6. VALUATION APPROACH AND METHODOLOGIES

- 6.1. For carrying out this valuation exercise, we have requested and received financial information from the Management, obtained relevant data from public domains, carried out analysis, carried discussions with the Management to understand the business and fundamental factors affecting the Companies and selected appropriate valuation methodologies.

- 6.2. For the purpose of valuation, generally following approaches can be considered, viz,
- (a) the 'Market' approach;
 - (b) the 'Income' approach; and
 - (c) the 'Asset' approach

6.3. MARKET APPROACH

Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e. similar) assets, liabilities or a group of assets and liabilities, such as a business.

Under this method, the value of the shares of a company is determined by taking the average of the market capitalization of the equity shares of a recognized stock exchange over reasonable period of time, subject to the element of speculative support that may be inbuilt in the market price. But there could be situations where the value of the share as quoted on the stock market would not be regarded as proper index for the fair value of the share.

6.4. INCOME APPROACH

6.4.1. Under the 'Income' approach, shares of companies are valued using 'Discounted Cash Flow' ('DCF') Method.

6.4.2. Under the DCF method the projected free cash flows from business operations after considering fund requirements for projected capital expenditure and incremental working capital are discounted at the Weighted Average Cost of Capital (WACC). The sum of the discounted value of such free cash flows and discounted value of perpetuity is the value of the business.

6.4.3. The free cash flows represent the cash available for distribution to both the owners and the creditors of the business. The free cash flows are determined by adding back to profit before tax, (i) interest on loans, if any, (ii) depreciation and amortizations (non-cash charge), and (iii) any non-operating item. The cash flow is adjusted for outflows on account of (i) capital expenditure, (ii) incremental working capital requirements and (iii) tax.

6.4.4. WACC is considered as the most appropriate discount rate in the DCF Method, since it reflects both the business and the financial risk of the company. In other words, WACC is the weighted average of the company's cost of equity and debt.

6.5. ASSET APPROACH – NET ASSET VALUE METHOD

6.5.1. Under the asset approach, the Net Asset Value ('NAV') method is considered, which is based on the underlying net assets and liabilities of the company, taking into account operating assets and liabilities on a book value basis and appropriate adjustments for, inter alia, value of surplus / non-operating assets. Such value generally represents the floor value in case of profit-making business.

6.6. Out of the above methods, the Valuers have used approaches / methods as considered appropriate by them respectively. The valuation approaches / methods used and the values arrived at using such approaches / methods by the Valuers have been tabled in

para 7 of this Report. The report date is the Valuation Date.

7. RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

- 7.1. The fair basis of amalgamation of DCL, NMW and HTMS with HTML would have to be determined after taking into consideration all the factors and methodologies mentioned hereinabove. Though different values have been arrived at under different methods, for the purposes of recommending a ratio of exchange it is necessary to arrive at a single value for the shares of the Companies. It is however important to note that in doing so, we are not attempting to arrive at the absolute values of the shares of each company. Our exercise is to work out relative value of shares of the Companies to facilitate the determination of a ratio of exchange. For this purpose, it is necessary to give appropriate weightage to the values arrived at under each approach.
- 7.2. Valuers, have independently applied approaches / methods discussed above, as considered appropriate and arrived at their assessment of the relative values per equity share of the Companies. To arrive at the consensus on the fair equity share exchange ratios for the Proposed Amalgamation, suitable minor adjustments / rounding off have been done in the relative values arrived by the Valuers.
- 7.3. The fair equity share exchange ratio has been arrived on the basis of a relative valuation of equity shares of the Companies based on the approaches explained herein and various qualitative factors relevant to the companies and the business dynamics and growth potential of the businesses, having regard to information base, management representation and perceptions, key underlying assumptions and limitations.
- 7.4. In the ultimate analysis, valuation will have to involve the exercise of judicious discretion and judgement taking into account all the relevant factors. There will always be several factors, e.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of the balance sheets but which will strongly influence the worth of a share.

