5. Sources of Information

For the purpose of valuation exercise, I have relied upon the following sources of information as provided to me by the management of the company:

- (b) Unaudited Financial Statements of PSL for the period year June 30, 2021
- (c) Management certified consolidated financial projections of ASPL for the period October 1, 2021 to March 31, 2028
- (d) Draft scheme of amalgamation between the companies

- (f) Such other information and explanations as I have required and which has been provided by the Management
- (g) Research websites such as investing.com, Capital IQ and Stern NYU

The Management has been provided with the opportunity to review the Draft Report (excluding the recommended Share Swap Ratio) as a part of my standard practice to make sure that factual inaccuracies/omissions are avoided in my final report.

6. Valuation Base

As per Indian Valuation Standard 102 issued by The Institute of Chartered Accountants of India, Valuation Base means the indication of the type of value being used in engagement. In this engagement, Fair Value as determined shall be considered as the valuation base.

7. Valuation Approach and Date

- i. The valuation exercise involves selecting a method suitable for the purpose of valuation, by the exercise of judgment by the valuer, based on the facts and circumstances as applicable to the business of the company to be valued.
- ii. As mentioned earlier, the present valuation exercise is being undertaken in order to derive the fair share swap ratio for the purpose of the amalgamation of ASPL and RRPL with PSL.
- iii. Management of the companies have represented that considering the regulatory requirement, the share swap ratio is to be carried out as on September 28, 2021 ("Valuation Date").

8. Valuation Methodology

- i. Valuation by its very nature, cannot be regarded as an exact science and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgment. Given the same set of facts and using the same assumptions, expert opinions may differ due to the number of separate judgment decisions. There can, therefore, be no standard formulae to establish an indisputable value, although certain formulae are helpful in assessing reasonableness. The International Accounting Standard Board (IASB), which is the independent standard setting body of the IFRS Foundation, has set out two internationally accepted valuation methodologies for arriving at the fair value of a share namely, the income approach and the market approach.

- ii. For the purpose of determining fair value, a valuer may, therefore, use any of the approaches as per the generally / internationally accepted valuation methodologies which in its opinion are most appropriate based on the facts of each valuation.
- iii. The internationally / generally accepted valuation methodologies have been discussed hereinafter, along with the reasons for the choice of approach used based on the facts of the company.

(A) Market Approach

Under this approach the valuation is done on the basis of the quoted market price of the company in case it is a publicly-traded company, or publicly traded comparable businesses / date is reviewed in order to identify a peer group similar to the subject company and then their multiples are applied to the entity being valued to determine the fair value. Usually under the market-based approach, the methods that may be applied are:

Market Price ("MP") Method

Under this method, the market price of an equity shares of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded. The market value generally reflects the investors' perception about the true worth of the company.

Comparable Companies Multiple ("CCM") Method

This valuation approach is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. The value is determined on the basis of multiples derived from valuations of comparable companies, as manifest in the stock market valuations of listed companies. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

(B) Asset Approach

Under this approach, the book value / replaceable value / realizable value of the underlying assets of the company is determined to arrive at the value of the business, depending on the facts and circumstances applicable to a company. Usually, under the asset-based approach, the methods that maybe applied are Net Book Value Method, Net Replaceable Value, Net Realizable Value.

(C) Income Approach

Usually, under the Income-Based Approach, the methods that maybe applied are Discounted Cash Flow (DCF) Method or the Price Earning Capacity Value (PECV) Method.

Under DCF approach, the future free cash flows of the business are discounted to the valuation

date to arrive at the present value of the cash flows of the business or capitalized using a discount rate depending on the capital structure of the company. This approach also takes into account the value of the business in perpetuity by the calculation of terminal value using the exit multiple method or the perpetuity growth method, whichever is appropriate.

Under PECV method, the average earning on the basis of the past 3-5 year are first determined, adjustments are then made for any exceptional transactions or items of non- recurring nature. The adjusted average earnings are then capitalized at an appropriate rate to arrive at the value of business. The capitalization rate so factored has to be decided depending upon various factors such as the earning trend in the industries, P/E prevailing in the industries etc. After this, the normalized earnings are then capitalized at an appropriate discount rate.

