IFGL Refractories Limited

Investor Presentation – Q3FY22
February 2022

*This presentation and the accompanying slides (the “Presentation”), has been prepared by **IFGL Refractories Limited**, solely for information purposes and do not constitute any offer, recommendation or invitation to purchase or subscribe for any securities, and shall not form the basis or be relied on in connection with any contract or binding commitment whatsoever.*

This Presentation has been prepared by the Company based on information and data which the Company considers reliable, but the Company makes no representation or warranty, express or implied, whatsoever, and no reliance shall be placed on, the truth, accuracy, completeness, fairness and reasonableness of the contents of this Presentation. This Presentation may not be all inclusive and may not contain all of the information that you may consider material. Any liability in respect of the contents of, or any omission from, this Presentation is expressly excluded.

Certain matters discussed in this Presentation may contain statements regarding the Company’s market opportunity and business prospects that are individually and collectively forward-looking statements. Such forward-looking statements are not guarantees of future performance and are subject to known and unknown risks, uncertainties and assumptions that are difficult to predict. These risks and uncertainties include, but are not limited to, the performance of the Indian economy and of the economies of various international markets, the performance of the refractories industry in India and world-wide, competition, the company’s ability to successfully implement its strategy, the Company’s future levels of growth and expansion, technological implementation, changes and advancements, changes in revenue, income or cash flows, the Company’s market preferences and its exposure to market risks, as well as other risks. The Company’s actual results, levels of activity, performance or achievements could differ materially and adversely from results expressed in or implied by this Presentation. The Company assumes no obligation to update any forward-looking information contained in this Presentation.

A decorative background consisting of several overlapping, wavy shapes in yellow, light blue, and dark blue, creating a sense of movement and depth.

Industry Overview

➤ Global outlook:

- As per WSA, the current forecast assumes that steel demand will grow by 4.5% in 2021 and reach 1,855.4 Mt after 0.1% growth in 2020. In 2022, steel demand will see a further increase of 2.2% to 1,896.4 Mt.
- The current forecast assumes that, with the progress of vaccinations across the world, the spread of variants of the COVID virus will be less damaging and disruptive than seen in previous waves.

Forecasted Global Short-Term Steel Demand

Steel Demand is expected to grow strongly across all parts of the world in 2021 & 2022

National Infrastructure Pipeline (NIP) Project

National Infrastructure Pipeline Project (NIP)

Government unveiled the multimillion-dollar National Infrastructure Pipeline (NIP), with projects spread across 18 states over the next five years

