We are very proud to announce, Innovative Ideals and Services (I) Ltd has signed a contract with Codeplay Labs Pvt Ltd, as their “Exclusive Distributor” in Maharashtra for the product “Innovative -DoorVi”, India’s first AI powered, cloud based Visitor Management System.

Innovative-DoorVi: The AI-Powered Smart Visitor Management System Revolutionizing Secure Access

A Cutting-Edge Alternative to Traditional Systems

Innovative-DoorVi is transforming visitor management with an AI-driven, cloud-based solution that eliminates the need for outdated video door phones and intercom systems. Designed for diverse environments—including hotels, residential complexes, condominiums, multi-family units, single homes (villas), and corporate towers—Innovative-DoorVi seamlessly integrates artificial intelligence to enhance security, communication, and convenience.

Unlike traditional intercoms that require costly infrastructure, hardware maintenance, and offer limited functionality, Innovative-DoorVi leverages AI and smart devices to provide a cost-effective, intelligent, and flexible solution. Through advanced AI capabilities, Innovative-DoorVi ensures predictive security, smart access control, and seamless visitor management, making it the ultimate smart entry system for modern spaces.

AI-Driven Features of Innovative-DoorVi

◆ **AI-Powered Facial Recognition**

- **Smart Access Control:** Innovative-DoorVi’s AI-driven facial recognition enables automatic entry authorisation for recognised visitors, ensuring secure and seamless access.
- **Hassle-Free Entry:** Frequent visitors, such as family members, employees, and delivery personnel, can be identified and granted access instantly, reducing delays and manual approvals.

◆ **Real-Time Video & Audio Calls**

- Residents and staff can communicate with visitors through AI-enhanced video and audio calls, ensuring clear and reliable interactions from anywhere.
- AI-enhanced noise cancellation improves call quality for better visitor communication.

◆ **AI-Powered Predictive Analytics for Visitor Management**

- **Peak Hour Insights:** AI algorithms analyse visitor data to predict high-traffic hours, allowing residents and businesses to schedule security reinforcements proactively.
- **Smart Alerts:** Innovative-DoorVi AI detects unusual visitor patterns and sends real-time security alerts to prevent unauthorised access.

◆ **Remote Access & Approvals**

- Users can grant or deny entry remotely via the AI-powered app, ensuring enhanced security even when they are away from home or the office.
- AI automates approval workflows based on past visitor behaviours and user preferences.

◆ **AI-Powered Chatbots for Visitor Assistance**

- **Virtual Concierge:** AI-driven chatbots assist visitors when the resident is unavailable, providing information or guidance.
- **Smart Guidance:** Automated responses can direct delivery personnel on where to leave packages or whom to contact in the resident's absence.

◆ **Seamless Integration with Smart Home Ecosystem**

- **AI-Powered Smart Locks:** Facial recognition allows auto-unlocking for authorised visitors while ensuring complete security.
- **Smart Home Compatibility:** Works seamlessly with Alexa, Google Assistant, and Apple HomeKit, enhancing automation and security.

◆ **AI-Powered Auto-Response for Missed Calls**

- Automated AI-generated responses assist visitors when residents are unavailable:
 - "I'm not home, please leave the package at the door."
 - "I'll be back in 10 minutes, please wait."

Use Cases

- ◇ **Hotels:** AI streamlines guest check-ins, manages visitor access efficiently, and enhances security without requiring heavy-duty hardware.
 - ◇ **Residential Complexes & Condominiums:** Keeps residents informed and connected with AI-powered visitor notifications and remote access control.
 - ◇ **Multi-Family Units & Villas:** Enhances security for both single and multi-unit homes, allowing homeowners to manage visitors even when away.
 - ◇ **Corporate Towers:** AI simplifies front-desk management, grants access remotely, and improves security compliance with digital visitor logs.
-

Advantages of Innovative-DoorVi Over Traditional Solutions

- ✓ **AI-Powered Security:** Smart facial recognition, predictive analytics, and real-time monitoring eliminate security vulnerabilities.
 - ✓ **Cost-Effective & Scalable:** Eliminates expensive wiring and maintenance of outdated intercom systems.
 - ✓ **Cloud-Based & App-Driven:** Ensures real-time access and control from anywhere with a seamless mobile experience.
 - ✓ **Enhanced Security & Compliance:** Digital visitor logs and AI-driven monitoring ensure regulatory compliance and data transparency.
 - ✓ **Always Connected:** Keeps residents, employees, and security personnel informed at all times.
-

Conclusion

By integrating AI-powered features, Innovative-DoorVi is setting a new benchmark for smart visitor management, combining unparalleled security, automation, and convenience. With advanced cloud technology, predictive analytics, and facial recognition, Innovative-DoorVi eliminates the need for outdated intercoms and embraces a digital-first approach to secure access control.

 **Say goodbye to traditional systems and embrace the AI-driven future of visitor management with Innovative-DoorVi!**
