- 5.5. As per the Draft scheme of amalgamation, the rationale for the scheme is envisaged as under:
- (i) The amalgamation of the Transferor Companies with the Transferee Company will enable consolidation of the business and operations of the Transferor Companies and the Transferee Company which will provide impetus to growth, enable synergies and focused management control.
 - (ii) It is considered desirable and expedient to reorganise and amalgamate the business of the Transferor Companies with the Transferee Company so as to have a stronger asset base which will result in bolstering the asset/capital base and balance sheet of the Transferee Company.
 - (iii) The amalgamation will result in stability, better economic control, flexibility and enhance the ability of the amalgamated entity to undertake large projects, thereby contributing to enhancement of future business potential.
 - (iv) The amalgamation will result in pooling of resources, integration and effective utilisation of resources, which is likely to result in optimising overall shareholders' value and improvement in competitive position of the Transferee Company in the real estate industry as a combined entity.
 - (v) There is no likelihood that any shareholder or creditor or any stakeholder of the Transferor Companies and the Transferee Company would be prejudiced as a result of the Scheme. Thus, the merger is in the interest of the shareholders, creditors and all other stakeholders of the companies and is not prejudicial to the interests of the concerned shareholders, creditors or the public at large.

6. Valuation Date:

- 6.1. The cut-off date for all the financial information used in the present valuation exercise has been considered on March 31, 2021 and the market parameters have been considered up to closing hours of May 28, 2021 being the last day of trading prior to the relevant date i.e. May 31, 2021.

7. Valuation Standards:

- 7.1 The Report has been prepared in compliance with the Valuation Standards issued by the Institute of Chartered Accountants of India and adopted by ICAI Registered Valuers Organisation.

8. Valuation Methodology and Approach:

- 8.1. The standard of value used in the Analysis is "Fair Value", which is often defined as the price, in terms of cash or equivalent, that a buyer could reasonably be expected to pay and a seller could reasonably be expected to accept, if the business were exposed for sale in the open market for a reasonable period of time, with both buyer and seller being in possession of the pertinent facts and neither being under any compulsion to act.

8.2. Valuation of a business is not an exact science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgement. In the ultimate analysis, valuation will have to be tempered by the exercise of judicious discretion by the Valuer and judgement taking into accounts all the relevant factors. There is, therefore, no indisputable single value. While I have provided my recommendation of the fair equity share exchange ratio pursuant to the scheme based on the financial and other information available to me and within the scope and constraints of my engagement, others may have a different opinion. The final responsibility for determination of the fair equity share exchange ratio is of the management of the Companies who takes into account other factors such as their own assessment of the companies and input of other advisors.

8.3. The results of this exercise could vary significantly depending upon the basis used, the specific circumstances and professional judgment of the valuer. In respect of going concerns, certain valuation techniques have evolved over time and are commonly in vogue. These can be broadly categorised as follows:

8.3.1. Cost Approach:

Cost approach focuses on the net worth or net assets of a business.

Replacement Cost Method:

Replacement Cost method is a version of NAV method wherein assets and liabilities are considered at their realizable (market) value including intangible assets and contingent liabilities, if any, which are not stated in the Statement of Assets and Liabilities. Under this method, adjustments are made to the company's historical balance sheet in order to present each asset and liability item at its respective fair market value. The difference between the total fair market value of the adjusted assets and the total fair market value of the adjusted liabilities is used to value a company. The value arrived at under this approach is based on the financial statements of the business and may be defined as Net-worth or Net Assets owned by the business.

The Asset Approach is generally considered to yield the minimum benchmark of value for an operating enterprise.

8.3.2. Market Approach:

(A) Market Price Method

The market price of an equity shares as quoted on a stock exchange is normally considered as the value of the equity shares of that Company where such quotations are arising from the shares being regularly and freely traded in, subject to the element of speculative support that may be inbuilt in the value of shares.

(B) Comparable Companies Multiple (CCM) Method

Under this methodology, market multiples of comparable listed companies are computed and applied to the business being valued in order to arrive at a multiple based valuation. The difficulty here is in the selection of a comparable company since it is rare to find two or more companies with the same product portfolio, size, capital structure, business strategy, profitability and accounting practices.

Whereas no publicly traded company provides an identical match to the operations of a given company, important information can be drawn from the way comparable enterprises are valued by public markets. This valuation is based on the principle that market transactions taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for exceptions and circumstances. Generally used multiples are EV/EBITDA multiple, EV/Revenue and Market Capitalization/PAT (PE multiple).

