# 2b. Pioneering India-Centric Studies to Generate Actionable Scientific Evidence – The India Heart Study

# IHS Methodology

The investigators examined the blood pressure of **18,918** participants with the help of 1,233 doctors

62.7%

Male

across 15 states

over a period of 9 months.

**42%** of the participants were misdiagnosed and were unaware of their actual health status

42% misdiagnosis - 23.7% of the respondents had white-coat hypertension and 18% of the respondents had masked hypertension

Indians have a higher average resting heart rate of **80 beats per minute**, higher than the desired rate of 72 beats per minute.

&

White-coat hypertensives get misdiagnosed as hypertensive and put on anti-hypertensives' medication, which increases the risk of hypotension (low blood pressure, less than SBP 90/60 DBP) in such persons.

On the other hand, a **masked hypertensive** may go undiagnosed, running the risk of complications to the heart, kidney, and brain, leading to premature mortality.

- We continue to make good progress in expanding our coverage of **Specialists and Consulting Physicians** in line with our expectations
- We have added ~ 200 Reps to the Eris field-force since the start of the year
- Strong momentum on therapy diversification with 3 emerging therapies (Derma, CNS & Women's Health) accounting for 21% of Branded Formulations revenue and growing at 25% p.a. over the last 6 quarters (vs. the market growth of 14%)
- We will continue to invest in these therapies for **organic** as well as **inorganic** growth
- Our acquisition of the Zomelis brand has created significant value with Sales having scaled up Nine-fold (9x) in less than 3 years from acquisition
- Oaknet, our acquisition in May 2022, is emerging as a clear success story in value creation; is tracking to achieve Rs. 50 cr. EBIDTA in FY23 one full year ahead of our expectation
- We will continue to look for such **high-return inorganic opportunities** to complement our organic growth initiatives

FY 23 guidance – Revenue growth of 30% and EBITDA growth of 16-17% including Oaknet

### **Safe Harbour Statement**

This presentation contains forward-looking statements and information that involve risks, uncertainties and assumptions. Forward-looking statements are all statements that concern plans, objectives, goals, strategies, future events or performance and the underlying assumptions and statements, other than those based on historical facts, including, but not limited to, those that are identified by the use of words such as 'anticipates', 'believes', 'estimates', 'expects', 'intends', 'plans', 'predicts', 'projects' and similar expressions. Risks and uncertainties that could affect us include, without limitation:

- General economic and business conditions in the markets in which we operate;
- The ability to successfully implement our strategy, our research and development efforts, growth & expansion plans and technological changes;
- Changes in the value of the Rupee and other currency changes;
- Changes in the Indian and international interest rates;
- Allocations of funds by the Governments in the healthcare sector;
- Changes in the laws and regulations that apply to our customers, suppliers, and the pharmaceutical industry;
- Increasing competition in and the conditions of our customers, suppliers and the pharmaceutical industry; and
- Changes in the political conditions in India and in other global economies.

Should one or more of such risks and uncertainties materialise, or should any underlying assumption prove incorrect, actual outcomes may vary materially from those indicated in the applicable forward-looking statements.

Any forward-looking statement or information contained in this presentation speaks only as of the date of the statement. We are not required to update any such statement or information to either reflect events or circumstances that occur after the date the statement or information is made or to account for unanticipated events, unless it is required by Law.
