resolution dated September 30, 2021 had appointed M/s Ravi Sharma & Co., Chartered Accountants (Firm Registration No: 015143C), as Statutory Auditors of the Company to hold office till the conclusion of the 54th Annual General Meeting of the Company to be held in the Calendar Year 2026. The requirement of ratification by Members at every Annual General Meeting is omitted vide notification dated May 7, 2018 issued by the Ministry of Corporate Affairs. Accordingly, the Board has not recommended ratification for the appointment of Statutory Auditors. However, the Board has noted the confirmation received from M/s Ravi Sharma & Co., Chartered Accountants, to the effect that their continuance of appointment is in compliance of Sections 139 and 141 of the Act and rules made thereunder.
23. In compliance with the aforesaid Circulars, notice of the AGM along with the Annual Report 2021-22 is being sent only through electronic mode to those Members whose email addresses are registered with the Company/ Depositories. Members may note that the Notice and Annual Report 2021-22 will also be available on the Company's website www.ommetals.com, websites of the Stock Exchanges i.e. BSE Limited and National Stock Exchange of India Ltd at www.bseindia.com and www.nseindia.com respectively and on the website of NSDL www.evoting.nsdl.com. For any query Shareholder may contact us at e-mail: cs@ommetals.com.
24. The Company has enabled the Members to participate at the 50th AGM through the VC facility provided by M/s Skyline financial Services Private Limited. The instructions for participation by Members are given in the subsequent paragraphs. Participation at the AGM through VC shall be allowed on a first-come-first-served basis.
25. The Company has provided the facility to Members to exercise their right to vote by electronic means both through remote e-voting and e-voting during the AGM. The process of remote e-voting with necessary user id and password is given in the subsequent paragraphs. Such remote e-voting facility is in addition to voting that will take place at the 50th AGM being held through VC.
26. Members joining the meeting through VC, who have not already cast their vote by means of remote e-voting, shall be able to exercise their right to vote through e-voting at the AGM. The Members who have cast their vote by remote e-voting prior to the AGM may also join the AGM through VC but shall not be entitled to cast their vote again.
27. Mr. Abhishek Goswami (CP No 17057), of M/s. Abhishek Goswami & Co., Company Secretaries has been appointed as a Scrutinizer to Scrutinize the e-voting process in a fair and transparent manner.
28. Instructions for e-voting and joining the AGM are as follows:
 1. The Members can join the AGM through the VC/OAVM mode 15 minutes before and after the scheduled time of the commencement of the Meeting by following the procedure mentioned in the Notice. The facility of participation at the AGM through VC/OAVM will be made available for 1,000 members on first come first served basis. This will not include large Shareholders (Shareholders holding 2% or more shareholding), Promoters, Institutional Investors, Directors, Key Managerial Personnel, the Chairpersons of the Audit Committee, Nomination and Remuneration Committee and Stakeholders Relationship Committee, Auditors etc. who are allowed to attend the AGM without restriction on account of first come first served basis.
 2. The company has a dedicated E-mail address cs@ommetals.com for members to mail their queries or lodge complaints, if any. We will endeavor to reply to your query at the earliest.
 3. Process and manner for members opting for voting through Electronic means:

A. VOTING THROUGH ELECTRONIC MEANS

- i. Pursuant to the provisions of Section 108 of the Companies Act, 2013 read with Rule 20 of the Companies (Management and Administration) Rules, 2014 (as amended) and Regulation 44 of SEBI (Listing Obligations & Disclosure Requirements) Regulations 2015 (as amended), and the Circulars issued by the Ministry of Corporate Affairs dated April 08, 2020, April 13, 2020 and May 05, 2020 and Circular number SEBI/HO/CFD/CMD1/CIR/P/2020/79 dated May 12, 2020 and SEBI/HO/CFD/CMD2/CIR/P/2021/11 dated January 15, 2021 issued by the Securities and Exchange Board of India (SEBI)(hereinafter collectively referred to as “the Circulars”) the Company is providing facility of remote e-Voting to its Members in respect of the business to be transacted at the AGM. For this purpose, the Company has entered into an agreement with National Securities Depository Limited (NSDL) for facilitating voting through electronic means, as the authorized agency. The facility of casting votes by a member using remote e-Voting system as well as E-voting on the date of the AGM will be provided by NSDL.
- ii. The remote e-voting period commences on Sunday, September 25, 2022 (9:00 a.m. IST) and ends on Wednesday, September 28, 2022 (5:00 p.m. IST). The Auditors' Report for the Financial Year ended 31st March, 2022 on the Financial Statements of the Company is a part of this Annual Report.

Independent Auditors' Report

The Auditors' Report to the members on the Accounts of the Company for the financial year ended March 31, 2022 contain with the qualification/reservation/adverse remark/ disclaimer which are replied by the Board of Directors hereunder:

Auditors Remark – 1

In the standalone financial statements, the Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 488.45 Lacs in a subsidiary namely Chahel Infrastructure Limited; being considered good and recoverable by the management.

However, this Subsidiary has accumulated losses and its net worth is fully eroded. Further, this subsidiary is facing liquidity constraints due to which it may not be able to attain projections made as per business plans, thus we are unable to comment upon the carrying value of this non-current investment and recoverability of the aforesaid dues and the consequential impact, if any, on the accompanying standalone financial results. Further we have not received audited Financial Statements of Subsidiary for the year ended on 31.03.2022. The recoverability of the said investment is in doubtful in our opinion.

Such matter is pending and reported since 31.03.2019.

Board's Reply-

Chahel Infra structure Limited, A subsidiary, which is holding 94.46% share in the Company has incurred losses during the past years but the Board of directors are in view that the said subsidiary Company may receive projects in future based on its experience which will generate Revenue in future and such losses will be recovered. Therefore, based on certain estimate, Future business plans, growth prospects and other factors, the Directors believes that the realizable amount of subsidiary is fully recoverable, due to these are considered good

Auditors Remark – 2

The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 5089.70 Lacs and advances of Rs. 10325.18 Lacs (P.Y. 10245.07 Lacs) in the name of Bhilwara Jaipur Toll Road Private Limited; being considered good and recoverable by the management. Joint venture has filed termination to their respective authority and claimed the amount invested and termination payments as per concession agreement of Rs. 61200.00 Lacs.

So far as this matter indicates material uncertainty about the going concern of joint venture. In our view, recoverability of the amount invested and advance provided not certain but no provisioning has been made against such diminishing of investment and loans. No Interest has been provided by the company on advances grant joint venture for four years. Management is of the view that Since Interim award has been received and Final arbitration claims have merits and will be in favor of SPV and amount invested and advance provided will be recovered. The interim award of arbitrator has been upheld and as per clarification decision of Honorable High Court pronounced on 20th Dec, 2021 –the receipt of funds in escrow account from PWD Rs. 191.79

Crores has been adjusted in loan account of banks. The final award for claim is in hearing process with arbitrator. Our opinion is modified in respect of the same.

Such Matter is pending and reported since 31.03.2019.

Board's Reply-

Interim Award amount has been received and final award is awaited and this amount will be recovered once the claim filed by joint venture gets paid.

Auditors Remark – 3

The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 97.50 Lacs and advances of Rs. 747.66 Lacs (P.Y. 747.61 Lacs) in the name of Gurha Thermal Power Company Limited (GTPCL) and Sanmati Infra Developers Limited; being considered good and recoverable by the management.

GTPCL has filed termination to their respective authority and claimed the amount invested and termination payments as per concession agreement of Rs. 3940.72 Lacs and such matter is pending Appellate authority.

So far as this matter indicates material uncertainty about the going concern of joint venture and associate. In our view, recoverability of the amount invested and advance provided not certain but no provisioning has been made against such probable non recovery of complete investment and loans. No Interest has been provided by the company on advances grant joint venture for four years. Management is of the view that such claim of GTPCL have merits and will be in favor of SPV and amount invested and advance provided will be recovered. Our opinion is modified in respect of the same.

Such Matter is pending and reported since 31.03.2019.

Board's Reply-

Arbitration award is awaited and this amount will be recovered once the claim filed by joint venture get paid

Auditors Remark – 4

MANAGEMENT DISCUSSION AND ANALYSIS

GLOBAL ECONOMY:

The war in Ukraine has triggered a costly humanitarian crisis that demands a peaceful resolution. At the same time, economic damage from the conflict will contribute to a significant slowdown in global growth in 2022 and add to inflation. Fuel and food prices have increased rapidly, hitting vulnerable populations in low-income countries hardest. Global growth is projected to slow from an estimated 6.1 percent in 2021 to 3.6 percent in 2022 and 2023. Beyond 2023, global growth is forecast to decline to about 3.3 percent over the medium term. War-induced commodity price increases and broadening price pressures have led to 2022 inflation projections of 5.7 percent in advanced economies and 8.7 percent in emerging market and developing economies. Multilateral efforts to respond to the humanitarian crisis, prevent further economic fragmentation, maintain global liquidity, manage debt distress, tackle climate change, and end the pandemic are essential.

INDIAN MACROECONOMICS REVIEW:

The last two years have been difficult for the world economy on account of the COVID-19 pandemic. Repeated waves of infection, supply-chain disruptions and, more recently, inflation have created particularly challenging times for policy-making. Faced with these challenges, the Government of India's immediate response was a bouquet of safety-nets to cushion the impact on vulnerable sections of society and the business sector. It next pushed through a significant increase in capital expenditure on infrastructure to build back medium-term demand as well as aggressively implemented supply-side measures to prepare the economy for a sustained long-term expansion.

SECTORAL TRENDS

Not surprisingly, the agricultural sector was the least impacted by the pandemic-related disruptions. It is estimated to grow 3.9 per cent in 2021-22 on top of 3.6 per cent and 4.3 per cent respectively in the previous two years. This sector now accounts for 18.8 per cent of GVA.

INFRASTRUCTURE- ENGINEERING INDUSTRY, REAL ESTATE

Infrastructure sector is a key driver for the Indian economy. The sector is highly responsible for propelling India's overall development and enjoys intense focus from Government for initiating policies that would ensure time-bound creation of world class infrastructure in the country. Infrastructure sector includes power, bridges, dams, roads, and urban infrastructure development.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. This depicts the upward trajectory of the Indian infrastructure space which is on the rise.

The Engineering sector is the largest of the industrial sectors in India. It accounts for 27% of the total factories in the industrial sector and represents 63% of the overall foreign collaborations. India's engineering sector has witnessed a remarkable growth over the last few years driven by increased investment in infrastructure and industrial production. The engineering sector, being closely associated with the manufacturing and infrastructure sectors, is of strategic importance to India's economy.

GOVERNMENT INITIATIVES

- In August 2021, the Government of India, the Central Water Commission (CWC), government representatives from 10 participating states and the World Bank signed a US\$ 250 million project to support the Indian government's long-term dam safety programme and improve safety and performance of existing dams across various states.
- The Second Dam Rehabilitation and Improvement Project (DRIP-2) will strengthen dam safety by building dam safety guidelines, bring in global experience and introduce

innovative technologies. The project will be implemented in ~120 dams across Chhattisgarh, Gujarat, Kerala, Madhya Pradesh, Maharashtra, Manipur, Meghalaya, Odisha, Rajasthan and Tamil Nadu, and at the national level through the CWC.

- The Indian engineering sector is of strategic importance to the economy owing to its intense integration with other industry segments. The sector has been de-licensed and enjoys 100% FDI. With the aim to boost the manufacturing sector, the government has relaxed the excise duties on factory gate tax, capital goods, consumer durables and vehicles.
- To increase the employability of engineering graduates in the country, Ministry of Human Resource Development is working along with Sector Skill Councils (SSCs) under National Skill Development Corporation (NSDC) to undertake apprenticeship/internship embedded degree programmes with a core focus on the development of knowledge, skills, aptitude and on-job training.
- The AICTE has entered into collaborations with the MSME ministry, NHAI and DM offices in 150 districts to facilitate engineering internships for students.
- In the Union Budget 2022-23, the government has given a massive push to the infrastructure sector by allocating Rs. 199,107 crore (US\$ 26.52 billion) to enhance the transport infrastructure.
- The government expanded the 'National Infrastructure Pipeline (NIP)' to 9,318 projects worth US\$ 2.23 trillion. As of February 2022, there are 2465 projects under development.
- Prime Minister Mr. Narendra Modi, on the country's 75th Independence Day, announced plans to invest Rs. 100 trillion (US\$ 1.35 trillion) in infrastructure to stimulate economic development and generate employment.
- In October 2021, the Department of Telecommunications (DoT) approved 31 proposals totaling an investment of US\$ 447 million over the next 4.5 years, as part of the PLI scheme for telecom and networking products manufactured in India.
- In October 2021, the Ministry of Textiles allowed pilot projects for application of geo-textiles in infrastructure projects.
- In September 2021, the government announced its PLI scheme of Rs. 10,683 crore (US\$ 1.4 billion) for textiles, specifically aimed at boosting production of man-made fibre (MMF) fabric, MMF apparel and technical textiles.
- In September 2021, the Indian government announced a PLI scheme for automobiles and auto components worth Rs. 25,938 crore (US\$ 3.49 billion). This scheme is expected to bring investments of Rs. 42,500 (US\$ 5.74 billion) by 2026.
- In August 2021, Prime Minister Mr. Narendra Modi launched the Voluntary Vehicle-Fleet Modernisation Program (VVMP), also known as the Vehicle Scrapping Policy. The policy will bring in investments worth Rs. 10,000 crore (US\$ 1.35 billion) to set up 450-500 Automated Testing Stations (ATS) and 60-70 Registered Vehicle Scrapping Facilities (RVSF) across the country. A single window clearance portal is being developed where applications for ATS and RVSF will be catered through a single portal within 60 days.
- The government is taking several steps to boost domestic defence manufacturing. In line with this, between FY17 and FY22 (until June 2021), the Indian government has signed 264 contracts for defence equipment procurement, with 159 contracts for armed forces equipment procurement.

- In April 2021, Under the Development cum Production Partner (DcPP) programme, Defence Research and Development Organisation (DRDO) allowed private sector firms to develop and produce missile systems, such as vertical launched surface and air missile system programmes, to promote the domestic defence industry.
- The Indian telecom equipment market is likely to increase owing to the government's Rs. 12,195 crore (US\$ 1.6 billion) PLI scheme approved for telecom gear manufacturing in February 2021.
- The National Infrastructure Pipeline (NIP) was launched in 2020 with estimated infrastructure investment of around Rs 111 lakh crore (US\$ 1.48 trillion) between FY 2020-2025, which will drive demand for capital goods.
- In FY21, the Indian government constructed 12,205.25 km of National Highways. The daily average length of the national highways constructed during FY21 was 34 km per day.
- In FY21, Rs. 54.22 crore (US\$ 7.30 million) was utilised under the scheme on 'Enhancement of Competitiveness in the Indian Capital Goods Sector'.
- Government of India allocated over Rs. 80,250 crore (US\$ 12.01 billion) for upgradation of 125,000 kms of rural roads under phase-III of the Pradhan Mantri Gram Sadak Yojana.

REAL ESTATE

Real estate sector is one of the most globally recognized sectors. It comprises of four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth in the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

In India, the real estate sector is the second-highest employment generator, after the agriculture sector. It is also expected that this sector will incur more non-resident Indian (NRI) investment, both in the short term and the long term. Bengaluru is expected to be the most favoured property investment destination for NRIs, followed by Ahmedabad, Pune, Chennai, Goa, Delhi and Dehradun

By 2040, real estate market will grow to Rs. 65,000 crore (US\$ 9.30 billion) from Rs. 12,000 crore (US\$ 1.72 billion) in 2019. Real estate sector in India is expected to reach US\$ 1 trillion in market size by 2030, up from US\$ 200 billion in 2021 and contribute 13% to the country's GDP by 2025. Retail, hospitality, and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

GOVERNMENT INITIATIVES

Government of India along with the governments of respective States has taken several initiatives to encourage development in the real estate sector. The Smart City Project, with a plan to build 100 smart cities, is a prime opportunity for real estate companies. Below are some of the other major Government initiatives:

- In October 2021, the RBI announced to keep benchmark interest rate unchanged at 4%, giving a major boost to the real estate sector in the country. The low home loan

interest rates regime is expected to drive the housing demand and increase sales by 35-40% in the festive season in 2021.

