Solix Enterprise Data Management Suite Achieves Oracle Validated Integration with Oracle E-Business Suite 12.2

Santa Clara, CA, June 23, 2014: Solix Technologies, Inc., a Gold level member of Oracle Partner Network (OPN), today announced it has achieved Oracle Validated Integration of Solix Enterprise Data Management Suite (EDMS) 6.1 with Oracle E-Business Suite 12.2.

Solix EDMS provides a comprehensive solution to address data growth and data governance challenges faced by customers by giving IT control over vital structured data through consistent enforcement of business rules across the enterprise.

To achieve Oracle Validated Integration, Oracle partners are required to meet a stringent set of requirements that are based on the needs and priorities of the customers. Solix EDMS integrates with Oracle E-Business Suite 12.2 to relocate less frequently used historical data to an active archive which is fully accessible to end users.

"Solix Enterprise Data Management Suite is the key to effective data management," said John Ottman, Executive Chairman of Solix. "Oracle Validated Integration is a table stake for Solix, as our customers operate some of the most demanding ERP environments in the world."

"Achieving Oracle Validated Integration gives our customers confidence that the integration between Solix Enterprise Data Management Suite 6.1 and Oracle E-Business Suite 12.2 is functionally sound and performs as tested," said Kevin O'Brien, senior director, ISV and SaaS Strategy, Oracle. "For solutions deployed on-premise, in the cloud, or both, Oracle Validated Integration applies a rigorous technical review and test process that helps to reduce deployment risk and improves the user experience of the partner's integrated offering."

Solix EDMS:

- Classifies and tiers structured data, enabling increased operational efficiencies
- Archives to a separate database or other archive store for easy end user access
- Maintains referential integrity and helps ensure that only complete business objects are archived
- Supports functionalities such as integrated patch synchronization and space reclamation from a unified admin console

About Oracle Validated Integration

Oracle Validated Integration, available through the Oracle PartnerNetwork (OPN), gives customers confidence that the integration of complementary partner software products with Oracle Applications and specific Oracle Fusion Middleware solutions have been validated, and the products work together as designed. This can help customers reduce risk, improve system implementation cycles, and provide for smoother upgrades and simpler maintenance. Oracle Validated Integration applies a rigorous technical process to review partner integrations. Partners who have successfully completed the program are authorized to use the "Oracle Validated Integration" logo. About Oracle Partner Network

Oracle Partner Network (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit http://www.oracle.com/partners.