To arrive at the total value available to the stakeholders, the value arrived under CCM method if calculated by EV/EBITDA or EV/Sales is adjusted for debt, (net of cash and cash equivalents), surplus non-operating investments and contingent liabilities. Value arrived under the PE multiple is adjusted only for surplus non-operating investments and contingent liabilities. (No debt adjustments required)

8.3.3. Income Approach:

The income approach is appropriate for estimating the value of a specific income / cash flows stream with consideration given to the risk inherent in that stream. The most common method under this approach is discounted cash flow method.

Discounted Cash Flows (DCF)

DCF uses the future free cash flows to available to equity shareholders of the company discounted by cost of equity, considering a risk factor measured by beta, to arrive at the present value.

Beta is an adjustment that uses historic stock market data to measure the sensitivity of the company's cash flow to market indices, for example, through business cycles.

The DCF method is a strong valuation tool, as it concentrates on cash generation potential of a business. This valuation method is based on the capability of a company to generate cash flows in the future. The free cash flows are projected for a certain number of years and then discounted at a discount rate that reflects a company's cost of capital and the risk associated with the cash flows it generates. DCF analysis is based mainly on the following elements:

- Projection of financial statements (key value driving factors)
- The cost of capital to discount the projected cash flows

27

Discount Factor

The Discount Factor considered for arriving at the present value of the free cash-flows to equity of the Company is the cost of equity. The cost of equity is computed using the Capital Asset Pricing Model (CAPM) using the formula shown below:

$$K_e = R_f + \beta * (R_m - R_f)$$

Where,

R_f = Risk free rate of return;

R_m = Market rate of return;

β = Sensitivity of the share to the market/ Measure of Market Risk

Terminal Value

The terminal value refers to the present value of the business as a going concern beyond the period of projections up to infinity. This value is estimated by taking into account expected growth rates of the business in future, sustainable capital investments required for the business as well as the estimated growth rate of the industry and economy.

12. Valuation of Companies:

12.1. Valuation of GHCL (Transferee Company):

(i) Cost Approach:

Replacement cost method under Cost approach has not been considered while valuing GHCL because,

- GHCL is having assets that do not have easily determinable market values such as significant property, plant, and equipment, equity investments in other unlisted entities, etc.
- Certain intangible assets, such as “the value from synergies”, “the value of a good business reputation”, etc., are not capitalized in the books.

Considering aforesaid reasons, it can be said that the net asset value does not reflect the intrinsic value of the business in a going concern scenario and hence not considered.

(ii) Market Approach:

Since the equity shares of Transferee Company are listed and traded on BSE and NSE, I have referred to the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time for the purpose of valuing GHCL.

- a. Attention may also be drawn to Regulation 158 of ICDR Regulations which specifies that issue of equity shares to shareholders of an unlisted entity pursuant to a NCLT approved scheme shall conform with the pricing provisions of preferential issue of equity shares which are frequently traded as specified under Regulation 164 of the said regulations.

- b. The traded turnover of equity shares of GHCL during twelve calendar months prior to relevant date is substantially higher than prescribed limit of 10 % under regulation 164(5) of ICDR and hence I have considered Pricing Formula provided in Regulation 164(1) for arriving at the minimum value per equity share of GHCL under the Market Price Method. The market price is considered as higher of the following:
- (a) average of the weekly high and low of the volume weighted average price (VWAP) of shares of GHCL on NSE during the 26 weeks preceding May 31, 2021; or
 - (b) average of weekly high and low of the volume weighted average price (VWAP) of shares of GHCL on NSE during the 2 weeks preceding May 31, 2021.
- c. As per explanation to regulation 164, NSE is considered as the recognized stock exchange in which the equity shares of GHCL are having highest trading volumes during preceding twenty six weeks prior to the relevant date.

(iii) Income Approach:

GHCL is a listed entity and information related to profit and loss account, balance sheet and cash flows is price sensitive. In light of the above, I was not provided with projections of GHCL by the Management of the Transferee Company. I have therefore, not used DCF method for the valuation exercise.

- (iv) Refer Annexure A of this report for the underlying working.

