ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India.

India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. We generally do business with our customers on purchase order basis and do not enter into long term contracts with them. Our inability to maintain relationships with our customers could have an adverse effect on our business, prospects, results of operations and financial condition.***

Our business is dependent on our continuing relationships with our customers. Our Company neither has any long term contract with any of customers nor has any marketing tie up for our products. Any change in the buying pattern of our customers can adversely affect the business of our Company. The loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations. Our business depends on the continuity of our relationship with our customers. There can be no assurance that we will be successful in maintaining such relationships or increasing the number of such relationships. If we are not able to maintain existing relationships with our current customers or if we are not able to develop new relationships, including if we are not able to provide services on a timely basis or offer services that meet the needs of the customers, the number of customers could decline in the future and as a result, our business, prospects, results of operations and financial condition could be adversely affected in the future.

- 2. Our Company is reliant on the demand from the chemical industry for a significant portion of our revenue. Any downturn in the chemical industry or an inability to increase or effectively manage our sales could have an adverse impact on our Company's business and results of operations.***

We cater to a broad spectrum of industries nationwide, supplying petrochemical products to esteemed clients such as Aditya International and Biozor Energy Pvt. Ltd. in western India and expanding our services to companies in northern India. Our primary focus is on supplying chemical products and bio-fuels to the infrastructure sector, niche industries like upstream hydrocarbon exploration, and export-oriented industries to meet the ever-growing demand. Our revenues are highly dependent on our customers from the chemical industry and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations. Further, in the event, there takes place a shift of practice of developing or procuring raw materials in-house in the chemical industries or the other industries which we cater to, it may have an adverse impact on the demand for our products. Similarly, in the event of any new breakthrough in the development of a novel product or raw material by our competitors or customers, our products may become obsolete or be substituted by such alternatives; thereby impacting our revenues and profitability adversely. It may also happen that our competitors are able to improve the efficiency of their manufacturing process or their distribution or raw materials sourcing process and thereby offer their similar or high quality products at lower price our Company may be unable to adequately react to such developments which may affect our revenues and profitability.

- 3. We depend on a few customers for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our business operations are highly dependent on our customers and the loss of any of our customers may adversely affect our sales and consequently on our business and results of operations. While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future. If there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders or expand our customer base on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 4. The prices we are able to obtain for our products that we trade depend largely on prevailing market prices.***

The price of the products traded by us has a significant impact on our profits. Some of our core products have been subject to price fluctuations resulting from government policies, shifts in supply and demand and other factors beyond our control. As a result, any fluctuation in prices could have a material adverse effect on our Company and our results of operations.

- 5. The commercial success of our services depends to a large extent on the success of the success of the end use customers. If there is any downturn in the industries in which the customers operate, it could have a material adverse effect on our business, financial condition and results of operations.***

We cater to a broad spectrum of industries nationwide, supplying petrochemical products to esteemed clients such as Aditya International and Biozor Energy Pvt. Ltd. in western India and expanding our services to companies in northern India. Our

primary focus is on supplying chemical products and bio-fuels to the infrastructure sector, niche industries like upstream hydrocarbon exploration, and export-oriented industries to meet the ever-growing demand. The success of our business operations is dependent upon the success of the business of our customers who are manufacturers engaged in the chemical industry. Therefore, the commercial success of our business is highly dependent on the commercial viability and success of our customers. Any downturn in the industries in which our customers operate or the demand of the products or services of our customers and end use customers, could have a direct impact on the demand of our services and our business operations. Any disturbance in the industry in which our customers operate could adversely impact our business due to our high dependence on our customers. Alternatively, in the event our customers are able to devise an in-house procurement unit, or if our customers are able to find a cheaper alternative for our services, it may conversely result in a reduction in the demand of our services and have a material adverse effect on our business, financial condition and results of operations.

6. *The business orders which we undertake may be delayed, modified, cancelled, or not fully paid for by our clients and therefore, could materially affect our business, results of operations and financial condition.*

The business orders which we undertake may be cancelled or may be subject to changes in scope or schedule. We may also encounter problems executing the orders or executing them on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone an order or cause its cancellation. Such factors could include delays or failures to obtain necessary permits, right-of-way, or receive performance bonds and other types of difficulties or obstructions. Any delay, failure, or execution difficulty with respect to orders in our Order Book could materially affect our business, results of operations and financial condition.

7. *We are dependent upon few suppliers for the material requirements of our trading business.*

Our primary focus is on supplying chemical products and bio-fuels to the infrastructure sector, niche industries like upstream hydrocarbon exploration, and export-oriented industries to meet the ever-growing demand. We majorly import the products traded by us from foreign jurisdictions. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all. Our Company maintains a list of approved and quality suppliers from whom we procure the materials on order basis as per our internal demand projections. We have not entered into long term contracts with our suppliers and prices for materials are normally based on the quotes we receive from various suppliers. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of products could have a material adverse effect on our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our ability to execute orders. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the amount of materials procured and the price, at which we procure such materials, may fluctuate from time to time. In addition, the availability and price of our materials may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the excipient industry in general. We cannot assure you that we will always be able to meet our material requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of materials to our customers. Further, we also cannot assure you with a reasonable certainty that the materials that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective materials, we may not be in a position to recover any advance payments made or claim compensation from our suppliers. Any inability on our part to procure sufficient quantities of materials, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

8. *Our Company has incurred negative net worth and losses in the past.*

On account of continuous decrease in demand our products and increased competition from domestic as well as international players, our Company has incurred losses in the past and also has suffered erosion in net worth. The details of losses and negative net worth reported in the preceding three years has been provided below:

(₹ in lakhs)

March 31, 2024	(Loss)		Negative Net Worth		
	March 31, 2023	March 31, 2022	March 31, 2024	March 31, 2023	March 31, 2022
(104.16)	14.65	(29.51)	(295.68)	(191.52)	(202.51)

Any operating losses/negative net worth could adversely affect the overall operations and financial conditions and also divert the attention of the management towards such events which could have an adverse effect on our operations and financials. There can be no assurance that we will not incur negative net worth and losses in any future periods, or that there may not be an adverse effect on our reputation or business as a result of such losses.

9. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products & services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel;
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems;

Also, please refer “*Management's Discussion and Analysis of Financial Condition and Results of Operations*” on page 121 for details on the factors affecting our financial results. All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

10. *Our Statutory Auditor has included matter of uncertainties, emphasis of matters and qualifications, in the examination report to Restated Consolidated Financial Statements for the three years ended March 31, 2024, March 31, 2023 and March 31, 2022.*

Our Statutory auditor has included the following remarks in the examination report to the Restated Financial Statements for the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022 and the audit reports for the Financial Years ended March 31, 2024, March 31, 2023 and March 31, 2022:

"We draw to attention to:

We are unable to determine the consequential impact of certain specific transactions /matters and disclosures on the Standalone Financial Statements. Such specific transactions/ matters include: 1. The Company continues to prepare its accounts as going concern basis, despite facts that- a) There is an erosion in the Net Worth of the Company 2. The Company has not complied with the TDS provisions of the Income Tax Act. 3. The Company has not complied with provision of Ind AS- 119 for employee benefits."

There can be no assurance that any similar remarks, or matters of emphasis will not form part of our financial statements for the future fiscal periods, which could subject us to additional liabilities due to which our reputation and financial condition may be adversely affected. For further details, please refer to “*Financial Information*” on page 100 of the Draft Letter of Offer.

11. *The proposed objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.*

The objects of the Issue for which the funds are being raised have not been appraised by any bank or financial institution. In the absence of such independent appraisal, the requirement of funds raised through this Issue, as specified in the section titled “*Objects of the Issue*” are based on the company’s estimates and internal research. We may have to revise our management estimates from time to time and consequently our funding requirements may also change. This may result in rescheduling of our expenditure plans and an increase or decrease in our proposed expenditure for a particular object. Deployment of these funds is at the discretion of the management and the Board of Directors of the company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

12. *We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

- 13. *If we are not able to obtain, renew or maintain our statutory and regulatory licenses, registrations and approvals required to operate our business, it may have a material adverse effect on our business, results of operations and financial condition.***

We require certain statutory and regulatory licenses, registrations and approvals to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. Further, in future, we may also be required to obtain new licenses, registrations and approvals for any proposed operations, including any expansion of existing operations. There can be no assurance that the relevant authorities will renew such licenses, registrations and approvals in a timely manner or at all. Further, these licenses, registrations and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. We may be subject to penalties or suffer a disruption in our business activities, any of which could adversely affect our results of operations. Further, our Company will be responsible for bearing any and all liabilities arising out of this non-compliance. If we are unable to renew, maintain or obtain the required registrations or approvals, it may result in the interruption of our operations and may have a material adverse effect on our revenues and operations. Failure by our Company to renew, maintain or obtain the required licenses or approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company and licenses for which renewal applications have been made, kindly refer the chapter titled "Government and Other Approvals" beginning on page 135 of this Draft Letter of Offer.

- 14. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.***

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

- 15. *We depend on the accuracy and completeness of information about customers and counterparties and any misrepresentation, errors in or incompleteness of such information could cause our business to suffer.***

In deciding whether to extend credit or enter into other transactions with customers, we rely on information furnished to us by or on behalf of customers. We may also rely on certain representations from our customers as to the accuracy and completeness of that information. For ascertaining the credit worthiness we do not obtain any independent support from credit information companies or credit bureaus and on independent valuers in relation to the value of the net worth of such parties. Our reliance on any misleading information given may affect our judgment of credit worthiness of potential customers, which may affect our business, prospects, results of operations and financial condition.

- 16. *All of our product verticals are extremely competitive segments and we face risk of competition affecting our margins and profitabilities as we scale our operations.***

Our purchase and sales models includes various intermediaries who may connect with our competitors and share details of the specialties of our products or our sourcing processes etc. We may not be able to protect our trade secrets and may not be able to detect the same as well. We have not entered into any non-disclosure agreements with our intermediaries and thus our efforts towards marketing of our products may be leaked to other players in the market. This may affect the demand and exclusivity of our products and make us subject to fierce competition thereby adversely affecting our business, financial condition and results of operations.

- 17. *There are outstanding litigations involving our Company, if determined adversely, may adversely affect our business and financial condition.***

As on the date of this Draft Letter of Offer, our Company is involved in certain legal proceedings. These legal proceedings are pending at different levels of adjudication before various courts and tribunals. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and include amounts claimed jointly and/or severally from us and/or other parties, as the case may be. We cannot assure you that these legal proceedings will be decided in favour of our Company, as the case may be, or that no further liability will arise out of these proceedings. We may incur significant expenses in such legal proceedings and we may have to make provisions in our financial statements, which could increase our expenses and liabilities. Any adverse decision may adversely affect our business, results of operations and financial condition.

