### **f. Details of impact of COVID-19 on listed entity's**

#### **• Capital and financial resources:**

The Company's equity capital structure remained unchanged.

The Company presently has adequate capital and financial resources to run its business.

#### **• Profitability:**

We are realizing lower revenue in the windmill operations due to regulatory changes made by the MSEDCL, which have affected the billing rates. The billing revenue per unit of power will continue to remain the same till March 2021, since we have an agreement in place till then.

There has been a reduction in lease rentals considering the market condition and the impact of the pandemic which has caused a reduction in profitability. The lease rentals will be reviewed towards the end of the last quarter of the FY20-21.

The quantum of money deployed in bank fixed deposits and mutual funds increased during the quarter due to receipt of dividend income from our investee companies.

#### **• Liquidity position:**

The Company has adequate liquidity and reserves to withstand the current situation.