- Under Union Budget 2021-22, tax deduction up to Rs. 1.5 lakh (US\$ 2069.89) on interest on housing loan, and tax holiday for affordable housing projects have been extended until the end of fiscal 2021-22.
- The Atmanirbhar Bharat 3.0 package announced by Finance Minister Mrs. Nirmala Sitharaman in November 2020 included income tax relief measures for real estate developers and homebuyers for primary purchase/sale of residential units of value (up to Rs. 2 crore (US\$ 271,450.60) from November 12, 2020 to June 30, 2021).
- In order to revive around 1,600 stalled housing projects across top cities in the country, the Union Cabinet has approved the setting up of Rs. 25,000 crore (US\$ 3.58 billion) alternative investment fund (AIF).
- Government has created an Affordable Housing Fund (AHF) in the National Housing Bank (NHB) with an initial corpus of Rs. 10,000 crore (US\$ 1.43 billion) using priority sector lending short fall of banks/financial institutions for micro financing of the HFCs.
- As of January 31, 2021, India formally approved 425 SEZs, of which 265 were already operational. Most special economic zones (SEZs) are in the IT/ BPM sector.

100% FDI is allowed through the automatic route, with major international players looking for growth opportunities to enter the Indian engineering sector. The engineering sector in India attracts immense interest from foreign players as it enjoys a comparative advantage in terms of manufacturing cost, technology, and innovation. The above, coupled with favourable regulatory policies and growth in the manufacturing sector, has allowed several foreign players to invest in India.

FDI inflow for miscellaneous mechanical and engineering industries stood at US\$ 3.88 billion between April 2000-December 2021 according to the data released by Department for Promotion of Industry and Internal Trade (DPIIT).

COMPANY UPDATES:

Om Infra Limited is one of the leading Diversified group of Companies having business interests into various fields which covers Construction of EPC projects in Hydro Mechanical projects, Irrigation projects, Canal & Dams projects and Construction of Real Estate projects.

The EPC contracts work include civil construction, designing, engineering, procurement, fabrication, manufacturing, supply, installation, commissioning and operations & maintenance. Our core business is providing turnkey EPC solutions for Engineering and Construction of Dams, Hydro power and irrigation projects in India and Abroad.

Company has successfully executed road projects and more than 60 Civil and Hydro-mechanical contracts for Hydro-power & Irrigation projects across the country and abroad. Currently working on more than 11 construction projects with total outstanding

unexecuted contract value of Rs 3576.68 crores (OMIL Share). These projects are across multiple states (Gujarat, Uttar Pradesh, Madhya Pradesh, Uttarakhand, Himachal Pradesh, Jharkhand, Tamil Nadu, Arunachal Pradesh, Punjab and Rajasthan) and two international locations (one in Africa and one project in Nepal). During the year company has received a new project under Jal Jeevan Mission in Rajasthan and Uttar Pradesh Distt.

Two Real Estate projects are under progress across Jaipur, Kota with sellable area of over a Million sq ft and one is in planning stage at Mumbai with the total estimated appx expected saleable area over 2.5 lakh sq ft (Om's share)

Though FY21-22 so far has seen marginally positive in revenues as compared to last year due to the lockdown and reverse migration of workers, but company's profitability for this period increased significantly led by improvement in margins. FY22-23 seems and likely to be much better as compared to FY21-22 in terms of execution of projects at both domestic and international sites leading to higher revenue recognition and FY22-23 is expected to witness handsome growth. Focus on tapping huge potential in Hydro Electric Power, River Linking and irrigation by capitalizing on the government's plans of accelerating infrastructure projects. Company is also focused on better operational efficiencies which would help in further margins improvement with a better recognition post name change.

Execution Update of Domestic & International Projects

- Company's operations which were impacted as the nation-wide lockdown, halted most of the construction activity in the country now getting stable and regular gradually.
- All safety measures have been ensured and followed at all the office and construction sites as set out by the Government
- Execution has already picked up again at all our EPC projects (see slide no. 5) and real estate projects (see slide no. 7)
- Company's largest contract – Isarda Dam project (Rs 550 Crore pre GST) has gathered pace; revenue booking already started and shapurkhandi Punjab also started generating revenue and is another big milestone in company's order book
- Revenue booking at other new Hydro Mechanical contracts, Arun-3 (Nepal) and Amravati (Maharashtra), will be more from the FY 2022-23.
- Africa Irrigation projects are progressing smoothly. Pace of execution of these projects has been better with completion expected by this FY
- In Gujarat and Bihar Silo projects – Ground breaking & civil structures work at both the projects are in progress. Company is hopeful to achieve Financial closure soon and COD in next 15-18 months
- In the month of February 2022, company has received letter of award from Government of Uttar Pradesh for “survey, design, preparation of DPR, construction, commissioning and O & M for 10 years for rural water supply for 1051 villages in two divisions of Moradabad in Uttar Pradesh namely Rampur and Amroha from the state water supply and sanitation mission, Govt. of Uttar Pradesh for an approximate estimated value of Rs.1051 Cr.
- In the month of March 2022, company has received two (2) prestigious contracts from Public Health Engineering Department, Region Churu (Rajasthan):
 - For “work of Nokha Water Supply Project to provide Functional Household Tap Connection (FHTC) including 10 years O & M under Jal Jeevan Mission (JJM) in District-Bikaner” for an estimated contact value of Rs.609 Cr. (Om Infra Share in joint venture is 50%)
 - For “work of Water Supply Project including reorganisation and improvement of various existing WSS of Khajuwala Constituency of Bikaner District including 10

years O & M” for an estimated contract value of Rs.370 Cr. (Om Infra Share in joint venture is 59%)

SMART CITIES

National Smart Cities Mission is an urban renewal and retrofitting program by the Government of India with the mission to develop smart cities across the country, making them citizen friendly and sustainable. The Union Ministry of Urban Development is responsible for implementing the mission in collaboration with the state governments of the respective cities. The mission initially included 100 cities, with the deadline for completion of the projects set between 2019 and 2023.

The Vikram Udyogpuri Ujjain project (smart city project) completed during the year.

REAL ESTATE

The Indian real estate sector was expected to start recovering in 2020 after few lackluster years wherein the sector was impacted by multiple reforms and the changes brought about by Demonetisation, RERA, GST and the NBFC crisis. It has been a tough task for the sector to align itself with these externalities, but the measures have resulted in much needed transparency, accountability and fiscal discipline for the sector. Prior to the pandemic, the real estate sector was expected to contribute around 13% of India’s GDP by 2025 (from around 6-7% in 2017), according to ANAROCK Research.

However, during this unprecedented crisis, the real estate sector exhibited remarkable resilience and recovered ahead of expectations. After grappling with initial labor shortages and demand deferment, both the residential and office markets witnessed signs of revival.

The real estate segment accounted for over 41% share of the global revenue in 2021 and is expected to witness significant growth over the forecast period. Rising purchasing power and consumer confidence are fueling the recovery of housing construction including both new constructions as well as renovation. This is expected to result in overall market growth.

While the pandemic outbreak temporarily disrupted the sector, it also led to emergence of certain trends such as preference for larger apartments, increasing inclination for home ownership as against rental housing, de-densification of office spaces and acceleration of the ongoing consolidation in the sector. Also, the current situation has opened up a lot of business development opportunities for well capitalised developers. The uncertainties of the second COVID-19 wave and its impact will need to be assessed and tracked closely.

COMPANY UPDATES:

- Execution of the two key real estate projects; Om Meadows (Kota) and Pallacia (Jaipur) are progressing well. The finishing, interior and value addition work in Pallacia /Kota residential project is going on. The structure completion has been achieved in Pallacia and the same is received from JDA.

- In the next three years, considering that the realty market to do considerably well, the company expects about Rs > 5 billion revenue and unrealized cash inflow from both the projects.

Strategy

OMIL is leading player in the hydro mechanical segment with expertise in hydro mechanical equipment's along with Engineering Construction for dams and Irrigation Projects. With highly expertise and experience team OMIL is always striving to constantly upgrade its benchmarks to meet and conquer the growing competitiveness of this segment. We are India's leading mechanical equipment manufacturers having mastery in execution of large and complex hydro -projects.

To strengthen and boost our international presence we secured Irrigation and Watershed Development in Mpanga Sector of Africa. Going ahead, it will continue to focus on the African region to secure new projects in order to garner new growth opportunities that the African region is offering.

The company is re-aligning its corporate structure and is focusing on Core operation of the business by re-structuring the business into core and non-core operation. In tune of

this, company has already sold few of the non-core assets. The company has already disposed of a few of its divisions including the Hotel, Cineplex division and One of the Packing division's machinery has already been sold to make the packaging business more viable and will further look to exit all its non-core assets very soon.

Along with its strategy to exit the non-core business, the company is also focusing on new profitable ventures like Construction and Operations of Food Grain Silos, Constructions of Smart Cities and Irrigation and water pipe laying.

OTHER SEGMENTS

Silos

The company has received its first project for construction of Silos. Silos are to be constructed at 4 locations with 50,000 MT capacity each for storage of Wheat on PPP Mode. Few Advantages of Silos are that it occupies less space as compared to warehouses and is easier to maintain optimum grain storage conditions in the silo and better equipped to control the temperature and keep birds, moulds and bugs. Government is planning for construction of 100 LMT Silos in a Phase Wise manner. The Company will continue to evaluate the projects that the Government will bid out in future.

Packaging & Manufacturing

The plastic caps and closures market was valued at USD 44.3 billion units in 2021 and is expected to reach 57.0 billion units by 2025, at a CAGR of 5.2% over the forecast period 2020-2025. Heat induction cap liner could be used on the variety of bottles made up of different plastic materials such as PP, PVC, HDPE etc, which protects the container from leakage and provides tamper evidence characteristics to it, due to which the market will grow in future.

Plastic caps and closures are used in a stretch of industries segments, such as food and beverages, pharmaceuticals, household goods, cosmetic products, etc. Caps and closures are the final components of packaging and are responsible for maintaining the integrity of the product packing.

One of the Packing division's machinery has already been sold to make the packaging business more viable

OPPORTUNITIES & THREATS

The economy witnessed global slowdown with the continuing COVID pandemic in 2021 as well. However with the pandemic much in control in the beginning of 2022, India's economy is now estimated to grow by more than 9% in the current fiscal year 2022-23. The economy has been on a recovery path after the impact of the world's strictest lockdown in the last fiscal. The spread of the Omicron variant in the third COVID wave prompted some states to impose curbs, which has hurt several sectors of the economy, particularly the contact intensive service sectors but overall it is felt that the impact of the third wave is muted.

Indian economy has witnessed significant improvements over the past years, in the form of lower inflation, benign global commodity prices, improved fiscal deficit, higher Government spend (Centre and State) and improving financial savings. The Indian economy grew approximately 9% in 2022 and 8.2% in the 2021 calendar year, after a 6.7% contraction in 2020, the year of COVID outbreak.

The Government of India is expected to invest highly in the infrastructure sector, mainly highways, renewable energy, and urban transport. Indian energy sector is expected to offer investment opportunities worth US\$ 300 billion over the next 10 years. In the Union Budget 2022-23, the Government has proposed infrastructure spend of over Rs 10 lakh crore, the Union government has reinforced its commitment to using infrastructure as a force multiplier for sustained economic growth. Within infrastructure, one of the key focus areas is leveraging multimodal transport infrastructure to reduce logistics costs, thereby improving India's overall competitiveness.

In 2019, the government launched several policy measures. These include the renewal of the government vehicle fleet, the launch of the Pradhan Mantri Kisan Samman Nidhi scheme (more commonly known as the income support scheme for farmers) of INR 750 billion, the merger of ten state-owned banks into four entities, an acceleration of an INR 700 billion capital infusion for banks, the removal of a surcharge on portfolio investments, a significant cut in corporate taxes (reducing the base rate from 30% to 22%) and, finally, an investment package in infrastructure of 102 lakh crore (roughly USD 1450 billion) over the next five years.

The infrastructure sector has become the biggest focus area for the Government of India. India plans to spend US\$ 1.4 trillion on infrastructure during 2019-23 to have a sustainable development of the country. This depicts the upward trajectory of the Indian infrastructure space which is on the rise. Also, with Covid-19 restrictions been now removed, the infrastructure work has progressed, and the economy boost is only possible with the infra development at the forefront.

While Budget 2022-23 reinforces the Union government's commitment to infrastructure development, timely implementation of the aforementioned measures would be critical for putting a robust extra budgetary financial eco-system in place.

Owing to the nature of the industry the Company operates in, the management of company perceives the following as threats in the construction of hydropower projects:

- Time in clearances - Stringent norms and cumbersome procedures for getting environmental and forest clearances leads to delays in obtaining clearances for projects, which may affect the capacity addition programs, even though State Governments are trying their best to adopt to single window clearance system, which will mitigate this threat to large extent.
- Land acquisition- The process of land acquisition for infrastructure work as well as for a project's components including submergence is quite cumbersome and time consuming. Single window clearance system will also mitigate this threat to great extent.
- Geological uncertainties - In spite of extensive surveys and investigations, various components of hydro projects such as head race tunnels, power houses, pressure shafts and surge shafts face geological surprises especially in the hilly region.
- Inter-state and International disputes – As water is a state subject in India, there are often inter-state river disputes due to which many hydro projects may get delayed or abandoned. Certain projects are situated outside India which is affected by India's international relations.

- Natural calamities - As most of the hydro projects are located in hilly terrains, natural calamities like landslides, hill slope collapses and road blocks, floods and cloud bursts cause severe setbacks in construction schedules.
- Unexpected complexities - Unexpected complexities and delays in clearances / execution due to reasons beyond one's control may cause variation / escalations in estimates.

RISKS & CONCERNS

The rapid and diffused spread of the recent Coronavirus (COVID-19) and global health concerns relating to this outbreak have had a negative impact on, among other things, financial markets, liquidity, economic conditions and trade and could continue to do so for an unknown period of time, that could in turn have a material adverse impact on our business, cash flows, results of operations and financial condition, including liquidity, asset quality and growth.

The construction industry is the second largest contributor to India's GDP. It not only has economic potential but is also among the biggest employment providers. Owing to the nature of the industry the Company operates in, it is exposed to a variety of risk factors which are broadly categorized into financial, technical, construction policy, political, market and legal. A tight risk process is carried out from pre-bid to project completion stage to manage, mitigate and monitor these risks by adopting specific risk mitigation measures.

During the year, the Board has reviewed the process and the Risks that have already been identified for the business and necessary action for mitigation has been initiated. Infra sector is crumbling as project delays, cost overruns and financing woes mount. Even new models like hybrid-annuity are proving to be unviable. Private sector investment is the key to revival, but the return of private capital may be delayed because of the inherent weakness in financial markets.

The top major constraints in infrastructure development over the next three years are thought to be corruption, political and regulatory risk, and access to financing and macroeconomic instability. This last is a shared concern troubling emerging-market economies.

With the resurgence of Covid-19, uncertainty of availability of the work force and disruptions in the supply chain may have adverse effects on the projects under execution. However, strategies to overcome these difficulties are being put in place to minimise the impact, and customers are taken into confidence.

Some of the crucial risks impacting the Company's overall governance are detailed below:

Liquidity risk

Liquidity risk refers to the risk of financial distress or extraordinary high financing costs arising due to shortage of liquid funds in a situation where business conditions unexpectedly deteriorate and requiring financing. The Company requires funds both for short term operational needs as well as for long term capital expenditure growth projects. The Company generates sufficient cash flow for operations, which together with the available cash and cash equivalents and short term investments provide liquidity in the short-term and long-term. .

The Company has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk because funds are borrowed at both fixed and floating interest rates. Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate. The borrowings of the Company are principally denominated in rupees and US dollars with a mix of fixed and floating rates of interest. The Company has exposure to interest rate risk, arising principally on changes in base lending rate and LIBOR rates.

Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks.

Company's credit risk arises principally from the trade receivables, loans, investments in debt securities, cash & cash equivalents.

Commodity price risk

The Company's revenue is exposed to the market risk of price fluctuations in its division is as under:

Engineering Division: the company generally takes Turnkey projects from government departments. The contract price is generally fix and free from any price risk subject to change in any government policy or rules.

Real Estate Division: the company is exposed to risk of prices of Residential and commercial units. These prices may be influenced by factors such as supply and demand, and regional economic conditions.

Packaging Division: the company is exposed to risk of prices of goods. These prices may be influenced by factors such as supply and demand, Cost of Production and regional economic conditions.

Market forces generally determine prices for the Real Estate Division and Packaging Division of the Company Adverse changes in any of these factors may reduce the revenue that the Company earns from the sale of its products.

The Company primarily purchases its raw materials in the open market from third parties. The Company is therefore subject to fluctuations in prices for the purchase of Building Material and other raw material inputs. The Company purchased substantially all of its Raw Material from third parties in the open market.

The Company aims to sell the products at prevailing market prices. Similarly the Company procures raw materials on prevailing market rates as the selling prices of its products and the prices of input raw materials move in the same direction.

Foreign currency fluctuation risk

The Company's functional currency is Indian Rupees (INR). The Company undertakes transactions denominated in foreign currencies; consequently, exposure to exchange rate fluctuations arise. Volatility in exchange rates affects the Company's revenue from export markets and the costs of imports, primarily in relation to raw materials. The Company is exposed to exchange rate risk under its trade and debt portfolio.