A summary of the pending tax proceedings and other material litigations involving our Company, our Promoter and our Directors are provided below:

18. Our Company proposes to utilize part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain unsecured borrowings availed by our Company and accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.

Our Company intends to utilise a part of the Net Proceeds for repayment or pre-payment, in full or in part, of all or certain unsecured borrowings availed by our Company. The details of the loans identified to be repaid or prepaid using the Net Proceeds have been disclosed in the section titled “*Objects of the Issue*” on page 53 of this Draft Letter of Offer. While we believe that utilization of Net Proceeds for repayment of unsecured loans would help us to reduce our cost of debt and enable the utilization of our funds for further investment in business growth and expansion, the pre-payment of loans will not result in the creation of any tangible assets for our Company.

19. System failures or inadequacy and security breaches in computer systems may adversely affect our business.

Our business is increasingly dependent on our ability to process transactions and banking data into well managed accounts systems. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate a growing customer base or product portfolio or supplier base. Any failure to effectively maintain or improve or upgrade our management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other

shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

20. Failure to manage our inventory could have an adverse effect on our net sales, profitability, cash flow and liquidity.

The results of operations of our business are dependent on our ability to effectively manage our inventory and stocks. To effectively manage our inventory, we must be able to accurately estimate customer demand and supply requirement accordingly. If our management has misjudged expected customer demand it could adversely impact the results by causing either a shortage of products or an accumulation of excess inventory.

21. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating, investing and financing activities in the past, the details of which are provided below:

Particulars	(₹ in Lakhs)		
	March 31, 2024	March 31, 2023	March 31, 2022
Net Cash Flow from/ (used in) Operating Activities	39.33	83.06	22.37
Net Cash Flow used in Investing Activities	(156.07)	(0.46)	0.11
Net Cash Flow used in Financing Activities	(133.23)	(75.40)	(17.42)

For further details with respect to reason for negative cash flows, please refer to “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” on page 121 of this Draft Letter of Offer. We may incur negative cash flows in the future which could have a material adverse effect on our business, prospects, results of operations and financial condition.

22. We are involved in high volume - low margin business. Any disruption in our turnover or failure to regularly grow the same may have a material adverse effect on our business, results of operations and financial condition.

Ours is a high-volume low margin business. Our inability to regularly grow our turnover and effectively execute our key business processes could lead to lower profitability and hence adversely affect our operating results, debt service capabilities and financial conditions. We are in the business of trading of ethylene oxide based derivatives and due to the nature of the products we sell, we may not be able to charge higher margins on our products. Hence, our business model is heavily reliant on our ability to effectively grow our turnover and manage our key processes including but not limited to procurement of timely sales / order execution and continuous cost control of non-core activities.

As part of our growth strategy, we aim to improve our functional efficiency and expand our business operations. Our growth strategy is subject to and involves risks and difficulties, many of which are beyond our control and, accordingly, there can be no assurance that we will be able to implement our strategy or growth plans or complete them within the timelines. Further, we operate in a dynamic industry, and on account of changes in market conditions, industry dynamics, technological improvements or changes and any other relevant factors, our growth strategy and plans may undergo changes or modifications, and such changes or modifications may be substantial, and may even include limiting or foregoing growth opportunities if the situation so demands.

23. The majority of Issue proceeds will be utilized by our Company for part- repayment or prepayment of unsecured loans availed by it from our Promoters and members of our Promoter Group. Accordingly, the utilization of that portion of the Net Proceeds will not result in creation of any tangible assets.

One of the Objects of this Issue is to partly repay or pre-pay the unsecured loans amounting to ₹ 511.73 lakhs availed by our Company from our Promoters, namely, Jaykishor Chaitanyakishor Chaturvedi, Ankur Jaykishor Chaturvedi and Siddharth Jaykishor Chaturvedi and one of the members of our Promoter Group, namely, Jaykishor Chaitanyakishor Chaturvedi (HUF). For further details, please see the chapter titled “*Objects of the Issue*” beginning on page 53 of this Draft Letter of Offer. Further, our Promoters and Promoter Group have confirmed that the application money due from them in lieu of their Rights Entitlements, can be adjusted towards the amount proposed to be repaid or pre-paid pursuant to this Issue. Accordingly, the utilization of Net Proceeds for repayment or pre-payment of unsecured loans would not result in an actual cash flow from our Company to our Promoters and members of our Promoter Group and will also not result in the creation of any tangible assets for our Company.

24. Any adverse change in regulations governing our products, may adversely impact our business prospects and results of operations.

An adverse change in the regulations governing the development of our products and their usage by our customers, including the development of licensing requirements and technical standards and specifications or the imposition of onerous requirements, may have an adverse impact on our operations. Our Company may be required to alter our distribution process and target markets and incur capital expenditure to achieve compliance with such new regulatory requirements applicable to us and our customers.

We cannot assure you that we will be able to comply with the regulatory requirements. If we fail to comply with new statutory or regulatory requirements, there could be a delay in the submission or grant of approval for marketing new products or we may be required to withdraw existing products from the market. Moreover, if we fail to comply with the various conditions attached to such approvals, licenses, registrations and permissions once received, the relevant regulatory body may suspend, curtail or revoke our ability to market such products and/or we may be deemed to be in breach of our arrangements with our customers. Consequently, there is an inherent risk that we may inadvertently fail to comply with such regulations, which could lead to forced shutdowns and other sanctions imposed by the relevant authorities, as well as the withholding or delay in receipt of regulatory approvals for our new products, which may adversely impact our business, results of operations and financial condition.

25. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

26. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of the end product before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Further, one of the objects of this Issue includes funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see "*Objects of the Issue*" on page 53. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we take provisions for bad debts, including those arising from such defaults based primarily on ageing and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have

large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

- 27. We are dependent on information technology systems in carrying out our business activities and it forms an integral part of our business. Further, if we are unable to adapt to technological changes and successfully implement new technologies or if we face failure of our information technology systems, we may not be able to compete effectively which may result in higher costs and would adversely affect our business and results of operations.***

We are dependent on information technology system in connection with carrying out our business activities and such systems form an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations. Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks. In the event, any breach of our systems or software leads to the leaking of our trade secrets or any inventive techniques devised by our Company, it might lead to loss of our originality in the market and increase the chance of our products being substituted by the products of our competitors.

Our future success depends in part of our ability to respond to technological advancements and emerging standards and practices on a cost-effective and a timely basis. Our failure to successfully adopt such technologies in a cost-effective manner could increase our costs thereby compelling us to bid at lower margins which might lead to loss of bidding opportunities vis-à-vis such competitors. Additionally, the government authorities may require adherence with certain technologies and we cannot assure you that we would be able to implement such technologies in a timely manner or at all. The cost of upgrading or implementing new technologies or upgrading our existing equipment or expanding our capacity could be significant, less cost effective and therefore could negatively impact our profitability, results of operations, financial condition as well as our future prospects.

- 28. We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.***

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the advancement of research and development in the chemical industry, changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company may not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which could have an adverse effect on our business, results of operations and financial condition.

29. *If our Company is unable to protect its intellectual property, or if our Company infringes on the intellectual property rights of others, our business may be adversely affected.*

Our Company is currently using logo is not yet registered in the name of our Company. If we are unable to get the same registered with the trademark authorities then, our Company may not be able to successfully enforce or protect our intellectual property rights and obtain statutory protections available under the Trademarks Act, 1999, as otherwise available for registered trademarks in future could have a material adverse effect on our business and goodwill, which in turn could adversely affect our results of operations.

There can be no assurance that third parties will not infringe upon our intellectual property, causing damage to our business prospects, reputation and goodwill. Our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming and costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which could adversely affect our business, results of operations and financial condition.

30. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Director and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

31. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

Upon completion of this Issue, our Promoters and members of our Promoter Group will collectively hold [●]% of the Equity share capital of our Company. As a result, our Promoters will have the ability to exercise significant influence over all matters requiring shareholders' approval. Accordingly, our Promoters will continue to retain significant control, including being able to control the composition of our Board of Directors, determine decisions requiring simple or special majority voting of shareholders, undertaking sale of all or substantially all of our assets, timing and distribution of dividends and termination of appointment of our officers, and our other shareholders may be unable to affect the outcome of such voting. There can be no assurance that our Promoters will exercise their rights as shareholders to the benefit and best interests of our Company. Further, such control could delay, defer or prevent a change in control of our Company, impede a merger, consolidation, takeover or other business combination involving our Company, or discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company even if it is in our Company's best interest. The interests of our Promoters could conflict with the interests of our other equity shareholders, and our Promoters could make decisions that materially and adversely affect your investment in the Equity Shares.

32. *The average cost of acquisition of Equity Shares held by our Promoters could be lower than the Issue Price.*

Our Promoters' average cost of acquisition of Equity Shares in our Company may be lower than the Issue Price which is proposed to be determined on a fixed price basis. For further details regarding average cost of acquisition of Equity Shares by our Promoters in our Company and build-up of Equity Shares by our Promoters in our Company, please refer to the chapter titled "*Capital Structure*" on page 50 of this Draft Letter of Offer.

33. *We are exposed to foreign currency exchange rate fluctuations, which may impact our results of operations and cause our results to fluctuate. Our inability to manage our foreign currency risk may harm our results of operations and cause our results to fluctuate and/or decline.*

Our financial statements are presented in Indian Rupees. However, our revenue and expenses are influenced by the currency of foreign countries. At present, our Company operates within the states of Gujarat and Maharashtra, with a

keen emphasis on importing diverse goods from Dubai. Further, due to the time gap between the accounting of purchases and actual payments, the foreign exchange rate at which the purchase is recorded in the books of accounts may vary with the foreign exchange rate at which the payment is made, thereby benefiting or affecting us, depending on the appreciation or depreciation of Rupee as compared to the foreign currency. We may, therefore, be exposed to risks arising from exchange rate fluctuations, suffer losses on account of foreign currency fluctuations for our material procurement and/or payments received and we may not be able to pass on all losses on account of foreign currency fluctuations to our customers. As on date of this Draft Letter of Offer, we do not have any hedging policy to mitigate the losses on account of foreign currency fluctuations. There is no guarantee that we may be able to manage our foreign currency risk effectively or mitigate exchange exposures, at all times and our inability may harm our results of operations and cause our results to fluctuate and/or decline.

34. *Our future fund requirements, in the form of further Issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further Issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favorable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

35. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of March 31, 2024, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please refer to the chapter titled — “*Restated Financial Information*” at page 100.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favorable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

36. *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. Further, we have not identified any alternate source of financing the ‘Objects of the Issue’. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.*

As on date, we have not made any alternate arrangements for meeting our capital requirements for the Objects of the Issue. We meet our capital requirements through our bank finance, unsecured loans, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further, we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Issue or any shortfall in the Issue proceeds may delay the implementation schedule and could adversely affect our growth plans. For further details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 53 of this Draft Letter of Offer.

37. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company’s future significantly depends upon the experience of our Promoters and continued services and the management skills of our Key Managerial Personnel and the guidance of our Promoters and Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial

condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — “*Our Management*” on page 86 of this Draft Letter of Offer.

38. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could adversely affect our results of operations and financial position.

39. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future also. For further details, please refer to the chapter titled “*Dividend Policy*” on page 99 of this Draft Letter of Offer.

40. *Increased losses due to fraud, employee negligence, theft or similar incidents may have an adverse impact on us.*

Our business and the industry in which we operate are vulnerable to the problem of pilferage by employees, damage, misappropriation of cash and inventory management and logistical errors. An increase in product losses due to such factors at our place of operation may require us to install additional security and surveillance equipment and incur additional expenses towards inventory management and handling. We cannot assure you whether these measures will successfully prevent such losses. Further, there are inherent risks in cash management as part of our operations, which include theft and robbery, employee fraud and the risks involved in transferring cash to banks. Additionally, in case of losses due to theft, financial misappropriation, fire, breakage or damage caused by other casualties, we cannot assure you that we will be able to recover from our insurers the full amount of any such loss in a timely manner, or at all. In addition, if we file claims under an insurance policy it could lead to increases in the insurance premiums payable by us or the termination of coverage under the relevant policy.

41. *We have not independently verified certain data in this Draft Letter of Offer.*

We have not independently verified data from the Industry and related data contained in this Draft Letter of Offer. Such data may also be produced on a different basis from comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Due to incorrect or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

42. *There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.*

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the securities markets elsewhere in the world.

43. *The price of the Equity Shares may be highly volatile after the Issue.*

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including, volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the our industry; adverse media reports on us or the industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

44. *Any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Letter of Issue would be subject to certain compliance requirements, including prior shareholders' approval.*

Our Company intends to use the Net Proceeds towards funding of working capital requirements and repayment of unsecured borrowings. Our Board will have flexibility in temporarily investing the Net Proceeds as well as its inter se allocation across various heads, as disclosed in the section titled "*Objects of the Issue*" on page 53.

In case of any exigencies arising out of business conditions, economic conditions, competition or other factors beyond our control which adversely affect our business, we may require to use the Net Proceeds to meet any other expenditure or fund which expenditure cannot be determined with certainty as on the date of this Draft Letter of Offer. In terms of Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Net Proceeds or in the terms of any contract as disclosed in the Draft Letter of Offer without obtaining the shareholders' approval through a special resolution. In the event of any such circumstances requiring us to undertake variation in the utilisation of the Net Proceeds disclosed in the Draft Letter of Offer, we cannot assure that we will be able to obtain the shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters would be required to provide an exit opportunity to the shareholders who do not agree with our proposal to change the objects of the Issue. Additionally, the requirement on Promoters to provide an exit opportunity to such dissenting shareholders may deter the Promoters from agreeing to the variation of the proposed utilisation of the Net Proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Issue to use any unutilized proceeds of the Fresh Issue, if any, or vary the terms of any contract referred to in the Draft Letter of Offer, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilised portion of Net Proceeds, if any, which may adversely affect our business and results of operations.

45. *The price of the Equity Shares may be volatile, which could result in substantial losses for investors acquiring the Equity Shares in the Issue.*

The market price of the Equity Shares may be volatile and could fluctuate significantly and rapidly in response to, among others, the following factors, some of which are beyond our control:

- volatility in the Indian and global securities market or in the value of the Rupee relative to the U.S. Dollar, the Euro and other foreign currencies;
- our profitability and performance;
- changes in financial analysts' estimates of our performance or recommendations;
- perceptions about our future performance or the performance of Indian companies in general;
- significant developments in India's economic liberalisation and deregulation policies;
- significant developments in India's fiscal and environmental regulations;
- economic developments in India and in other countries; and
- any other political or economic factors.

These fluctuations may be exaggerated if the trading volume of the Equity Shares is low. Volatility in the price of the Equity Shares may be unrelated or disproportionate to our results of operations. It may be difficult to assess our performance against either domestic or international benchmarks.

Indian stock exchanges, including the Stock Exchanges, have experienced substantial fluctuations in the prices of listed securities and problems such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. The governing bodies of Indian stock exchanges have also, from time to time, imposed restrictions on trading in certain securities, limitations on price movements and margin requirements. Further, disputes have occurred between listed companies, stock exchanges and other regulatory bodies, which in some cases may have had a negative effect on market sentiment. If such or similar problems were to continue or recur, they could affect the market price and liquidity of the securities of Indian companies, including the Equity Shares.

- 46. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.***

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through further issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

- 47. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.***

Any instance of disinvestments of Equity Shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sale of Equity Shares might occur.

- 48. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.***

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights including in relation to class actions, under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

ISSUE SPECIFIC RISKS

- 49. *We will not distribute this Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.***

In accordance with the SEBI ICDR Regulations and SEBI Master Circular our Company will send, only through email, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

- 50. *SEBI has recently, by way of SEBI Master Circular, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI Master Circular and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 142 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Master Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned / reversed / failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

51. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.*

In accordance with the circular SEBI Master Circular, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 03, 2018 issued by the SEBI, with effect from April 01, 2019, a transfer of listed Equity Shares cannot be processed unless the Equity Shares are held in dematerialized form. For details, please refer chapter “*Terms of the Issue*” on page 142 of this Draft Letter of Offer.

52. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 142 of this Draft Letter of Offer.

53. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

54. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

55. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

56. *Investors will be subject to market risks until the Equity Shares credited to the investors demat account are listed and permitted to trade.*

Investors can start trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

57. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

58. *The trading price of our Equity Shares may be subject to volatility and you may not be able to sell your Equity Shares at or above the Issue Price.*

The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our Equity Shares.

59. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

60. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely affect the value of our Equity Shares, independent of our operating results.*

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

61. *Investors will not have the option of getting the allotment of Equity Shares in physical form.*

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see “*Terms of the Issue*” on page 142 of this Draft Letter of Offer. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

62. *There is no guarantee that our Equity Shares will be listed, or continue to be listed, on the Indian stock exchanges in a timely manner, or at all, and prospective investors will not be able to immediately sell their Equity Shares on the Stock Exchange.*

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be applied for or granted until after our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. Accordingly, there could be a failure or delay in listing our Equity Shares on the Stock Exchange, which would adversely affect your ability to sell our Equity Shares.

63. *Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.*

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

64. *Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.*

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

65. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our summary statements of assets and liabilities and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity, as per the Financial Statements, have been prepared in accordance with the Ind GAAP notified under the Companies Act, 2013, read with the applicable Rules, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of Ind AS, US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of Ind AS, US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader’s level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

66. Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors’ reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders’ equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

67. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India’s principal stock exchanges;
- variations in exchange rates;
- changes in India’s tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India’s various neighboring countries;

- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

68. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“**ICDS**”), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules (“**GAAR**”) have been made effective from April 01, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 01, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

69. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors’ reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause

increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition. The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange's indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

70. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

71. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

72. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

73. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2023, pursuant to which the Finance Bill 2023 (defined below) has proposed various amendments. The Finance Bill, 2023 became the Finance Act, 2023 March 31, 2023 and has come into effect with effect from April 01, 2023. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as "gig workers" and "platform workers" and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

74. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

75. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors' reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

SECTION IV – ABOUT THE COMPANY

INDUSTRY OVERVIEW

GLOBAL ECONOMY

More than three years after the global economy suffered the largest shock of the past 75 years, the wounds are still healing, amid widening growth divergences across regions. After a strong initial rebound from the depths of the COVID-19 pandemic, the pace of recovery has moderated. Several forces are holding back the recovery. Some reflect the long-term consequences of the pandemic, Russia's war in Ukraine, and increasing geoeconomic fragmentation. Others are more cyclical, including the effects of monetary policy tightening necessary to reduce inflation, withdrawal of fiscal support amid high debt, and extreme weather events. Despite signs of economic resilience earlier this year and progress in reducing headline inflation, economic activity is still generally falling short of pre-pandemic (January 2020) projections, especially in emerging market and developing economies.

The strongest recovery among major economies has been in the United States, where GDP in 2023 is estimated to exceed its pre-pandemic path. The euro area has recovered, though less strongly—with output still 2.2 percent below pre-pandemic projections, reflecting greater exposure to the war in Ukraine and the associated adverse terms-of-trade shock, as well as a spike in imported energy prices. In China, the pandemic-related slowdown in 2022 and the property sector crisis contribute to the larger output losses of about 4.2 percent, compared with pre-pandemic predictions. Other emerging market and developing economies have seen even weaker recoveries, especially low-income countries, where output losses average more than 6.5 percent. Higher interest rates and depreciated currencies have exacerbated the difficulties of low-income countries, placing more than half either at high risk of distress or already in distress. Overall, global output for 2023 is estimated at 3.4 percent (or about \$3.6 trillion in 2023 prices) below pre-pandemic projections. Private consumption has also recovered faster in advanced economies than in emerging market and developing economies, owing to an earlier reopening in the former group facilitated by greater availability of effective vaccines, stronger safety nets, more ample policy stimulus, and greater feasibility of remote work. These factors supported livelihoods during the pandemic, and household consumption is now broadly back to pre-pandemic trends. Among advanced economies, private consumption has been stronger in the United States than in the euro area, with households receiving larger fiscal transfers early in the pandemic and spending the associated savings more quickly; being better insulated from the rise in energy prices resulting from the war in Ukraine; and feeling relatively confident amid historically tight US labor markets, which have supported real disposable incomes.

Among emerging market and developing economies, the consumption shortfall is particularly large in China, reflecting tight restrictions on mobility during the COVID-19 crisis. Divergences in labour market performance across regions broadly mirror those for output and consumption. Employment and labour participation rates are estimated to exceed pre-pandemic trends in advanced economies but to remain significantly below them in emerging market and developing economies, reflecting more severe output losses and much weaker social protection. Countries that had the most limited fiscal space are also those where employment shortfalls are the largest (ILO 2023). Among advanced economies, the euro area has seen larger employment gains than the United States. This may reflect more extensive use in the former of worker-retention programs modelled on the German Kurzarbeit short-time work scheme (IMF 2020), which protect workers' income and allow businesses to retain firm-specific human capital, reducing the costly process of separation, rehiring, and training. In the euro area, these programs bolstered employment during the most challenging phases of the crisis and accelerated the recovery when economies reopened.