7.5. In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove in this report, we recommend the following fair equity share exchange ratio for the proposed Amalgamation whose computation as required as per BSE Circular number LIST/COMP/02/2017-18 dated May 29, 2017 and NSE Circular number NSE/CML/2017/12 dated June 01, 2017 is as under:

7.5.1. Computation of Fair Equity Share Exchange Ratios as derived by SSPA, is given below:

Method of Valuation	HTML		DCL		NMW		HTMS	
	Value per Share (INR)	Weights	Value per Share (INR)	Weights	Value per Share (INR)	Weights	Value per Share (INR)	Weights
Asset Approach - NAV Method	NA	NA	34.18	50%	5.36	50%	NA	NA
Income Approach - DCF Method	137.29	50%	NA	NA	NA	NA	6.41	100%
Market Approach - Market Price Method	15.93	50%	13.13	50%	5.57	50%	NA	NA
Relative Value per equity share	76.61		23.65		5.46		6.41	
Exchange Ratio (rounded off)			3.25		14.00		12.00	

NA - Not Applicable / Not Applied

Valuer's Notes:

In the present case, the business of HTML and HTMS are intended to be continued on a 'going concern basis' and there is no intention to dispose-off the assets, therefore the Asset approach is not adopted for the present valuation exercise.

Given the nature of businesses of HTML and HTMS and the fact that we have been provided by the companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income approach to arrive the relative fair value of the shares of the companies for the purpose of arriving at the fair equity share exchange ratios. Since, business operations of DCL are insignificant and NMW does not carry business operations on their own, Income approach cannot be considered. NAV method under Asset approach has been considered for valuation of DCL and NMW wherein the fair values of underlying investments have been considered by applying DCF method under income approach.

In the present case, equity shares of HTML, DCL and NMW are listed on BSE and NSE. Per the relevant SEBI regulations, the equity shares of HTML and DCL are frequently traded, whereas, the equity shares of NMW are not frequently traded. Since we are carrying out relative valuation, based on our analysis it would be inappropriate to ignore the market price. Accordingly, to calculate the relative equity value, we have considered the market prices for all the three companies and assigned appropriate weights to different valuation approaches to arrive at the fair equity share exchange ratios.

7.5.2. Computation of Fair Equity Share Exchange Ratios as derived by Finvox, is given below:

Method of Valuation	HTML		DCL		NMW		HTMS	
	Value per Share (INR)	Weights	Value per Share (INR)	Weights	Value per Share (INR)	Weights	Value per Share (INR)	Weights
Asset Approach - NAV Method	84.53	33.33%	32.56	50%	5.44	50%	NA	NA
Income Approach - DCF Method	127.69	33.33%	NA	NA	NA	NA	6.44	100%
Market Approach - Market Price Method	17.30	33.33%	14.64	50%	5.31	50%	NA	NA
Relative Value per equity share	76.51		23.60		5.38		6.44	
Exchange Ratio (Rounded off)			3.25		14.00		12.00	

NA - Not Applicable / Not Applied

Valuer's Notes:

We have used the NAV method under the Asset approach to arrive at the relative fair value of equity shares of HTML, DCL and NMW. The NAV method generally sets a floor to the range of values as an entity tends not to be worth less than the net value of its underlying assets and liabilities at fair value. In case of HTML, as the market price is less than the NAV, therefore, we have also considered the Asset approach to arrive the relative fair value of the equity shares of HTML. In case of DCL and NMW, as both the entities derive majority of their value from the underlying investments in subsidiary companies, we have used the Asset approach for their valuation. In case of HTMS, as the company operates a digital entertainment business, the true worth of HTMS is not reflected by the net assets of the company. Therefore, the asset approach was not used in the valuation of HTMS.