12.2. Valuation of SRPL, MEPL and GIPL (Transferor Companies):

(i) Cost Approach:

Based on the information and explanations received from management of the SRPL, MEPL and GIPL and based on my perusal of the Scheme, I understand that the Scheme is proceeded with, on the assumption that the SRPL, MEPL and GIPL are amalgamating as a going concern. Therefore, I have used the Replacement cost method to value the shares of SRPL, MEPL & GIPL. In working out, Replacement cost Method for valuation of SRPL, MEPL and GIPL (Transferor Companies), I have considered:

- Fair Value of Land based on Valuation Reports of Shri Pranav Parikh, Registered Valuer – Land and Building Class (IBBI Registration No. IBBI/RV/07/2019/12652) for plot of land owned by respective companies.

- Value of cash & cash equivalents as at 31st March, 2021 as per audited Financial Statements.
- Out of adjusted value of assets, the liability pertaining to inter-corporate deposits have been reduced to arrive at fair value under Replacement cost method.

The detailed workings for Replacement cost method are given in Annexure – B.

(ii) Market Approach:

As informed to me, there are no comparable listed peers for SRPL, MEPL and GIPL of same specifications, features and financial data etc. and hence I have not used CCM method under Market Approach for valuation of SRPL, MEPL and GIPL.

Since SRPL, MEPL and GIPL are not listed on any Indian Stock Exchange; hence Market price method under Market approach is not used for their valuation.

(iii) Income Approach:

The management of the transferor companies have provided the details of projected cash flows for the period of four years considering the proposed development of such properties on the Land owned by each of the companies. In view of same, I have used Discounted Cash Flow approach under Income Approach for valuation of SRPL, MEPL and GIPL since their value also lies in the future potentials from their business. In this approach the valuation would primarily be based on the present value of future cash flows by discounting such future cash flows using cost of equity as a rate of discounting. Broad steps followed to derive the value under this approach are described as under:

- I have considered the projected cash flow available to equity shareholders (FCFE) for period starting from FY 2021-22 to FY 2024-25 as certified by the management of the SRPL, MEPL and GIPL.
- The Terminal Value i.e. value beyond the explicit forecast period is not relevant as the said companies are contemplating to develop and sale the units of project by FY 2024-25.
- FCFE for future years is discounted using cost of equity as the discounting factor to arrive at their Net Present Value ("NPV") as at the valuation date.
- The value so arrived has been increased by cash & cash equivalents as on the valuation date to arrive the value attributable to the equity shareholders of SRPL, MEPL and GIPL respectively.
- The value as computed above has been then divided by the number of equity shares to arrive the value per equity share as at the valuation date.

The detailed workings for arriving at value under DCF approach are given in Annexure – C.

12.3 Discount for Lack of Marketability:

Further, the transferee companies being considered for valuation are closely held private companies, the marketability of the interest (represented by equity share) in the companies has to be considered at the time of arriving at the value per share. Marketability is defined as the ability to convert the business interest into cash quickly with minimum transaction and administrative costs, and with high degree of certainty as to the amount of net proceeds. There is usually a cost and a time lag associated with locating interested and capable buyers of interests in closely held companies, because there is no established market for readily available buyers and sellers. All other factors being equal, an interest in a publicly traded company is worth more because it is readily marketable. In view of the above and based on various empirical studies available a discount factor of 10 % has been applied in case of equity shares of SRPL, MEPL and GIPL.

12.4. Basis of Fair Equity Share Exchange Ratio:

- a. The basis of the fair equity share exchange ratio pursuant to the Scheme would have to be determined after taking into consideration all the factors and methods mentioned hereinabove and to arrive at a final value for the shares of each company. It is, however, important to note that in doing so, I am not attempting to arrive at the absolute values of the Companies, but their relative values to facilitate the determination of the fair equity share exchange ratio.
- b. I have independently applied methods discussed above, as considered appropriate, and arrived at their assessment of value per share of the Companies. To arrive at the consensus of the fair equity share exchange ratio, rounding off have been done in the values.
- c. The fair equity share exchange ratio has been arrived at on the basis of a relative valuation based on the various approaches/methods explained above and various qualitative factors relevant to each Company having regard to information base, key underlying assumptions and limitations. For this purpose, I have assigned appropriate weights to the values arrived at under each approach/method.

