PRESS NOTE

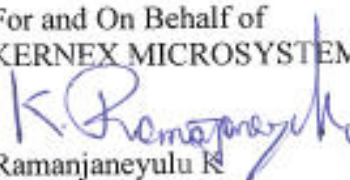

Kernex Microsystems is pleased to announce for the benefit of its Promoters, and Share Holders and general public that your company has won a R&D contract for development of Train Collision Avoidance System (TCAS), one of the two companies selected by Research, Designs and Standard Organization of Indian Railways (RDSO), Lucknow, on behalf of Railway Board, while competing with eight contenders, including a few multi-national companies.

The product TCAS, is required to be conforming to SIL-4 level Railway product and CENELEC specifications.

This development aims at manufacturing of TCAS devices, Application Software and Communication Protocols and Interoperability with other vendors and carrying out trials in SC Railways between Vikarabad – Bidar section and is to be completed in about eight months time, that is, by February 2014.

Kernex is expected to complete the project on time and assume a leading role in this venture, which might culminate in obtaining RDSO's approvals and supplying the product to Zonal Railways, as part of deployment all over Indian Railways.