Given the nature of businesses of HTML and HTMS and the fact that we have been provided by the companies with their projected financials, we have considered it appropriate to apply the DCF Method under the Income approach to arrive the relative fair value of the shares of the companies for the purpose of arriving at the fair equity share exchange ratios. As previously discussed, the NAV method under Assets approach has been considered for valuation of DCL and NMW wherein the fair values of underlying investments have been considered by applying DCF method under Income approach.

As previously discussed, equity shares of HTML, DCL and NMW are listed on BSE and NSE. Per the relevant SEBI regulations, the equity shares of HTML and DCL are frequently traded, whereas, the equity shares of NMW are not frequently traded. Since we are carrying out relative valuation, based on our analysis it would be inappropriate to ignore the market price. Accordingly, to calculate the relative equity value, we have considered the market prices for all the three companies and assigned appropriate weights to different valuation approaches to arrive at the fair equity share exchange ratios.

We have used the Market Price method under the Market approach for the valuation of HTML, DCL and NMW by using the pricing formula provided in Regulations 164 (1) of Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulations 2018 ('ICDR').

The market price is considered as higher of the following:

- (a) average of the weekly high and low of the volume weighted average price during the 26 weeks preceding February 09, 2021; or
- (b) average of weekly high and low of the volume weighted average price during the 2 weeks preceding February 09, 2021.

<<<Space is intentionally left blank>>>

7.6. In light of the above, and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, we recommend fair equity share exchange ratios as mentioned below:

- The fair equity share exchange ratio for the proposed amalgamation of DCL with HTML is as under:

4 (Four) equity shares of HTML of INR 2 each fully paid up for every 13 (Thirteen) equity shares of DCL of INR 2 each fully paid up

- The fair equity share exchange ratio for the proposed amalgamation of NMW with HTML is as under:

1 (One) equity share of HTML of INR 2 each fully paid up for every 14 (Fourteen) equity shares of NMW of INR 10 each fully paid up

- The fair equity share exchange ratio for the proposed amalgamation of HTMS with HTML is as under:

1 (One) equity share of HTML of INR 2 each fully paid up for every 12 (Twelve) equity shares of HTMS of INR 10 each fully paid up

Thanking you,
Yours faithfully,

For SSPA & CO.

2. This Statement, which is the responsibility of the Company's management and approved by the Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 "*Interim Financial Reporting*" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India and in compliance with Regulation 33 and Regulation 52, to the extent applicable, of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended ('Listing Regulations'). Our responsibility is to issue a report on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*" issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
4. Based on our review conducted as above and based on the consideration of the review report of the other auditor referred to in paragraph 5 below, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with applicable accounting standards and other recognised accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 33 and 52, to the extent applicable, of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

1. We have reviewed the accompanying Statement of unaudited consolidated financial results of Digicontent Limited (“the Parent”) and its subsidiary (the Parent and its subsidiary together referred to as “the Group”), for the quarter ended 30 September 2021 and year to date results for the period from 1 April 2021 to 30 September 2021 (“the Statement”), being submitted by the Parent pursuant to the requirements of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended (“Listing Regulations”).
2. This Statement, which is the responsibility of the Parent’s management and approved by the Parent’s Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 “*Interim Financial Reporting*” (“Ind AS 34”), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. Our responsibility is to express a conclusion on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 “*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*”, issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33 (8) of the Listing Regulations, to the extent applicable.

4. The Statement includes the results of the following entities:

Parent

- a. Digicontent Limited

Subsidiary

- b. HT Digital Streams Limited (HTDSL)

B S R and Associates

5. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

To
Board of Directors of Digicontent Limited

1. We have reviewed the accompanying Statement of unaudited standalone financial results of Digicontent Limited (“the Company”) for the quarter ended 30 September 2021 and year to date results for the period from 1 April 2021 to 30 September 2021 (“the Statement”).
2. This Statement, which is the responsibility of the Company’s management and approved by the Board of Directors, has been prepared in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 “*Interim Financial Reporting*” (“Ind AS 34”), prescribed under Section 133 of the Companies Act, 2013, and other accounting principles generally accepted in India and in compliance with Regulation 33 of the Listing Regulations. Our responsibility is to issue a report on the Statement based on our review.
3. We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 “*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*” issued by the Institute of Chartered Accountants of India. This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data and thus provides less assurance than an audit. We have not performed an audit and accordingly, we do not express an audit opinion.
4. Based on our review conducted as above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with applicable accounting standards and other recognised accounting practices and policies has not disclosed the information required to be disclosed in terms of Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 including the manner in which it is to be disclosed, or that it contains any material misstatement.

