Talligence – a unique AI & ML powered business intelligence, and analytics solution for MSMEs officially launched.

Talligence is a robust AI and ML solution that converts raw data from Tally® into business insights. Specially crafted for small and medium enterprises, it provides valuable and meaningful insights into business operations through industry standard KPIs, scorecards, analytics and reports.

Gujarat-based NSE and BSE-listed Dev Information Technology Limited (DEV IT) launched Talligence, an AI-powered and ML-driven BI and Analytics solution for Tally®. The analytical, visualization and automation prowess of Talligence was presented at the Courtyard by Marriott, Ahmedabad, on 3rd February in the presence of Chief Guest Shri Pathik Patwari, President of Gujarat Chamber of Commerce and Industries (GCCCI), Tally Partners, Chartered Accountants, and business owners from various MSME sectors.

Talligence addresses the data analytics needs of MSMEs. The product harnesses Tally® data and turns the raw data into meaningful business insights. Talligence has an intuitive interface and pre-defined dashboards and scorecards for tracking sales, purchases, finances, and inventory in an easy-to-understand manner. Moreover, the users can use the power of NLP to extract the exact information they need from Talligence. The chatbot conveyed simple speech in voice commands and communicated to the business data to present answers to simple queries.

Customized Data Analysis for Business Owners

According to Mr Vishal Vasu, Director and CTO at Dev Information Technology Ltd. *“Talligence is a lightweight BI solution that extracts, refines, cleanses, and*

correlates the accounting data into an easy-to-understand format. We want to bring the power of data intelligence and analytics to every business owner by making Talligence powerful yet affordable.”

Talligence has pre-built dashboards with a range of drill-down and filters. There are C-level dashboards with specific functionalities for CEOs and CFOs, giving them an integrated and holistic view of the business. The entire business data and information regarding sales, geographic locations, specific products, accounts receivables, accounts payable, expense statements, the quantity and value of stocks, etc., are available within seconds. The facility to compare data over a period, including weeks, months, quarters, and years, enables the identification of patterns and trends in the business.

Mr. Vasu added, *“We have been working on Talligence for the last two years and have added a wide gamut of features after carefully considering what a modern-day business requires. In an era where data is the new oil, a solution like Talligence will make it convenient to extract useful insights and give everyone a simpler way to monitor critical business parameters.”*
