Range of options to cut debt load, says Biocon

Co had borrowed to buy US firm for \$3.3 bn; Net debt now at \$1.1 billion

Naman Suri & Ranjani Raghavan
NEW DELHI/MUMBAI

Biopharmaceutical firm Biocon Ltd will "remain focused" on reducing its debt taken on to buy the \$3.3 billion generics portfolio of American drugmaker Viatrix, a top executive said.

On 8 February, the company said it had made a prepayment of \$200 million over the preceding quarter, which brought its group-level debt down to \$1.1 billion.

Biocon's net debt rose to \$1.9 billion in December 2022, as it sought funds to complete the mega-transaction for Viatrix.

"The debt levels have been reduced to \$1.1 billion at the group level and while the debt levels are comfortable now, we'd like to perhaps get to a level of three times the multiple of Ebitda (earnings before interest, taxes, depreciation, and amortization)," said Peter Bains, group CEO for Biocon Ltd in an interview with Mint.

Biocon's Ebitda for FY23 stood at ₹2,888 crore—three times that is ₹8,664 crore (₹1.04 billion).

The company has "a range of options" to achieve debt reduction, he said, though it was "unlikely" it would sell equity stake in any of its units.

"We have the potential to generate cash from our business operations, and we've also explored licensing opportunities in the past, which could contribute additional income. Moreover, we could consider financial restructuring regarding our existing debt. There are various options available to address our leverage, and we're open to exploring them to bring about the desired outcomes," he said.

The \$200 million prepayment was made through receivables and out-licensing deals.

The company may also not require cash for capital expenditure as it is coming to the end of its investment cycle.

Biocon said in December 2023 it was in

Biocon's net debt had risen to \$1.9 billion in December 2022, as it sought funds to complete the purchase of American drugmaker Viatrix's generics portfolio.

the middle of a \$500-million capex plan for the generics business, which is currently witnessing a slowdown.

"We are not going forward with that, we are coming towards the end of the investment cycle for the generics business, where we have strengthened capacities and capabilities in both fermentation and APIs," Bains added.

CLEARING ITS DUES

BIOCON "unlikely" to sell stake in any of its units to reduce debt, says group CEO Peter Bains

The biopharma firm said it made a prepayment of \$200 million over the preceding quarter

During the third quarter of the current financial year, the company said revenue from the generics business was down 7% to ₹703 crore.

However, it sees significant growth opportunities in this segment, driven by the investments that it has already made, particularly in the development and manu-

facture of peptides, commonly used in dietary supplements.

"Central to the capex programme in generics is to build the capacities and capabilities of development and manufacturing of peptides, which we still have to complete. We're progressing well in late-stage preparations to bring generic peptides to market, pending regulatory approvals.

This focus on generic peptides, such as GLP 1, is a key driver for growth in our generics segment," he said.

Additionally, the company sees growth potential in its biologics business, revenue from which was 63% during Q3FY24 at ₹2,483 crore.

Biocon on Thursday reported consolidated net profit of ₹690 crore during the third quarter of the current fiscal year, up from the ₹42 crore loss it incurred in the corresponding quarter a year ago. Consolidated revenue came in at ₹3,954 crore, up 34% y-o-y.

L&T, Matrix join energy subsidy scheme

The incentives are part of the ₹17,490-crore Sight scheme. AP

L&T Electrolysers Ltd and Matrix Gas and Renewables Ltd have been awarded subsidies under New Delhi's flagship green hydrogen promotion scheme following a last-minute withdrawal by Jindal India Ltd, a B&C Jindal Group company, said one person familiar with the development.

The decision was taken on Thursday after Jindal India missed the 3 February deadline to furnish bank guarantees required to formally sign up for the scheme, this person said, asking not to be named.

The incentives are part of the ₹17,490-crore Strategic Interventions for Green Hydrogen Transition (Sight) scheme, which grants subsidies to companies for setting up electrolyser manufacturing plants in India.

Jindal India backed out of the scheme after disagreements with its overseas technology partner, according to the person mentioned above. The company did not reply to emailed queries.

L&T Electrolysers has been awarded maximum incentives of ₹444 crore to set up 300 megawatts of annual electrolyser manufacturing capacity. The company had earlier won a lower allocation of 63 MW against its application of 300 MW. L&T received the higher allocation following the withdrawal of Jindal India.

Matrix has been awarded incentives of ₹93 crore to set up 63 MW of annual electrolyser manufacturing capacity.

MNRE and SECI did not immediately reply to queries. L&T and Matrix could not immediately be reached for a comment.

"The recent measures by the Indian government to reallocate resources towards green hydrogen electrolyser manufacturing suggest a growing commitment to developing domestic production capacity in this emerging clean energy sector," said Sanjiv Agarwal, Partner, EY.

"This initiative, if successful, could contribute significantly to India's energy independence and self-sufficiency goals," he said.
