PRESS RELEASE

Tata Communications becomes the Official Digital Transformation Partner of ROKiT Williams Racing

The Formula 1® team will benefit from Tata Communications' seven-season track record in addressing the critical technology requirements of the world's most technologically advanced sport

London, UK - March 13th 2019 - ROKiT [Williams Racing](#) has chosen [Tata Communications](#) as the team's Official Digital Transformation Partner.

ROKiT Williams Racing will benefit from Tata Communications' seven-season track record in the reliable delivery of network, hosting, broadcasting and security services to the F1® ecosystem. The team will use Tata Communications' digital infrastructure to enable real-time data transfer between the pit-lane garage at each Grand Prix and the team's race factory in the UK.

This infrastructure includes a superfast subsea fibre network that carries around 30% of the world's Internet routes. It powers Internet of Things applications across the globe, underpins Tata Communications' cloud and cyber security services, and enables software defined networking for multinational businesses. Harnessing Tata Communications' digital capabilities means that even if ROKiT Williams Racing's engineers are thousands of miles apart, they are able to share vital data and insights, and collaborate on race strategy as if they were in the same place.

"Unlike any other technology company, Tata Communications plays a central role in all areas of F1® - arguably the most challenging technology environment there is," said **Claire Williams, Deputy Team Principal, ROKiT Williams Racing**. "We've chosen Tata Communications as our new partner because of its deep understanding of the F1® ecosystem and its unique technology requirements, and the company's 'whatever it takes' attitude to support our team. We know we can trust Tata Communications to deliver at every race weekend, anywhere in the world."

"Since 2012, Tata Communications' role in F1® has continued to grow, and we're incredibly proud to now work with one of the most iconic teams in the paddock," said **Mehul Kapadia, Managing Director of Tata Communications' F1® Business and the company's Global Head of Marketing**. "Our aim is to unleash the full potential of digital transformation in live sports by enabling organisations like ROKiT Williams Racing to harness the power of our technology capabilities."

Tata Communications plays a central role in not only F1®, but also MotoGP™ and the European Tour. The company also collaborates with other sports, such as football, sailing and cricket, using its networking, cloud, mobility and security expertise to pave the way for new, more efficient ways of working in sports, to enable fans to engage with their heroes in new ways, and to lower the barriers for sports to expand to new markets. Tata Communications has tested in action technologies such as live 360°, Ultra-HD video, and explored how innovations such as the Internet of Things could offer unique data-driven insights for teams and individuals.

Tata Communications has been the Official Connectivity Provider of Formula 1® since 2012, enabling the sport to seamlessly reach its half a billion fans globally each season. In 2013, the company became the Official Managed Connectivity Supplier of Mercedes-AMG Petronas Motorsport.

Ends...

[About Tata Communications](#)

Tata Communications is a leading global digital infrastructure provider that powers today's fast growing digital economy.

Forward-looking and cautionary statements

Certain words and statements in this release concerning Tata Communications and its prospects, and other statements, including those relating to Tata Communications' expected financial position, business strategy, the future development of Tata Communications' operations, and the general economy in India, are forward-looking statements. Such statements involve known and unknown risks, uncertainties and other factors, including financial, regulatory and environmental, as well as those relating to industry growth and trend projections, which may cause actual results, performance or achievements of Tata Communications, or industry results, to differ materially from those expressed or implied by such forward-looking statements. The important factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements include, among others, failure to increase the volume of traffic on Tata Communications' network; failure to develop new products and services that meet customer demands and generate acceptable margins; failure to successfully complete commercial testing of new technology and information systems to support new products and services, including voice transmission services; failure to stabilize or reduce the rate of price compression on certain of the company's communications services; failure to integrate strategic acquisitions and changes in government policies or regulations of India and, in particular, changes relating to the administration of Tata Communications' industry; and, in general, the economic, business and credit conditions in India. Additional factors that could cause actual results, performance or achievements to differ materially from such forward-looking statements, many of which are not in Tata Communications' control, include, but are not limited to, those risk factors discussed in Tata Communications Limited's Annual Reports. The Annual Reports of Tata Communications Limited are available at www.tatacommunications.com. Tata Communications is under no obligation to, and expressly disclaims any obligation to, update or alter its forward-looking statements.
