10. Health and Safety Management System

- a. Whether an occupational health and safety management system has been implemented by the entity? (Yes/ No). If yes, the coverage of such a system?

Yes. The Safety & Health Management system covers activities across all manufacturing locations, offices, research laboratories and supply chain partners and ensures the protection of environment, health & safety of its employees, contractors, visitors and all other relevant stakeholders.

The Company has also adopted Environment, Health & Safety Policy which can be accessed on its website at: <https://www.rallis.com/EHSPolicy>

**b. What are the processes used to identify work-related hazards and assess risks on a routine and non-routine basis by the entity?**

The Company has a process for Risk Management which is essential for preventing incidents, injuries, occupational disease, emergency preparedness and business continuity. There is a structured Risk Assessment & Management process which is regularly reviewed and mitigation plans are put in place to reduce the risk.

For all activities including routine or non-routine, hazards are identified by a trained cross functional team and risk assessment is done through Hazard Identification and Risk Assessment (HIRA) / Job Safety Analysis (JSA) / Standard Operating Procedures (SOP) which is referred before starting any activity. Identified hazards and associated risks are addressed through operational control measures using a hierarchy of control approach. Techniques like Process Hazard Analysis (PHA), what-if-analysis, Failure Mode Effect Analysis (FMEA) are carried out on a case to case basis.

Storage and handling of toxic chemicals like Ammonia, Bromine, Solvents, flammable materials like fuel, etc. are identified as the major process hazards at the site for which the Company has carried out Quantitative Risk Assessment; HAZOP study & engineering control as appropriate.

Considering the level of process hazards, Ankleshwar and Dahej, Gujarat (manufacturing units of the Company) have been working on Process Safety and Risk Management (PSRM) for the last two years.

**c. Whether you have processes for employees to report the work-related hazards and to remove themselves from such risks. (Y/N)**

Yes. Work related Hazards are being identified and addressed through a daily plant round and cross functional Behaviour Safety Observation rounds. Analysis of observations are being done through Master Data Online (MDO) safety e-portal and controls are identified during studies like HIRA, HAZOP, JSA etc.

**d. Do the employees of the entity have access to non-occupational medical and healthcare services? (Yes/ No)**

Yes. All employees are covered under the Medclaim Insurance Policy and Group Personal Accident Policy

**11. Details of safety related incidents, in the following format**

Safety Incident	Category	FY 2021-22	FY 2020-21
Lost time injury Frequency Rate (LTIFR) (per one million-person hours worked)	Employees & Workers	0.13	0.06
Total recordable work-related injuries	Employees & Workers	5	4
No. of fatalities	Employees & Workers	0	0
High consequence work related injury or ill health (excluding fatalities)	Employees & Workers	0	0

**12. Describe the measures taken by the entity to ensure a safe and healthy workplace**

At Rallis, a culture of safety is encouraged across hierarchies by promoting behaviour-based safety, process safety and road safety as key focus areas among its workforce, PSRM implementation started at the Dahej and Ankleshwar sites after a gap assessment with the help of an external competent agency. Rallis is taking various measures to further strengthen its process safety through enhancing automation in chemical processes and unit operations. Safety Audit conducted at all manufacturing sites by corporate safety to identify and rectify the gaps in workplace safety. Tfs (Together for Sustainability) audit process was carried out to verify Rallis' sustainability performance against a defined set of audit criteria on environment, health & employee wellbeing. Both Ankleshwar and Dahej where the assessment was carried out, fared very well in Tfs Audit with high scores. Tata group safety standards are implemented at sites to align the site procedure with the group guidelines. MDO - the e-portal has also been implemented to record safety performance and take timely action on deviations.

The Company also has a Board level Safety, Health, Environment and Sustainability ('SHES') Committee, chaired by a Non-Executive, Independent Director. The Committee reviews and monitors the safety, health, environmental and sustainability practices, processes, standards and activities of the Company to ensure compliance with appropriate laws and legislation. This Committee also provides valuable direction and guidance to the Management to ensure that Safety and Sustainability implications are duly and timely addressed. All the incidents are reported to the Committee and are investigated and analysed to avoid any recurrence.

### 15. Provide details of any corrective action taken or underway to address safety-related incidents (if any) and on significant risks / concerns arising from assessments of health & safety practices and working conditions.