We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 “*Review of Interim Financial Information Performed by the Independent Auditor of the Entity*”, issued by the Institute of Chartered Accountants of India. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

We also performed procedures in accordance with the circular issued by the SEBI under Regulation 33 (8) of the Listing Regulations, to the extent applicable.

4. The Statement includes the results of the following entities:

Parent Company

- a. Next Mediaworks Limited

Subsidiaries

- c. Syngience Broadcast Ahmedabad Limited

5. Based on our review conducted and procedures performed as stated in paragraph 3 above and based on the consideration of the review report of the other auditor referred to in paragraph 6 below, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in accordance with the recognition and measurement principles laid down in the aforesaid Indian Accounting Standard and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of Regulation 33 of the Listing Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

1. Corporate information

HT Mobile Solutions Limited ("The Company") is a public company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India to carry out mobile marketing, social media marketing, advertising, mobile CRM and loyalty campaigns, mobile music content and ring tones and integrates with other media campaigns and strategies.

The registered office of the Company is located at Hindustan Times House, 18-20, Kasturba Gandhi Marg, New Delhi-110001.

2. Significant accounting policies followed by the company

2.1 Basis of preparation

The Special purpose financial information for the period April 1, 2021 to September 30, 2021 have been prepared in accordance with recognition and measurement principles of Indian Accounting Standards ('Ind AS') specified in the Companies (Indian Accounting Standards) Rules, 2015 (as amended) under Section 133 of the Companies Act 2013 (the "accounting principles generally accepted in India").

A Composite Scheme of Amalgamation u/s 230-232 of the Companies Act, 2013 which provides for merger of Next Mediaworks Limited (NMWL), Digicontent Limited (DCL) and HT Mobile Solutions Limited (HTMSL) with HT Media Limited (HTML) ("Scheme"), has been approved by the Board of Directors of respective companies at their meeting held on February 11, 2021, subject to requisite approval(s). Both NSE and BSE have issued their no-objection letter in relation to the Scheme pursuant to Regulation 37 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The Scheme has been filed before the Delhi and Mumbai Benches of Hon'ble National Company Law Tribunal (NCLTs) on September 08, 2021 and September 13, 2021 respectively. The special purpose financial information of the Company has been prepared for the purpose of filing with NCLT in relation to proposed merger scheme.

The accounting policies are applied consistently to all the periods presented in the financial statements.

The financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Defined benefit plans - plan assets measured at fair value;
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

The financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

2.2 Summary of significant accounting policies

a) Current versus non- current classification

The Company presents assets and liabilities in the balance sheet based on current and non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the display of advertisement on website and delivery of content and their realization in cash and cash equivalent. The Company has identified 12 months as its operating cycle.

b) Business combinations - common control transactions

Common control business combination means a business combination involving entities or businesses in which all the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory.

Common control business combination are accounted for using the pooling of interests method as follows:

- The assets and liabilities of the combining entities are reflected at their carrying amounts.
- No adjustments are made to reflect fair values, or recognise any new assets or liabilities. Adjustments are only made to harmonise accounting policies.
- The financial information in the financial statements in respect of prior periods is restated as if the business combination had occurred from the beginning of the preceding period in the financial statements, irrespective of the actual date of the combination. However, where the business combination had occurred after that date, the prior period information is restated only from that date.
- The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee or is adjusted against general reserve.
- The identity of the reserves are preserved and the reserves of the transferor become the reserves of the transferee.
- The difference, if any, between the amounts recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves

c) Foreign currencies

Transactions in foreign currencies are initially recorded by the Company at their respective functional currency spot rates at the date the transaction first qualifies for recognition. However, for practical reasons, the Company uses an average rate if the average approximates the actual rate at the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency spot rates of exchange at the reporting date.