Adverse movements in the exchange rate between the Rupee and any relevant foreign currency result's in increase in the Company's overall debt position in Rupee terms without the Company having incurred additional debt and favourable movements in the exchange rates will conversely result in reduction in the Company's receivables in foreign currency.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market prices. The Company is exposed in the ordinary course of its business to risks related to changes in foreign currency exchange rates, commodity prices and interest rates.

Salary risk

Salary increase should take into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

No other post-retirement benefits are provided to these employees.

Interest risk

The rate used to discount post employment benefit obligation should be determined by reference to market yields at the balance sheet date on Government bonds. The currency and term of government bonds should be in consistent with the currency and estimated term of post employment benefit obligation.

Investment risk

The liability is not funded and is not relevant in company.

Health, Safety And Environment Risks

The Infrastructure sector has inherent hazards and is therefore subject to extensive health, safety and environmental laws, regulations and standards. Any incident can result in property damages, injuries and potential fatalities as also adversely impact surrounding communities and environment. Such incidents may result in litigation, disruption of operations, penalties and loss of Company image & goodwill.

Political, Legal And Regulatory Risks

Regulatory risk is the risk that a change in laws and regulations will materially impact a security, business, sector, or market. A change in laws or regulations made by the government or a regulatory body can increase the costs of operating a business, reduce the attractiveness of an investment, or change the competitive landscape.

Non-compliance with applicable laws & regulations as well as changes in the Government policies may adversely impact operations and hamper growth.

Fraud and Cyber Security

With ever increasing reliance on information technology, there is enhanced risk of security breaches resulting in misappropriation of funds or assets. Such breaches could bring the operations to a standstill or worse.

Other Operational Risks:

Execution challenges: The Company faces execution challenges like geological surprises, availability of work front, land acquisition and Right-of-Way (ROW), pending approvals and clearances from Government agencies, working in difficult/harsh weather conditions, manpower issues, etc. The Company closely tracks the key risks for each project to ensure timely mitigation.

Counter Party Risks:

The Company partners with different contractors (Joint Venture / consortium projects) across businesses based on technical requirements/local market conditions. The partner's performance and financial strength is crucial for project success. Learnings from the past projects are incorporated in the inter-se agreements with the partners and clauses on liability of each partner is carefully drafted after legal due diligence is exercised.

Working capital challenges:

Project delays and adverse contractual payment terms sometimes lead to increased working capital requirements. The Company has strengthened the process for close monitoring of cash flows at the project level. It ensures regular follow-up for delay in payments from clients, and has ensured improvement in the working capital levels.

INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

A strong Internal Control framework is an important part of operations and corporate governance. The management has established internal control systems commensurate with the size and complexity of the business. The internal control provides a structured

approach for identification, rectification, monitoring and reporting of gaps in the internal control systems and processes.

Om Infra Limited has an adequate system of internal control to ensure that the resources of the Company are used efficiently and effectively, all assets are safeguarded and protected against loss from unauthorized use or disposition and the transactions are authorized, recorded and reported correctly, financial and other data are reliable for preparing financial information and other data and for maintaining accountability of assets. Internal audits of all branches of the company across India are set in place and are reviewed by the management. The Audit Committee regularly reviews the adequacy and effectiveness of the internal controls and internal audit function.

Management has put in place effective Internal Control Systems to provide reasonable assurance for:

- Safeguarding Assets and their usage.
- Maintenance of Proper Accounting Records and
- Adequacy and Reliability of the information used for carrying on Business Operations.

HUMAN RESOURCES AND INDUSTRIAL RELATIONS

The success of any project is a direct reflection of the skill of the workers who completed it and the managers who supervised it. The total employee strength of the Group, as on 31st March, 2022 was more than 500.

The Company's Human Resource Development ("HRD"), being a key function is manned by professionally qualified and experienced personnel and with necessary directions from the senior management. The Company focuses on effective HRD, resulting in greater employee satisfaction and retention levels.

OUTLOOK

The GCC economy is returning to pre-Covid levels, with massive vaccination drives by local Governments, enabling quicker recovery. With the resumption of normalcy post the Covid-19 outbreak and with expected growth pick-up in the infrastructure are expected to grow in the next year. RBI's monetary policies and government initiatives such as Product Linked Incentives (PLI), National Monetisation Plan (NMP), PM Gati Shakti – National Master Plan are set to aid the growth of the economy. The geopolitical tensions are expected to wane over time. Consequently, businesses and investors will be able to focus on the growth potential of the country's economy.

In the future and the Company plans to increase its footprint through value-accretive projects leading to increase in profitability.

- During the recent budget for FY22, Govt focus remained on building Infrastructure with significant allocations towards Irrigation and Hydro-Power segments. Tendering and bidding activities are expected to pick-up in the coming period

- Liquidity situation has also seen an improvement in the markets. Execution of projects would also see a significant improvement in FY22.
- With the execution pick-up expected at both domestic and international projects in FY22, revenue growth for the next financial year should be strong. COVID 19 and its affect in different geographies will be key.
- Company has also been exploring bids for projects in domestic markets and expected to add good amount of fresh orders in FY22.
- Focus on improving execution and operational efficiencies would help in further improvement in margins
- With balance sheet remains healthy, the company is well placed to better execute its projects and further look for opportunities in this space leading to increase in profitability

Real Estate Division: the company is exposed to risk of prices of Residential and commercial units. These prices may be influenced by factors such as supply and demand, and regional economic conditions. Packaging Division: the company is exposed to risk of prices of goods. These prices may be influenced by factors such as supply and demand, Cost of Production and regional economic conditions and Environment policies.

Market forces generally determine prices for the Real Estate Division and Packaging Division of the Company. Adverse changes in any of these factors may reduce the revenue that the Company earns from the sale of its products.

The Company primarily purchases its raw materials in the open market from third parties. The Company is therefore subject to fluctuations in prices for the purchase of Building Material and other raw material inputs. The Company purchases substantially all of its Raw Material from third parties in the open market.

The Company aims to sell the products at prevailing market prices. Similarly the Company procures raw material on prevailing market rates as the selling prices of its products and the prices of input raw materials move in the same direction.

The Company's functional currency is Indian Rupees (INR). The Company undertakes transactions denominated in foreign currencies; consequently, exposure to exchange rate fluctuations arise. Volatility in exchange rates affects the Company's revenue from export markets and the costs of imports, primarily in relation to raw materials. The Company is exposed to exchange rate risk under its trade and debtors portfolio.

Adverse movements in the exchange rate between the Rupee and any relevant foreign currency result's in increase in the Company's overall debt position in Rupee terms without the Company having incurred additional debt and favorable movements in the exchange rates will conversely result in reduction in the Company's receivables In foreign currency.

Independent Auditor's Report

**To the Members of
M/s. Om Infra Limited
(formerly known as Om Metals Infraprojects Ltd.)**

Report on the Standalone Financial Statements

Qualified Opinion

We have audited the standalone financial statements of Om Infra Limited (formerly known as Om Metals Infraprojects Ltd.) ("the Company"), which comprise the balance sheet as at 31st March 2022, and the statement of Profit and Loss (including other comprehensive income), the statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information. Company's Financial statements includes financial statements of Engineering Segment and other Joint Operations audited by other auditors, report of which have been furnished to us. Our opinion, in so far as it relates to the affairs of such Segment is based solely on the report of other auditors.

In our opinion and to the best of our information and according to the explanations given to us, except for the matters discussed in basis of qualified opinion, the aforesaid standalone financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the act read with the companies (Indian Accounting Standards) , Rules,2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2022, and the profit, and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis Of qualified opinion

1. As stated in Note 57(b) to the standalone financial statements, The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 488.45 Lacs in a subsidiary namely Chahel Infrastructure Limited; being considered good and recoverable by the management.

However, this Subsidiary has accumulated losses and its net worth is fully eroded. Further, this subsidiary is facing liquidity constraints due to which it may not be able to attain projections made as per business plans, thus we are unable to comment upon the carrying value of this non-current investment and recoverability of the aforesaid dues and the consequential impact, if any, on the

accompanying standalone financial results. Further we have not received audited Financial Statements of Subsidiary for the year ended on 31.03.2022. The recoverability of the said investment is in doubtful in our opinion.

Such matter is pending and reported since 31.03.2019.

2. As stated in Note 57(a) to the standalone financial statements, The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 5089.70 Lacs and advances of Rs. 10324.31 Lacs (P.y. 10245.07 Lacs) in the name of Bhilwara Jaipur Toll Road Private Limited; being considered good and recoverable by the management.

Joint venture has filed termination to their respective authority and claimed the amount invested and termination payments as per concession agreement of Rs. 61200.00 Lacs.

So far as this matter indicates material uncertainty about the going concern of joint venture. In our view, recoverability of the amount invested and advance provided not certain but no provisioning has been made against such diminishing of investment and loans. No Interest has been provided by the company on advances granted to joint venture for four years. Management is of the view that Since Interim award has been received and Final arbitration claims have merits and will be in favor of SPV and amount invested and advance provided will be recovered. The interim award of arbitrator has been upheld and as per clarification decision of Honorable High Court pronounced on 20thDec, 2021 –the receipt of funds in escrow account from PWD Rs. 191.79 Crores has been adjusted in loan account of banks. The final award for claim is in hearing process with arbitrator. Our opinion is modified in respect of the same.

Such Matter is pending and reported since 31.03.2019.

3. As stated in Note 57(c) & 57(d) to the standalone financial statements, The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 97.50 Lacs and advances of Rs. 747.66 Lacs (P.y. 747.61 Lacs) in the name of Gurha Thermal Power Company Limited (GTPCL) and Sanmati Infra Developers Limited; being considered good and recoverable by the management.

GTPCL has filed termination to their respective authority and claimed the amount invested and termination payments as per concession agreement of Rs. 3940.72 Lacs and such matter is pending Appellate authority.

So far as this matter indicates material uncertainty about the going concern of joint venture and associate. In our view, recoverability of the amount invested and advance provided not certain but no

provisioning has been made against such probable non recovery of complete investment and loans. No Interest has been provided by the company on advances granted to joint venture for four years. Management is of the view that such claim of GTPCL have merits and will be in favor of SPV and amount invested and advance provided will be recovered. Our opinion is modified in respect of the same.

Such Matter is pending and reported since 31.03.2019.

4. Financial Statements includes financial statements of one joint ventures, whose financial statements reflect total assets Rs.1515.19 Lacs as at 31 March 2022, and total revenues of Rs. 0.00 and Net loss of joint venture of Rs. 44.29 Lacs for the year ended on that date, as considered in these standalone financial statements. The Company had prepared separate set of statutory financial statements joint ventures for the years ended 31 March 2022 in accordance with accounting principles generally accepted in India. Audited financial statements of such entities are not made available to us. Our opinion in respect of these joint ventures and branch is qualified in respect of this matter.
5. As stated in Note 76 to the standalone financial statements, Financial statements include profit of Rs. 98.85 lac as profit from Joint venture namely OMIL-VKMCPL JV (Pench-II), but such financial statements are not provided to us. Our opinion is modified in respect of the same.

Emphasis of Matter

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued

by the Institute of Chartered Accountants of India (ICAI) together with the Independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole and in forming our opinion thereon and we do not provide a separate opinion on these matters. The Key audit matters on financial statements of Engineering and Hotel Segments and joint operations of the Company are provided by other auditors and whose reports have been furnished to us. Our opinion, in so far as it relates to the affairs of such Segment is based solely on the report of other auditors.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexure to Board's Report, Business Responsibility Report, Corporate Governance and Shareholder's Information, but does not include the standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

(Also refer Note 23 to the standalone financial statements).
- c. According to the records of the Company examined by us and the information and explanations given to us, the Company has obtained term loans and applied for the purpose for which they were taken.
- d. According to the information and explanations given to us, and the procedures performed by us, and on an overall examination of the standalone financial statements of the Company, we report that no funds raised on short-term basis have been used for long-term purposes by the Company.
- e. According to the information and explanations given to us and on an overall examination of the standalone financial statements of the Company, we report that the Company has not taken any funds from any entity or person on account of or to meet the obligations of its subsidiary, associates or joint venture.
- f. According to the information and explanations given to us and procedures performed by us, we report that the Company has not raised loans during the year on the pledge of securities held in its subsidiaries, joint ventures or associate companies.
- (x) a. The Company has not raised any money during the year by way of initial public offer / further public offer (including debt instruments) and hence, the requirement to report on clause 3(x)(a) of the Order is not applicable to the Company.
- b. The Company has not made any preferential allotment or private placement of shares /fully or partially or optionally convertible

debentures during the year under audit and hence, the requirement to report on clause 3(x)(b) of the Order is not applicable to the Company.

- (xi) a. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company or on the Company, noticed or reported during the year, nor have we been informed of any such case by the Management.
- b. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, a report under Section 143(12) of the Act, in Form ADT-4, as prescribed under rule 13 of Companies (Audit and Auditors) Rules, 2014 was not required to be filed with the Central Government. Accordingly, the reporting under clause 3(xi)(b) of the Order is not applicable to the Company
- c. During the course of our examination of the books and records of the Company carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, the Company has received whistle-blower complaints during the year, which have been considered by us for any bearing on our audit and reporting. As explained by the management, there were certain complaints in respect of which investigations are ongoing as on the date of our report and hence, the impact on our audit report in respect of those complaints cannot be determined at this stage.
- (xii) As the Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it, the reporting under clause 3(xii) of the Order is not applicable to the Company.
- (xiii) The Company has entered into transactions with related parties in compliance with the provisions of Sections 177 and 188 of the Act. The details of such related party transactions have been disclosed in the standalone financial statements as required under Indian Accounting Standard 24 “Related Party Disclosures” specified under Section 133 of the Act.
- (xiv) a. In our opinion and according to the information and explanation given to us, the Company has an internal audit system commensurate with the size and nature of its business.

- b. The reports of the Internal Auditor for the period under audit have been considered by us.

Annexure to the Independent Auditor's Report of even date to the members of Om Infra Limited (Formerly known as Om Metal Infracore Limited), on the financial statements for the year ended 31st March 2022

INDEPENDENT AUDITOR'S REPORT

Annexure B

Independent Auditor's report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act"). In preparing the report, we have considered the report made under the aforesaid order by other auditors, who have audited the Financial Statements of the Segments of Engg. & Hotel and Joint operations of the Company we report that:

In conjunction with our audit of the standalone financial statements of **Om Infra Limited**. ("the Company") as of and for the year ended 31 March 2022, we have audited the internal financial controls over financial reporting (IFCoFR) of the company of as of that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Control Over Financial Reporting (the 'Guidance Note') issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of the company's business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial

reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the IFCoFR and their operating effectiveness. Our audit of IFCoFR included obtaining an understanding of IFCoFR, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment including the assessment of the risks of material misstatement of the financial statements whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's IFCoFR.

Meaning of Internal Financial Controls Over Financial Reporting

A company's IFCoFR is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's IFCoFR includes those policies and procedures that (1) pertain to the maintenance of records that in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of IFCoFR, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the IFCoFR to future periods are subject to the risk that IFCoFR may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Basis for Qualified Opinion

In our opinion, according to information and explanations given to us and based on our Audit Procedure performed, the following material weakness

has been identified in the operating effectiveness of the Company's IFCoFR as at 31.03.2022.

The Company's Internal Financial Control in respect of Supervisory and review controls over process of determining of (a) Carrying Value of the Company's Non-Current Investment in its Subsidiaries and Joint Venture (b) recoverability of Non-Current Loans, other Non-Current Financial Assets and Other Current Financial Assets due from such subsidiaries were not operating effectively. Absence of aforesaid assessment in accordance with the accounting principal generally accepted in India could potentially result in a material misstatement in the carrying value of investments in such Subsidiaries and the aforesaid dues from such subsidiaries and consequently, could also impact the Profit (Financial Performance including other Comprehensive Income) after tax.

A material weakness is a deficiency, or a combination of deficiencies, in IFCoFR, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statement will not be prevented or detected on a timely basis.

Qualified Opinion

In our opinion, except for the possible effects of the material weakness describe in the basis for Qualified Opinion Paragraph, the Company has, in all material respects, adequate internal financial controls over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2022, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Control Over Financial Reporting (the 'Guidance Note') issued by the Institute of Chartered Accountants of India (ICAI).

We have considered the material weakness identified and reported above in determining the nature, timing, and extent of Audit test applied in our Audit of the Standalone Financial Statements of the Company as at and for the year ended 31.03.2022, and the material weakness has affected our opinion on the standalone Financial Statements of the Company and we have issued a Qualified Opinion on the Standalone Financial Statement.

2 STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES:

2.01 Statement of Compliance:

Standalone Financial Statements have been prepared in accordance with the accounting principles generally accepted in India including Indian Accounting Standards (Ind AS) prescribed under the section 133 of the Companies Act, 2013 read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and the Companies (Accounting Standards) Amendment Rules, 2016.

