Dear Sirs,

We are sending herewith copy of the Press Release titled “**TCS and National Robotarium Collaborate on Cutting-Edge Robotics and AI research**” which will be disseminated shortly.

The Press release is self-explanatory.

Thanking you,

Yours faithfully,
For **Tata Consultancy Services Limited**

**Pradeep Manohar Gaitonde
Company Secretary**

TCS and National Robotarium Collaborate on Cutting-Edge Robotics and AI research

Tata Consultancy Services Announces Major Applied Engineering Partnership with The National Robotarium – a Research and Development Centre at Heriot-Watt University in Edinburgh

LONDON | MUMBAI, October 04, 2022: Tata Consultancy Services (TCS) (BSE: 532540, NSE: TCS) announced a major applied engineering and research partnership with The National Robotarium, the UK's largest and most advanced AI and robotics research centre, which opened its doors at Heriot-Watt University's Edinburgh campus.

TCS Research will work closely with the new centre on innovation as part of a wider agreement between TCS and Heriot-Watt University, to support early-stage AI and robotics product development, entrepreneurship, job creation and building digital skills in the workforce.

The National Robotarium provides a data-driven incubator environment, in which humans and robots can work together alongside academics, technologists and businesses ranging in size from innovative start-ups to global enterprises. By utilising the unique capabilities of the pioneering research centre, TCS and The National Robotarium will be able to de-risk and accelerate the development and adoption of robotics systems that can be used to tackle urgent societal issues, such as social and geriatric care.

TCS and The National Robotarium will work together with experts from Heriot-Watt University and the University of Edinburgh on applied engineering and joint research across multiple disciplines, including soft robotics, field robotics, co-bots and tele-operations. TCS will bring together the best of its innovation capabilities with TCS PACE™ to increase cross-industry collaboration and accelerate the development of advanced robotics solutions from laboratory to market.

The new centre features an autonomous systems laboratory, a living lab for trialling technology in a realistic home setting, and an education hub for a school outreach programme that will see TCS and The National Robotarium engaging with young students who are interested in pursuing a career in robotics.

K Ananth Krishnan, Chief Technology Officer, TCS, commented: *“TCS is delighted to announce this strategic partnership with The National Robotarium aimed at achieving our shared goal of empowering people's lives with innovative technology. As part of this partnership, we will leverage the TCS PACE philosophy and ecosystem to accelerate industrial collaboration and increase the adoption of AI and robotics solutions to drive superior outcomes for customer and communities.”*

Stewart Miller, CEO, The National Robotarium, commented: *“This exciting collaboration is a fitting milestone to announce during the official opening ceremony of the National Robotarium. The partnership will enable Tata Consultancy Services and the National Robotarium to combine our vast combined experience and expertise, elevating the robotics and artificial intelligence offerings of both organisations as a result.”*

Dr Gillian Murray, Deputy Principal for Business and Enterprise, Heriot-Watt University, said: *“This unique and ground-breaking facility is already helping to inform and lead the future applications of robotics and AI on the global stage. Our strategic partnership with TCS will accelerate that process, ensuring that the expertise of the National Robotarium is sought after to address a multitude of global societal challenges.”*

About Tata Consultancy Services (TCS)

Tata Consultancy Services is an IT services, consulting and business solutions organization that has been partnering with many of the world's largest businesses in their transformation journeys for over 50 years. TCS offers a consulting-led, cognitive powered, integrated portfolio of business, technology and engineering services and solutions. This is delivered through its unique Location Independent Agile™ delivery model, recognized as a benchmark of excellence in software development.

A part of the Tata group, India's largest multinational business group, TCS has over 606,000 of the world's best-trained consultants in 55 countries. The company generated consolidated revenues of US \$25.7 billion in the fiscal year ended March 31, 2022, and is listed on the BSE (formerly Bombay Stock Exchange) and the NSE (National Stock Exchange) in India. TCS' proactive stance on climate change and award-winning work with communities across the world have earned it a place in leading sustainability indices such as the MSCI Global Sustainability Index and the FTSE4Good Emerging Index.