The Company follows Tata group Safety Incident Investigation guidelines. The Incident Investigation process describes a structured approach to identify, assess and control various hazards and risks and support the system to achieve the goal of 'Zero Harm' along with other business goals of zero defects, zero legal non-compliance etc. in a systematic and auditable manner. Incident Investigation guideline support the Rallis Safety Policy, Safety Principles and Technical requirement on Process Safety & Risk Management.

It outlines a structured approach to list and investigate the process of safety incidents and near misses, work out the root cause(s), with possible corrective or preventive action and to follow up closure of these actions identified.

All incidents are investigated by a cross-functional team and all critical factors involved in the incident are determined through root cause analysis with proper corrective and preventive actions to prevent a recurrence.

The learnings are shared and training is conducted for better understanding & better implementation of processes across all locations.

A Report prepared by a process of collating all the safety incidents (critical near miss, safety parameters, process safety, fire incidents, etc.) through a safety cross functional team forms the basis for the monthly report which is sent to the senior leadership team and to the SHES Committee of the Board.

**9. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes**

Non toxic waste water from process, canteen, amenities, cooling towers, boiler blow-down, etc. is treated in Effluent Treatment Plant (ETP). ETP is equipped with primary, secondary, tertiary treatment followed by an RO system. Tertiary treated effluent is either recycled through RO or discharged to the common effluent system.

The Aqueous effluent generated from processes having low COD and high TDS is fed to the Multiple Effect Evaporator and condensate of the evaporator is sent for treatment in the Effluent treatment plant or recycled/reused.

The sludge generated from the evaporator/ETP is sent to an authorised secured landfill site. High calorific and high TDS value hazardous waste is sent for processing to authorised co-processors and further to cement industry.

Spent acids are sent for recycling to authorised end user to make useful products. Aqueous/Organic waste is sent to the authorised common incinerator system.

As per our policy we have discontinued production of the highly toxic red triangle products as per the Insecticides Act.. Thus, the product portfolio and waste generated remains relatively less toxic.

**10. Under CSR, the Company is not working in any ecologically sensitive zones / areas.

6. **If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, provide details of the same as well as outcome of such initiatives, as per the following format**

Sr. No	Initiative undertaken	Details of the initiative (Web-link, if any, may be provided along-with summary)	Outcome of the initiative
1.	Integrated Waste Management	Converting Hazardous waste like Spent Sulphuric Acid, Sodium Sulphate into useful product with partnership with authorised end users	Conservation of Natural resources

7. **Does the entity have a business continuity and disaster management plan? Give details in 100 words**

Yes. Business Continuity Plans (BCP) are designed to help the Company to recover from a disruption in production activity. Specifically, BCP provides guidance to ensure that the Manufacturing units can respond effectively to a disruption and restore production operations as quickly as possible.

The objectives of BCP for Manufacturing plants are to identify various threats that can disrupt the business operations. Identify advanced arrangements and procedures that will enable the team to respond quickly to an emergency event and ensure continuous performance of critical business functions. Reduce employee injury or loss of life and minimise damage and losses. Protect essential facilities, equipment, vital records, and other assets. Identify teams which would need to respond to a crisis and describe specific responsibilities. Facilitate effective decision-making to ensure that agency operations are restored in a timely manner. Identify alternative courses of action to minimise and/or mitigate the effects of the crisis and shorten the agency response time. Quantify the impact of any kind of event in terms of money, time, business and workforce. Recover quickly from an emergency event and resume to full-scale manufacturing of products in a timely manner. Maintain the quality of manufactured goods and products and keep consistency prioritised, protecting our customer base and brand during an emergency event.

8. **Disclose any significant adverse impact to the environment, arising from the value chain of the entity. What mitigation or adaptation measures have been taken by the entity in this regard.**

No such incident has occurred. The Company provides awareness and training to the farmers to ensure proper handling and uses of agrochemical products.

9. **Percentage of value chain partners (by value of business done with such partners) that were assessed for environmental impacts.**

During FY 2021-22, the Company covered key value chain partners for environment impact assessment internally (Third party formulations & warehouse). The coverage was 90% for third party formulations and 70% warehouse operations.

The Company is planning to conduct impact assessment for critical value chain partners in the 2nd phase.
