

PRESS RELEASE

Sanofi India to use renewable energy for its Ankleshwar manufacturing site

- Signs a 2.1 MW project with Suzlon Group -

Mumbai, August 05, 2013 - Sanofi India Limited announced today that it has signed an agreement with India's largest wind turbine manufacturer, Suzlon Energy Limited (SEL), for a 2.1 MW (megawatt) offsite windmill installation, to generate renewable power for captive consumption at its Ankleshwar manufacturing site.

Present in India since 1956, Sanofi is one of few healthcare companies in the country exploring the use of renewable energy sources for its manufacturing operations. In 2012, Sanofi's Goa manufacturing site demonstrated the utilization of biomass from agro waste to generate energy. In addition to creating employment for local villagers, the biomass project helped reduce the site's steam cost as well as its dependence on fossil fuel.

"As a global healthcare leader, Sanofi believes that reducing our carbon footprint and using energy responsibly are part of our mission to help protect life on this planet. We strongly support the use of renewable energies, and hence initiated a study in 2012 to better understand the local renewable energy market in India to identify available opportunities", said Dr. Shailesh Ayyangar, Managing Director-India and Vice-President South Asia. *"We are very pleased to partner with Suzlon to explore the use of wind energy, which is today India's fastest growing renewable energy source."*

The manufacturing site at Ankleshwar - one of Sanofi's three GMP (Good Manufacturing Practices) compliant state-of-the-art manufacturing sites in India - produces solid dose formulations and Active Pharma Ingredients (API). Between its two facilities at Goa and Ankleshwar, Sanofi has the capacity to manufacture 8.5 billion tablets annually.

"We are pleased to partner with Sanofi, which is one of India's leading healthcare companies. In times when the future of our planet is being discussed on various forums, it is extremely encouraging to see businesses taking proactive steps to offset their carbon emissions. We look forward to building a successful wind power project with Sanofi", said Mr. Tulsi Tanti, Chairman, Suzlon Group.

About Sanofi

Sanofi, an integrated global healthcare leader, discovers, develops and distributes therapeutic solutions focused on patients' needs. Sanofi has core strengths in the field of healthcare with seven growth platforms: diabetes solutions, human vaccines, innovative drugs, consumer

healthcare, emerging markets, animal health and the new Genzyme. Sanofi is listed in Paris (EURONEXT: SAN) and in New York (NYSE: SNY).

In India, Sanofi operates through five entities - Sanofi India Limited, Sanofi-Synthelabo (India) Limited, Sanofi Pasteur India Private Limited, Shantha Biotechnics Limited and Genzyme India Private Limited.

About Suzlon Group

The Suzlon Group is ranked as the world's fifth largest* wind turbine supplier, in terms of cumulative installed capacity and marketshare, at the end of 2012. The company's global spread extends across Asia, Australia, Europe, Africa and North and South America with over 22,500 MW of wind energy capacity installed, operations across 32 countries. The Group offers one of the most comprehensive product portfolios - ranging from sub-megawatt onshore turbines at 600 Kilowatts (KW), to the world's largest commercially-available offshore turbine at 6.15 MW - with a vertically integrated, low-cost, manufacturing base. The Group - headquartered at Suzlon One Earth in Pune, India - comprises Suzlon Energy Limited and its subsidiaries, including REpower Systems SE. Visit us at www.suzlon.com