Investment allocation under NIP

\$5 Trillion Economy

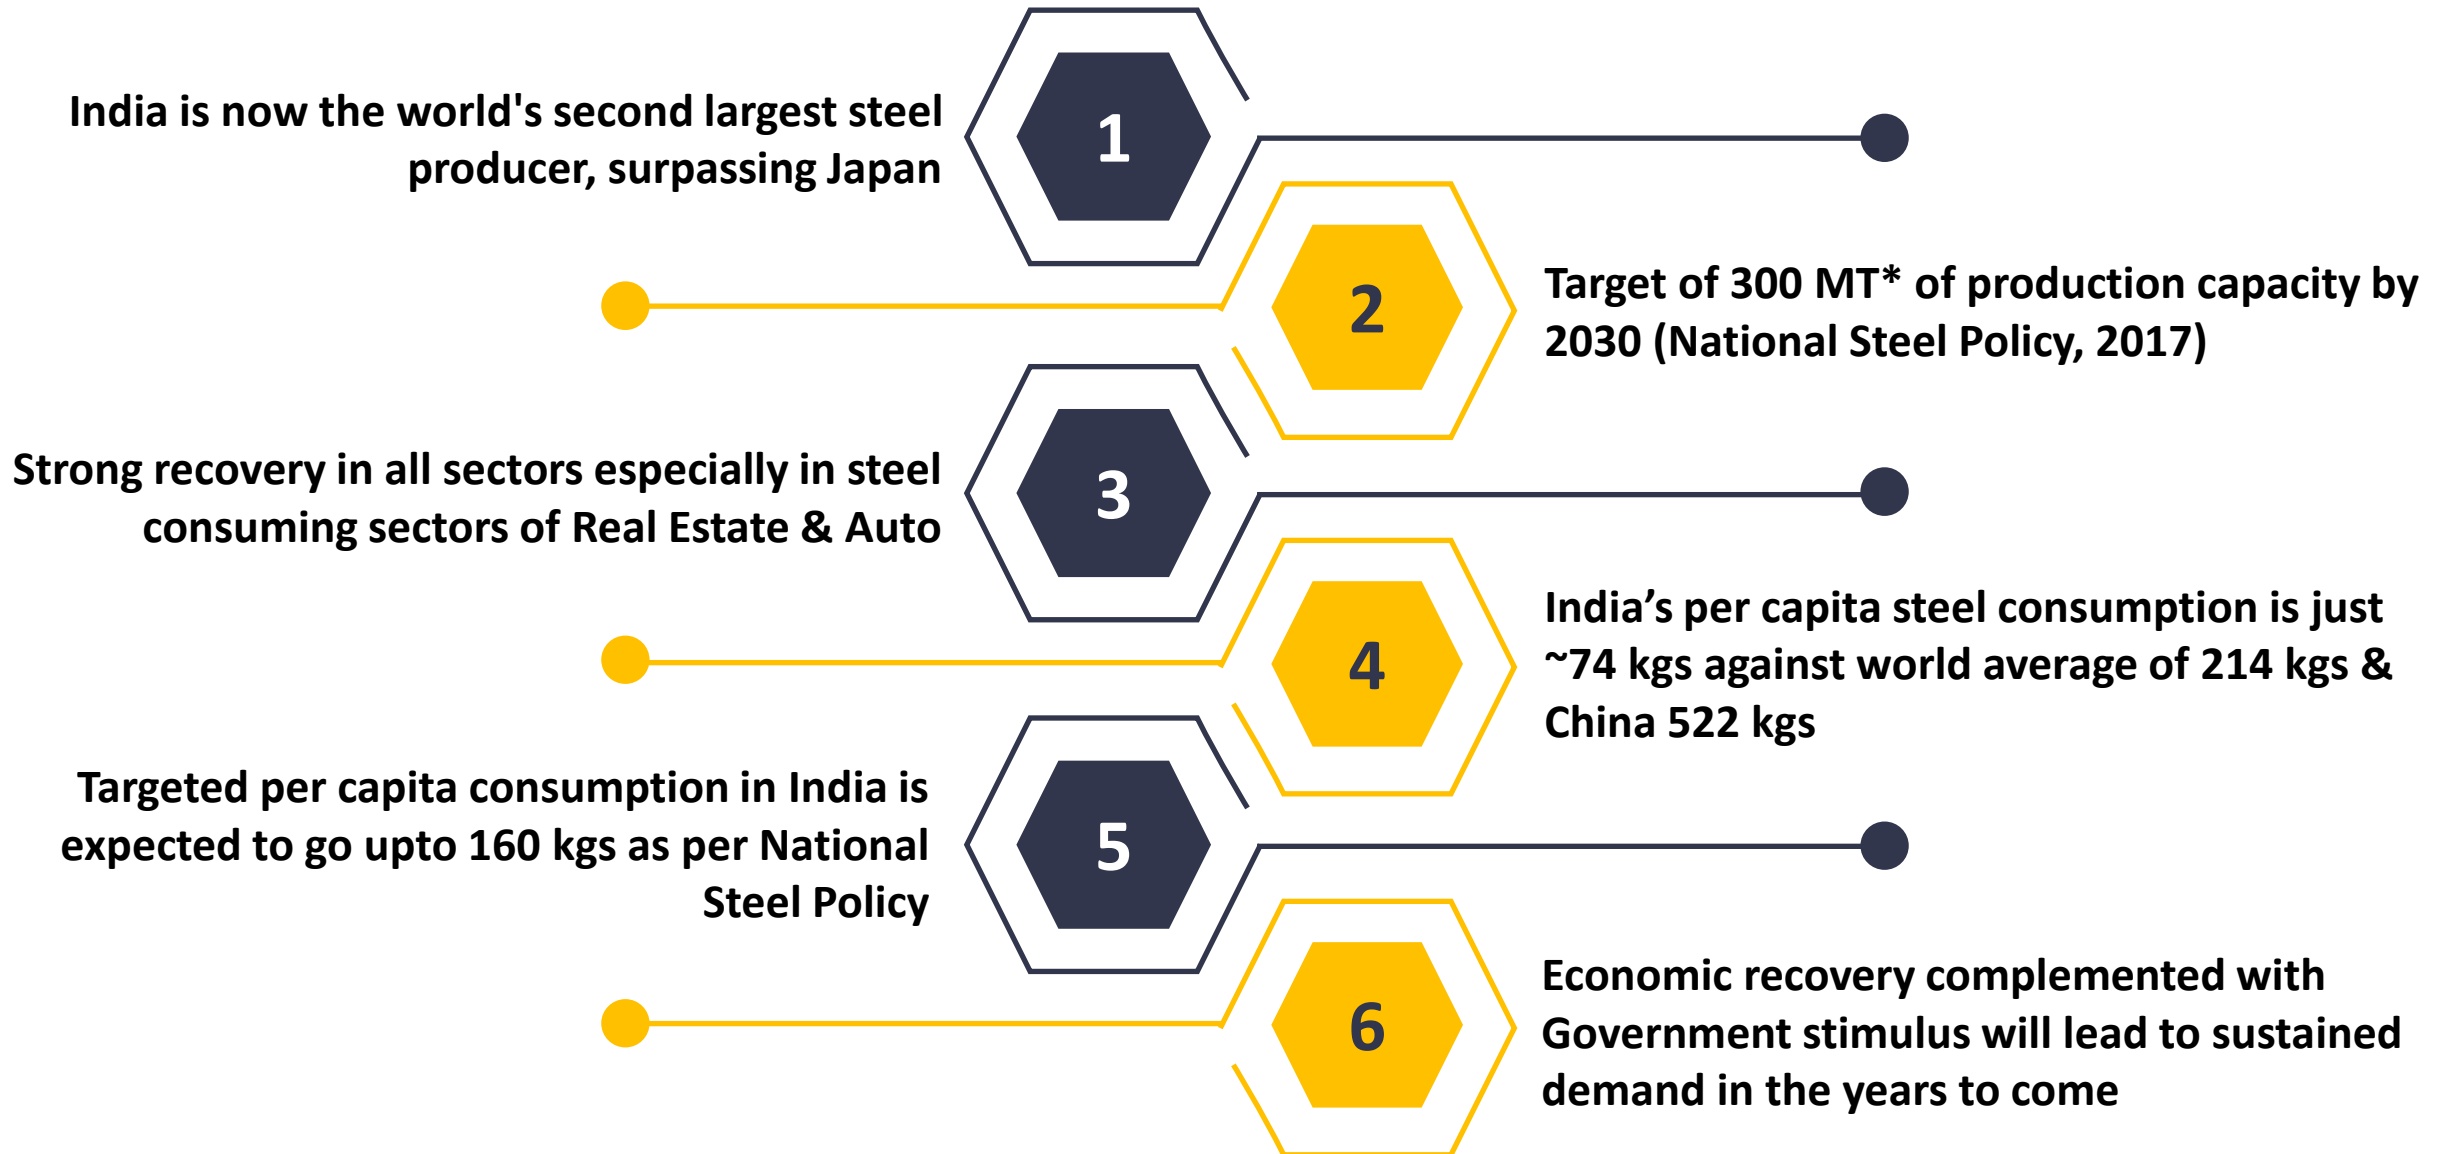

India needs to spend about \$1.4 trillion on infrastructure to become a \$5 trillion economy by FY25

