Subject: Technical snag in CPP Switchyard and connected State Grid.

Dear Sir,

NALCO is having a Captive Power Plant (CPP) of 10x120 MW capacity, which provides uninterrupted power supply to its Smelter for Aluminium production. Due to technical snag in CPP Switchyard and connected State Grid, CPP faced a blackout situation on three occasions in 48 hours from 30th September, 2020 to 02nd October, 2020. This had an impact on Smelter Potline operations, which was promptly tackled and normalcy was restored, isolating out-lived non-performing pots.

This is for your information and record in compliance of Regulation 30 of the SEBI (LODR) Regulations, 2015.

Yours faithfully,
For **National Aluminium Co. Ltd.**
