# MEDIA RIGHTS DEALS KEY TO SURGE

# IPL brand value up 80%, hits \$3.2 bn

**GEETIKA SRIVASTAVA** New Delhi, July 10

THE STANDALONE BRAND value of the Indian Premier League (IPL) is now \$3.2 billion, 80% higher than \$1.8 billion in 2022, according to a report by global investment bank Houlihan Lokey.

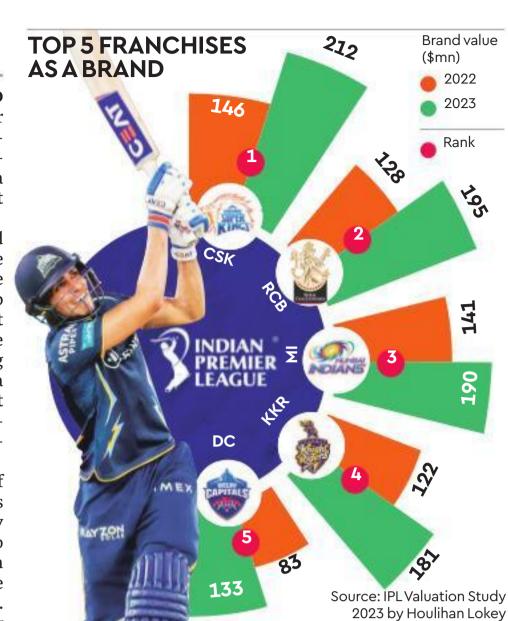

The report, 'IPL Brand Valuation Study', valued the business enterprise of the league at \$15.4 billion, up from \$8.5 billion in 2022. It ascribed this jump to the impact of the eye-popping amounts paid by media houses to acquire broadcast rights for the 2023-27 seasons, which now rest with Viacom18 and Disney Star.

The report said the value of the league's media rights has grown at an extraordinary CAGR of 18% from 2008 to 2023, while the growth in absolute terms between the 2017 and 2023 cycles is 196%.

The league's broadcasting fee, when compared on a permatch basis, is well above that of other professional leagues in the world like the NBA, EPL, and Bundesliga and is second only to the NFL, it said.

"When you think about it, it is India's only premier live entertainment event. The country doesn't have any other property like this. Movie theatres are underpenetrated, movie viewing is on the decline at the moment. IPL is actually the stage where consumers go to watch something live," said Naresh Gupta, cofounder and managing partner, Bang in the Middle.

KV Sridhar, the global chief creative officer at Nihilent, ascribed the continuing success of the IPL to three primary reasons. First, it is running with the full might and support of BCCI & ICC and thus

enjoys the limelight and attracts viewership.

The second reason, he said, is the money involved. "The league makes players richer than they would be if they played Test cricket their entire lives. This is why so many stars are attracted to the event. Some even prefer to play here instead of representing their countries. That attracts audiences," he said. The presence of marquee players such as Virat Kohli and MS Dhoni, who are massive brands themselves, has helped increase the league's popularity. Dhoni's team, Chennai Super Kings, has ranked first in terms of brand value (\$212 million), according to the report.

And for advertisers, the IPL provides a window of 40 days to push their brands. "If you set

aside funds for advertising during the league, your brand will instantly become wellknown due to the loyalty of the

IPL 2023's advertising revenue was a whopping ₹10,120 crore, as per market research and analysis firm Redseer Strategy Consultants.

viewership," Sridhar said.

The role of technology in leading the game's growth should not be underestimated, said experts. The rise in its viewership on OTT platforms, especially after JioCinema decided to stream it for free, has given a big boost to the league's brand value. Higher definition videos, better sound quality, and better technology to determine outcomes have all played a key role in increasing the popularity of the tournament.

# TWIN BALANCE SHEET ADVANTAGE

In his foreword to the Financial Stability Report released last month, RBI governor Shaktikanta Das talked about how India is on the cusp of a 'twin balance sheet advantage for growth'. A few days later, finance minister Nirmala Sitharaman also mentioned it while predicting a robust economic growth. We explain what they were referring to

### What is the twin balance sheet issue

THE 'TWIN BALANCE sheet' issue refers to the earlier problematic balance sheets of both companies and banks. Companies had excessive debt and insufficient funds to repay it, with a large number of them having an interest coverage ratio of less than 1. This indicated that their operations did not generate enough money to even cover the interest payments.

On the other hand, banks were burdened with significant nonperforming assets (NPAs). In fact, bad loans had crossed ₹8 trillion, and the NPA ratio had reached almost 12% in 2016-17. Many banks reported that the amount of bad loans exceeded the total interest they earned, limiting their ability to lend. Consequently, new companies did not have access to bank funding.

AMONG KEY REGULATORY measures, the RBI introduced the Central Repository of Information on Large Credits (CRILC) in 2014 to enable banks to share information on large loan accounts of ₹5 crore and above. To detect early signs of weakness in loan accounts, the RBI insisted on collecting information on loans overdue up to 90 days, known as special mention accounts (SMAs). The regulator also initiated an asset quality review (AQR) in September 2015.

The enactment of the Insolvency and Bankruptcy Code (IBC) was aimed at expediting loan resolution. Additionally, between FY17 and FY21, the government infused over ₹3 trillion to strengthen public sector banks. In 2021, a separate bank called the National Asset Reconstruction Company (NARCL) was established to handle bad debts only.

## Why is it an 'advantage' now

THE FSR SAYS both banking and corporate sector balance sheets have strengthened. Banks have bolstered their capital base, with the capital to riskweighted assets ratio and the common equity tier 1 capital ratio reaching historical highs of 17.1% and 13.9%, respectively, in March 2023. Banks have also improved their returns on assets and returns on equity. Their GNPA ratio fell to a 10-year low of 3.9%, and the net NPA ratio fell to 1%. The provisioning coverage ratio rose to 74%. Moreover, the profit after tax of banks grew by 38.4% in 2022-23.

The corporate balance sheet is said to be at its healthiest in 10 years. Most sectors have deleveraged their balance sheets by using profits and excess funds to repay debt. In fact, an RBI report states that the debt-to-equity ratio of private (non-financial) companies fell from ~55% to 35% between FY15 and FY23. All this means they are in a better position to expand business now.