9. Recommendation of Fair Share Swap Ratio for the proposed scheme of amalgamation

- i. My exercise is to work out the relative value of shares to facilitate the determination of a fair share swap ratio.
- ii. In order to consider reasonable methods for the valuation exercise, I have referred the Securities and Exchange Board of India (Issue of Capital and Disclosure Requirements) Regulation 2018 as amended from time to time ('ICDR Regulations') and the specific information/explanations. I have considered the following respective methods for the valuation:
 - **PSL: Valuation of Equity Shares of INR 5/- each, fully paid.**
 - i. The issuance of shares under schemes in case of allotment of shares only to a select group of shareholders or shareholders of unlisted companies pursuant to such schemes shall follow the pricing provisions of Chapter V of SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2018, as amended from time to time (hereinafter referred to as "the ICDR Regulations")¹.
 - ii. The equity shares of PSL are traded on BSE and NSE. As per definition provided under Regulation 164 (5) of SEBI (Issue of Capital and Disclosure Requirements) Regulations 2018 the shares of PSL are frequently traded shares.
 - iii. Regulation 164(1) states the price of the equity shares shall be not less than higher of the following -
 - (a) Average of the weekly high and low of the volume weighted average price during the 26 weeks preceding September 29, 2021; or
 - (b) Average of weekly high and low of the volume weighted average price during the 2 weeks preceding September 29, 2021.

¹ SEBI Circulars CFD/DIL3/CIR/2017/21 dated March 10, 2017 and CFD/DIL3/CIR/2017/26 dated March 23, 2017) read with SEBI Master Circular SEBI/HO/CFD/DIL1/CIR/P/2020/249 dated 22-12-2020

- iv. The Regulation 164 specifies the minimum price for issue of shares on a preferential basis. The Pricing Formula provided in Regulation 164 (1) has been considered for arriving at the value per equity share of PSL under the Market Price Method.
- v. I have also considered EV/EBITDA trailing multiples of certain comparable companies of PSL engaged in the similar businesses to compute the Value per equity share using Comparable Companies Method.
- vi. Considering the foregoing, Market Price Method and Comparable Companies Method under the Market Approach has been considered and equal weights have been applied for valuation of equity shares of PSL. The value so determined is exceeding the minimum price prescribed under regulation 164. In view of this value so determined is in compliant with the pricing provisions of Chapter V of the ICDR Regulations.
- vii. The Asset Approach does not reflect the intrinsic value of the business in a going concern scenario. Further, since PSL is a listed company on NSE and BSE, information related to future profitability is price sensitive in nature and hence the management has not provided us with the projected financial statements of PSL. In view of this, I have not considered Income approach and Asset approach for valuation of equity shares of PSL.

• **ASPL: Valuation of equity shares of ASPL**

- i. RRPL is wholly owned subsidiary of ASPL and thus no separate valuation is done for RRPL but instead consolidated financials were adopted for ASPL to arrive at the consolidated value.
- ii. The Asset Approach does not reflect the intrinsic value of the business in a going concern scenario. Therefore, I have not considered Asset approach for the valuation of ASPL & RRPL.
- iii. The management has provided consolidated projections of ASPL and the same has been considered for valuation to arrive at value based on the Discounted Cash Flow method. The management is of the view that it will take about 7 years to achieve normalized growth, and thus for this reason, for the purpose of valuation projected financials for 7 years have been considered. Additionally, cost of equity has been arrived through widely accepted CAPM methodology adjusted for company specific circumstances.
- iv. Comparable Companies Multiple Method ('CCM') has been considered for the valuation of ASPL, based on the peer companies as identified.
- v. Further weightage of 60% has been considered for Income Approach as it captures the entire growth prospects of the company appropriately. Multiples based market approach has been assigned weightage of 40% given that fact that it is based on historic fundamentals of the company.
- vi. Valuation through CCM approach is determined for minority holding. Since, post-merger the Transferee Company shall gain complete control on the business operations of the transferor, additional control premium of 20% has been considered.

10. Conclusion

The fair share swap ratio has been arrived at on the basis of relative valuation of the Transferor & Transferee Companies based on the approach/method explained herein earlier and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of the Companies, having regard to the information bases, key underlying assumptions and limitations. For this purpose, I have assigned appropriate weights to the values arrived at under each approach/method.