The aforesaid financial statements have been approved by the Board of Directors in the meeting held on 30.05.2022

2.02 Basis of Preparation and Presentation:

The Standalone Financial Statements have been prepared on the historical cost basis except for certain financial instruments measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid for transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

Level 1 input are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

As the year-end figures are taken from the source and rounded to the nearest digits, the figures reported for the previous quarters might not always add up to the year figures reported in the statement.

2.03 Use of Estimates & Judgements:

(a.) The preparation of the financial statements in conformity with Ind AS requires the Management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed. Accounting estimates could change from period to period.

Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

(b.) Estimation of uncertainties relating to the global health pandemic from COVID-19.

The Company has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, unbilled revenues and investment in subsidiaries. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the Company, as at the date of approval of these financial statements has used internal and external sources of information including credit reports and related information, economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements.

2.04 Basis of classifications of current and non-current:

All the assets and liabilities have been classified as current or non-current in the balance sheet.

An asset has been classified as current if (a) it is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle; or (b) it is held primarily for the purpose of being traded; or (c) it is expected to be realized within twelve months after the reporting date; or (d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date. All other assets have been classified as non-current.

A liability has been classified as current when (a) it is expected to be settled in the Company's normal operating cycle; or (b) it is held primarily for the purpose of being traded; or (c) it is due to be settled within twelve months after the reporting date; or (d) the Company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. All other liabilities have been classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.05 Recent Accounting Pronouncements

Recent accounting pronouncements Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 23, 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022, applicable from April 1st, 2022, as below:

i. Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103.

ii. Ind AS 16 – Proceeds before intended use The amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in profit or loss.

iii. Ind AS 37 – Onerous Contracts - Costs of Fulfilling a Contract The amendments specify that that the 'cost of fulfilling' a contract comprises the 'costs that relate directly to the contract'. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts.

iv. Ind AS 109 – Annual Improvements to Ind AS (2021) The amendment clarifies which fees an entity includes when it applies the '10 percent' test of Ind AS 109 in assessing whether to derecognise a financial liability.

v. Ind AS 116 – Annual Improvements to Ind AS (2021) The amendments remove the illustration of the reimbursement of leasehold improvements by the lessor in order to resolve any potential confusion regarding the treatment of lease incentives that might arise because of how lease incentives were described in that illustration.

The Company is assessing the impact of these changes and will accordingly incorporate the same in the financial statements for the year ending March 2023.

2.06 Revenue Recognition:

Company mainly derives business from executing turnkey projects and sale of goods and services. Company is also in the business of real estate sector, manufacturing of plastic caps and hotel business activities.

Effective April 1, 2018, the Company adopted Ind AS 115 "Revenue from Contracts with Customers" using the cumulative catch-up transition method, applied to contracts that were not completed as of April 1, 2018. In accordance with the cumulative catch-up transition method, the comparatives have not been retrospectively adjusted. The following is a summary of new and/or revised significant accounting policies related to revenue recognition. Refer Note 1 "Significant Accounting Policies," in the Company's 2018 Annual Report for the policies in effect for revenue prior to April 1, 2018. The effect on adoption of Ind AS 115 was insignificant.

IND AS 115 lays down five step model for revenue recognition which is as follows:

- 1 Identify contract with customer
- 2 Identify performance obligations
- 3 Determine transaction price
- 4 Allocate transaction price to different performance obligations
- 5 Revenue recognition

A. Engineering Segment

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to receive in exchange for those products or services.

• Sale of Goods or Services

In case of sale of goods performance obligation is satisfied when control is transferred to customer and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

In case of sale of service performance obligation is satisfied when work is executed, customer approves the work performed and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

The company accounts for discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discounts/ incentives to each of the underlying performance obligation that corresponds to the progress by the customer towards earning the discount/ incentive. Such situation generally does not arise in company.

• Accounting of turnkey projects

Turnkey projects includes building of dam, canals, power house boards building dam gates etc. in executing turnkey projects many revenue emerges like direct contracts price which is mentioned, claims for arbitrations, or any other income related to projects.

In item rate contracts, the Company has applied the guidance in Ind AS 115, Revenue from contract with customer, by applying the revenue recognition criteria for each distinct performance obligation.

As company's major revenue comes through tendering of projects. Generally different set of performance obligations are already identified in tenders for which company has to quote separate price for each performance obligations. So performance obligations are identified at preliminary stage. Transaction price for each performance obligation is allocated in contract itself.

Performance obligation is satisfied when project authority approves the work and issue running bill on account of service or goods supplied by the company.

Revenue is recognized over a period of time using output method, Milestone Method. Milestone is being approved by the project awarding authority by issuing running bill against work executed by the company.

Variable considerations like escalation/claims/ arbitration or any incentives cannot be identified at initial level. Though provision of variable consideration is always forms part of contract with customer but as per past experience of company, variable consideration is very fluctuating and depends on the current work execution by the company. Determination of variable consideration is quite a complex task because it cannot be measured reliably and variable consideration is not directly related to each performance obligation.

In such situation performance obligations is being satisfied when project authorities approved the bill or paid the bills issued by company. After which revenue is recognized on the basis of bills approved.

In case of some claims filed by company which is being approved by third party authority like arbitrator/ courts, then such claims are accounted and revenue recognized only when order from third party is in favor of company unconditionally and project authority doesn't have any further right to appeal in higher courts.

Contract modifications, either to the contract scope or contract price are accounted for when additions, deletions or changes are approved either of the parties. The accounting for modifications of contracts involves assessing whether the work added to an existing contract is distinct and whether the pricing is at the standalone selling price. Work added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the standalone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the standalone selling price.

- **Trade receivables and Contract Balances**

The company classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time .

Invoicing in excess of earnings is classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

B. Accounting of Realestate Transactions

- (i.) Revenue from real estate projects – The Company derives revenue, primarily from sale of properties comprising of both commercial and residential units. Revenue from sale of constructed properties is recognised at a 'Point of Time', when the Company satisfies the performance obligations, which generally coincides with completion/ possession of the unit. To estimate the transaction price in a contract, the Company adjusts the contracted amount of consideration to the time value of money if the contract includes a significant financing component.
- (ii.) The revenue on account of interest on delayed payment by customers and expenditure on account of compensation / penalty for project delays are accounted for at the time of acceptance / settlement with the customers due to uncertainties with regard to determination of amount receivable / payable.
- (iii.) Amount received on booking is classified as contract liabilities and shown in balance sheet as current or non-current as classification permits.
- (iv.) Eligible expenses incurred for building of real estate units/flats are capitalized and shown as inventory as Work in progress stock.

C. Packaging Segment

In case of sale of goods performance obligation is satisfied when control is transferred to customer and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

In case of sale of service performance obligation is satisfied when work is executed, customer approves the work performed and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

The company accounts for discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discounts/ incentives to each of the underlying performance obligation that corresponds to the progress by the customer towards earning the discount/ incentive. Such situations generally does not arise in company.

The Company presents revenues net of indirect taxes in its statement of Profit and loss.

D. Accounting for Joint Arrangements Contracts:-

- (a.) Under Ind AS 111, Joint arrangement, Investment in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights or obligations of each investor, rather than the legal structure of the joint arrangement. Company has both joint operations and joint ventures.

(i.) Joint Operations

Company recognize its direct right to the asset, liability, revenue and expenses of joint operations and its share of any jointly held or incurred assets, liability, revenue and expenses in standalone financial statements.

(ii.) Joint Ventures

Joint ventures are accounted for using the equity method in consolidated financial statements. Such investments after being recognized at cost in standalone financial statements.

(b.)

(i.) In respect of contract executed in joint ventures under profit sharing arrangement (Assessment as AOP/Firm under Income Tax Laws), the services rendered to the Joint Ventures are accounted as income on accrual basis. The profit/Loss is accounted for, as and when it is determined by the Joint Venture and the net investment in the Joint venture is reflected as investment, loans and advance or current liabilities.

(ii.) Profit from those joint ventures which are Firms, are accounted directly in investment accounts and respective investment get increased.

2.07 Other Income:

a) Dividend and Interest Income:-

Revenue is recognized when the shareholder's right to receive payment is established (provided that it is probable that the economic benefit will flow to the company and the amount of income can be measured reliably). Dividend from subsidiaries is recognized even if the same is declared after the balance sheet date but pertains to period on or before the date of balance sheet as per the Companies Act., 2013.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on, time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.08 Leases:

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company accounts for each lease component within the contract as a lease separately from non-lease components of the contract and allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment.

Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For leases with reasonably similar characteristics, the Company, on a lease by lease basis, may adopt either the incremental borrowing rate specific to the lease or the incremental borrowing rate for the portfolio as a whole. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in statement of profit and loss.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

Company as a lessor

At the inception of the lease the Company classifies each of its leases as either an operating lease or a finance lease. The Company recognises lease payments received under operating leases as income on a straight-line basis over the lease term. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the lease. When the Company is an intermediate lessor it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short term lease to which the Company applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the Company applies Ind AS 115 Revenue from contracts with customers to allocate the consideration in the contract.

The incremental borrowing rate applied to lease liabilities as at April 1, 2019 is 11%.

2.09 Foreign Currency Transaction:

The Functional and reporting currency of the company is INR. Transactions other than functional currency are treated as foreign currency transactions.

(i.) Initial Recognition

Foreign currency transactions are recorded in the functional currency, by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction.

(ii.) Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

(iii.) Treatment of Exchange Differences

Exchange differences arising on settlement/restatement of short term foreign currency monetary assets and liabilities of the Company are recognized as income or expense in the Statement of Profit and Loss.

Exchange differences arising on long-term foreign currency monetary items related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset. Exchange differences arising on other long-term foreign currency monetary items are accumulated in the "Foreign Currency Monetary Translation Account" and amortized over the remaining life of the concerned monetary item.

(iv.) Translation of Foreign operation

The results and financial position of a foreign operation (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented (i.e. including comparatives) are translated at the closing rate at the date of that balance sheet;
- Income and expenses for each statement of profit and loss presented (i.e. including comparatives) are translated at average exchange rates; and
- All resulting exchange differences have been recognised in other comprehensive income.

On disposal of a foreign operation, the associated exchange differences are re-classified to profit or loss, as part of the gain or loss on disposal.

2.1 Borrowing Costs:

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use.

All other borrowing costs are recognized in the Statement of Profit and Loss in the period in which they are incurred.

The Company determines the amount of borrowing costs eligible for capitalization as the actual borrowing costs incurred on that borrowing during the period less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset. In case if the Company borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalization are determined by applying a capitalization rate to the expenditures on that asset.

The Company suspends capitalization of borrowing costs during extended periods in which it suspends active development of a qualifying asset.

2.11 Retirement and Other Employee Benefits:

Defined Contribution Plans

(a.) Payment to defined contribution retirement benefit plans are recognized as an expense when employees, as certified by board of directors have rendered service entitling them to the contributions.

(b.) Provident fund of the Company is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

(c.) Pension Fund of the Company is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

Defined Benefit Obligation Plans

For defined benefit obligation plants, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effects of changes to the assets, ceiling(if applicable) and the return on plan assets (excluding interest)is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the year in which they occur. Remeasurement recognised in OCI is reflected immediately in retained earnings will not be classified to profit & loss. Net interest is calculated by applying the discount rate to the net defined liability/asset. Defined benefit costs are categorized as follows:

- 1.) Service costs (including current service cost, past service cost as well as gains and losses on curtailment and settlements).
- 2.) Net interest expense or income
- 3.) Remeasurement

(d.) Gratuity liability is a defined benefit obligation of the company. The Company provides for gratuity to employees as calculated by actuarial valuer. The benefit is in the form of Lump sum payments to vested employees on resignation, retirement, on death while in employment or on termination of employment of and amount equivalent to 15 days basic salary payable to each completed year of services. Vesting occurs upon completion of 5 years of services. The company has not made annual contributions to funds administered by trustees or managed by insurance companies.

(e.) Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Company presents the entire leave as a non-current liability in the balance sheet.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefits expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income and such re-measurement gain / (loss) are not reclassified to the statement of profit and loss in the subsequent periods. They are included in retained earnings in the statement of changes in equity.

2.12 Taxation:

Tax expense comprises of current tax, deferred tax and Dividend Tax which are described as follows -:

(a.) Current Tax

Current tax is measured after providing deductions under chapter VI A of Income Tax Act, 1961 and making adjustments of ICDS prescribed under Income Tax Act, 1961 at the amount expected to be paid to the tax authorities, using the applicable tax rates. Current tax is calculated using tax rates that have been enacted or substantively enacted by the end of reporting period. Current Tax is generally charged to profit & loss except when they relate to items which are recognized in other comprehensive income or equity.

(b.) Deferred Tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred Tax is generally charged to profit & loss except when they relate to items which are recognized in other comprehensive income or equity.

Deferred tax asset and deferred tax liabilities are off-set if a legally enforceable right exist to set-off current tax asset against current tax liabilities and the deferred taxes relates to the same taxable entity and the same taxation authority.

2.13 Property, Plant and Equipment:

(a.) PROPERTY, PLANT & EQUIPMENT is recognized when it is probable that future economic benefits associated with the items will flow to the company and the cost of the item can be measured reliably.

The cost of Property Plant & Equipment comprises its purchase price net of any trade discounts and rebates, any import duty and other taxes any directly attributable expenditure on making the asset ready for its intended use including relevant borrowing cost for qualifying asset. Expenditure incurred after Property Plant & Equipment have been put into operation such as repair & maintenance are charged to the statement of Profit & Loss in the year in which the costs are incurred, Major shutdown and overhaul expenditure are capitalized as the activities undertaken improves the economic benefit expected to arise from the assets.

Assets in the course of construction are capitalized in the assets under construction account. At the point when the asset is operating at management's intended use, the cost of construction is transferred to the appropriate category of the PROPERTY, PLANT & EQUIPMENT and depreciation commences. Cost associated with the commissioning of the asset and any obligatory decommissioning costs are capitalized where the asset is available for use but incapable of operating at normal levels until a year of commissioning has been completed. Revenue generated from production during the trial period capitalized.

Capital subsidy received against specific assets is reduced from the value of relevant PROPERTY, PLANT & EQUIPMENT.

(b.) Free hold land is carried at historical cost.

(c.) Leasehold land is not amortized as all leasehold land is on 99 years lease with local authority and such leasehold land is outside the scope of Ind AS-16.

Items of stores and spares that meet the definition of property, plant and equipment are capitalized at cost. Otherwise, such items are classified as inventories.

An item of PROPERTY, PLANT & EQUIPMENT is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of PROPERTY, PLANT & EQUIPMENT is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit & loss.

Depreciation and Estimates

Depreciable amount for assets is the cost of an asset, or other amount substituted for costs, less its estimated residual value. Depreciation is recognized so as to write off the cost of asset (other than free hold land and lease hold land having 99 years of lease and properties under construction) less their residual values (after considering the restoration cost) over their useful lives using Written down value method as prescribed in schedule II of companies act, 2013.

2.14 Intangible Assets:

Intangible assets (which comprises of software acquired (useful life 3-5 years)) and depreciation /amortization on WDV method as per Companies Act 2013 and impairment losses if any.

Amortization is recognized on a written down value basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

2.15 Capital Work in Progress:

Capital work in progress are stated at cost and inclusive of preoperative expenses, project development expenses etc.

2.16 Impairment of Property, Plant & Equipments and Intangible Assets:

At the end of each reporting year, the company reviews the carrying amount of its tangible and intangible assets to determine whether there is any indication that those assets are suffered an impairment loss. If any such indication exists the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any). Where it is not possible to estimate the recoverable amount of the individual asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating unit or otherwise they are allocated to the smallest group of cash-generating unit for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less cost to sell and value in use. In assessing value in use the estimated future cash flow are discounted to their present value using pretax discount rate that reflects current market assessment if the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted.

An impairment loss is recognized in the Statement of Profit and Loss whenever the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount. A previously recognized impairment loss is increased or reversed depending on changes in circumstances.

However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

2.17 Inventories:

Inventories are stated at the lower of cost or net realizable value, details as follows:-

Raw Material, stores & spares, Components, construction material.	Cost includes cost of purchase and other costs incurred in bringing the inventories to the present location and condition.
Process Stocks and finished goods	Cost for this purpose includes direct material cost, labor cost plus appropriate share of manufacturing overheads allocated on absorption cost basis.(excluding borrowing cost)
Work In progress in case of Real Estate Projects	Cost for this purpose includes Land, borrowing costs, direct material cost, labor cost plus appropriate share of manufacturing overheads allocated on absorption cost basis.(excluding borrowing cost)

Costs of inventories are determined on FIFO basis. Net realizable value is estimated selling price in the ordinary course of business.

