**EMKAY GLOBAL
Bharat Forge**

Target: ₹775
CMP: ₹663.75

The demand outlook for CY22 provided by 24 global entities, including CV/PV OEMs, non-auto companies and industry associations, offers a positive read-through for forging companies. India's MHCV segment is expected to witness a strong 28 per cent volume growth in CY22. North America's HCV segment is likely to grow 12 per cent and Europe 8 per cent in CY22.

The outlook for CY22 remains unchanged, supported by large order books. However, the CY23 outlook has moderated to 9 per cent (vs. 22 per cent earlier) on account of macro uncertainties.

The order book is healthy, but the Russia-Ukraine conflict and China's Covid lockdowns have created temporary supply issues. The outlook for the industrial segments remains robust owing to increased infra spends and an upturn in the oil & gas segment, which is likely to see up to 45 per cent growth in CY22.

For Bharat Forge (BHFC), we trim our FY23E/FY24 EPS by 3 per cent/5 per cent to account for some moderation in the demand outlook and lower margins. In a bear-case recession scenario, if we build in a 15 per cent drop in exports (excluding oil and gas segment), our FY24E EPS declines about 16 per cent). Following the EPS revision, we expect a revenue CAGR of 14 per cent over FY22-24.

**MOTILAL OSWAL
Hindustan Unilever (Buy)**

Target: ₹2,700
CMP: ₹2,197.25

Hindustan Unilever now has 16 brands with over ₹1,000 crore in annual sales (v/s 14 brands in FY21). In FY22, its gain in market share was the highest in more than a decade. The company continues to place the building blocks for future growth and has been able to do so ahead of its peers. It continues to display the dexterity shown over the last decade, despite its larger size, even as it continues to grow v/s its peers. Hindustan Unilever continues to strengthen the key drivers of its success in India over the last decade, including: pioneering the use of technology to generate data and facilitate decision making; focusing on decentralisation and localised strategies based on its WiMI framework; recognising trends and investing in them early on; funnelling cost savings back into the business; and its strong execution ability, which has led to a positive momentum in earnings. The company's pre-Covid earnings growth was particularly impressive, given the weak mid-single-digit growth posted by its (much smaller) peers over the same period. Once the ongoing high material cost environment abates, we believe the company could revert to mid-teens earnings growth. Hindustan Unilever is the best prepared among peers on the technology as well as the e-commerce strategy front to deal with potentially-significant disruptions ahead.

Crisil launches benchmarks for AIFs

OUR BUREAU

Mumbai, June 9

Crisil Research launched sub-category-level benchmarks for the domestic alternative investment fund (AIF) industry on Thursday. The move will usher in granularity and enable metrics-driven investment decision-making by stakeholders in the fast-growing industry, based on due comparison of equivalent funds.

"These benchmarks are the logical next step to the original category-level benchmarks introduced in October 2020 and provide peer comparison for AIFs belonging to seven sub-categories within the three broad AIF categories – I, II and III," Crisil said in a press release.

Jiju Vidyadharan, Senior Director, Crisil Research, said, "The Indian AIF industry continues to grow at a healthy pace, with commitments increasing 42 per

cent between March 2021 and March 2022 to ₹6.41-lakh crore. With investors embracing the product and the industry maturing, there is a need for enhanced bench-marking practices. Crisil's sub-category AIF

benchmarks will plug this gap, providing like-to-like fund comparison within its category." The benchmarks have been developed in accordance with SEBI guidelines and in consultation with industry participants.
