# RBI says India's growth momentum to continue in FY24; stresses on structural reforms

The Reserve Bank on Tuesday said that India's growth momentum is likely to continue in 2023-24 even as it made a case for pushing structural reforms to deal with the geopolitical developments and also to achieve sustained growth in the medium-term. The Reserve Bank's annual report flagged slowing global growth, protracted geopolitical tensions and a possible upsurge in financial market volatility as possible downside risks to growth.

The report notes that volatility has ebbed in global financial markets and risks to financial stability from the failure of banks in some advanced economies (AEs) in March 2023 have eased. Resolute

# RBI's balance sheet grows 2.5 pc to Rs 63.45 lakh crore in FY23

MUMBAI, MAY 30 /--/ The size of the Reserve Bank's balance sheet increased by 2.5 per cent for the year ended on March 31 to about Rs 63.45 lakh crore on higher income, as per the central bank's annual report released on Tuesday. The balance sheet of the RBI plays a critical role in the functioning of the country's economy, largely reflecting the activities carried out in pursuance of its currency issue function as well as monetary policy and management reserve objectives

"The size of the balance sheet increased by Rs 1,54,453.97 crore, i.e., 2.50 cent from Rs 61,90,302.27 crore as on March 31, 2022 to Rs 63,44,756.24 crore as on March 31, 2023," the report said. While income for the year increased by 47.06 per cent, the expenditure increased by 14.05 per cent. The year ended with an overall surplus of Rs 87,416.22 crore as against Rs 30,307.45 crore in the previous year, resulting in an increase of 188.43 per cent. The RBI transfers the surplus as dividend to the central government. "The increase on the asset side was due to rise in foreign investments, gold, and loans and advances by 2.31 per cent, 15.30 per cent and 38.33 per cent, respectively," the RBI said. On the liability side, the expansion was due to increase in notes issued, revaluation accounts and other liabilities by 7.81 per cent, 20.50 per cent and 79.07 per cent, respectively. RBI further said

domestic assets constituted 27.69 per cent while the foreign currency assets and gold (including gold deposit and gold held in India) constituted 72.31 per cent of total assets as on March 31, 2023 as against 28.22 per cent and 71.78 per cent, respectively, as on March 31, 2022. A provision of about Rs 1.31 lakh crore was made and transferred to Contingency Fund (CF). No provision was made towards Asset Development Fund (ADF). (PTI)

stemmed the tide of confidence runs for now. "Amidst strong global headwinds, the Indian economy is expected to have recorded a growth of 7.0 per cent in real GDP in 2022-23,"

A sustained recovery in discretionary spending, particularly in contact intensive services, restoration of consumer confidence, high festival season spending after two consecutive years of COVID-19 induced isolation and the government's thrust on capex provided impetus to the growth momentum. In the second half of the year, however, the pace of yearon-year growth moderated because of unfavourable base effects, weakening consumption