Goods in transit are stated at actual cost and freight if any.

2.18 Investment in Subsidiaries and Joint Venture:

Investment in subsidiaries is carried at deemed cost in the separate financial statements.

Investment in joint ventures and associates are valued at cost after adjusting impairment.

2.19 Provisions, Contingent Liabilities & Assets:

A Provision is recognized when an enterprise has a present obligation as a result of past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not disclosed to its present value and are determined based on best management estimate taking into account the risks and uncertainties surrounding the obligation required to settle the obligation at the balance sheet date.

These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation.

A contingent asset is a possible asset that arises from past events the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise.

Contingent liabilities and assets are not recognized but are disclosed in the notes.

2.20 Financial Instruments:

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial Assets:

(a.) Classification: The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

(b.) Initial Recognition: Financial assets are recognised initially at fair value considering the concept of materiality. Transaction costs that are directly attributable to the acquisition of the financial asset (other than financial assets at fair value through profit or loss) are added to the fair value measured on initial recognition of financial assets.

(c.) Subsequent Measurement of Financial Assets: Financial assets are subsequently measured at amortized cost if they are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income (FVTOCI): Financial assets are subsequently measured at fair value through other comprehensive income (FVTOCI), if it is held within a business model whose objective is achieved by both from collection of contractual cash flows and selling the financial assets, where the assets' cash flows represent solely payments of principal and interest. Further equity instruments where the Company has made an irrevocable election based on its business model, to classify as instruments measured at FVTOCI, are measured subsequently at fair value through other comprehensive income.

(d.) Impairment of Financial Assets: The Company assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost and FVTOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

In accordance with Ind AS 109: Financial Instruments, the Company recognizes impairment loss allowance on trade Standalone Financial Statement as at and for the year ended 31st March, 2018 SPML Infra Limited 114 Annual Report 2017-18 receivables based on historically observed default rates. Impairment loss allowance recognized during the year is charged to the Statement of Profit and Loss.

(e.) Derecognition of financial assets: A financial asset is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company's continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Financial Liabilities:

(a.) Classification: The Company classifies its financial liabilities in the following measurement categories:

- Those to be measured subsequently at fair value through profit or loss, and
- Those measured at amortized cost using the effective interest method. The classification depends on the entity's business model for managing the financial liabilities and the contractual terms of the cash flows.

(b.) Initial Recognition: Financial liabilities are recognized at fair value on initial recognition considering the concept of materiality. Transaction costs that are directly attributable to the issue of financial liabilities that are not at fair value through profit or loss are reduced from the fair value on initial recognition.

(c.) Subsequent Measurement of Financial Liabilities: The measurement of financial liabilities depends on their classification, as described below:

Amortised cost: After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective interest rate (EIR) method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

(d.) Derecognition of financial liabilities: A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the Derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of Financial Instruments

The Company offsets a financial asset and a financial liability when it currently has a legally enforceable right to set off the recognized amounts and the Company intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

2.21 Fair Value Measurement:

The Company measures financial instruments, such as, equity instruments at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3- Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Company's management determines the policies and procedures for both recurring fair value measurement, such as instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for disposal in discontinued operation.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Company's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

The management also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summaries accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

2.22 Non-Current Asset Held for Sale and Discontinued Operations

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. The criteria for held for sale is regarded met only when the assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sale of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned.

Non-current assets held for sale are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets.

An impairment loss is recognised for any initial or subsequent write-down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortized.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations,
- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

Discontinued operations are excluded from the results of continuing operations and are presented as profit or loss before / after tax from discontinued operations in the statement of profit and loss.

2.23 Segment Reporting and Accounting Policies

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. Chief operating decision maker review the performance of the Company according to the nature of products manufactured traded and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of segments is based on the activities performed by each segment.

The Company prepares its segment information in conformity with the accounting policies adopted for preparing and presenting financial statements of the Company as a whole.

2.24 Cash and Cash Equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.25 Earnings per Share

(a.) Basic EPS

Basic EPS is calculated by dividing the profit attributable to shareholders by the weighted average number of shares outstanding during financial year adjusted for bonus elements in the equity shares issued during the year.

(b.) Diluted EPS

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

3 Key Sources of Estimation Uncertainty and Critical Accounting Judgements

In the course of applying the policies outlined in all notes under section 2 above, the Company is required to make judgments, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period, if the revision affects current and future period.

Key sources of estimation uncertainty

(i.) Useful lives of property, plant and equipment

Management reviews the useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors including relative efficiency and operating costs. Accordingly, depreciable lives are reviewed annually using the best information available to the Management.

(ii.) Impairment of property plant and equipment

Determining whether the property, plant and equipment are impaired requires an estimate in the value in use of plant and equipment. The value in use calculation requires the Management to estimate the future cash flows expected to arise from the property, plant and equipment and a suitable discount rate in order to calculate present value. When the actual cash flows are less than expected, a material impairment loss may arise.

(iii.) Provisions and liabilities

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgment to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(iv.) Impairment of investments in joint ventures and associate

Determining whether the investments in joint ventures and associate are impaired requires an estimate in the value in use of investments. In considering the value in use, the Management have anticipated the future commodity prices, capacity utilization of plants, operating margins, and availability of infrastructure, discount rates and other factors of the underlying businesses / operations of the investee companies. Any subsequent changes to the cash flows due to changes in the above mentioned factors could impact the carrying value of investments.

(v.) Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystallizing or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not recognized.

(vi.) Fair value measurements

When the fair values of financial assets or financial liabilities recorded or disclosed in the financial statements cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include consideration of inputs such as liquidity risk, credit risk and volatility.

(vii.) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

In determining the allowances for doubtful trade receivables, the Company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and rates used in the provision matrix. There has been no significant change in the credit quality of receivables past due for more than 180 days.

Before accepting any new customer, the Company uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. The Company does not generally hold any collateral or other credit enhancements over these balances nor does it have a legal right of offset against any amounts owed by the Company to the counterparty.

Trade receivables have been given as Primary security towards borrowings.

In determining the recoverability of a trade receivable, the Company considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the end of the reporting period. The concentration of credit risk is limited due to the fact that the customer base is large and mostly unrelated.

In every payments of running bill, project authority deduct retention amount which is either released by submitting bank guarantee or released after successful completion of project. This retention amount keeps accumulating. Collection of retention money is probable and therefore debtors on account of retention money are considered good. refer note no 49.

(i) General reserve

Under the erstwhile Indian Companies Act 2013, a General Reserve was created through an annual transfer of net income at a specified percentage in accordance with applicable regulations. The purpose of these transfers was to ensure that if a dividend distribution in a given year is more than 10% of the paid-up capital of the Company for that year, then the total dividend distribution is less than the total distributable results for that year.

Consequent to introduction of Companies Act 2013, the requirement of mandatory transfer of a specified percentage of the net profit to general reserve has been withdrawn and the Company can optionally transfer any amount from the surplus of profit or loss account to the General reserves.

(ii) Dividends

The Company declares and pays final dividends in Indian rupees 385.22 lacs for the year 2020-21.

(iii) Capital Reserve

Reserve is created on amalgamation as per statutory requirement for Rs. 81.67 crore and balance Rs. 41.51 crore on account of sales of assets and investments.

26 Income Taxes

Indian companies are subject to Indian income tax on a standalone basis. Each entity is assessed to tax on taxable profits determined for each fiscal year beginning on April 1 and ending on March 31.

Statutory income taxes are assessed based on book profits prepared under generally accepted accounting principles in India adjusted in accordance with the provisions of the (Indian) Income tax Act, 1961. Such adjustments generally relate to depreciation of fixed assets, disallowances of certain provisions and accruals, deduction for tax holidays, the set-off of tax losses and depreciation carried forward and retirement benefit costs. Statutory income tax is charged at 25% plus a surcharge and education cess.

(b) Segment accounting polices:

In addition to the significant accounting policies applicable to the business segment as set in note 2.23, the accounting policies in relation to segment accounting are as under:

i) Segment revenue & expenses:

Joint revenue and expenses of segments are allocated amongst them on a reasonable basis. All other segment revenue and expenses are directly attributable to the segments.

ii) Segment assets and liabilities:

Segment assets include all operating assets used by a segment and consist principally of operating cash, receivables, inventories and fixed assets, net of allowance and provisions, which are reported as direct off sets in the balance sheet. Segment Liabilities include all operating Liabilities and consist principally of trade payables & accrued liabilities. Segment assets and liabilities do not include deferred income taxes except in the Engineering division. While most of the assets/liabilities can be directly attributed to individual segments, the carrying amount of certain assets /liabilities pertaining to two more segments are allocated to the segments on a reasonable basis.

iii) Inter segment sales:

Inter segment sales between operating segments are accounted for at market price. These transactions are eliminated in consolidation. The main division is engineering division and funds provided by engineering division to other division and interest on such balances are not charged.

iv) Other segment having revenue from sale of external customers in excess of 10% of total revenue of all segments is shown separately and others are shown in other segment.

46 Retirement And Other Employee Benefits:

(a) Defined Contribution Plans

The Company operates defined contribution retirement benefit plan for all qualifying employees. Company directly contributes to the provident fund and having no obligation for further contribution.

Particulars	(Rs. In Lacs)	
	2021-22	2020-21
Provident Fund	31.60	14.66
Contribution to Employee State Insurance	3.61	2.15

(b) Defined Benefit Plans

Gratuity has been provided on the basis of actuarial valuation using the project unit credit method and same is non-funded. The obligation for leave encashment is recognized in the same manner as gratuity.

The plans in India typically expose the Company to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk: The liability is not funded and is not relevant in company.

Interest risk: The rate used to discount post-employment benefit obligation should be determined by reference to market yields at the balance sheet date on Government bonds. The currency and term of government bonds should be in consistent with the currency and estimated term of post-employment benefit obligation.

Salary risk: Salary increase should take into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

No other post-retirement benefits are provided to these employees.

47.3 Financial Risk Management

The Company manages financial Risk by its Board of Directors for overseeing the Risk Management Framework and developing and monitoring the Company's risk management policies. The risk management policies are established to ensure timely identification and evaluation of risks, setting acceptable risk thresholds, identifying and mapping controls against these risks, monitor the risks and their limits, improve risk awareness and transparency. Risk management policies and systems are reviewed regularly to reflect changes in the market conditions and the Company's activities to provide reliable information to the Management and the Board to evaluate the adequacy of the risk management framework in relation to the risk faced by the Company.

The risk management policies aim to mitigate the following risks arising from the financial instruments:

- Market risk
- Credit risk; and
- Liquidity risk

47.4 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market prices. The Company is exposed in the ordinary course of its business to risks related to changes in foreign currency exchange rates, commodity prices and interest rates.

47.5 Foreign Currency Risk Management (As Per Annexure 48.5A)

The Company's functional currency is Indian Rupees (INR). The Company undertakes transactions denominated in foreign currencies; consequently, exposure to exchange rate fluctuations arise. Volatility in exchange rates affects the Company's revenue from export markets and the costs of imports, primarily in relation to raw materials. The Company is exposed to exchange rate risk under its trade and debt

Adverse movements in the exchange rate between the Rupee and any relevant foreign currency results in increase in the Company's overall debt position in Rupee terms without the Company having incurred additional debt and favorable movements in the exchange rates will conversely result in reduction in the Company's receivables in foreign currency.

The carrying amounts of the Company's monetary assets and monetary liabilities at the end of the reporting period are as follows:

47.6 Commodity Price Risk :-

The Company's revenue is exposed to the market risk of price fluctuations in its division is as under:

Engineering Segment: the company generally takes Turnkey projects from government departments. The contract price is generally fix and free from any price risk subject to change in any government policy or rules.

Real Estate Segment: the company is exposed to risk of prices of Residential and commercial units. These prices may be influenced by factors such as supply and demand, and regional economic conditions.

Other Segment (Packaging): the company is exposed to risk of prices of goods. These prices may be influenced by factors such as supply and demand, Cost of Production and regional economic conditions.

Market forces generally determine prices for the Real Estate and Packaging Segment of the Company. Adverse changes in any of these factors may reduce the revenue that the Company earns from the sale of its products.

The Company primarily purchases its raw materials in the open market from third parties. The Company is therefore subject to fluctuations in prices for the purchase of Building Material and other raw material inputs. The Company purchased substantially all of its Raw Material from third parties in the open market.

The Company aims to sell the products at prevailing market prices. Similarly the Company procures raw materials on prevailing market rates as the selling prices of its products and the prices of input raw materials move in the same direction.

47.7 Credit Risk Management:

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks.

Company's credit risk arises principally from the trade receivables, loans, investments in debt securities, cash & cash equivalents.

Trade Receivables:

The company's customer profile includes public sector enterprises, state owned companies and private corporate as well as large individuals. Accordingly, company's customer risk is low. The company's average project execution cycle is around 24 to 36 months, general payment terms includes mobilization advances, monthly progress payments with a credit period ranging from 45 to 90 days and certain retention money to be released at the end of the project.

Customer credit risk is managed centrally by the Company and subject to established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard. The history of trade receivables shows a negligible allowance for bad and doubtful debts.

47.8 Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is exposed to interest rate risk because funds are borrowed at both fixed and floating interest rates. Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate.

The borrowings of the Company are principally denominated in rupees and US dollars with a mix of fixed and floating rates of interest. The Company has exposure to interest rate risk, arising principally on changes in base lending rate and LIBOR rates.

Fixed Rate Borrowings	2273.18	1466.50
Floating Rate Borrowings	1873.70	1134.65
Total Borrowings	4146.88	2601.15

47.9 Liquidity risk Management

Liquidity risk refers to the risk of financial distress or extraordinary high financing costs arising due to shortage of liquid funds in a situation where business conditions unexpectedly deteriorate and requiring financing. The Company requires funds both for short term operational needs as well as for long term capital expenditure growth projects. The Company generates sufficient cash flow for operations, which together with the available cash and cash equivalents and short-term investments provide liquidity in the short-term and long-term. The Company has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods and its non-derivative financial assets. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

(a)

(i) The Company, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 5089.70 Lacs (31 March 2021: 5089.70 lacs), and current advances of Rs. 10324.31 Lacs (31st March 2021 Rs. 10245.07 Lacs) in Bhilwara Jaipur Toll Road Private Limited, Joint Venture, is holding 49% share in Special Purpose Vehicle (SPV). SPV had been awarded project by Rajasthan State Govt. through PWD to Design, Build, Finance, Operate and transfer (DBFOT) SH-12 toll road through an agreement dated 12.07.2010. SPV was granted a right to collect toll fees for 22 years starting from 02.02.2012 till 02.02.2034. Company is fulfilling its obligations perfectly despite of regular defaults made by government in fulfilling its obligations.

SPV was collecting toll on all vehicles including private vehicles as per concession agreement. But Government announced to exempt toll fees of private vehicles w.e.f. 01.04.2018. Since the private vehicle's toll fees is significant portion of total toll collection and Joint Venture calculated project viability including that toll collection on private vehicles. SPV suffered losses of revenue because of toll fees exemption on private vehicles. SPV intimated this loss to PWD and asked them to compensate the loss. But in spite of regular reminders and notices by the SPV to PWD, PWD did not respond to any of their notices.

After reminders and notices, SPV decided to terminate the project w.e.f. 03.10.2018 and sent notice to PWD about termination. SPV approached PWD for amicable settlement of loss of revenue but after seeing no response from PWD, SPV moved to commercial court for asking compensation where commercial court suggested to go through arbitration process. The company raised the various claims of Rs. 61200.00 lacs (P.Y. Rs. 61200.00 Lacs). Arbitrator in its interim award directed PWD to pay bank debt and take custody of road and this award is challenged by PWD in Commercial court. Govt of Rajasthan withdrew its order dated 1.4.2018 and allowed the toll collection from Private vehicles w.e.f 1.11.2019.

The interim award of arbitrator has been upheld and as per clarification decision of Honorable High Court pronounced on 20th Dec, 2021 -the receipt of funds in escrow account from PWD Rs. 191.79 Crores has been adjusted in loan account of banks. The final award for claim is in hearing process with arbitrator.

Going Concern:

SPV terminated the agreement on 03.10.2018 and raised the claim including debt due and capital contributed as per termination clause of concession agreement with the PWD. SPV did not book any revenue and expenses related to toll road collection w.e.f. 03.10.2018. SPV is running toll operation on behalf of PWD.

