

PRESS RELEASE

BEML LAUNCHES NEW VERSION OF MOTOR GRADER FOR CONSTRUCTION SECTOR

BEML LIMITED, the premier manufacturer of heavy earth moving equipment for Mining & Constructions Sectors, has indigenously developed and launched BG405A Motor grader BS III compliant Engine with net Horse Power of 119HP and is certified by ARAI for deployment in the Infrastructure/Construction sector.

BG405A is designed with articulated boom and has a compact wheel base with 10 feet blade and has turning circle radius of 6.5 meter, specially suitable for road construction projects in rough terrains.

The Equipment is provided with joy stick for ease of operation which reduces operator fatigue. The Equipment is fitted with accumulator assisted all hydraulic braking which ensures fast response while working under demanding conditions. The ergonomically designed cabin has improved operator comfort, wider visibility & safety, fully programmable digital display system with a 7 inch LCD screen provided for improved diagnostics that enhances diagnostic capability. Canopy option is also available.

The silent features of the equipment are :

- ❖ Equipped with Bharat Stage III emission compliant Engine,
- ❖ Cabin with excellent operator comfort and visibility.
- ❖ All in one LCD Murphy instrument gauge with Operator interface.
- ❖ Aesthetically designed hood with improved maintenance access.
- ❖ Ensures safety by providing back up light & alarm.
- ❖ Scarifier is provided as standard attachment.
- ❖ Improved serviceability and accessibility.

With the launch of BG405A Motor Grader, BEML is fulfilling the need of Construction & Infrastructure sectors in their endeavours.