In the ultimate analysis, the valuation will have to involve the exercise of judicious discretion and judgment taking into account all the relevant factors. There will always be several factors. E.g. present and prospective competition, yield on comparable securities and market sentiments, etc. which are not evident from the face of balance sheets but which will strongly influence the worth of a share. This concept is also recognised in judicial decisions. For example, Viscount Simon Bd in Gold Coast Selection Trust Ltd. vs. Humphrey reported in 30 TC 2019 (House of Lords) and quoted with approval by the Supreme Court of India in the case reported in 176 ITR 417 as under:

"If the asset takes the form of fully paid shares, the valuation will take into account not only the terms of agreement but a number of other factors, such as prospective yield, marketability, the general outlook for the type of business of the company which has allotted the share, the result of a contemporary prospectus offering similar shares for subscription, the capital position of the company, so forth. There may also be an element of value in the fact that the holding of the shares gives control of the company. If the asset is difficult to value, but is nonetheless of a money value, the best valuation possible must be made. Valuation is art, not an exact science. Mathematical certainty is not demanded nor indeed is it possible."

PSL holds 90.48% of the issued share capital of ASPL and since ASPL holds 100% of share capital of RRPL, Equity Shares of INR 5/- each of PSL will be issued only to minority shareholders of ASPL other than PSL. In light of the above and on consideration of all the relevant factors and circumstances as discussed and outlined hereinabove earlier in this report, in my opinion, a recommended share swap ratio would be as under -

- **To the external shareholders of ASPL – Swap ratio – 5.68:1 or 568 : 100**
568 Equity Shares of INR 5/- each, Fully paid up of PSL to be issued to the external shareholders of ASPL for every 100 shares of ASPL.

The Report assumes that the Companies comply fully with relevant laws and regulations applicable in all its area of operations unless otherwise states, and the Companies will be managed in a competent and responsible manner. Further, except as specifically stated to the contrary, this valuation Report has given no consideration to matters of a legal nature, including issues of legal title and compliance with local laws, and litigation and other contingent liabilities that are not recorded in the financial statements of the Companies.

This conclusion is subject to the Statement of Assumptions and Limiting Conditions stated in Annexure-II. I have no obligation to update this report or my conclusion of value for information that comes to my attention after the date of this report.

In accordance with my standard practice, the Management has been provided with an opportunity to review factual information in my draft Certificate to ensure that factual inaccuracies, omissions etc. are avoided in my final Certificate. I state that I am independent of the shareholders, directors and management of PSL, ASPL and RRPL and do not have any financial association with the shareholders, directors and management of PSL, ASPL and RRPL other than receipt of fees in connection with the professional services provided. My fee for the engagement is not contingent upon the results reported.

Accordingly, I express no audit opinion or any other form of assurance on this information.
4. I do not provide assurance on the achievability of the results forecast by the management/owners as events and circumstances do not occur as expected; differences between actual and expected results may be material. I express no opinion as to how closely the actual results will correspond to those projected/forecast as the achievement of the forecast results is dependent on actions, plans and assumptions of management.
5. The valuation of companies and assets is made based on the available facts and circumstances and the conclusions arrived at in many cases will be subjective and dependent on the exercise of individual judgment. Although every scientific method has been employed in systematically arriving at the value, there is no indisputable single value and the estimate of the value is normally expressed as falling within a likely range. To comply with the client's request, I have provided a single value for the overall purpose of this report. Whilst, I consider the valuation to be both reasonable and defensible based on the information available, others may place a different value.
6. The client and its management/representatives warranted to me that the information they supplied was complete, accurate and true and correct to the best of their knowledge. I have relied upon the representations of the clients, their management and other third parties concerning the financial data, operational data and maintenance schedule of all plant-machinery-equipment-tools-vehicles, real estate investments and any other investments in tangible assets except as specifically stated to the contrary in the report. I shall not be liable for any loss, damages, cost or expenses arising from fraudulent acts, misrepresentations, or wilful default on part of the companies, their directors, employee or agents.
7. I have relied on data from external sources also to conclude the valuation. These sources are believed to be reliable and therefore, I assume no liability for the truth or accuracy of any data, opinions or

estimates furnished by others that have been used in this analysis. Where I have relied on data, opinions or estimates from external sources, reasonable care has been taken to ensure that such data has been correctly extracted from those sources and /or reproduced in its proper form and context.