- (i) Joint Venture has earned a profit of Rs. 1.37 Lacs (p.y. loss of Rs. 1.19 lacs) subject to point above. Joint Venture's accumulated losses amount of Rs. 4544.89 lacs (P.Y. Rs. 4546.61 lacs) which are eroding capital of the Joint Venture substantially. Interest on Loan is not provided as company has terminated concession agreement. Joint Venture is of the view that all such losses and amount due to company will be recovered from PWD through claim.
- (ii) It is understood that post receipt of arbitration award by SPV, all claims of Om Metals shall be settled by SPV.
- (b) The Company, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 488.45 lacs (31 March 2021: 488.45 lacs), in Chahel Infrastructure Limited, a subsidiary, which is holding 94.46% share in company. While such entities have incurred losses during their past years and net-worth of entity as at 31 March 2022 has been fully eroded and company will receive projects in future based on its experience which will generate revenue in future and such losses will be recovered. Therefore, based on certain estimates like future business plans, growth prospects and other factors, the management believes that the realizable amount of subsidiary is fully recoverable due to which these are considered as good and recoverable.
- (c) The Company, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 95.00 lacs (31 March 2021: Rs. 95 lacs), in Sanmati Infra Developers Private Limited, a Associate, which is holding 25% share in company. While such entities have incurred losses during their past years and net-worth of entity as at 31 March 2022 has been fully eroded and company will receive projects in future based on its experience which will generate revenue in future and such losses will be recovered. Therefore, based on certain estimates like future business plans, growth prospects and other factors, the management believes that the realizable amount of subsidiary is fully recoverable due to which these are considered as good and recoverable.

(d) The Company, as at 31 March 2022, has a non-current investment amounting to Rs. 2.50 lacs (31 March 2021: 2.50 lacs), and non-current advances of Rs. 747.66 Lacs (31st March, 2021 Rs. 747.61 Lacs) in Gurha Thermal Power Company Limited, a Joint Venture, is holding 50% share in Joint Venture. The Joint Venture has terminated the Power Purchase Agreement (PPA) on 15-07-2015 with Rajasthan Rajya Vidhyut Prasaran Nigam Ltd (RRV PNL). The Joint Venture was formed for the Business of Power generation and selling the same to the RRV PNL. As the agreement is terminated by the Joint Venture and the Joint Venture has also filed the claim against the RRV PNL for the recovery of the amount invested by the Company of Rs. 750.16 Lacs plus interest. The Joint Venture has filed petition before the Rajasthan Electricity Regulatory Commission, Jaipur. RERC vide its order dated 09.01.2018 dismissed the petition. The Joint Venture challenged the order of RERC, Jaipur by filing appeal before the APTEL (Appellate Tribunal for Electricity), New Delhi. The case is pending for adjudication.

The Joint Venture, in view of the litigation at APTEL (Appellate tribunal of electricity) in the matter of statutory clearances from authorities in relation to agreements with Rajasthan Rajya Vidhyut Prasaran Nigam Ltd (RRV PNL) before which the Joint Venture has made a claim among other things for reimbursement of expenses incurred in relation to the project, compensation etc., but the matter is under subjudice, and thereafter the Joint Venture pursues other projects in the near to medium term, hence the going concern assumption is followed and such amount invested and loan granted is good and recoverable.

58 In every payment of running bill, project authority deduct retention amount on account of defect liabilities arise during the contract period which is either released by submitting bank guarantee or released after successful completion of project. This retention amount keeps accumulating. Collection of retention money is probable and therefore debtors on account of retention money are considered good based on the track record and previous performance of the company. Deduction of retention money has been claimed as per the provisions of Income Tax Computation and Disclosure Standards (ICDS). Company have created deferred tax on retention money due to difference in tax base and accounting base as per Ind As 12 and same has been considered for previous year as well. Company has shown such retention money as debtors as good and realizable in its stock Statements as they are due from governments.

II.		Audit Qualification (each audit qualification separately):		
		Qualification 1		
		a. Details of Audit Qualification:	<p align="center">The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 488.45 Lacs in a subsidiary namely Chahel Infrastructure Limited; being considered good and recoverable by the management. However, this Subsidiary has accumulated losses and its net worth is fully eroded. Further, this subsidiary is facing liquidity constraints due to which it may not be able to attain projections made as per business plans, thus we are unable to comment upon the carrying value of this non-current investment and recoverability of the aforesaid dues and the consequential impact, if any, on the accompanying standalone financial results. Further we have not received audited Financial Statements of Subsidiary for the year ended on 31.03.2022 . The recoverability of the said investment is in doubtful in our opinion.</p>

	Qualification 2	
	a. Details of Audit Qualification:	<p>The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 5089.70 Lacs and advances of Rs. 10325.18 Lacs (P.y. 10245.07 Lacs) in the name of Bhilwara Jaipur Toll Road Private Limited; being considered good and recoverable by the management. Joint venture has filed termination to their respective authority and claimed the amount invested and termination payments as per concession agreement of Rs.61200 Lakhs.</p> <p>So far as this matter indicates material uncertainty about the going concern of joint venture. In our view, recoverability of the amount invested and advance provided not certain but no provisioning has been made against such diminishing of investment and loans. No Interest has been provided by the company on advances grant joint venture for four years. Management is of the view that Since Interim award has been received and Final arbitration claims have merits and will be in favor of SPV and amount invested and advance provided will be recovered. The interim award of arbitrator has been upheld and as per clarification decision of Honorable High Court pronounced on 20th Dec, 2021 –the receipt of funds in escrow account from PWD Rs. 191.79 Crores has been adjusted in loan account of banks. The final award for claim is in hearing process with arbitrator.Our opinion is modified in respect of the same</p>

2 STATEMENT OF SIGNIFICANT ACCOUNTING POLICIES:

2.01 Statement of Compliance:

Consolidated Financial Statements have been prepared in accordance with the accounting principles generally accepted in India including Indian Accounting Standards (Ind AS)prescribed under the section 133 of the Companies Act,2013 read with rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 and the Companies (Accounting Standards) Amendment Rules, 2016.

The aforesaid financial statements have been approved by the Board of Directors in the meeting held on 30.05.2022.

2.02 Basis of preparation and presentation:

The Consolidated Financial Statements have been prepared on the historical cost basis except for certain financial instruments measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid for transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes in to account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurements in its entirety, which are described as follows:

Level 1 input are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

As the year-end figures are taken from the source and rounded to the nearest digits, the figures reported for the previous quarters might not always add up to the year figures reported in the statement.

2.03 Use of Estimates & Judgements:

(a.) The preparation of the financial statements in conformity with Ind AS requires the Management to make estimates, judgments and assumptions. These estimates, judgments and assumptions affect the application of accounting policies and the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these financial statements have been disclosed. Accounting estimates could change from period to period.

Actual results could differ from those estimates. Appropriate changes in estimates are made as the Management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

(b.) Estimation of uncertainties relating to the global health pandemic from COVID-19.

The group has considered the possible effects that may result from the pandemic relating to COVID-19 on the carrying amounts of receivables, unbilled revenues and investment in subsidiaries. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of this pandemic, the group, as at the date of approval of these financial statements has used internal and external sources of information including credit reports and related information, economic forecasts. The group has performed sensitivity analysis on the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the group's financial statements may differ from that estimated as at the date of approval of these financial statements.

2.04 Basis of classifications of current and non-current:

All the assets and liabilities have been classified as current or non-current in the balance sheet.

An asset has been classified as current if (a) it is expected to be realized in, or is intended for sale or consumption in, the Group's normal operating cycle; or (b) it is held primarily for the purpose of being traded; or (c) it is expected to be realized within twelve months after the reporting date; or (d) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date. All other assets have been classified as non-current.

A liability has been classified as current when (a) it is expected to be settled in the Group's normal operating cycle; or (b) it is held primarily for the purpose of being traded; or (c) it is due to be settled within twelve months after the reporting date; or (d) the Group does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date. All other liabilities have been classified as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

2.05 Recent Accounting Pronouncements

Recent accounting pronouncements Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 23, 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022, applicable from April 1st, 2022, as below:

i. Ind AS 103 – Reference to Conceptual Framework The amendments specify that to qualify for recognition as part of applying the acquisition method, the identifiable assets acquired and liabilities assumed must meet the definitions of assets and liabilities in the Conceptual Framework for Financial Reporting under Indian Accounting Standards (Conceptual Framework) issued by the Institute of Chartered Accountants of India at the acquisition date. These changes do not significantly change the requirements of Ind AS 103.

ii. Ind AS 16 – Proceeds before intended use The amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in profit or loss.

iii. Ind AS 37 – Onerous Contracts - Costs of Fulfilling a Contract The amendments specify that the ‘cost of fulfilling’ a contract comprises the ‘costs that relate directly to the contract’. Costs that relate directly to a contract can either be incremental costs of fulfilling that contract (examples would be direct labour, materials) or an allocation of other costs that relate directly to fulfilling contracts.

iv. Ind AS 109 – Annual Improvements to Ind AS (2021) The amendment clarifies which fees an entity includes when it applies the ‘10 percent’ test of Ind AS 109 in assessing whether to derecognise a financial liability.

v. Ind AS 116 – Annual Improvements to Ind AS (2021) The amendments remove the illustration of the reimbursement of leasehold improvements by the lessor in order to resolve any potential confusion regarding the treatment of lease incentives that might arise because of how lease incentives were described in that illustration.

The Company is assessing the impact of these changes and will accordingly incorporate the same in the financial statements for the year ending March 2023.

2.06 Revenue Recognition:

Group mainly derives business from executing turnkey projects and sale of goods and services. Group is also in the business of real estate sector, manufacturing of plastic caps and hotel business activities.

Effective April 1, 2018, the Group adopted Ind AS 115 “Revenue from Contracts with Customers” using the cumulative catch-up transition method, applied to contracts that were not completed as of April 1, 2018. In accordance with the cumulative catch-up transition method, the comparatives have not been retrospectively adjusted. The following is a summary of new and/or revised significant accounting policies related to revenue recognition. Refer Note 1 “Significant Accounting Policies,” in the Group’s 2018 Annual Report for the policies in effect for revenue prior to April 1, 2018. The effect on adoption of Ind AS 115 was insignificant.

IND AS 115 lays down five step model for revenue recognition which is as follows:

- 1 Identify contract with customer
- 2 Identify performance obligations
- 3 Determine transaction price
- 4 Allocate transaction price to different performance obligations
- 5 Revenue recognition

A. Engineering Segment

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration we expect to receive in exchange for those products or services.

• Sale of Goods or services

In case of sale of goods performance obligation is satisfied when control is transferred to customer and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

In case of sale of service performance obligation is satisfied when work is executed, customer approves the work performed and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

The group accounts for discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discounts/ incentives to each of the underlying performance obligation that corresponds to the progress by the customer towards earning the discount/ incentive. Such situations generally does not arise in group.

- **Accounting of turnkey projects**

Trunkey projects includes building of dam, canals, power house boards building dam gates etc. in executing turnkey projects many revenue emerges like direct contacts price which is mentioned, claims for arbitrations, or any other income related to projects.

In item rate contracts, the Group has applied the guidance in Ind AS 115, Revenue from contract with customer, by applying the revenue recognition criteria for each distinct performance obligation.

As group's major revenue comes through tendering of projects. Generally different set of performance obligations are already identified in tenders for which group has to quote separate price for each performance obligations. So performance obligations are identified at preliminary stage. Transaction price for each performance obligation is allocated in contract itself.

Performance obligation is satisfied when project authority approves the work and issue running bill on account of service or goods supplied by the group.

Revenue is recognized over a period of time using output method, Milestone Method. Milestone is being approved by the project awarding authority by issuing running bill against work executed by the group.

Variable considerations like escalation/claims/ arbitration or any incentives cannot be identified at initial level. Though provision of variable consideration is always forms part of contract with customer but as per past experience of group, variable consideration is very fluctuating and depends on the current work execution by the group. Determination of variable consideration is quite a complex task because it cannot be measured reliably and variable consideration is not directly related to each performance obligation.

In such situation performance obligations is being satisfied when project authorities approved the bill or paid the bills issued by group. After which revenue is recognized on the basis of bills approved.

In case of some claims filed by group which is being approved by third party authority like arbitrator/ courts, then such claims are accounted and revenue recognized only when order from third party is in favor of group unconditionally and project authority doesn't have any further right to appeal in higher courts.

Contract modifications, either to the contract scope or contract price are accounted for when additions, deletions or changes are approved either of the parties. The accounting for modifications of contracts involves assessing whether the work added to an existing contract is distinct and whether the pricing is at the consolidated selling price. Work added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the consolidated selling price, or as a termination of the existing contract and creation of a new contract if not priced at the consolidated selling price.

- **Trade Receivables and Contract Balances**

The group classifies the right to consideration in exchange for deliverables as either a receivable or as unbilled revenue.

A receivable is a right to consideration that is unconditional upon passage of time. Revenue for time and material contracts are recognized as related service are performed. Revenue for fixed price maintenance contracts is recognized on a straight line basis over the period of the contract. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset for these cases as right to consideration is unconditional upon passage of time

Invoicing in excess of earnings is classified as unearned revenue.

Trade receivable and unbilled revenues are presented net of impairment in the Balance Sheet.

B. Accounting of Real estate Sector

- (i.) Revenue from real estate projects – The Group derives revenue, primarily from sale of properties comprising of both commercial and residential units. Revenue from sale of constructed properties is recognised at a 'Point of Time', when the Company satisfies the performance obligations, which generally coincides with completion/ possession of the unit. To estimate the transaction price in a contract, the Company adjusts the contracted amount of consideration to the time value of money if the contract includes a significant financing component.
- (ii.) The revenue on account of interest on delayed payment by customers and expenditure on account of compensation / penalty for project delays are accounted for at the time of acceptance / settlement with the customers due to uncertainties with regard to determination of amount receivable / payable.
- (iii.) Amount received on booking is classified as contract liabilities and shown in balance sheet as current or non-current as classification permits.
- (iv.) Eligible expenses incurred for building of real estate units/flats are capitalized and shown as inventory as Work in progress stock.

C. Packaging Sector

In case of sale of goods performance obligation is satisfied when control is transferred to customer and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

In case of sale of service performance obligation is satisfied when work is executed, customer approves the work performed and recoverability of amount is probable. Transaction price is same as invoice value excluding taxes. Revenue is recognized as and when performance obligation is satisfied.

The group accounts for discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discounts/ incentives to each of the underlying performance obligation that corresponds to the progress by the customer towards earning the discount/ incentive. Such situations generally does not arise in group.

The Group presents revenues net of indirect taxes in its statement of Profit and loss.

D. Accounting for Joint arrangements Contracts:-

(a.) 1) Under Ind AS 111, Joint arrangement, Investment in joint arrangements are classified as either joint operations or joint ventures. The classification depends on the contractual rights or obligations of each investor, rather than the legal structure of the joint arrangement. Group has both joint operations and joint ventures.

(i.) Joint Operations

Group recognize its direct right to the asset, liability, revenue and expenses of joint operations and its share of any jointly held or incurred assets, liability, revenue and expenses in consolidated financial statements.

(ii.) Joint Ventures

Joint ventures are accounted for using the equity method in consolidated financial statements. Such investments after being recognized at cost in consolidated financial statements.

(b.)

(i.) In respect of contract executed in joint ventures under profit sharing arrangement (Assessment as AOP/Firm under Income Tax Laws) , the services rendered to the Joint Ventures are accounted as income on accrual basis. The profit/Loss is accounted for, as and when it is determined by the Joint Venture and the net investment in the Joint venture is reflected as investment, loans and advance or current liabilities.

(ii.) Profit from those joint ventures which are Firms, are accounted directly in investment accounts and respective investment get increased.

2.07 Other Income:

a) Dividend and Interest Income:-

Revenue is recognized when the shareholder's right to receive payment is established (provided that it is probable that the economic benefit will flow to the group and the amount of income can be measured reliably). Dividend from subsidiaries is recognized even if the same is declared after the balance sheet date but pertains to period on or before the date of balance sheet as per the Companies Act., 2013.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on, time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.08 Leases:

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as a lessee

The Group accounts for each lease component within the contract as a lease separately from non-lease components of the contract and allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

The Group recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment.

Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Group measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses incremental borrowing rate. For leases with reasonably similar characteristics, the group, on a lease by lease basis, may adopt either the incremental borrowing rate specific to the lease or the incremental borrowing rate for the portfolio as a whole. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the group is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The group recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Group recognises any remaining amount of the re-measurement in

The group has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

The Group as a lessor

At the inception of the lease the group classifies each of its leases as either an operating lease or a finance lease. The group recognises lease payments received under operating leases as income on a straight-line basis over the lease term. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the lease. When the group is an intermediate lessor it accounts for its interests in the head lease and the sub-lease separately. It assesses the lease classification of a sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. If a head lease is a short term lease to which the group applies the exemption described above, then it classifies the sub-lease as an operating lease.

If an arrangement contains lease and non-lease components, the group applies Ind AS 115 Revenue from contracts with customers to allocate the consideration in the contract.

The incremental borrowing rate applied to lease liabilities as at April 1, 2019 is 11%.

2.09 Foreign Currency Transaction:

The Functional and reporting currency of the group is INR. Transactions other than functional currency are treated as foreign currency transactions.

