in. Kindly revert as early as possible. In any case, if we do not hear from you by June 04, 2021, we will proceed on the basis that you have no any comments to offer.

4. CARE reserves the right to undertake a surveillance/review of the rating from time to time, based on circumstances warranting such review, subject to at least one such review/surveillance every year.

5. CARE reserves the right to revise/reaffirm/withdraw the rating assigned as also revise the outlook, as a result of periodic review/surveillance, based on any event or information which in the opinion of CARE warrants such an action. In the event of failure on the part of the entity to furnish such information, material or clarifications as may be required by CARE so as to enable it to carry out continuous monitoring of the rating of the bank facilities, CARE shall carry out the review on the basis of best available information throughout the life time of such bank facilities. In such cases the credit rating symbol shall be accompanied by "ISSUER NOT COOPERATING". CARE shall also be entitled to publicize/disseminate all the afore-mentioned rating actions in any manner considered appropriate by it, without reference to you.

6. CARE ratings do not take into account the sovereign risk, if any, attached to the foreign currency loans, and the ratings are applicable only to the rupee equivalent of these loans.

7. Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.

8. Users of this rating may kindly refer our website www.careratings.com for latest update on the outstanding rating.

Detailed Rationale and Key Rating Drivers

The revision in the ratings assigned to the bank facilities of TIL Limited (TIL) takes into account the significant loss incurred by the company in Q4FY21 (refers to the period January 1 to March 31) due to lower operating income, decline in operating profitability and significant provisions on doubtful receivables. The debt coverage indicators have weakened with decline in profitability and continued high level of debt to meet the increased working capital requirement. The working capital cycle has further elongated in FY21 (refers to the period April 1 to March 31) to 424 days as against 312 days in FY20 with high inventory level and increase in receivables inspite of significant provisions made during the year. The ratings continue to remain constrained by the exposure to foreign exchange fluctuation risk.

To support liquidity, the promoters have infused significant amount of funds as unsecured loans in FY21. However, due to the second wave of the pandemic, there has been a slowdown in collection of dues from customers. Furthermore, the monetisation of a non-core asset which was expected to

be completed by May 2021 and would have significantly eased the pressure on liquidity is yet to materialise.

The ratings continue to draw strength from the experience of the promoters along with long and established track record of the company, manufacturing and technical collaboration with leading international players, moderate order book, reputed clientele and consistent source of revenue from maintenance and repair contracts.

Rating Sensitivities

Positive factors – Factors that could lead to positive rating action/upgrade

- Improvement in operating profitability with PBILDT margin at about 10% on a sustained basis and interest coverage above 1.5x.
- Improvement in operating cycle and release of working capital.
- Reduction in debt level leading to improvement in debt coverage indicators.

Negative factors - Factors that could lead to negative rating action/downgrade

- Continued low operating profitability resulting in weak debt coverage indicators.
- Further deterioration in capital structure or delay in monetisation of non-core assets resulting in inability to reduce debt level.
- Further elongation in operating cycle.

Outlook: Negative

The outlook remains 'Negative' on the expectation of continued subdued profitability and pressure on liquidity due to significant amount of funds blocked in inventory and long due receivables and elevated debt levels more so in the wake of second wave of COVID. The outlook may be revised to stable if the operational performance improves resulting in improvement in debt coverage indicators and liquidity improves with timely monetisation of assets or fund infusion by promoters resulting in reduction in debt level.

Detailed description of the key rating drivers

Key Rating Weaknesses

Significant loss incurred in Q4FY21

TIL incurred loss of Rs.33.57 crore on operating income of Rs.69.60 crore in Q4FY21 as against a profit of Rs.2.31 crore on operating income of Rs.114.92 crore in Q3FY21.

TIL's operating income witnessed a decline of about 16% on a standalone basis in FY21 as compared to FY20. Sales have been lower during the year mainly due to the impact on demand and execution due to outbreak of Covid-19 and consequent lockdowns. Also, there has been a disruption in supply chain. The company incurred net loss of Rs.67 crore in FY21 with lower operating profitability on account of under-absorption of overheads, lower margin sales and significant provisioning on receivables (about Rs.36 crore). Finance cost also increased due to higher borrowings to support increase in working capital intensity further impacting profitability.

Deterioration in debt coverage indicators

Interest coverage ratio declined significantly in FY21 as the operating profitability declined and there was further increase in finance cost. After adjusting for the non-cash provision on receivables, the interest coverage stood at 0.30x in FY21 as against 1.39x in FY20.

The debt level has witnessed further increase as on March 31, 2021 with significant infusion of unsecured loans by the promoters during the year and Covid loans availed by the company. With inadequate cash flows from operations, the company has been relying on unsecured loans from promoters to meet its debt obligations. It is also in the process of monetising its non-core assets to support liquidity.

Increased working capital intensity of operations

TIL requires high level of working capital to support and maintain its large inventory of raw materials, finished goods as well as stores & spare parts. The inventory level has continued to

remain high as on March 31, 2021 and the receivables level has witnessed further increase. Moreover, a significant proportion of debtors remains due for more than nine months. The fund based working capital limits remained almost fully utilised in the 12 months ended March 2021 with increase in working capital requirement.

Exposure to foreign exchange risk

The major raw materials/inputs required by TIL are high quality steel, engines, chassis for auto mobiles, valves, axle, hoist units, hydraulic ram and cylinder etc. A large part of the material requirement is met through imports (about 50% of the total raw material is imported). This exposes the company to risk of foreign exchange fluctuation.

Key Rating Strengths

Long and established track record with experienced promoters

TIL is an established player in providing technology intensive equipment for the infrastructure sector. The company, over the last seven decades, has consistently introduced new products in the material handling and construction equipment. The current promoter Mr. Sumit Mazumder, possesses rich experience in the industry and is supported by a team of qualified personnel.

Manufacturing and technical collaborations with leading international players

TIL, over the years, has entered into long term manufacturing and technical alliances with leading equipment manufacturers across the globe to offer superior products to its customers. These alliances have given technological parity to the company as most of the other domestic construction and material handling equipment manufacturers have also tied-up with renowned international technology providers.

Moderate order book position with reputed clientele and wide service network

The order book of the company improved to about Rs.346 crore as on March 10, 2021 as against Rs.113 crore on June 30, 2020. The orderbook also includes defence equipment orders worth Rs

200 crore. The client portfolio of the company comprises reputed public sector and private sector entities. With a network of four regional offices, 60 branches & 20 product support centres in India, the company offers the required service back-up to support its product line.

Consistent source of revenue from maintenance & repair contracts and sale of component & spare parts

TIL, while selling its products, also enters into long term maintenance and repair contracts with various customers thereby providing stable and consistent source of future income. It derives income of around one-third of gross sales from sale of components & spare parts.

Liquidity: Stretched

The working capital limits have been utilised almost fully in the 12-month period ended March 31, 2021. The promoters have infused about Rs.70 crore in FY21 and Rs.11 crore in May 2021 as unsecured loans to support liquidity. The company is also looking at sale of other non-core assets, a part of which was expected to be completed by May 2021. However, the same has got delayed and is now expected to be completed in June 2021. The company does not have any major capex plans.

Analytical approach: Standalone.