Investment, on the other hand, has uniformly fallen short of pre-pandemic trends across regions. Businesses have shown less enthusiasm for expansion and risk taking amid rising interest rates, withdrawal of fiscal support, dimmer prospects for product demand, stricter lending conditions, and growing uncertainties regarding geoeconomic fragmentation. Higher leverage has further dampened investment which remains 3 percent to 10 percent lower across regions than had been projected before the pandemic. Moreover, the pandemic, war in Ukraine, and worsening climate shocks have contributed to a reversal in decades-long poverty reduction trends. According to World Bank staff estimates, 75 million to 95 million more people were living in extreme poverty in 2022 compared with pre-pandemic estimates. Spikes in food prices and related insecurities following Russia's invasion of Ukraine, as well as bouts of extreme weather, have accentuated these difficulties. The global average temperature in July 2023 was the highest on record for any month, amid reports of catastrophic flooding, heat waves, and wildfires in many regions. Overall, the global prevalence of undernourishment is significantly higher than before the pandemic.

Source: Global recovery remains slow, with growing regional divergences and little margin for policy error

OVERVIEW OF THE INDIAN ECONOMY

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

Real GDP or GDP at Constant (2011-12) Prices in the year 2023-24 is estimated at Rs. 172.90 lakh crores (US\$ 2.07 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 160.71 lakh crores (US\$ 1.92 trillion). The growth in real GDP during 2023-24 is estimated at 7.6% as compared to 7.0% in 2022-23. There are 113 unicorn startups in India, with a combined valuation of over US\$ 350 billion. As many as 14 tech startups are expected to list in 2024 Fintech sector poised to generate the largest number of future unicorns in India. With India presently has the third-largest unicorn base in the world. The government is also focusing on renewable sources by achieving 40% of its energy from non-fossil sources by 2030. India is committed to achieving the country's ambition of Net Zero Emissions by 2070 through a five-pronged strategy, 'Panchamrit'. Moreover, India ranked 3rd in the renewable energy country attractive index.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 to 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between same time period. India's current account deficit (CAD) narrowed to 1.2% of GDP in the October-December quarter. The CAD stood at US\$ 10.5 billion for the third quarter of 2023-24 compared to US\$ 11.4 billion or 1.3% of GDP in the preceding quarter. This was largely due to higher service exports.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles Mr. Piyush Goyal, Indian exports are expected to reach US\$ 1 trillion by 2030.

Road Ahead

In the second quarter of FY24, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2023. India's comparatively strong position in the external sector reflects the country's positive outlook for economic growth and rising employment rates. India ranked 5th in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in 2023-24, stood 37.4% higher than the same period last year. In the budget of 2023-24, capital expenditure took lead by steeply increasing the capital expenditure outlay by 37.4 % in BE 2023-24 to Rs.10 lakh crore (US\$ 120.12 billion) over Rs. 7.28 lakh crore (US\$ 87.45 billion) in RE 2022-23. The ratio of revenue expenditure to capital outlay increased by 1.2% in the current year, signalling a clear change in favour of higher-quality spending. Stronger revenue generation because of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels. In February 2024, the Finance Ministry announced the total expenditure in Interim 2024-25 estimated at Rs. 47,65,768 crore (US\$ 571.64 billion) of which total capital expenditure is Rs. 11,11,111 crore (US\$ 133.27 billion).

Since India's resilient growth despite the global pandemic, India's exports climbed at the second-highest rate with a year-over-year (YoY) growth of 8.39% in merchandise exports and a 29.82% growth in service exports till April 2023.

With a reduction in port congestion, supply networks are being restored. The CPI-C inflation reduction from June 2022 already reflects the impact. In September 2023 (Provisional), CPI-C inflation was 5.02%, down from 7.01% in June 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

OVERVIEW OF THE CHEMICALS INDUSTRY IN INDIA

India’s chemical industry is extremely diversified and can be broadly classified into bulk chemicals, specialty chemicals, agrochemicals, petrochemicals, polymers, and fertilisers. India is the 6th largest producer of chemicals in the world and 3rd in Asia, contributing 7% to India’s GDP. India's chemical sector, which is currently estimated to be worth US\$ 220 billion in 2022 and is anticipated to grow to US\$ 300 billion by 2025 and US\$ 1 trillion by 2040.

Globally, India is the fourth-largest producer of agrochemicals after the United States, Japan and China. India accounts for 16-18% of the world production of dyestuffs and dye intermediates. As per Chemexcil (Chemicals Export Promotion Council), India’s agrochemicals export was estimated to be at US\$ 1.04 billion from April 2023-June 2023 (Provisional). Indian colorants industry has emerged as a key player with a global market share of ~15%. The country’s chemicals industry is de-licensed, except for few hazardous chemicals. India has traditionally been a world leader in generics and biosimilars and a major Indian vaccine manufacturer, contributing more than 50% of the global vaccine supply. India holds a strong position in exports and imports of chemicals at a global level and ranks 14th in exports and 8th in imports at global level (excluding pharmaceuticals). From April 2023 to June 2023 (provisional), India's dye exports (Dyes and Dye Intermediates) totaled US\$ 561.56 million.

The domestic chemicals sector's small and medium enterprises are expected to showcase 18-23% revenue growth in FY22, owing to an improvement in domestic demand and higher realisation due to high prices of chemicals. Domestic demand is expected to rise from US\$ 170 billion-US\$ 180 billion in 2021 to US\$ 850 billion-US\$ 1,000 billion by 2040.

The Indian chemicals industry stood at US\$ 178 billion in 2019 and is expected to reach US\$ 304 billion by 2025 registering a CAGR of 9.3%. The demand for chemicals is expected to expand by 9% per annum by 2025. The chemical industry is expected to contribute US\$ 383 billion to India’s GDP by 2030.