(i.) Initial Recognition

Foreign currency transactions are recorded in the functional currency, by applying to the foreign currency amount the exchange rate between the functional currency and the foreign currency at the date of the transaction.

(ii.) Conversion

Foreign currency monetary items are reported using the closing rate. Non-monetary items which are carried in terms of historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction.

(iii.) Treatment of Exchange Differences

Exchange differences arising on settlement/restatement of short term foreign currency monetary assets and liabilities of the Group are recognized as income or expense in the Statement of Profit and Loss.

Exchange differences arising on long-term foreign currency monetary items related to acquisition of a fixed asset are capitalized and depreciated over the remaining useful life of the asset. Exchange differences arising on other long-term foreign currency monetary items are accumulated in the "Foreign Currency Monetary Translation Account" and amortized over the remaining life of the concerned monetary item.

(iv.) Translation of Foreign operation

The results and financial position of a foreign operation (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each balance sheet presented (i.e. including comparatives) are translated at the closing rate at the date of that balance sheet;
- Income and expenses for each statement of profit and loss presented (i.e. including comparatives) are translated at average exchange rates; and
- All resulting exchange differences have been recognised in other comprehensive income.

On disposal of a foreign operation, the associated exchange differences are re-classified to profit or loss, as part of the gain or loss on disposal.

2.1 Borrowing Costs:

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use.

All other borrowing costs are recognized in the Statement of Profit and Loss in the period in which they are incurred.

The Group determines the amount of borrowing costs eligible for capitalization as the actual borrowing costs incurred on that borrowing during the period less any interest income earned on temporary investment of specific borrowings pending their expenditure on qualifying assets, to the extent that an entity borrows funds specifically for the purpose of obtaining a qualifying asset. In case if the Group borrows generally and uses the funds for obtaining a qualifying asset, borrowing costs eligible for capitalization are determined by applying a capitalization rate to the expenditures on that asset.

The Group suspends capitalization of borrowing costs during extended periods in which it suspends active development of a qualifying asset.

2.11 Retirement and Other Employee Benefits:

Defined Contribution Plans

(a.) Payment to defined contribution retirement benefit plans are recognized as an expense when employees, as certified by board of directors have rendered service entitling them to the contributions.

(b.) Provident fund of the Group is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

(c.) Pension Fund of the Group is a defined contribution scheme. The Group has no obligation, other than the contribution payable to the provident fund. The Group recognizes contribution payable to the provident fund scheme as expenditure, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid.

Defined Benefit Obligation Plans

For defined benefit obligation plants, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effects of changes to the assets, ceiling (if applicable) and the return on plan assets (excluding interest) is reflected immediately in the statement of financial position with a charge or credit recognized in other comprehensive income in the year in which they occur. Remeasurement recognized in OCI is reflected immediately in retained earnings will not be classified to profit & loss. Net interest is calculated by applying the discount rate to the net defined liability/asset. Defined benefit costs are categorized as follows:

- 1.) Service costs (including current service cost, past service cost as well as gains and losses on curtailment and settlements).
- 2.) Net interest expense or income
- 3.) Remeasurement

(d.) Gratuity liability is a defined benefit obligation of the group. The Group provides for gratuity to employees as calculated by actuarial valuer. The benefit is in the form of Lump sum payments to vested employees on resignation, retirement, on death while in employment or on termination of employment of and amount equivalent to 15 days basic salary payable to each completed year of services. Vesting occurs upon completion of 5 years of services. The group has not made annual contributions to funds administered by trustees or managed by insurance companies.

(e.) Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Group treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year-end. The Group presents the entire leave as a non-current liability in the balance sheet,

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefits expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income and such re-measurement gain / (loss) are not reclassified to the statement of profit and loss in the subsequent periods. They are included in retained earnings in the statement of changes in equity.

2.12 Taxation:

Tax expense comprises of current tax, deferred tax and Dividend Tax which are described as follows -:

(a.) Current Tax

Current tax is measured after providing deductions under chapter VI A of Income Tax Act, 1961 and making adjustments of ICDS prescribed under Income Tax Act, 1961 at the amount expected to be paid to the tax authorities, using the applicable tax rates. Current tax is calculated using tax rates that have been enacted or substantively enacted by the end of reporting period. Current Tax is generally charged to profit & loss except when they relate to items which are recognized in other comprehensive income or equity.

(b.) Deferred Tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred Tax is generally charged to profit & loss except when they relate to items which are recognized in other comprehensive income or equity.

Deferred tax asset and deferred tax liabilities are off-set if a legally enforceable right exist to set-off current tax asset against current tax liabilities and the deferred taxes relates to the same taxable entity and the same taxation authority.

2.13 Property, Plant and Equipment:

(a.) PROPERTY, PLANT & EQUIPMENT is recognized when it is probable that future economic benefits associated with the items will flow to the group and the cost of the item can be measured reliably.

The cost of Property Plant & Equipment comprises its purchase price net of any trade discounts and rebates, any import duty and other taxes any directly attributable expenditure on making the asset ready for its intended use including relevant borrowing cost for qualifying asset. Expenditure incurred after Property Plant & Equipment have been put into operation such as repair & maintenance are charged to the statement of Profit & Loss in the year in which the costs are incurred, Major shutdown and overhaul expenditure are capitalized as the activities undertaken improves the economic benefit expected to arise from the assets.

Assets in the course of construction are capitalized in the assets under construction account. At the point when the asset is operating at management's intended use, the cost of construction is transferred to the appropriate category of the PROPERTY, PLANT & EQUIPMENT and depreciation commences. Cost associated with the commissioning of the asset and any obligatory decommissioning costs are capitalized where the asset is available for use but incapable of operating at normal levels until a year of commissioning has been completed. Revenue generated from production during the trial period capitalized.

Capital subsidy received against specific assets is reduced from the value of relevant PROPERTY, PLANT & EQUIPMENT.

(b.) Free hold land is carried at historical cost.

(c.) Leasehold land is not amortized as all leasehold land is on 99 years lease with local authority and such leasehold land is outside the scope of Ind AS-16.

Items of stores and spares that meet the definition of property, plant and equipment are capitalized at cost. Otherwise, such items are classified as inventories.

An items of PROPERTY, PLANT & EQUIPMENT is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of asset. Any gain or loss arising on the disposal or retirement of an item of PROPERTY, PLANT & EQUIPMENT is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in statement of profit & loss.

Depreciation and estimates

Depreciable amount for assets is the cost of an asset, or other amount substituted for costs, less its estimated residual value. Depreciation is recognized so as to write off the cost of asset (other than free hold land and lease hold land having 99 years of lease and properties under construction) less their residual values (after considering the restoration cost) over their useful lives using Written down value method as prescribed in schedule II of companies act, 2013.

2.14 Intangible Assets:

Intangible assets (which comprises of software acquired (useful life 3-5 years)) and depreciation /amortization on WDV method as per Companies Act 2013 and impairment losses if any.

Amortization is recognized on a written down value basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

2.15 Capital Work in Progress:

Capital work in progress are stated at cost and inclusive of preoperative expenses, project development expenses etc.

2.16 Impairment of Property, Plant & Equipments and Intangible Assets:

At the end of each reporting year, the group reviews the carrying amount of its tangible and intangible assets to determine whether there is any indication that those assets are suffered an impairment loss. If any such indication exists the recoverable amount of the asset is estimated in order to determine the extent of impairment loss (if any). Where it is not possible to estimate the recoverable amount of the individual asset, the group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating unit or otherwise they are allocated to the smallest group of cash-generating unit for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less cost to sell and value in use. In assessing value in use the estimated future cash flow are discounted to their present value using pretax discount rate that reflects current market assessment if the time value of money and the risk specific to the asset for which the estimates of future cash flows have not been adjusted.

An impairment loss is recognized in the Statement of Profit and Loss whenever the carrying amount of an asset or a cash-generating unit exceeds its recoverable amount. A previously recognized impairment loss is increased or reversed depending on changes in circumstances.

However the carrying value after reversal is not increased beyond the carrying value that would have prevailed by charging usual depreciation if there was no impairment.

2.17 Inventories:

Inventories are stated at the lower of cost or net realizable value, details as follows:-

Raw Material, stores & spares, Components, construction material.	Cost includes cost of purchase and other costs incurred in bringing the inventories to the present location and condition.
Process Stocks and finished goods	Cost for this purpose includes direct material cost, labor cost plus appropriate share of manufacturing overheads allocated on absorption cost basis. (excluding borrowing cost)
Work In progress in case of Real Estate Projects	Cost for this purpose includes Land, borrowing costs, direct material cost, labor cost plus appropriate share of manufacturing overheads allocated on absorption cost basis. (excluding borrowing cost)

Costs of inventories are determined on FIFO basis. Net realizable value is estimated selling price in the ordinary course of business.

Goods in transit are stated at actual cost and freight if any.

2.18 Investment in subsidiaries and joint venture:

Investment in subsidiaries is carried at deemed cost in the separate financial statements.

Investment in joint ventures and associates are valued at cost after adjusting impairment and accounted using equity method as per Ind AS 28.

2.19 Provisions, Contingent Liabilities & Assets:

A Provision is recognized when an enterprise has a present obligation as a result of past event, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are not disclosed to its present value and are determined based on best management estimate taking into account the risks and uncertainties surrounding the obligation required to settle the obligation at the balance sheet date.

These are reviewed at each balance sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation.

A contingent asset is a possible asset that arises from past events the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the enterprise.

Contingent liabilities and assets are not recognized but are disclosed in the notes.

2.20 Financial Instruments:

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial Assets:

(a.) Classification: The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income, or through profit or loss), and
- those measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

(b.) Initial Recognition: Financial assets are recognised initially at fair value considering the concept of materiality. Transaction costs that are directly attributable to the acquisition of the financial asset (other than financial assets at fair value through profit or loss) are added to the fair value measured on initial recognition of financial assets.

(c.) Subsequent Measurement of Financial Assets: Financial assets are subsequently measured at amortized cost if they are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income (FVTOCI): Financial assets are subsequently measured at fair value through other comprehensive income (FVTOCI), if it is held within a business model whose objective is achieved by both from collection of contractual cash flows and selling the financial assets, where the assets' cash flows represent solely payments of principal and interest. Further equity instruments where the Group has made an irrevocable election based on its business model, to classify as instruments measured at FVTOCI, are measured subsequently at fair value through other comprehensive income.

(d.) Impairment of Financial Assets: The Group assesses on a forward looking basis the expected credit losses associated with its assets carried at amortized cost and FVTOCI debt instruments. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

In accordance with Ind AS 109: Financial Instruments, the Group recognizes impairment loss allowance on trade Consolidated Financial Statement as at and for the year ended 31st March, 2018 SPML Infra Limited 114 Annual Report 2017-18 receivables based on historically observed default rates. Impairment loss allowance recognized during the year is charged to the Statement of Profit and Loss.

(e.) Derecognition of financial assets: A financial asset is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or

The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Financial Liabilities:

(a.) Classification: The Group classifies its financial liabilities in the following measurement categories:

- Those to be measured subsequently at fair value through profit or loss, and
- Those measured at amortized cost using the effective interest method. The classification depends on the entity's business model for managing the financial liabilities and the contractual terms of the cash flows.

(b.) Initial Recognition: Financial liabilities are recognized at fair value on initial recognition considering the concept of materiality. Transaction costs that are directly attributable to the issue of financial liabilities that are not at fair value through profit or loss are reduced from the fair value on initial recognition.

(c.) Subsequent Measurement of Financial Liabilities: The measurement of financial liabilities depends on their classification, as described below:

Amortised cost: After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the Effective interest rate (EIR) method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the EIR amortization process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance costs in the statement of profit and loss.

(d.) Derecognition of financial liabilities: A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the Derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Offsetting of Financial Instruments

The Group offsets a financial asset and a financial liability when it currently has a legally enforceable right to set off the recognized amounts and the Group intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

2.21 Fair Value Measurement:

The Group measures financial instruments, such as, equity instruments at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

- Level 3- Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's management determines the policies and procedures for both recurring fair value measurement, such as instruments and unquoted financial assets measured at fair value, and for non-recurring measurement, such as assets held for disposal in discontinued operation.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

The management also compares the change in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarizes accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

2.22 Non-Current Asset held for Sale and Discontinued Operations

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. The criteria for held for sale is regarded met only when the assets is available for immediate sale in its present condition, subject only to terms that are usual and customary for sale of such assets, its sale is highly probable; and it will genuinely be sold, not abandoned.

Non-current assets held for sale are measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets.

An impairment loss is recognised for any initial or subsequent write-down of the asset to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortized.

A discontinued operation is a component of an entity that either has been disposed of, or is classified as held for sale, and:

- represents a separate major line of business or geographical area of operations,

- is part of a single coordinated plan to dispose of a separate major line of business or geographical area of operations.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the balance sheet. The liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the balance sheet.

Discontinued operations are excluded from the results of continuing operations and are presented as profit or loss before / after tax from discontinued operations in the statement of profit and loss.

2.23 Segment Reporting and Accounting Policies

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. Chief operating decision maker review the performance of the Group according to the nature of products manufactured traded and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. The analysis of segments is based on the activities performed by each segment.

The Group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting financial statements of the Group as a whole.

2.24 Cash and Cash Equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.25 Earnings per Share

(a.) Basic EPS

Basic EPS is calculated by dividing the profit attributable to shareholders by the weighted average number of shares outstanding during financial year adjusted for bonus elements in the equity shares issued during the year.

(b.) Diluted EPS

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

3 Key sources of estimation uncertainty and critical accounting judgements

In the course of applying the policies outlined in all notes under section 2 above, the Group is required to make judgments, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period, if the revision affects current and future period.

Key sources of estimation uncertainty

(i.) Useful lives of property, plant and equipment

Management reviews the useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors including relative efficiency and operating costs. Accordingly, depreciable lives are reviewed annually using the best information available to the Management.

(ii.) Impairment of property plant and equipment

Determining whether the property, plant and equipment are impaired requires an estimate in the value in use of plant and equipment. The value in use calculation requires the Management to estimate the future cash flows expected to arise from the property, plant and equipment and a suitable discount rate in order to calculate present value. When the actual cash flows are less than expected, a material impairment loss may arise.

(iii.) Provisions and liabilities

Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events that can reasonably be estimated. The timing of recognition requires application of judgment to existing facts and circumstances which may be subject to change. The amounts are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

(iv.) Impairment of investments in joint ventures and associate

Determining whether the investments in joint ventures and associate are impaired requires an estimate in the value in use of investments. In considering the value in use, the Management have anticipated the future commodity prices, capacity utilization of plants, operating margins, and availability of infrastructure, discount rates and other factors of the underlying businesses / operations of the investee companies. Any subsequent changes to the cash flows due to changes in the above mentioned factors could impact the carrying value of investments.

(v.) Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Group. Potential liabilities that are possible but not probable of crystallizing or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in the notes but are not recognized.

(vi.) Fair value measurements

When the fair values of financial assets or financial liabilities recorded or disclosed in the financial statements cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include consideration of inputs such as liquidity risk, credit risk and volatility.

(vii.) Taxes

Deferred tax assets are recognized for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

In determining the allowances for doubtful trade receivables, the Company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience and is adjusted for forward looking information. The expected credit loss allowance is based on the ageing of the receivables that are due and rates used in the provision matrix. There has been no significant change in the credit quality of receivables past due for more than 180 days.

Before accepting any new customer, the Company uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. and defines credit limits by customer. Limits and scoring attributed to customers are reviewed once a year. The Company does not generally hold any collateral or other credit enhancements over these balances nor does it have a legal right of offset against any amounts owed by the Company to the counterparty.

Trade receivables have been given as Primary security towards borrowings.

In determining the recoverability of a trade receivable, the Company considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the end of the reporting period. The concentration of credit risk is limited due to the fact that the customer base is large and mostly unrelated.

In every payments of running bill, project authority deduct retention amount which is either released by submitting bank guarantee or released after successful completion of project. This retention amount keeps accumulating. Collection of retention money is probable and therefore debtors on account of retention money are considered good. refer note no 49.

(i) General reserve

Under the erstwhile Indian Companies Act 2013, a General Reserve was created through an annual transfer of net income at a specified percentage in accordance with applicable regulations. The purpose of these transfers was to ensure that if a dividend distribution in a given year is more than 10% of the paid-up capital of the Company for that year, then the total dividend distribution is less than the total distributable results for that year.

Consequent to introduction of Companies Act 2013, the requirement of mandatory transfer of a specified percentage of the net profit to general reserve has been withdrawn and the Company can optionally transfer any amount from the surplus of profit or loss account to the General reserves.

(ii) Dividends

The Company declares and pays final dividends in Indian rupees 385.22 lacs for the year 2020-21.

