Sub: - Press Release – STL powers Europe’s Gigabit ambition, showcases Optical Networking solutions at ANGA COM and FTTH Europe 2022

Ref: - Scrip ID - STLTECH/ Scrip Code – 532374

Dear Sir/Madam,

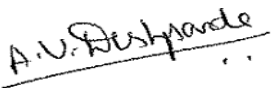

We wish to inform that, the Company will be demonstrating its end-to-end optical networking solutions at prestigious industry events in Europe - ANGA COM in Cologne and FTTH Europe in Vienna.

A copy of the Company’s Press Release in this behalf, is enclosed herewith.

Kindly take the above on record.

Thanking you.

Yours faithfully,
For **Sterlite Technologies Limited**

Amit Deshpande

Corporate General Counsel & Company Secretary (ACS 17551)

Enclosure: As above.

PRESS RELEASE

STL powers Europe's Gigabit ambition, showcases Optical Networking solutions at ANGA COM and FTTH Europe 2022

Cologne, 09 May 2022: [STL](#) [NSE: STLTECH], one of the industry's leading integrators of digital networks, will be demonstrating its end-to-end optical networking solutions at prestigious industry events in Europe - ANGA COM in Cologne and FTTH Europe in Vienna.

Over the past decade, STL has worked closely with European network builders to enable full-fibre digital connectivity, FTTx and 5G initiatives. Through its advanced Optical Fibre cable (OFC) and Optical Interconnect manufacturing set-ups, Metallurgica Bresciana and Optotec in Italy, STL has helped in meeting the fibre demand, expediting fibre rollouts, reducing lead times and overall carbon footprint across Europe and the Middle East.

STL has been able to serve European customers through solutions like [Opticonn](#), its purpose-engineered, end-to-end, 5G-ready optical networking solution. STL has enhanced its Opticonn solution with the acquisition of [Optotec](#) - a Europe based player in Optical Interconnect Products. It offers racks, sub-racks and passive components for central office, closures, cabinets, and pedestals for outside plant, termination boxes and outlet for customer premises.

STL is showcasing its full-fibre [Opticonn](#) solution, especially developed for the needs of the European market at [ANGA COM](#), from May 10-12 at hall 8 booth D22 and [FTTH Europe 2022](#), from May 24-25 at booth P04. [Opticonn](#) comprises optical products and pre-connected integrated systems including:

1. [Stellar fibre](#): One of the world's first G.657.A2 macro-bend insensitive fibre, which is compatible with legacy, networks comprising G.657.A1 and G.652D
2. [Celesta Intelligently Bonded Ribbon Cable](#): a high-density optical fibre cable with a capacity of up to 6,912 optical fibres
3. [Yogalite micromodule cable](#): a cable built on bend-insensitive technology, considerably reduces installation time
4. [Optical interconnect suite](#): a portfolio that includes pre-connectorized Plug and Play Solution for FTTx Opto Blaze terminal and Opto Bolt Drop Cable, Optotec Max closure and Optotec CORC-Ribbon Optimised Splice Closure

Rahul Puri, Regional Head, Europe, STL, said: "Europe is making great strides towards becoming a gigabit economy and optical networking is playing a key role. To support this journey, we will continue to build exciting and innovative optical products for powering digital connectivity and connecting billions. Our [Opticonn](#) product portfolio will support telcos, alternative network providers, and governments in their national broadband plans and will also accelerate fibre-dense 5G rollouts in the region."

About STL - Sterlite Technologies Ltd:

STL is one of the industry's leading integrators of digital networks providing All-in 5G solutions. Our capabilities across optical networking, services, software, and wireless connectivity place us amongst the top optical players in the world. These capabilities are built on converged architectures helping telcos, cloud companies,

citizen networks, and large enterprises deliver next-gen experiences to their customers. STL partners with service providers globally in achieving a green and sustainable digital future in alignment with UN SDG goals. STL has a strong global presence in India, Italy, the UK, the US, China, and Brazil. [Read more](#), [Contact us](#).
