around Mumbai for a period of four years (Ref No: CC25FK082)

Moderate pick-up in H2 exports expected

PRIYANSH VERMA New Delhi, October 18

INDIA'S MERCHANDISE **EXPORTS** in the first half of FY25 rose at a modest rate of 1%, owing to slowdown in global demand, decline in oil prices, higher logistics costs for exporters, and of course, declining competitiveness in certain segments.

The outlook for the second half is, however, of slight improvement, even as the current external situation is likely to sustain, according to analysts.

"Outlook for the rest of the year is mixed, and challenges remain in the form of disturbances in West Asia," said Ajay Sahai, director general, Federation of Indian Export Organisation (FIEO). "We expect goods and services exports to be around \$825 billion, with goods exports at \$450-\$455 billion." In FY24, good exports were \$437 billion, down 3%

In H1FY25, India's overall goods exports stood at \$213.2 billion as against \$211.1 billion in the year ago period. As per FIEO's estimate, the growth in H2 would be around 4-6%.

Elara Securities economist Garima Kapoor, however, doesn't expect the trend to 'reverse materially" H2FY25 as oil prices remain soft and global supply chain pressures have started to mount. "The disruption in West Asia and the impact on the movement of trade through the Red Sea has impacted key shipping

SLOWING DEMAND

■ In H1FY25, India's overall goods exports stood at \$213.2 billion as against \$211.1 billion in the year ago period

Gems and jewellery exports contracted by 10.9% and iron ore by 27.6% during H1

exports, accounting for 17% of total exports, declined 12.4% on year largely due to fall in global crude oil prices Brent crude prices

are currently trading around 11% lower than last year

In the first six months of the current fiscal, said, Ashwani Kumar, president, FIEO, the ongoing global trade disruptions along with the volatility in crude and metal prices played a key role in bringing down the "value of exports to some extent".

Petroleum products exports, accounting for 17% of total exports, declined 12.4% on year largely due to fall in global crude oil prices. Brent crude prices are currently trading around 11% lower than last year.

Gems and jewellery exports during H1 contracted by 10.9%, iron ore by 27.6%, and several agriculture products — such as cereals, cashew, oil meals, oil seeds by about 9%. On the contrary,

tronic goods (19.7%), chemicals (4.6%), and engineering goods (5.3%) lead to an arrest in exports' fall.

On the impact on manufacturing, economists say weak exports may pull down output growth to some extent, and subsequently the GDP. "The sectors like textiles, auto and petroleum products are particularly vulnerable," said Suman Chowdhury, chief economist, Acuite Ratings and Research.

"The manufacturing sector growth in the Apr-Aug'24 period has slowed down to 3.6% but it may improve to some extent in H2 with an expectation of an uptick in domestic demand," he said. Most economists expect India's GDP growth in FY25 to be in the range of 6.8-6.9%.

India's forex reserves log worst fall in 2.5 years

REUTERS Mumbai, October 18

INDIA'S FOREIGN EXCHANGE reserves dropped for a second consecutive week, falling to a one-month low of \$690.43 billion as of October 11, data from the Reserve Bank of India (RBI) showed on Friday.

The reserves fell by \$10.75 billion in the reporting week, the biggest drop since April 1, 2022. They had fallen by \$3.7 billion in the previous week.

Changes in foreign currency assets are caused by the central bank's intervention in the foreign exchange market as well as the appreciation or depreciation of foreign assets held in the reserves.

The RBI intervenes on both sides of the forex market to prevent undue volatility in the rupee. In the period for which the forex reserves data pertains, the rupee had declined past 84 per dollar for the first time ever amid a jump in outflows from local stocks and ele-

vated oil prices. The rupee's fall below 84 was significant as it was a crucial psychological support level that the RBI had defended for more than two months, traders said. The RBI intervened in the forex market to keep the rupee's fall in check, they added.

Forex reserves also include India's reserve tranche position in the International Monetary Fund. Foreign investors pulled out \$8.4 billion so far this month from local stocks on a net basis, surpassing the previous record monthly outflow of \$8.35 billion, recorded

routes," she said. pick up in exports of elecin March 2020. Market for cardiac, diabetes drugs tripled in five years, says report

MANU KAUSHIK New Delhi, October 18

THE SIZE OF the cardiac and anti-diabetes drugs market in India has more than tripled in the last 10 years, said the latest report from Pharmarack.

The report said that the anti-diabetes market, which stood at around ₹5,000 crore in 2014, has jumped to nearly ₹17,000 crore now whereas the size of cardiac market has grown from about ₹10,000 crore to nearly ₹30,000 crore during the same period.

The increase in market size is primarily led by innovator molecules. "While legacy brands have become stronger over the years, entry of brands from innovator companies

(Amount (₹ in Lakhs)

Source: Pharmarack

have also contributed to some extent to this phenomenon. The volume has not increased in the same proportion as value which indicates the shift of consumption from the existing molecules to newer molecules. There's also some component of shift to online sales," the report said.

As per the report, innovative treatment options in the lifestyle diseases are driving the value growth because they provide faster relief, have better control over symptoms, have lesser side effects, stronger clinical trials support, and global acceptance. "The cardio-diabeto seg-

ment contributes to almost onefifth of the overall domestic pharma market today. Over the past five years, the cardiac segment growth has been better than the overall pharma market growth. The anti-diabetes segment also shows a positive streak over the past five years with good amount of action due to molecules going off patent in this segment," the report said.

Interms of market share, the Indian companies have a relatively stronger dominance in the cardiac segment whereas MNCs have relatively better share in the anti-diabetes segment.

The report said that India is grappling with a growing burden of non-communicable diseases (NCDs), which poses a significant challenge to the healthcare system. "NCDs also hamper economic growth. It is estimated that India will lose \$4.58 trillion before 2030 as a result of NCDs and mental health conditions," the report adds.