Exchange differences arising on the settlement of monetary items or on restatement of the Company's monetary items at rates different from those at which they were initially recorded during the period, or reported in previous financial statements, are recognized as income or as expenses in the period in which they arise.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions.

d) Fair value measurement

The Company measures certain financial instruments such as investments at fair value at each reporting/ balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 — Valuation techniques for which inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 — Valuation techniques for which inputs are unobservable inputs for the asset or liability

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

e) Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured based on the transaction price, which is the consideration, adjusted for allowances, trade discounts, volume rebates, if any, as specified in the contract with the customer. Revenue excludes taxes collected from customers. The Company has concluded that it is the principal in all of its revenue arrangements since it is the primary obligor in all the revenue arrangements as it has pricing latitude and is also exposed to inventory and credit risks.

Goods and Service tax / Service tax is not received by the Company on its own account. Accordingly, it is excluded from revenue.

Contract asset and unbilled receivables

Contract asset represents the Company's right to consideration in exchange for services that the Company has transferred to a customer when that right is conditioned on something other than the passage of time.

When there is unconditional right to receive cash, and only passage of time is required to do invoicing, the same is presented as unbilled receivable.

A contract liability is recognised if a payment is received or a payment is due (whichever is earlier) from a customer before the Company transfers the related goods or services and the Company is under an obligation to provide only the goods or services under the contract. Contract liabilities are recognised as revenue when the Company performs under the contract. (i.e., transfers control of the related goods or services to the customer).

The specific recognition criteria described below must also be met before revenue is recognised.

Revenue from services

Revenue from services is recognised basis music and video content monetised during the month through various publishers (websites).

Revenue from SMS pushes/voice calls

Revenue is recognised after the delivery of SMS pushes/voice calls.

Revenue from Content

Revenue is recognised basis of log records of operators.

Revenue from Digital Services/Social Media

Revenue from social media is recognised based on actual output delivered in a month to the client as per the terms of the RO/email from client/agreement.

Revenue from tuition, examination, content and admission fees: Revenue from tuition, examination and content fees is recognized over the period of the completion of the course offered.

Interest income

Interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss.

f) Taxes

Current income tax

Tax expense is the aggregate amount included in the determination of profit or loss for the period in respect of current tax and deferred tax.

Current income tax is measured at the amount expected to be paid to the tax authorities in accordance with the Income Tax Act, 1961.

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Appendix C to Ind AS 12, Income Taxes dealing with accounting for uncertainty over income tax treatments does not have any material impact on financial statements of the Company.

Deferred tax

Deferred tax is provided considering temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

- In respect of taxable temporary differences associated with investments in subsidiaries and associates, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognized outside profit or loss is recognized outside profit or loss. Deferred tax items are recognized in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

GST / value added taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of sales tax / value added taxes/ goods and service tax paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable
- When receivables and payables are stated with the amount of tax included

The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

g) Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met.

Cost comprises the purchase price, borrowing costs (if any) if capitalization criteria are met and any directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Recognition:

The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if:

- a) it is probable that future economic benefits associated with the item will flow to the entity;
and
- b) the cost of the item can be measured reliably.

All other expenses on existing assets, including day-to day- repairs and maintenance expenditure and cost of replacing parts, are charged to the Statement of Profit and Loss for the period during which such expenses are incurred.