8. Further, as specifically stated to the contrary, this report has given no consideration to matters of a legal nature, including issues of legal title and compliance with local laws, and litigations and other contingent liabilities that are not recorded/reflected in the balance sheet/fixed assets register provided to us.
9. The valuation report is tempered by the exercise of judicious discretion by the valuers, taking into account the relevant factors. There will always be several factors, e.g. management capability, present and prospective competition, yield on comparable securities, market sentiment, etc. which may not be apparent from the Balance Sheet but could strongly influence the value.
10. I am fully aware that based on the opinion of value expressed in this report, I may be required to give testimony or attend court / judicial proceedings with regard to the subject assets, although it is out of scope of the assignment, unless specific arrangements to do so have been made in advance, or as otherwise required by law. In such event, the party seeking my evidence in the proceedings shall bear the cost/professional fee of attending court / judicial proceedings and tendering evidence before such authority shall be under the applicable laws.
11. While my work has involved an analysis of financial information and accounting records, my engagement does not include an audit in accordance with generally accepted auditing standards of the client existing business records. Accordingly, I assume no responsibility and make no representations with respect to the accuracy or completeness of any information provided by and on behalf of you and the client. My report is subject to the scope and limitations detailed hereinafter. As such the report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein and in the context of the purpose for which it is made.
12. The actual market price achieved may be higher or lower than my estimate of value depending upon the circumstances of the transaction (for example the competitive bidding environment), the nature of the business (for example the purchaser's perception of potential synergies). The knowledge, negotiating ability and motivation of the buyers and sellers and the applicability of a discount or premium for control will also affect actual market price achieved. Accordingly, my valuation conclusion will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree. I also emphasize that my opinion is not the only factor that should be considered by the parties in agreeing the transaction price.
13. An analysis of such nature is necessarily based on the prevailing stock market, financial, economic and other conditions in general and industry trends in particular as in effect on, and the information made available to me as of, the date hereof. Events occurring after the date hereof may affect this report and the assumptions used in preparing it, and I do not assume any obligation to update, revise or reaffirm this Report.

For the purpose of providing our opinion, we have reviewed:

1. Certain publicly available business and financial information relating to Transferor and Transferee Company.

5.2 Assumptions and Limiting Conditions

ARIHANT has been engaged to provide standard services for the issuance of the Fairness Opinion and therefore have not performed any due diligence or audit of the information provided to us, nor have we made any independent valuation or appraisal of the assets or liabilities. Prataap has provided us with the copy of valuation report done by the Valuers and have asked us to peruse and opine on the said report. Prataap has confirmed that as the issuance of Fairness Opinion is in relation to proposed amalgamation, the said valuers's report may also be reproduced / quoted by us.

ARIHANT has assumed and relied upon the truth, accuracy and completeness of the information, data and financial terms provided to us / Valuers by Prataap, Avadh or their authorized representatives or used by us, and has assumed that the same are factually correct and does not assume or accept any liability or responsibility for any independent verification or checking of such information or any independent valuation or appraisal of any of the assets, operations or liabilities of Transferor Companies and Transferee Company.

In preparing this opinion, ARIHANT has received specific confirmation from management of transferee company and transferor companies that all the information the Company has provided to ARIHANT in relation to the engagement of ARIHANT is correct and complete and no information has been withheld that could have influenced the purport of this Fairness Opinion.

This opinion exclusively focuses on the fairness, from a valuation point of view, of the shares / assets done by the Valuers and does not address any other issues such as the underlying business decision to recommend the transaction or its commercial merits, which are matters solely for the Boards of Directors of Transferee Company and Transferor Companies to address and further to be confirmed by the shareholders of both the companies, as may be required.

It is specifically noted that the Valuer is an independent Valuer registered with IBBI for asset class 'Securities and Financial Assets' and as such possesses requisite qualification, competence and experience to conduct the valuation and is solely responsible for selection of valuation methods and calculations thereunder and the valuer's competence has been fully relied upon. We are required to assess the fairness of the valuation and the resulting swap ratio.

