

Intimation to stock exchange:

We would like to inform that we are planning to launch "**Nippo Home UPS & Tubular Battery**" on pilot study basis in Tamil Nadu, Andhra Pradesh and Telungana. Beginning of next week, our new products will be available in the dealer outlets, along with an active toll free number for services.

The Company is going to launch the Nippo Home UPS & Tubular Battery on Friday the 19th day of December 2014 with a small conference in presence of print & electronic media at Chennai Tamil Nadu.

Features of the Product: Our Home UPS feature micro digital feedback technology with two modes of efficient charging – Normal & Quick charging. With a superior design of protection for overload, short-circuit, overcharge and deep discharge, our Home UPS product is built to last. It also regulates output voltage and frequency, to ensure the home appliances are protected. Our battery is of tall tubular technology, designed to withstand long and frequent power cuts with minimum maintenance.
