3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

Polyplex recognises the importance of environmental stewardship and strives to reduce waste through the usage of the 3 R's (Reuse, Reduce and Recycle). We minimize manufacturing waste through source reduction, reuse and recycling, and responsibly disposing of hazardous waste. Waste from direct materials, packaging materials and plant operations are the three categories of waste generated by our operations (hazardous and non-hazardous). Because PET in both film and resins is often recyclable, the polyester film manufacturing process has a minor environmental impact. We have the required EIA approval for its Polyester resin line, and we provide periodical reports to the competent authorities as required by the Environmental Clearance (EC).

Waste from direct materials	Non-hazardous waste like polyester chip lumps, polyester film lumps, waste trimmings, contaminated films, and waste aluminium coated film.	We recycle and reuse 99% of our simple PET film waste and the remaining is sold to third-party contractors.
Waste from packaging materials	Waste like wooden pallets, plastics, PVC cups, and paper cores as packaging material for both incoming material, as well as finished goods.	We are trying to minimize the packaging waste, most of which is sold to third parties.
Waste from plant operations	Waste like sludge from ETP and tank bottom, oil and lubricants, scrap metal, batteries, chemical waste, and used drums.	Most of the waste is non-hazardous and sold to third parties. Hazardous waste is disposed of by authorized vendors.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

Polyplex as on 31st March 2023 was registered under the PWMR Rules as a "manufacturer". As a manufacturer, Polyplex was required to get registered at Pollution Control Board (UPCB) which has been done.

But, as per the recent clarifications sought from CPCB, Polyplex is required to register as a producer, whereby the "producer" is defined as a person engaged in manufacture or import of carry bags or multilayered packaging or plastic sheets or like, and includes industries or individuals using plastic sheets or like or covers made of plastic sheets or multilayered packaging for packaging or wrapping the commodity. The registration as an Importer and Recycler has already been received and other registrations are in process.
