COVID-19 Pandemic Situation- Update on Operations

A. Impact on the business

The lockdowns and restrictions imposed on various activities due to COVID – 19 pandemic have posed challenges on all the business operations of the Company. The Company's operations were hit substantially from 25th March 2020 till the 22nd May 2020, when lockdown was gradually lifted. Manufacturing facilities (factory), Branch Office and admin office were fully shut during such period.

B. Ability to maintain operations including the factories/units/office spaces functioning and closed down

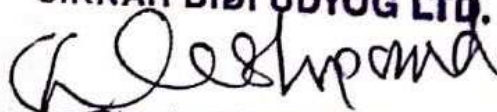

As stated earlier, manufacturing facilities, branch and admin office were shut down entirely during the lockdown phase as the Company does not deal in essential goods or services. However the Company adopted the work from home policy during the entire duration of the lockdown.

C. Schedule, if any, for restarting the operations and steps taken to ensure smooth functioning of operations

With the lifting of the lockdown restrictions, the Company has started manufacturing activities from 23rd May, 2020. However production ramp up will be based on current inventory levels and the Company's estimate of demand. In the short term, it is therefore expected that manufacturing activity will be below the normal.

In order to ensure smooth functioning of operations at working places the Company has put in place strict monitoring process for CoVID-19 precaution. The company has also provided facilities to its employees to work from home.

D. Estimation of the future impact of CoVID-19 on its operations

The Company is not in a position to quantify the impact on operations but expects normalcy to be achieved only after a quarter. Customer sentiment pointing to reduced spends on discretionary items might impact demand for the Company's product. The drop in sales is also expected to impact profitability in the near term.

E. Impact of COVID-19 on capital and financial resources, profitability, liquidity position, ability to service debt, assets and internal financial reporting and control and Supply Chain

The Company has kept on hold payment of its loan instalments due to liquidity tightness. However the Company does not foresee any liquidity challenges to meet its supplier obligations.

The Company does not see incremental risk to recoverability of assets (Inventories, investments, Receivables, etc.). There is also no impact on internal financial controls due to the COVID-19 situation.

There is minimum disruption in the supply chain as most of the vendors have re-started their operations and are ready to provide required supplies.

Although, it is not yet possible to ascertain the actual impact on profitability, both qualitatively and quantitatively yet the business of the Company is significantly impacted due to the lockdown. Simultaneously, the Company continued to incur fixed expenses which would impact the profitability of the Company.

F. Existing contracts/agreements where non-fulfilment of the obligations by any party will have significant impact on the listed entity's business

The Company is well positioned to fulfil its obligations and also does not foresee any significant impact on the business due to non-fulfilment of the obligations by any party.