Depreciation on property, plant and equipment is provided on a Straight Line Method over its economic useful lives of the assets as follows:

Type of asset	Useful lives estimated by management (Years)
General plant and machinery	3 – 6
Furniture and fixtures	2-10
Leasehold improvements	amortized over the lease period

The Company, based on technical assessment made by the management every year, depreciates certain plant and machinery over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

Property, Plant and Equipment which are added/disposed off during the year, depreciation is provided on pro-rata basis with reference to the month of addition/deletion.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

Subsequent expenditure can be capitalised only if it is probable that future economic benefits associated with the expenditure will flow to the company.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

h) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

The useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the Statement of Profit and Loss.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually either individually or at the cash generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the income statement when the asset is derecognized.

Intangible assets with finite lives are amortised on straight line basis using the estimated life as follows:

Intangible Assets	Useful Life (in Years)
Software Licenses	6

i) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

j) Impairment of non-financial assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable

amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded Company's or other available fair value indicators.

The Company bases its impairment calculation on detailed budgets and forecast calculations, which are prepared separately for each of the Company's CGUs to which the individual assets are allocated. These budgets and forecast calculations generally cover a period of five years. For longer periods, a long-term growth rate is calculated and applied to project future cash flows after the fifth year. To estimate cash flow projections beyond periods covered by the most recent budgets/forecasts, the Company extrapolates cash flow projections in the budget using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. In any case, this growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is used.

Impairment losses of continuing operations, including impairment on inventories, are recognised in the statement of profit and loss.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the Company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the Statement of Profit or Loss unless the asset is carried at a revalued amount, in which case, the reversal is treated as a revaluation increase.

Intangible assets with indefinite useful lives are tested for impairment annually at the CGU level, as appropriate, and when circumstances indicate that the carrying value may be impaired.

k) Employee benefits

Short term employee benefits and defined contribution plans:

All employee benefits payable/available within twelve months of rendering the service are classified as short-term employee benefits. Benefits such as salaries, wages and bonus etc. are recognised in the statement of profit and loss in the period in which the employee renders the related service.

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The

Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability after deducting the contribution already paid. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset to the extent that the pre-payment will lead to, for example, a reduction in future payment or a cash refund.

Gratuity

Gratuity is a defined benefit scheme. The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method.

Re-measurements, comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the balance sheet with a corresponding debit or credit to retained s through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring cost

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset.

The Company recognises the following changes in the net defined benefit obligation as an expense in the Statement of profit and loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements; and
- Net interest expense or income

Termination benefits

Termination benefits are payable when employment is terminated by the company before the normal retirement date. The Company recognises termination benefits at the earlier of the following dates: (a) when the Company can no longer withdraw the offer of those benefits; and (b) when the Company recognises costs for a restructuring that is within the scope of Ind AS 37 and involves the payment of terminations benefits. Benefits falling due more than 12 months after the end of the reporting period are discounted to present value.

Compensated Absences

Accumulated leave, which is expected to be utilized within the next 12 months, is treated as short term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats leaves expected to be carried forward for measurement purposes. Such compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the year end. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred. The Company presents the entire leave as a current liability in the balance sheet, since it does not have an unconditional right to defer its settlement for 12 months after the reporting date. Where Company has the unconditional legal and contractual right to defer the settlement for a period beyond 12 months, the same is presented as non- current liability.

I) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial assets

Initial recognition and measurement

All financial assets (Other than trade receivable which is recognised at transaction price as per Ind AS 115) are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

Equity investments

All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading and contingent consideration recognised by an acquirer in a business combination to which Ind-AS 103 applies are Ind-AS classified as at FVTPL. For all other equity instruments, the Company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value. The Company makes such election on an instrument-by-instrument basis. The classification is made on Initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the OCI. There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Profit and loss.

Subsequent measurement

For purposes of subsequent measurement, Debt instruments are measured at amortised cost.