India has traditionally been a world leader in generics and biosimilars and major Indian vaccine manufacturers, contributing more than 50% of the global vaccine supply. Chemicals and petrochemicals demand in India is expected to nearly triple and reach US\$ 1 trillion by 2040.

An investment of Rs. 8 lakh crore (US\$ 107.38 billion) is estimated in the Indian chemicals and petrochemicals sector by 2025. The specialty chemicals constitute 22% of the total chemicals and petrochemicals market in India. The demand for specialty chemicals is expected to rise at a 12% CAGR in 2019-22.

The Department of Chemicals & Petrochemicals intend to bring PLI in chemical & petrochemical sector and will redraft the Petroleum, Chemicals and Petrochemicals Investment Region (PCPIR) guidelines.

Indian manufacturers have recorded a CAGR of 11% in revenue between FY15 and FY21, increasing India’s share in

the global specialty chemicals market to 4% from 3%, according to the Crisil report. A revival in domestic demand and robust exports will spur a 50% YoY increase in the CAPEX of specialty chemicals manufacturers in FY22 to Rs. 6,000-6,200 crore (US\$ 815-842 million). Revenue growth is likely to be 19-20% YoY in FY22, up from 9-10% in FY21, driven by recovery in domestic demand and higher realisations owing to rising crude oil prices and better exports.

Moreover, according to the CRISIL report, the specialty chemicals market in India would grow faster than China, increasing its market share to 6% by 2026 from 3-4% in fiscal 2021. A shift in the global supply chain brought on by the China+1 strategy and a resurgence in domestic end-user demand will fuel significant revenue growth of 18–20% in 2022 and 14–15% in 2023.

India is in a unique position to benefit from the shift away from China owing to competitive cost advantage and incentivized government policies and reforms (such as allowing 100% FDI in chemicals). For instance a global specialty player in 2021, formed a JV with an Indian glycols player and plans to invest in ethylene oxide derivatives. China's production capacity in agrochemicals is limited, proving beneficial for Indian players as they expand capacities (an Indian agrochemical company and an intermediates player are expanding production capacities).

India is already a net exporter of specialty chemicals owing to low-cost manufacturing capabilities, strong standards of environmental compliance and an increased number of products meeting the globally acceptable registration requirements, such as REACH. However, the country still has import substitution potential due to the net import nature of sectors such as dyes and pigments, along with certain polymers (acrylic)

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND RESULTS OF OPERATIONS

OVERVIEW OF OUR BUSINESS

Our Company has a long-standing history of trading of Ethylene Oxide (EO) based derivatives since inception in 1993 till 2010. Post-2010, our Company diversified into packaging the products traded by us in plastic-related products such as LDPE and HDPE plastic bags, complying with government regulations. Additionally, we expanded our trading operations to include a variety of products such as Rubber Processed Oil (RPO), Furnace Oil, Petrochemicals, Solar products, LDPE/HDPE granules, and various allied products. Our Company has successfully sustained its business operations, even as many of our competitors have ceased to exist. This resilience is largely due to our strategic diversification of the product range we trade. At the core of our business philosophy is the commitment to building and maintaining robust relationships with our customers, which we believe is essential for long-term success. Ensuring customer satisfaction, fostering loyalty, and actively seeking feedback are integral aspects of our strategy.

In addition to trading of Ethylene Oxide (EO) based derivatives, we also package the products traded by us in LDPE and HDPE plastic bags in our manufacturing unit based on the requirement of our customers and in accordance with the government norms. Our packaging services provide our customers with an added advantage of safe delivery of products and storage in their warehouses in a safe and compliant manner.

We cater to a broad spectrum of industries nationwide, supplying petrochemical products to esteemed clients such as Aditya International and Biozor Energy Pvt. Ltd. in western India and expanding our services to companies in northern India. Our diverse product portfolio is designed to meet the varied needs and demands of our clients, ensuring we can provide tailored solutions to different market segments. Our primary focus is on supplying chemical products and bio-fuels to the infrastructure sector, niche industries like upstream hydrocarbon exploration, and export-oriented industries to meet the ever-growing demand. The company benefits from the extensive experience of its Managing Director, Mr. J. K. Chaturvedi, in the chemical and petrochemical industries, contributing to its consistent performance.

At present, our Company operates within the states of Gujarat and Maharashtra, with a keen emphasis on importing diverse goods from Dubai. This strategic choice facilitates efficient logistics management for our operations. Furthermore, the concentration of major petrochemical companies such as OPAL, RIL, GNFC, and GSFC in Gujarat and Maharashtra enhances the viability of our operations in these regions. Through the identification of reputable companies in Dubai capable of supplying high-quality products to India, we have established strategic logistics arrangements with M/S. Tulsi Logistics. This ensures the seamless transportation of materials from their point of origin to our warehouse, facilitating efficient distribution to our customers, predominantly located in Western India, particularly Gujarat and Maharashtra. This strategic approach capitalizes on the presence of significant traders and industries in the region who seek readily available products stocked in warehouses

Additionally, the presence of significant chemical and petrochemical companies in areas like Baroda, Dahej, Hazira, Ankleshwar, Vapi, and Nagothane further supports our connectivity within the industry. Our established offices in Baroda and Andheri at Mumbai, ensure convenient access to these key players, as many of them are headquartered in these regions.

In terms of client engagement, our focus centers on infrastructure development by supplying bitumen and its various derivatives. This strategic approach aims to augment value within the plastics industry by offering a comprehensive range of polymers.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.

Our Company is not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Letter of Offer.
