### EMERGING CONCERN

# **Slackening Recovery Overshadows Sharp Base Effect-Driven Growth in April: Icra**

**Our Bureau** 

New Delhi: India's slackening recovery momentum overshadowed the sharp base effect in April as the second wave of Covid-19 surged through the country causing localised restrictions across states, according to ratings agency Icra.

While a majority of leading economic indicators showed annual growth due to a massively shrunken base in April last year, most of them were lower than pre-Covid levels, the agency said in a report on Wednesday.

"Notwithstanding the base effect-led spike in growth of many sectoral indicators in April 2021, the slackening momentum, driven by the second wave of Covid-19 infections in India, has emerged as a concern," the report said.

tracked by Icra improved in

"However, the optimism ge-

nerated by this trend is limi-

ted, as eight of the 13 non-financial indicators in April

traffic, vehicle registrations, auto output, consumption of petrol and diesel, as well as the output of Coal India. Further, indicators like GST e-way bills, electricity generation, vehicle registrations and rail freight traffic displayed a slowing sequential momentum in April 2021, reflecting the rise in Covid-19 cases and imposi-

tion of localised restrictions, the report said. "The early data available for May 2021 confirms that this trend is continuing, as the lockdowns have both been exten-

ded, and spread to other states, to curb the second wave of Covid-19," Nayar said.

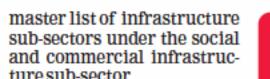

India saw a record-high 4,529 deaths even as daily fresh cases eased to 267,000

in the last 24 hours. In addition to substantial healthcare expenses related to the Covid-19 treatment and high retail prices of fuels that are expected to squeeze disposable income, the satiation of pent-up demand seen during the festive season last year will further limit demand for consumer durables, according to the report.