2

13. Conclusion:

Based on the foregoing data, considerations and steps followed, I consider the recommendation of fair equity share exchange ratio for amalgamation of SRPL, MEPL and GIPL with GHCL as follows:

Computation of fair equity share exchange ratio:

(All amounts in INR except equity share exchange ratio)

Valuation approach	GHCL		SRPL		MEPL		GIPL	
	Value per Share	Weight	Value per Share	Weight	Value per Share	Weight	Value per Share	Weight

Market Approach	64.01	100%	NA	NA	NA	NA	NA	NA
Income Approach	NA	NA	54,730	50%	99,618	50%	77,081	50%

Less: Discount @ 10 % in value of SRPL, MEPL & GIPL	NA		5,409		9,558		7,576	
Relative Value per Equity Share	64.01		48,680		86,018		68,180	
Fair Equity Share Exchange Ratio i.e. No of Equity share of GHCL to be issued per Equity Share of Transferor Company (Rounded off)	-		761		1,344		1,065	

Notes to the above table for computation of fair equity share exchange ratio.

- NA means Not Adopted / Not Applicable.
- SRPL, MEPL and GIPL are not listed on any Indian Stock Exchange; consequently, Market Price Method under Market Approach is not used.
- GHCL is listed on BSE and NSE. Hence, I have considered Market Price Method for valuing GHCL.

- I have not used CCM Method for SRPL, MEPL and GIPL due to difference in size, nature, features, financial data, etc. of SRPL, MEPL and GIPL as compared to other Companies operating in similar sector and listed on Indian Stock Exchanges.
- I have not used CCM Method for GHCL due to difference in size, nature, features, financial data, etc. of GHCL as compared to other Companies operating in similar sector and listed on Indian Stock Exchanges.
- I have not used Replacement cost method under Cost Approach for valuation GHCL since the net asset value does not reflect the intrinsic value of the business in a going concern scenario.
- I have not used Discounted Cash flow method for valuation GHCL due to non-availability of projections of GHCL by the Management.

Dear Sirs,

Sub: Clarification on Valuation Report dated 31st May, 2021

Ref: Valuation Report on Fair Equity Share Exchange Ratio pursuant to Scheme of Amalgamation of Sulabh Realty Private Limited and Malvika Estate Private Limited and Gitanjali Infrastructure Private Limited (together referred to as the "Transferor Companies") with Ganesh Housing Corporation Limited ("Transferee Company")

This has reference to above referred Valuation Report on Fair Equity Share Exchange Ratio submitted by me on 31st May, 2021.

In this connection, the management of Transferee company has sought clarification on the issue mentioned at Sr. no. 4 to the NSE remarks vide requirement letter no. NSE/LIST/27204 dated 10th June, 2021, which is reproduced hereunder:

4. *Valuation Report from a Registered Valuer as per Para I(A)(4) of Annexure I of SEBI Circular no. CFD/DIL3/CIR/2017/21 dated March 10, 2017 and amendment thereof along with the Computation of Fair Share Exchange Ratio as mentioned in the format enclosed in Annexure A (Clause 12.3 Pg. 14: Kindly clarify whether it is transferor company or transferee)*

In this connection, kindly note that in the first line to the Clause 12.3 on Page 14, there is a typographical human error viz. the word "transferee" has been written instead of "transferor". Hence, the word transferee should be read as transferor. In this regard, corrected clause 12.3 is reproduced below for your ready reference:

12.3 Discount for Lack of Marketability:

Further, the transferor companies being considered for valuation are closely held private companies, the marketability of the interest (represented by equity share) in the companies has to be considered at the time of arriving at the value per share. Marketability is defined as the ability to convert the business interest into cash quickly with minimum transaction and administrative costs, and with high degree of certainty as to the amount of net proceeds. There is usually a cost and a time lag associated with locating interested and capable buyers of interests in closely held companies, because there is no established market for readily available buyers and sellers. All other factors being equal, an interest in a publicly traded company is worth more because it is readily marketable. In view of the above and based on various empirical studies available a discount factor of 10 % has been applied in case of equity shares of SRPL, MEPL and GIPL.

1. We have reviewed the accompanying Statement of Unaudited Consolidated Financial Results of GANESH HOUSING CORPORATION LIMITED ("the Parent") and its Subsidiaries (the parent and its subsidiaries together referred to as "the Group") for the quarter ended 30th June, 2021. This Statement being submitted by the Parent pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ("the Regulations").
2. This statement which is responsibility of the parent's management and has been approved by the Parent's Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34, (Ind AS 34) "Interim Financial Reporting" prescribed under Section 133 of the Companies Act, 2013 as amended, read with relevant rules issued there under and other accounting principles generally accepted in India read with the Circular. 3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410, "Review of interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
4. We also performed procedure in accordance with the circular issued by the SEBI under Regulation 33(8) of the regulations, to the extent applicable.
5. The statement includes the result of the following entities:-
 1. Madhukamal Infrastructure Private Limited
