

Rossell Techsys Receives Order from Boeing for Manufacturing of Wire Harnesses

Rossell India is pleased to announce the receipt of an order from Boeing for wire harness manufacturing for the company's F/A-18 Super Hornet fighter jet.

"We are proud of the confidence shown in our company strategy by a customer like Boeing," said Mr Rishab Gupta, Executive Vice President of Rossell India Limited. "Right from the time we started our first interactions with Boeing, we were unwavering on the company strategy – and that was to offer a strong value proposition for long-term partnerships, built on proactive investments, global standard infrastructure, a process-driven culture and a high calibre staff."

From offering our customers state-of-the-art infrastructure, to having a highly committed, capable and capacious workforce, to establishing optimal and efficient processes, to safeguarding precious intellectual property, our vision is to offer foreign customers a similar experience to home ground and one which is seamless and fully integrated, says Mr Gupta.

The aerospace division has concentrated on three key competencies of interest to foreign OEMs. These competencies are (a) Automated Test Equipment (ATEs) (b) Wire Harness Engineering and Loom fabrication and (c) Avionic product support services. The investment made in this division over the last few years has begun to yield encouraging results. Rossell Techsys has also signed MoU's with many other foreign OEMs in the aerospace domain and continues to see increased traction in its competency areas. The stage has been set for a quantum growth within the next few years. Rossell Techsys shall continue to invest proactively to enhance the Indian execution experience of foreign OEMs in aerospace.

Rossell Techsys is the aerospace engineering and manufacturing division of Rossell India Limited and is located in Whitefield, Bangalore. It boasts of a state-of-the-art engineering and manufacturing facility and a suite of accreditations, certifications and memberships. Rossell Techsys is AS9100 Rev C, ISO-9001, ISO-27001 certified and CEMILAC accredited and is a member of RTCA and IPC. ISO 14001 certification is on the anvil.