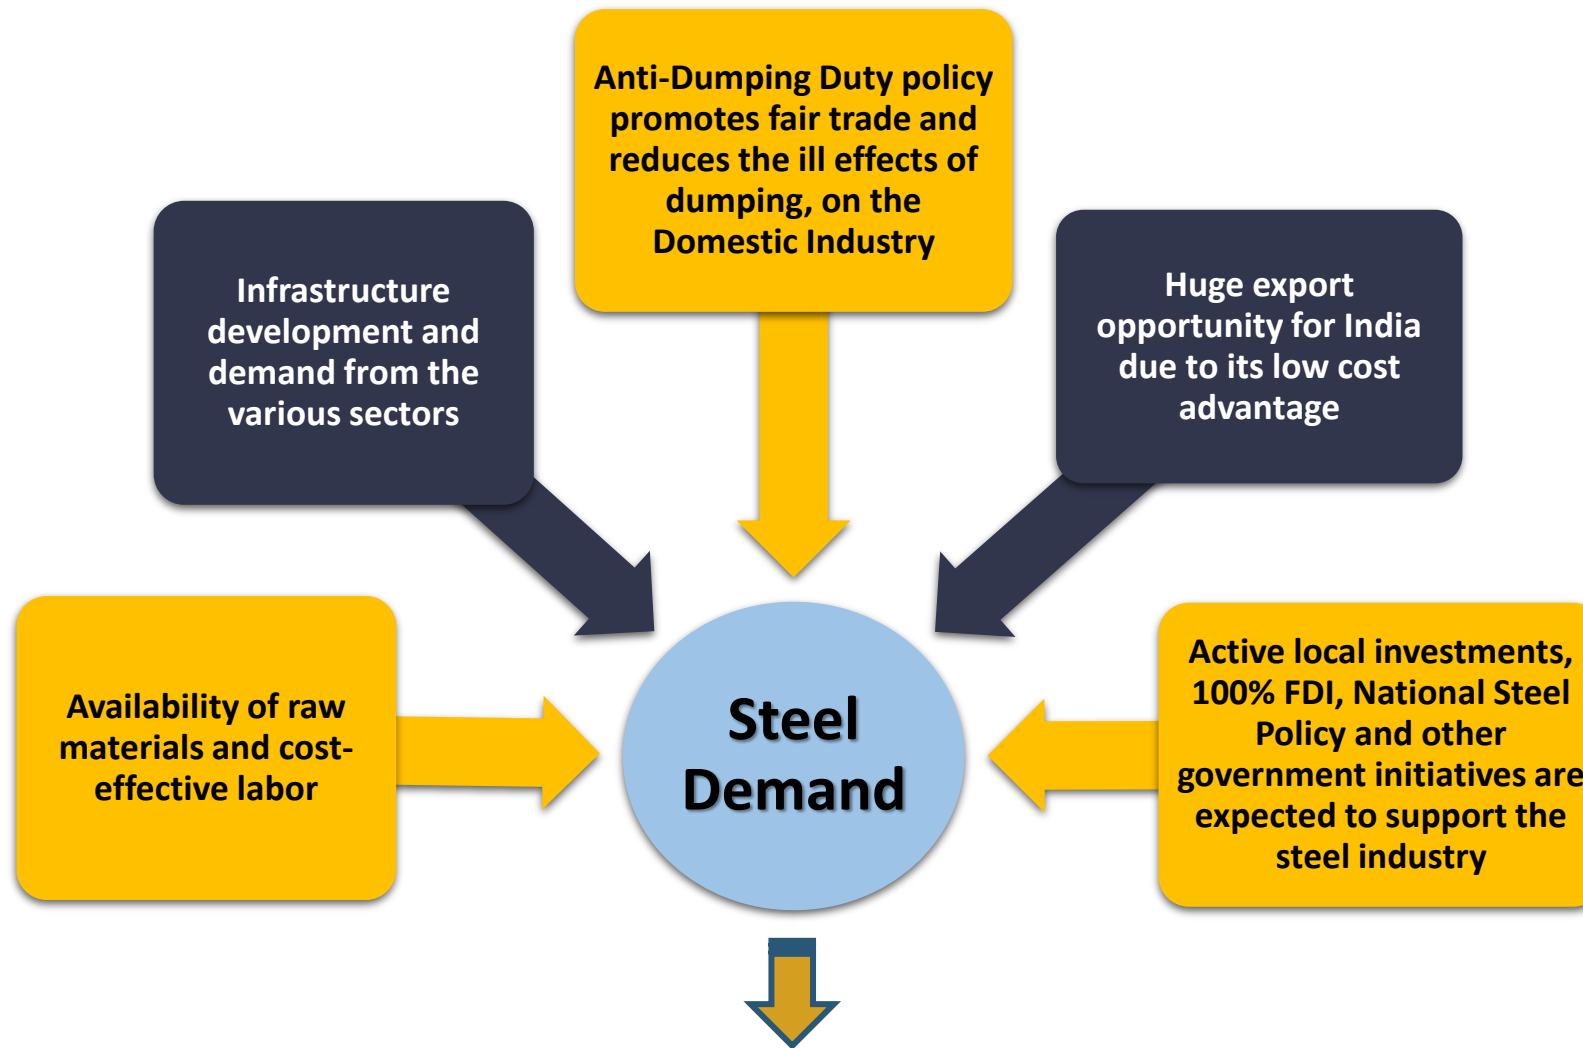

Fresh Investments in Infrastructure

This fresh investment in power, railways, and water, coupled with renewed interest in the automobile sector is bound to bring in fresh demand for steel

Domestic Steel Industry on a strong footing in the long term

Growth drivers of Indian Steel industry

Boost usage of refractory products significantly. Iron and steel industry accounts for approximately 71% of the refractories market share

What are Refractories

Refractories are material having high melting points, with properties that make them suitable to act as heat-resisting barriers between high and low temperature zones. Refractories are inorganic nonmetallic material which can withstand high temperature without undergoing physical or chemical changes while remaining in contact with molten slag, metal and gases

Raw Materials

Principal raw materials used in the production of refractories are: oxides of silicon, aluminum, magnesium, calcium and zirconium and some non-oxide refractories like alumina, carbides, nitrides, borides, silicates and graphite