(iii) Capital Reserve

Reserve is created on amalgamation as per statutory requirement for Rs. 81.67 crore and balance Rs. 41.51 crore on account of sales of assets and investments.

45 Segment Reporting:

(a) Primary Segment: Business Segment

Based on the guiding principles given in Accounting Standard AS –17 “Segment Reporting” notified under Companies (Accounting standard) Rules 2006, the Group’s operating business are organized and managed separately according to the nature of products manufactured and services provided . The identified reportable segments are:

- 1 Engineering Segment
- 2 Real Estate Segment
- 3 Other segment which include hostel, packaging and other related activities

Secondary Segment: Geographical segment:

The analysis of Geographical segment is based on the geographical location i.e. domestic and overseas markets of the customers.

(b) Segment accounting policies:

In addition to the significant accounting policies applicable to the business segment as set in **note 2.23**, the accounting policies in relation to segment accounting are as under:

i) Segment revenue & expenses:

Joint revenue and expenses of segments are allocated amongst them on a reasonable basis. All other segment revenue and expenses are directly attributable to the segments.

ii) Segment assets and liabilities:

Segment assets include all operating assets used by a segment and consist principally of operating cash, receivables, inventories and fixed assets, net of allowance and provisions, which are reported as direct off sets in the balance sheet. Segment Liabilities include all operating Liabilities and consist principally of trade payables & accrued liabilities. Segment assets and liabilities do not include deferred income taxes except in the Engineering segment. While most of the assets/liabilities can be directly attributed to individual segments, the carrying amount of certain assets /liabilities pertaining to two more segments are allocated to the segments on a reasonable basis.

iii) Inter segment sales:

Inter segment sales between operating segments are accounted for at market price. These transactions are eliminated in consolidation. The main segment is engineering segment and funds provided by engineering segments to other segments and interest on such balances are not charged.

iv) Other segment having revenue from sale of external customers in excess of 10% of total revenue of all segments is shown separately and others are shown in other segment.

46 Retirement and Other Employee Benefits:

(a) Defined contribution plans

The Group operates defined contribution retirement benefit plan for all qualifying employees. Group directly contribute to the provident fund and having no obligation for further contribution.

Particulars	(Rs. In Lacs)	
	2021-22	2020-21
Provident Fund	31.60	14.66
Contribution to Employee State Insurance	3.61	2.15

(b) Defined Benefit Plans

Gratuity has been provided on the basis of actuarial valuation using the project unit credit method and same is non-funded. The obligation for leave encashment is recognized in the same manner as gratuity.

The plans in India typically expose the Group to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk: The liability is not funded and is not relevant in group.

Interest risk: The rate used to discount post-employment benefit obligation should be determined by reference to market yields at the balance sheet date on Government bonds. The currency and term of government bonds should be in consistent with the currency and estimated term of post-employment benefit obligation.

Salary risk: Salary increase should take into account inflation, seniority, promotion and other relevant factors such as supply and demand in the employment market.

No other post-retirement benefits are provided to these employees.

47 Financial Instruments**47.1 Capital Risk Management**

The Group being in a capital intensive industry, its objective is to maintain strong credit rating healthy capital ratios and establish a capital structure that would maximize the return to stakeholders through optimum mix of debt and equity.

The Group's capital requirement is mainly to fund its capacity expansion, repayment of principal and interest on its borrowings and strategic acquisitions. The principal source of funding of the Group has been, and is expected to continue to be, cash generated from its operations supplemented by funding from bank borrowings and the capital markets.

The Group regularly considers other financing and refinancing opportunities to diversify its debt profile, reduce interest cost and elongate the maturity of its debt portfolio, and closely monitors its judicious allocation amongst competing capital expansion projects and strategic acquisitions, to capture market opportunities at minimum risk.

The Group monitors its capital using gearing ratio, which is net debt divided to total equity. Net debt includes, interest bearing loans and borrowings less cash and cash equivalents, Bank balances other than cash and cash equivalents and current investments.

47.3 Financial Risk Management

The Group manages financial Risk by its Board of Directors for overseeing the Risk Management Framework and developing and monitoring the Group's risk management policies. The risk management policies are established to ensure timely identification and evaluation of risks, setting acceptable risk thresholds, identifying and mapping controls against these risks, monitor the risks and their limits, improve risk awareness and transparency. Risk management policies and systems are reviewed regularly to reflect changes in the market conditions and the Group's activities to provide reliable information to the Management and the Board to evaluate the adequacy of the risk management framework in relation to the risk faced by the Group.

The risk management policies aim to mitigate the following risks arising from the financial instruments:

- Market risk
- Credit risk; and
- Liquidity risk

47.4 Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in the market prices. The Group is exposed in the ordinary course of its business to risks related to changes in foreign currency exchange rates, commodity prices and interest rates.

47.5 Foreign Currency Risk Management (As Per Annexure 48.5A)

The Group's functional currency is Indian Rupees (INR). The Group undertakes transactions denominated in foreign currencies; consequently, exposure to exchange rate fluctuations arise. Volatility in exchange rates affects the Group's revenue from export markets and the costs of imports, primarily in relation to raw materials. The Group is exposed to exchange rate risk under its trade and debt portfolio.

Adverse movements in the exchange rate between the Rupee and any relevant foreign currency result's in increase in the Group's overall debt position in Rupee terms without the Group having incurred additional debt and favorable movements in the exchange rates will conversely result in reduction in the Group's receivables in foreign currency.

The carrying amounts of the Group's monetary assets and monetary liabilities at the end of the reporting period are as follows:

NOTES ANNEXED TO AND FORMING PART OF THE BALANCE SHEET
AS AT 31st March,2022

47.6 Commodity Price Risk :-

The Group's revenue is exposed to the market risk of price fluctuations in its division is as under:

Engineering segment: The group generally takes Turnkey projects from government departments. The contract price is generally fix and free from any price risk subject to change in any government policy or rules.

Real Estate Segment: The group is exposed to risk of prices of Residential and commercial units. These prices may be influenced by factors such as supply and demand, and regional economic conditions.

Other Segment (Packaging): The group is exposed to risk of prices of goods. These prices may be influenced by factors such as supply and demand, Cost of Production and regional economic conditions.

Market forces generally determine prices for the Real Estate and Packaging segment of the Group Adverse changes in any of these factors may reduce the revenue that the Group earns from the sale of its products.

The Group primarily purchases its raw materials in the open market from third parties. The Group is therefore subject to fluctuations in prices for the purchase of Building Material and other raw material inputs. The Group purchased substantially all of its Raw Material from third parties in the open market.

The Group aims to sell the products at prevailing market prices. Similarly the Group procures raw materials on prevailing market rates as the selling prices of its products and the prices of input raw materials move in the same direction.

47.7 Credit Risk Management:

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. Credit risk encompasses of both, the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks.

Group's credit risk arises principally from the trade receivables, loans, investments in debt securities, cash & cash equivalents.

Trade Receivables:

The group's customer profile includes public sector enterprises, state owned companies and private corporate as well as large individuals. Accordingly group's customer risk is low. The group's average project execution cycle is around 24 to 36 months, general payment terms includes mobilization advances, monthly progress payments with a credit period ranging from 45 to 90 days and certain retention money to be released at the end of the project.

Customer credit risk is managed centrally by the Group and subject to established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on an extensive credit rating scorecard.

47.8 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group is exposed to interest rate risk because funds are borrowed at both fixed and floating interest rates. Interest rate risk is measured by using the cash flow sensitivity for changes in variable interest rate.

The borrowings of the Group are principally denominated in rupees and US dollars with a mix of fixed and floating rates of interest. The Group has exposure to interest rate risk, arising principally on changes in base lending rate and LIBOR rates.

47.9 Liquidity Risk Management

Liquidity risk refers to the risk of financial distress or extraordinary high financing costs arising due to shortage of liquid funds in a situation where business conditions unexpectedly deteriorate and requiring financing. The Group requires funds both for short term operational needs as well as for long term capital expenditure growth projects. The Group generates sufficient cash flow for operations, which together with the available cash and cash equivalents and short term investments provide liquidity in the short-term and long-term. . The Group has established an appropriate liquidity risk management framework for the management of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods and its non-derivative financial assets. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows.

(a)

(i) The Group, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 5089.70 Lacs (31 March 2021: 5089.70 lacs), and current advances of Rs. 10324.31 Lacs (31st March 2021 Rs. 10245.07 Lacs) in Bhilwara Jaipur Toll Road Private Limited, Joint Venture, is holding 49% share in Special Purpose Vehicle (SPV). SPV had been awarded project by Rajasthan State Govt. through PWD to Design, Build, Finance, Operate and transfer (DBFOT) SH-12 toll road through an agreement dated 12.07.2010. SPV was granted a right to collect toll fees for 22 years starting from 02.02.2012 till 02.02.2034. Group is fulfilling its obligations perfectly despite of regular defaults made by government in fulfilling its obligations.

SPV was collecting toll on all vehicles including private vehicles as per concession agreement. But Government announced to exempt toll fees of private vehicles w.e.f. 01.04.2018. Since the private vehicle's toll fees is significant portion of total toll collection and Joint Venture calculated project viability including that toll collection on private vehicles. SPV suffered losses of revenue because of toll fees exemption on private vehicles. SPV intimated this loss to PWD and asked them to compensate the loss. But in spite of regular reminders and notices by the SPV to PWD, PWD did not respond to any of their notices.

After reminders and notices, SPV decided to terminate the project w.e.f. 03.10.2018 and sent notice to PWD about termination. SPV approached PWD for amicable settlement of loss of revenue but after seeing no response from PWD, SPV moved to commercial court for asking compensation where commercial court suggested to go through arbitration process. The group raised the various claims of Rs. 61200.00 lacs (P.Y.Rs.61200.00 Lacs).Arbitrator in its interim award directed PWD to pay bank debt and take custody of road and this award is challenged by PWD in Commercial court. Govt of Rajasthan withdrew its order dated 1.4.2018 and allowed the toll collection from Private vehicles w.e.f 1.11.2019.

The interim award of arbitrator has been upheld and as per clarification decision of Honorable High Court pronounced on 20th Dec, 2021 -the receipt of funds in escrow account from PWD Rs. 191.79 Crores has been adjusted in loan account of banks. The final award for claim is in hearing process with arbitrator.

Going Concern:

Going Concern:

SPV terminated the agreement on 03.10.2018 and raised the claim including debt due and capital contributed as per termination clause of concession agreement with the PWD. SPV did not book any revenue and expenses related to toll road collection w.e.f. 03.10.2018. SPV is running toll operation on behalf of PWD.

(i) Joint Venture has earned a profit of Rs. 1.37 Lacs (p.y. loss of Rs. 1.19 lacs) subject to point above. Joint Venture's accumulated losses amount of Rs. 4544.89 lacs (P.Y. Rs. 4546.61 lacs) which are eroding capital of the Joint Venture substantially. Interest on Loan is not provided as company has terminated concession agreement. Joint Venture is of the view that all such losses and amount due to company will be recovered from PWD through claim.

(ii) It is understood that post receipt of arbitration award by SPV, all claims of Om Metals shall be settled by SPV.

(b) The Group, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 488.45 lacs (31 March 2021: 488.45 lacs), in Chahel Infrastructure Limited, a subsidiary, which is holding 94.46% share in company. While such entities have incurred losses during their past years and net-worth of entity as at 31 March 2022 has been fully eroded and company will receive projects in future based on its experience which will generate revenue in future and such losses will be recovered. Therefore, based on certain estimates like future business plans, growth prospects and other factors, the management believes that the realizable amount of subsidiary is fully recoverable due to which these are considered as good and recoverable.

(c) The Group, as at 31 March 2022, has (i) a non-current investment amounting to Rs. 95.00 lacs (31 March 2021: Rs. 95 lacs), in Sanmati Infra Developers Private Limited, a subsidiary, which is holding 25% share in company. While such entities have incurred losses during their past years and net-worth of entity as at 31 March 2022 has been fully eroded and group will receive projects in future based on its experience which will generate revenue in future and such losses will be recovered. Therefore, based on certain estimates like future business plans, growth prospects and other factors, the management believes that the realizable amount of subsidiary is fully recoverable due to which these are considered as good and recoverable.

(d) The Group, as at 31 March 2022, has a non-current investment amounting to Rs. 2.50 lacs (31 March 2021: 2.50 lacs), and non-current advances of Rs. 747.66 Lacs (31st March, 2021 Rs. 747.61 Lacs) in Gurha Thermal Power Company Limited, a Joint Venture, is holding 50% share in Joint Venture. The Joint Venture has terminated the Power Purchase Agreement (PPA) on 15-07-2015 with Rajasthan Rajya Vidhyut Prasaran Nigam Ltd (RRVPNL). The Joint Venture was formed for the Business of Power generation and selling the same to the RRVPNL. As the agreement is terminated by the Joint Venture and the Joint Venture has also filed the claim against the RRVPNL for the recovery of the amount invested by the Company of Rs. 750.16 Lacs plus interest. The Joint Venture has filed petition before the Rajasthan Electricity Regulatory Commission, Jaipur. RERC vide its order dated 09.01.2018 dismissed the petition. The Joint Venture challenged the order of RERC, Jaipur by filing appeal before the APTEL (Appellate Tribunal for Electricity) New Delhi. The case is pending for adjudication.

The Joint Venture, in view of the litigation at APTEL (Appellate tribunal of electricity) in the matter of statutory clearances from authorities in relation to agreements with Rajasthan Rajya Vidhyut Prasaran Nigam Ltd (RRVPNL) before which the Joint Venture has made a claim among other things for reimbursement of expenses incurred in relation to the project, compensation etc., but the matter is under subjudice, and thereafter the Joint Venture pursues other projects in the near to medium term, hence the going concern assumption is followed and such amount invested and loan granted is good and recoverable.

58 In every payments of running bill, project authority deduct retention amount on account of defect liabilities arise during the contract period which is either released by submitting bank guarantee or released after successful completion of project. This retention amount keeps accumulating. Collection of retention money is probable and therefore receivables on account of retention money are considered good based on the track record and previous performance of the group. Deduction of retention money has been claimed as per the provisions of Income Tax Computation and Disclosure Standards (ICDS). Group have created deferred tax on retention money due to difference in tax base and accounting base as per Ind As 12 and same has been considered for previous year as well. Group has shown such retention money as debtors as good and realizable in its stock Statements as they are due from governments.

59 The group has invested/guaranteed OMIL-JSC JV, Kameng as working capital and non-fund based banking facilities. The commercial understanding between partners through a letter of undertaking on 31.3.2009 that group will receive higher sum of profit to compensate its additional investment/ Guarantee in this joint venture as mutually decided by partners after completion of project.

- 60 In case of Upperbeda (Revenue C.Y. Rs. 52.40 lacs and P.Y. Rs. 24.98 lacs) and SSNNL Gujrat (Revenue C.Y. Rs. 602.76 lacs and P.Y. Rs. 1571.58 lacs) projects which has been allotted to Om Metals -Spml JV but being a lead partner, revenue is been recognized in group's books and Income tax is deducted in the name of Om Infra Limited itself. All payments were received by Om Infra Limited.
- 61 Insurance cover has not been taken for bulky items at Kota factory like steel plates/ Machines etc. which are not easily subjected to burglary or theft.
- 62 Due to high labour turnover at hilly or remote locations of project site some time it is very difficult to accomplish the labourrelated compliances in these regions.
- 63 The provision of Employees benefits has been taken on the basis of best judgment policy and prudent business practice as assessed and provided by the Management.
- 64 After the award of work, sometimes other partner of the JV falls short of its financial commitment in JV and the one partner has to meet all financial obligations. This entails for modified profit percentage to the other partner in JV depending on nature and circumstances of the project and the JV agreement is supplemented to provide such effect.
- 65 The Group has sold hotel Om Tower Jaipur and handed over possession to the buyer on 2nd April, 2021 and booked a profit of Rs. 1132.58 lacs. Buyer also confirms to buy all Fixed assets other than land and building at Rs. 30.00 Lacs. Buyer has used bank account of group till Dec-21. Remaining Assets and liabilities have been written off by the group.

II.	Audit Qualification (each audit qualification separately):			
	Qualification 1			
	a.	Details of Audit Qualification:	<p align="center">The Company's non-current investments as at 31 March 2022 include investments aggregating Rs. 488.45 Lacs in a subsidiary namely Chahel Infrastructure Limited; being considered good and recoverable by the management. However, this Subsidiary has accumulated losses and its net worth is fully eroded. Further, this subsidiary is facing liquidity constraints due to which it may not be able to attain projections made as per business plans, thus we are unable to comment upon the carrying value of this non-current investment and recoverability of the aforesaid dues and the consequential impact, if any, on the accompanying standalone financial results. Further we have not received audited Financial Statements of Subsidiary for the year ended on 31.03.2022. The recoverability of the said investment is in doubtful in our opinion.</p>