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the profit or loss. The losses arising from impairment are recognised in the profit or loss. This category generally applies to trade and other receivables.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a Company of similar financial assets) is primarily derecognised (i.e. removed from the Company's balance sheet) when:

- The rights to receive cash flows from the asset have expired, or
- The Company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Company continues to recognise the transferred asset to the extent of the Company continuing involvement. In that case, the Company also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

In accordance with Ind-AS 109, the Company applies expected credit loss (ECL) model for measurement and recognition of impairment loss on the following financial assets and credit risk exposure:

- a) Financial assets that are debt instruments, and are measured at amortised cost e.g. loans, debt securities, deposits, trade receivables and bank balance
- b) Trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind-AS 115 (referred to as 'contractual revenue receivables' in these financial statements).

The Company follows 'simplified approach' for recognition of impairment loss allowance on:

- Trade receivables or unbilled receivables;

The application of simplified approach does not require the Company to track changes in credit risk. Rather, it recognises impairment loss allowance based on lifetime ECLs at each reporting date, right from its initial recognition.

For recognition of impairment loss on other financial assets and risk exposure, the Company determines that whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognising impairment loss allowance based on 12-month ECL.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial instrument. The 12-month ECL is a portion of the lifetime ECL which results from default events that are possible within 12 months after the reporting date.

As a practical expedient, the Company uses a provision matrix to determine impairment loss allowance on portfolio of its trade receivables. The provision matrix is based on its historically observed default rates over the expected life of the trade receivables and is adjusted for

forward-looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

ECL impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the statement of profit and loss. This amount is reflected under the head 'other expenses' in the Profit and Loss. The balance sheet presentation for various financial instruments is described below:

[
Financial assets measured as at amortised cost, contractual revenue receivables and lease receivables: ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount. For assessing increase in credit risk and impairment loss, the Company combines financial instruments on the basis of shared credit risk characteristics with the objective of facilitating an analysis that is designed to enable significant increases in credit risk to be identified on a timely basis.

The Company does not have any purchased or originated credit-impaired (POCI) financial assets, i.e., financial assets which are credit impaired on purchase/ origination.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, as appropriate. All financial liabilities are recognised initially at fair value and, in the case of and payables, net of directly attributable transaction costs.

The Company's financial liabilities mainly include trade and other payables.

Subsequent measurement

Trade and other payables are subsequently measured at amortised cost using the effective interest method.

De-recognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit or Loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

m) Leases

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The Company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in statement of profit and loss.

The Company has elected not to apply the requirements of Ind AS 116 to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognised as an expense on a straight-line basis over the lease term.

As a practical expedient a lessee (the company) has elected, by class of underlying asset, not to separate lease components from any associated non-lease components. A lessee (the company) accounts for the lease component and the associated non-lease components as a single lease component.

Company as a lessor

At the inception of the lease the Company classifies each of its leases as either an operating lease or a finance lease. The Company recognises lease payments received under operating leases as income on a straight- line basis over the lease term. In case of a finance lease, finance income is recognised over the lease term based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the lease.

n) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalent consists of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

Cash flows from operating activities are being prepared as per the Indirect method mentioned in Ind AS 7.

o) Measurement of EBITDA

The Company has elected to present earnings before interest, tax, depreciation and amortization (EBITDA) as a separate line item on the face of the statement of profit and loss. The company measures EBITDA on the basis of profit/ (loss) from continuing operations. In its measurement, the Company does not include depreciation and amortization expense, finance costs and tax expense.

p) Contingent Liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. Contingent assets are only disclosed when it is probable that the economic benefits will flow to the entity.

q) Earnings Per Share

Basic earnings per share

Basic earnings per share are calculated by dividing:

- the profit attributable to equity holders of the Company
- by the weighted average number of equity shares outstanding during the financial period, adjusted for bonus elements in equity shares issued during the period and excluding treasury shares.