The Opinion assumes that the Companies comply fully with relevant laws and regulations applicable in all its area of operations unless otherwise stated, and the Companies are managed in a competent and responsible manner. Further, except as specifically stated to the contrary, this fairness opinion has given no consideration to matters of a legal nature, including issues of legal title and compliance with local laws,

and litigation and other contingent liabilities that are not recorded in the financial statements of the Companies.

ARIHANT's formation of fairness opinion is based on the Valuation Report, information supplied by Transferee Company and Transferor Companies, representations and confirmations of its management on various issues and we have relied upon them as such without any independent verification and as such we do not hold ourselves liable if our opinion becomes flawed as a result of any shortcomings in such information, representations and confirmations given by Transferee Company and Transferor Companies.

In rendering this opinion, ARIHANT has not provided legal, regulatory, tax, accounting or actuarial advice and accordingly ARIHANT does not assume any responsibility or liability in respect thereof. Furthermore, ARIHANT has assumed that the proposed transaction will be consummated on the terms and conditions as set out in the proposed Scheme of Amalgamation, without any material changes to, or waiver of, its terms or conditions.

6. Valuation Approaches and their Review

6.1. Overview

The formation of a fairness opinion is generally a complex process involving careful consideration and review of valuation methods, associated financial and other analyses performed by the Valuers. ARIHANT has made a qualitative assessment of the appropriateness of the method and subsequent application.

6.2 Valuation

ARIHANT has reviewed the method of valuation adopted by the Valuers. The valuation analysis is focused on Valuer's assessment of Avadh's equity shares and Equity shares of Prataap.

In the Present case, the Transferor companies are private companies. Red Rotopack private limited is a wholly owned subsidiary of Avadh snacks private limited and hence Red Rotopack is not separately valued, instead Avadh snacks private limited is valued on consolidated basis. The valuation of Transferor Company(s) is based on broadly accepted valuation methodologies i.e. a) Income Approach and b) Market Approach. The Valuer has stated that the Asset Approach does not reflect the intrinsic value of the business in a going concern scenario and he has therefore not considered Asset approach for the valuation of ASPL & RRPL.

- a) **Income Approach:** We note that the Valuer has used Discounted Cash Flow (DCF) method under the Income approach to arrive at the equity value of Avadh. DCF is one of the widely acceptable methodologies for valuation of companies in growth phase.
- b) **Market Approach:** Based on the market data available, Valuers have identified few peer companies and accordingly appropriate multiples were assigned to compute the value.

Suitable weights have been assigned to the values derived by the Valuers.

The valuation is being done to amalgamate the transferor and transferee companies and if successful, would result in complete control of the Transferor Company(s) to the Transferee Company. In such a case, suitable control premium may be applied to the equity value arrived, which is for a non-controlling stake. Considering the same, Valuers have assigned a control premium of 20% to arrive at the equity value of the Company.

6.3 Analysis of the Valuation

While forming our opinion, we performed certain procedures and made certain enquiries with Transferee company and Transferor companies. Some of the procedures / activities performed and the findings are mentioned below:

- Noted that the scheme involves amalgamation of Avadh and Red rotopack with and into Prataap and upon implementation will lead to dissolution without winding up of the Transferor companies.
- Noted that the appointed date for the proposed scheme of Amalgamation is April 1, 2021 and the valuation of Avadh is carried out considering latest available financials as on June 30, 2021.
- Red rotopack is a wholly owned subsidiary of Avadh and hence no separate valuation is done for Red rotopack.
- The valuation of Avadh is based on the broadly accepted valuation methodologies and the approach seems reasonable.
- The consideration of amalgamation is settled through issuance of equity shares of Rs 5 each by Prataap to shareholders of Avadh other than Prataap.
- Shares held by Prataap in Avadh shall be cancelled and extinguished.

7. Opinion

- (b) Amalgamation will result in better integration, financial strength and flexibility for the amalgamated entity, which would result in maximizing overall shareholder value, and will improve the competitive position of the combined entity and reduction in operational costs and increase operational efficiency.
- (c) Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete successfully in an increasingly competitive industry.

Synergies of Business of the entities involved in the Scheme