Uses

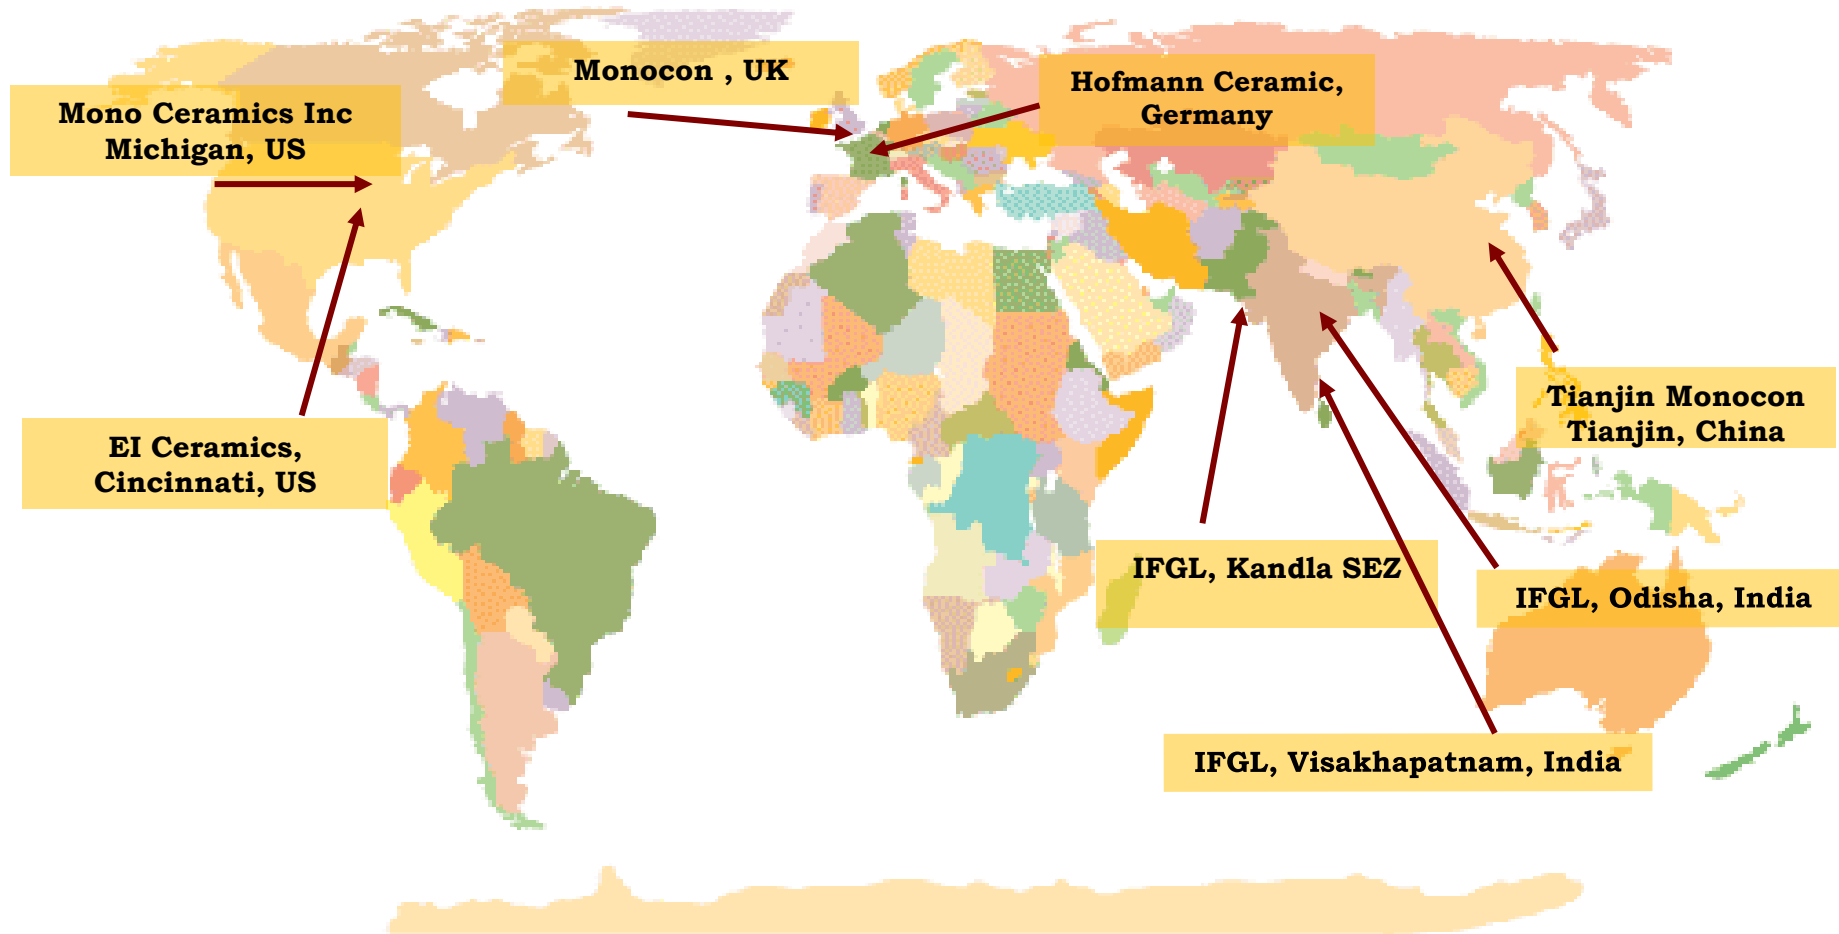

Refractories are used by metallurgy industry for flow control and also in the internal linings of furnaces, kilns, reactors and other vessels for holding and transporting metal and slag. In non-metallurgical industries, the refractories are mostly installed on fired heaters, hydrogen reformers, ammonia primary and secondary reformers, cracking furnaces, utility boilers, catalytic cracking units, coke calciner, sulphur furnaces, air heaters, ducting, stacks, etc.

Types of Refractories

Isostatic Refractories, Slide Gate Refractories & Systems, Tube Changer Refractories & System, Purging System & Refractories, Cast Products & Zirconia Nozzles, Monolithics/ Castable & Foundry Ceramics
