CUTTING IMPORTS Commerce min makes list of 102 items to boost local capacity

PRESS TRUST OF INDIA
New Delhi, November 10

THE COMMERCE MINISTRY has shared a list of as many as 102 products whose imports are high and are increasing consistently — such as coking coal, certain machinery, some chemicals, and digital cameras — to different ministries to look at ways for enhancing their domestic capacity with an aim to reduce imports, an official said.

As part of an exercise to reduce the country's import bill, the ministry has undertaken a detailed analysis of these 102 products for enhancing domestic production opportunities of those items.

According to the analysis, the import of these goods has been consistently increasing or have held high import shares across

the long, medium and short terms. The cumulative share of these items is 57.66% in total imports during the March-August 2021 period.

"These goods have domestic production opportunities," the official said adding that the commerce ministry has suggested different departments and ministries products that are showing high import growth and may be prioritised for immediate interventions to increase local production.

Out of 102, 18 products have both high share and high import growth rates. These include gold, crude palm oil, integrated circuits, personal computers, urea, stainless steel scrap, refined copper, cameras, machines for transmission of voices and images, sunflower seed oil, and phosphoric acid.

Icra sees competition intensifying between Indian and Chinese steel players

PRESS TRUST OF INDIA
New Delhi, November 10

THE COMPETITION BETWEEN Indian and Chinese steel players could intensify at global level, amid subdued steel demand in China, according to Icra.

In China — the largest steel-consuming country — steel-makers could brace for an extended period of weak demand as the economy goes through the process of rebalancing of an overheated property market, which was a key growth engine driving the country's steel demand for the last two decades, the ratings

agency said in its latest report. According to Icra, in 2020-21, China emerged as the single-largest importer of steel from India. However, with the Chinese steel demand growth waning in the current fiscal, the share of steel exports to China by Indian mills has plummeted to just 8% in the first half of the ongoing fiscal from 30% in the preceding financial year.

"As demand dries up back home, a steadily rising trend in Chinese steel exports suggests that competition in the export markets between Indian and Chinese mills could intensify going forward," it said.

Govt seeks bids for new PM office, an 'India House' for foreign meets

ANISHA DUTTA
 NEW DELHI, NOVEMBER 10

THE GOVERNMENT has sought bids for a new four storied building for the Prime Minister's Office, and the offices of the Cabinet Secretariat and the National Security Council Secretariat, along with a new storied 'India House' to be built within 24 months of being awarded. According to the plan, the 'India House' would be used to host meetings with foreign dignitaries.

The existing plots in the South Block where the buildings are proposed to be built will first be demolished, as per the plan.

Work on the new residence and office of the Prime Minister, part of the Central Vista redevelopment project, will go beyond the December 2022 completion target. The Indian Express had reported on November 4. According to the Central Public Works Department (CPWD) timeline, the PM's residence was scheduled to be completed by December 2022. But that is set to change. The plots where the PMO and the Executive Enclave are proposed to be built are currently occupied by Defence establishments.

The CPWD, the nodal agency for the Central Vista redevelopment project, Tuesday sought pre-qualification bids for construction of the Executive Enclave that will house the Prime Minister's Office, India House, Cabinet Secretariat and National Security Council Secretariat, at a cost of Rs 1,171 crore.

"The site is located on the south side of the existing South Block in Plot number 36/38, in high security zone. The existing structures on plot number 36/38 are to be demolished before the start of new construction. The existing boundary wall also needs to be demolished and a new boundary wall shall be constructed as per design and drawings provided by the department," the tender document said.

The proposed office buildings shall be of reinforced cement concrete frame, it noted. "Free transplantation as per the requirement to be done and the existing services, if any, to be diverted. The structure has been designed considering the earthquake zone V," it said.

A spokesperson for HCP, the consultancy firm overlooking the project, had informed The Indian Express that the design for the Prime Minister's office and residence is still in its concept stage. "The broad goal is to provide modern and highly functional facilities at one location, to reduce redundancies of infrastructure, and improve city traffic management," the HCP spokesperson said.