Diluted earnings per share

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account:

- The after income tax effect of interest and other financing costs associated with dilutive potential equity shares, and
- The weighted average number of additional equity shares that would have been outstanding assuming the conversion of all dilutive potential equity shares.

r) Equity-settled transactions

The cost of equity-settled transactions is determined by the fair value at the date when the grant is made using an appropriate valuation model. The Company has availed option under Ind-AS 101, to apply intrinsic value method to the options already vested before the date of transition and applied Ind-AS 102 Share-based payment to equity instruments that remain unvested as of transition date.

That cost is recognised, together with a corresponding increase in share-based payment (SBP) reserves in equity, over the period in which the performance and/or service conditions are fulfilled in employee benefits expense. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest. The Statement of Profit and Loss expense or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period and is recognised in employee benefits expense.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Company's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

No expense is recognised for awards that do not ultimately vest because non-market performance and/or service conditions have not been met. Where awards include a market or non-vesting condition, the transactions are treated as vested irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

When the terms of an equity-settled award are modified, the minimum expense recognised is the expense had the terms had not been modified, if the original terms of the award are met. An additional expense is recognised for any modification that increases the total fair value of the share-based payment transaction, or is otherwise beneficial to the employee as measured at the date of modification. Where an award is cancelled by the entity or by the counterparty, any remaining element of the fair value of the award is expensed immediately through profit or loss.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of diluted earnings per share.

2.3 Significant accounting judgments, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The areas involving critical estimates or judgment are as below:**Taxes**

Uncertainties exist with respect to the interpretation of complex tax regulations, changes in tax laws, and the amount and timing of future taxable income. Given the wide range of business relationships and the long-term nature and complexity of existing contractual

agreements, differences arising between the actual results and the assumptions made, or future changes to such assumptions, could necessitate future adjustments to tax income and expense already recorded. The Company establishes provisions, based on reasonable estimates. The amount of such provisions is based on various factors, such as experience of previous tax assessments and differing interpretations of tax regulations by the taxable entity and the responsible tax authority. Such differences of interpretation may arise on a wide variety of issues depending on the conditions prevailing in the respective domicile of the Companies.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Share Based Payment

The Company measures the cost of equity-settled transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

Defined benefit plans

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

The mortality rate is based on publicly available mortality tables for the specific countries. Those mortality tables tend to change only at interval in response to demographic changes. Future salary increases and gratuity increases are based on expected future inflation rates for the respective countries.

Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the DCF model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Impairment of Non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent markets transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

1. The certificate is issued in accordance with the terms of our engagement letter dated 8 February 2021 and addendum to the engagement letter dated 22 April 2021.
2. HT Media Limited (hereinafter referred to as "the Company" or "the Transferee Company" / "HTML"), and Next Mediaworks Limited, Digicontent Limited and HT Mobile Solutions Limited (hereinafter collectively referred to as the "transferor companies") propose to enter into a Scheme of Amalgamation, where the transferor companies will be transferred to and be vested in HTML, as a going concern, without any further deed or act, together with all the properties, assets, rights, liabilities, benefits and interests therein ("Proposed Scheme"). The Proposed Scheme has been approved by Board of Directors of HTML and each of the transferor companies, respectively, on 11 February 2021 and is subject to approval of the respective Shareholders and Creditors of HTML and transferor companies, National Company Law Tribunal and Statutory and Regulatory Authorities, as applicable.

However, as per Section 232(6) of the Companies Act, 2013, the Proposed Scheme has to provide for the appointed date from which the Proposed Scheme shall be deemed to be effective. The Company has accordingly proposed the appointed date as 1 April 2020.

In our view read with the above, the accounting treatment proposed in Para 10 of Part E of Section D of the Proposed Scheme and as reproduced in Annexure 1 to this certificate, initialled and stamped for identification purposes, is in compliance with Ind AS 103 i.e. the Accounting Standards prescribed under section 133 of the Companies Act, 2013 and SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 and circulars issued there under. This certificate is being issued in response to a query from the Bombay Stock Exchange as received by the Company and in lieu of our original certificate dated 11 February 2021.
