AURIONPRO EARNS SOC2 TYPE 1 CERTIFICATION

Demonstrates ongoing commitment to maintaining the highest levels of information security, availability, and integrity

January 8, 2014 – Mumbai, India (Marketwire)

Aurionpro is pleased to announce that its Pune, India Software Delivery Center, which provides leading Information Security, Enterprise Portal, Content Management, and SOA-based software development and consulting services, has earned SOC2 Type 1 Certification.

Independent auditors carried out the assessment and awarded the designation. This external validation demonstrates Aurionpro's ongoing commitment to maintaining the highest level of information security, availability, and integrity, and builds on the Pune Software Delivery Center's previous SSAE16 Type II Information Security designation.

SOC2 Certification indicates that Aurionpro complies with a comprehensive set of criteria known as the Trust Services Principles (TSP), which include guidelines pertaining to the security, availability, and processing integrity of a service organization's systems, as well as the confidentiality and privacy of the information that a service organization's systems process or maintain.

"By earning SOC2 Certification, we have demonstrated not only that security controls are defined, but that those controls are being effectively applied throughout our organization," said Nirav Shah, Aurionpro's EVP of Global Delivery. "Successful completion of this process shows our customers that Aurionpro takes the security surrounding our development and operational systems very seriously. It also makes it easier for us to assist our customers with their internal audit and compliance initiatives surrounding sensitive health information, financial data, and other confidential information."

About SOC2

The SOC2 framework is part of the new Service Organization Control (SOC) reporting platform developed by the American Institute of Certified Public Accountants (AICPA) in order to modernize reporting on service organizations and align with globally accepted accounting principles. Type 1 is a report on management's description of a service organization's systems and the suitability of the design of controls.
